*Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

†For the week ended October 1, 1937.

(1) Calculated from yields of Ontario bonds. (2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations. (4) Figures for end of previous month.

(5) Figures for four weeks ending September 25, 1937, and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending September 11, August 14 and July 17, 1937; September 5, August 8, and July 11, 1936. (7) MacLean's Building Review. (8) Index numbers are adjusted when necessary for seasonal variation. (9) Subject to revision.

exception of the index of exports, which was lower. Information available for September shows advance in employment and in the number of revenue freight cars loaded, both as compared with the previous month and with September, 1936, while contracts awarded and wholesale prices were lower than in the previous month but higher than in September, 1936.

Strikes and Lockouts.—The number of strikes and lockouts recorded for September was thirty-four, involving 7,007 workers and resulting in a time loss of 44,378 man working days, as compared with thirty-nine disputes in August involving 17,966 workers with time loss of 297,827 days, and twenty-seven disputes in September, 1936, involving 6,554 workers with time loss of 33,577 days. None of the disputes in September caused great time loss except that of steel workers at Sorel, P.Q., which commenced in August and was not terminated until early in October. In August most of the time loss was due to strikes of textile factory workers in Quebec and Ontario. In September last year there were important strikes of artificial silk factory workers at Cornwall, Ont., fur workers at Winnipeg, Man., and coal miners at New Waterford, N.S., and at East Coulee, Alta. Of the thirty-four disputes recorded for September, twenty-five were recorded as terminated, five resulting in favour of the workers involved, four in favour of the employers concerned, two being partially successful, while compromise settlements were reached in eleven cases and the results of three were recorded as indefinite. Nine disputes, involving approximately 1,940 workers, were recorded as unterminated at the end of the month. These figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or definitely declared terminated by the unions involved.

Industrial Disputes Investigation Act

During the month, the Department received the majority and minority findings of a Board of Conciliation established to deal with a dispute between the Winnipeg Electric Company and its street railway employees and certain electrical workers.

An application for the establishment of a Board was received from coal miners in the employ of the Hillcrest Collieries.

Further information concerning proceedings under the Act, including the texts of the Board findings in the case of the Winnipeg dispute, will be found in the section commencing on page 1062.

Statistics of public aid recipients

The National Employment Commission has recently issued a report dealing with the registration (in June 1937) of recipients of aid to which the Dominion Government contributed. The report deals exclusively with material aid including agricultural aid.

Figures for the Province of New Brunswick are not included in the report as that province reported that the Government had substituted works projects for aid at April 1, 1937. Statistics throughout the tables given in the report are final with the exception of the Province of Quebec, where in certain instances figures are subject to revision after the receipt of final reports from the Government of that province.

The report is divided into four sections. Section A deals with statistics relating to fully employable persons of both sexes, sixteen years of age and over who are in receipt of material aid; Section B concerns statistics of persons other than those fully employable; Section C relates to farm resident operators and their dependents who are in receipt of agricultural aid; while Section D gives a recapitulation of all persons in sections A, B and C in receipt of material aid.

In Section D it is shown that the total of all persons in receipt of aid to which the Dominion contributed—whether agricultural or material aid—amounted to 900,851 for June, 1937. This total was made up of 180,771 employable persons; 47,349 "partially employable and fully unemployed"; 407,604 non-worker type dependents, making a total for these three classifications of 635,724, to which is added the 265,127 farm resident operators and their dependents to make the grand total referred to above.

Relief in drought areas to be administered by Department of Agriculture

In the agreements covering relief in the section of the drought areas in Saskatchewan and Alberta where the Dominion Government has assumed 100 per cent responsibility, provision is being made for the administration of all forms of assistance by the Federal Department of Agriculture, according to a statement issued on October 2, by the Hon. Norman McL. Rogers, Minister of Labour. The Minister's statement continues as follows:

"This means that the Department of Labour will cease to supervise or administer direct relief in the drought areas. That responsibility will now be assumed by the Department of Agriculture. The change is in conformity with the recommendation of the National Employ-

ment Commission that different groups of relief recipients should be segregated and that agricultural assistance should be distinguished as far as possible from unemployment relief. The wisdom of this recommendation with respect to the drought areas was recognized by Mr. Gardiner and myself at the conclusion of our inspection trip through the drought-stricken territory in August.

"Under the arrangements now being made, the responsibility for all forms of assistance in the drought area will be concentrated in one Department. The Department of Agriculture is administering the Prairie Farm Rehabilitation Act and the provision of feed and fodder and other rehabilitation measures in the drought area. The Government has accepted the view of the National Employment Commission that the Department which administers measures of agricultural rehabilitation should also be charged with the responsibility of co-ordinating direct relief with other forms of agricultural assistance."

Queen's University to establish course in industrial relations

According to an announcement in the October issue of the *Queen's Review*, Queen's University has decided to establish an Industrial Relations Section in the School of Commerce and Administration of which Prof. W. A. Mackintosh is director. With the co-operation of the Personnel Associations of Toronto and Montreal, conferences of industrial executives, government and labour officials and university men, have been held in Kingston in each of the past two years. "This experience," it was stated, "convinced the university that it has an important function to perform in this field."

Continuing, the *Queen's Review* stated:

"The decision to establish an Industrial Relations Section has been reached after consultation with leading industrialists, labour officials, and industrial relations experts. The co-operation and financial support for a five-year period of a number of industrial corporations has been secured. The arrangements ensure that the work of the Section will be entirely unfettered and unbiased.

"An appointment will be made of a man, qualified to undertake investigation and experienced in the problems of industry and of labour, to take immediate charge of the work. Research and secretarial assistants will also be appointed. A library and information centre will be built up covering the whole field of industrial relations. In particular, there will be assembled full and precise information on the policies and practices which obtain in Canadian industry in the relationships and responsibilities of management and labour. In providing a clearing-house of information, accurate and up-to-date, it is hoped that a service will be available to management and to labour which will be constructively of value in promoting sound thinking and industrial understanding.

"It is planned that the Industrial Relations Section will give a further service in that students in Applied Science and Commerce in the University will be kept in touch with the problems in this field, and with the methods which are being used to meet these problems. With this background they may thus go out into industry and business with knowledge and with a sympathetic understanding of the difficulties which have to be faced.

"It is of the first importance that the work commend itself both to labour and to industrial management. It will go forward with that aim continuously in view."

It is understood that Mr. J. C. Cameron has been appointed in charge of this new section.

Conference on Industrial Relations

A conference on Industrial Relations was held at Queen's University, Kingston, on September 9-11, at which about one hundred persons were in attendance from leading industrial and commercial companies, from the universities, from the Canadian National and Canadian Pacific Railways, and from the federal and provincial governments. Principal R. C. Wallace, of Queen's University, extended an official welcome to those in attendance.

The following acted as chairmen at successive session of the conference: Professor W. A. Mackintosh, Director of the School of Commerce and Administration, Queen's University, and General Chairman of the Conference; Principal R. C. Wallace; Mr. H. H. Stedman, Superintendent of Swift-Canadian Ltd., and President of the Personnel Association of Toronto; Mr. J. H. Brace, General Manager, Western Area of the Bell Telephone Company of Canada; and Mr. Tom Moore, Vice-Chairman of National Employment Commission, Ottawa.

The Dominion Department of Labour was represented by the Honourable Norman McL. Rogers, Minister of Labour, who addressed the Conference on the subject of "The Avoidance of Industrial Unrest."

The subjects of the other papers and addresses on the program are as follows: *What is an Economic Wage?*, by Prof. V. W. Bladen, Department of Economics of Toronto University; *Is Legislation the Answer?*, by E. J.

Young, Chairman of the Ontario Industry and Labour Board; *What Can be Done by Management to Achieve a Fair Wage Structure?* (a panel-discussion), by L. N. Buzzell of McDonald, Currie & Co.; J. A. Calder, Assistant Comptroller of the Imperial Tobacco Company; E. R. Complin of the Industrial Relations Section of Canadian Industries, Ltd.; J. A. Coote, Professor of Mechanical Engineering, McGill University; C. H. Fraser, General Personnel Supervisor of the Bell Telephone Co. of Canada; Mr. F. H. Horton, Personnel Manager of the Dominion Rubber Company; and Mr. H. M. Payette, Industrial Relations Supervisor of General Foods, Ltd.; *Carrying the Worker with Management in Its Policies,* by Mr. F. M. Morton, Vice-President of the International Harvester Company, Hamilton, Ont.; *Development of a Basis for Negotiation,* by George Hodge, Chief of Department of Personnel, Canadian Pacific Railway Company. Each of these addresses resulted in a general discussion by the conference.

Unemployment insurance legislation in South Africa

At the last session of the Parliament of the Union of South Africa, the Unemployment Benefit Act, 1937, was passed providing the Union with a contributory system of unemployment insurance.

The Act, which will come into force on a date to be fixed by proclamation, is intended to provide for the payment of benefits to employees in certain industries who are capable of and available for work, but are unemployed. Eight industries—building, mechanical and electrical, motor engineering, furniture-making, gold mining within certain districts, leather and footwear manufacturing, printing and newspaper, and clothing—are included in a schedule to which the Act applies.

The Minister administering the Act has the power to establish an unemployment benefit fund for any scheduled industry. Such a fund may be established by a notice in the official *Gazette* of South Africa, which will specify the area or areas in respect of which the fund is to operate as well as the limits of the scheduled industry in respect of which the fund is to be established. The notice establishing the fund will also specify the date as from which employers and employees in the industry concerned, who are liable to contribute, shall pay contributions to the fund.

Subject to certain exceptions, which are specified in the Act, every employee (including an apprentice) in a scheduled industry in the area concerned, must contribute to the fund. The chief exemptions are labourers, i.e., persons whose earnings are at a rate of not more than £78 per annum employed in certain operations; and persons whose rate of earnings exceed £450 per annum. Agricultural workers are also exempt from the provisions of the Act.

The Act specifies the amount which employers and employees will be obliged to contribute to an established fund. The contributions vary in accordance with wage or salary groups which have been enumerated in three categories. Those earning not more than £78 per annum will pay two pence per week and their employer sixpence; contributors whose annual earnings are at a rate of more than £78 and not more than £130 will pay sixpence and their employer tenpence; in cases where annual earnings are at a rate of more than £130 and not more than £450 the employer and employee each contribute one shilling. In addition to these contributions the State must contribute from revenue to each established fund an amount equal to one-quarter of the total contributed by employers and employees.

The rate of benefit payable to a contributor who becomes unemployed depends upon the wage or salary group in which he is classified and the rate of his benefit is to be calculated in respect of the group in which he was employed when contributions were last paid up by and for him. Those in the group earning not more than £78 will receive a benefit of 10 shillings per calendar week; those earning £78 to £130 a benefit of 20 shillings per calendar week; and those in the group £130 to £450 the benefit will be 30 shillings per calendar week.

The Act also provides for the appointment of a committee to administer each fund established; the establishment of a central body which will exercise a general supervision over all funds and committees; obligations of employers; determining annual earnings; when claims can be made, etc.

Unemployment insurance proposals in Australia

A report on unemployment insurance, submitted to the Parliament of the Australian Commonwealth, has recently been received.

In June, 1936, as indicated in the report, following the request of the Commonwealth Government of Australia for the service of British officials, Mr. Godfrey H. Ince, Chief Insurance Officer, Ministry of Labour, London, was selected by the British Government for the purpose of assisting the Commonwealth Government in investigating the subject of Unemployment Insurance as affecting Australia.

Mr. Ince's report was completed in February of this year and was presented to the Australian Government on June 17, 1937.

Introducing his report, Mr. Ince states: "My investigations have led me to the conclusion that while the institution of a system of unemployment insurance in Australia presents a number of difficulties, a scheme based on the principles of the British scheme, and modified to suit the conditions existing in the Commonwealth is quite practicable."

The report is divided into three parts, with a series of appendices which deal with details of the possible alternative schemes for Australia; the British and Queensland schemes of insurance; the Employment Exchange systems existing in Great Britain and in the several States of the Commonwealth; the various measures taken by the various states for the relief of unemployment; and statistical information. Part I of the report is confined to general considerations and conclusions. Part II sets out the principles of unemployment insurance and their application to Australia and deals with detailed and technical matters. Part III contains a summary of considerations and conclusions.

Mr. Ince, states that in considering the nature of any unemployment insurance scheme for Australia "regard must be had, in addition to other factors, to the federal system of Government and the constitutional relations between the Commonwealth and the States." He suggests the following three methods are open for adoption in Australia:—

(1) A series of separate State schemes under the independent control of the State Governments.

(2) An Australia-wide scheme under the control of the Commonwealth Government.

(3) A series of state schemes on a uniform basis, the schemes being under the control of the State Governments, but uniformity being secured by a measure of Commonwealth control.

The report also states that whichever of these methods is adopted the main principles on which an unemployment insurance scheme should be based do not vary and are the same for Australia as for Great Britain. These principles and the implications which follow from them, particularly as applied to Australia, are set out in some detail in Part II of the report. The three main general principles to be followed are given as follows:

(1) That the scheme should cover as large a number of persons as possible exposed to the risk of unemployment.

(2) That on the occurrence of unemployment, persons should have a right to receive payments in return for contributions paid.

(3) That the contributions and benefits should be so adjusted that income is sufficient to meet expenditure, including administrative expenses.

Mr. Ince also recommended that in addition the scheme should "so far as practicable, be outside the field of political controversy, as simple as possible, and flexible and adaptable to fluctuations in industrial conditions."

Dealing with the application of these principles the report points out "that differences become apparent between Great Britain and Australia. The political constitution of the Commonwealth, the distribution over a vast area of a comparatively sparse population—a sparseness which is accentuated by the concentration of population in a few large cities—the frequent migration of workers both within a state and from one state to another, the different conditions existing in the various states and the temperament of the people, are factors which make the detailed system of unemployment insurance existing in Great Britain impracticable in Australia at the present time. What is required to meet the conditions in Australia is a less detailed law and a more simplified administration, and there is no reason to suppose that a scheme based on the principles of the British Scheme but modified in the direction of simplification would not be practicable. At the same time it must be pointed out that there is a risk of the simplification of administration producing a system less efficient than that operating in Great Britain."

Youth training in Australia 1937-38

In view of the recent youth training agreements negotiated (LABOUR GAZETTE, July, 1937, page 743, August, page 858, September, page 980) between the Dominion Government and six of the Provincial Governments in accordance with the appropriation of $1,000,000 voted for the purpose by the Dominion Parliament at its last session, (LABOUR GAZETTE, April, page 414) it is of interest to note what is being done in this regard in Australia.

The New South Wales *Industrial Gazette* of June 30, contains an outline of the youth training scheme adopted in Australia. The

scheme has been established as a result of a resolution adopted by the Conference on Youth Employment held in February which pointed to the lack of training as a considerable factor militating against the establishment in employment of young men 18 to 25 years and recommended to the Commonwealth Government "the necessity for the immediate provision of funds in conjunction with the States for the this purpose".

This request for financial assistance was met by the Commonwealth Government granting £200,000 for the whole of Australia for the financial year July 1, 1937, to June 30, 1938. The approximate amount allocated to each State will be: New South Wales, £77,000; Victoria, £52,000; Queensland, £25,000; South Australia, £20,000; Western Australia, £17,000; and Tasmania, £9,000.

Conditions attaching to the grant are that the State Governments will furnish schemes for the approval of the Commonwealth Government, the schemes, when approved, to be carried out by the State authorities. The grant is to be expended on schemes for the training of youths, and not for their employment as an unemployment relief payment, although it is open to a State to suggest that a portion of the money be used as a subsidy while the youths are receiving training.

The *Industrial Gazette* also gives a general outline of the conditions to be applied in New South Wales in carrying out the youth training scheme in that State.

The Factories Act in Great Britain, 1937

From time to time references have been made in the Labour Gazette (February, 1937, page 129, March, 1937, page 320, May, 1937, page 482) to the new Factories Act in Great Britain which consolidated and amends the Factory and Workshops Act of 1901 to 1929 and provides improved arrangements for securing the safety, health and welfare of factory workers. The new Act received Royal Assent on July 30 and is to come into force on July 1, 1938.

A summary of the Bill, in the form in which it was introduced into the House of Commons was given in the Labour Gazette of Ferbuary, 1937, page 320. During the passage of the Bill through Parliament many amendments were made, chiefly amplifying and making more stringent the provisions regarding health, safety and welfare, and those regarding the hours of employment and the amount of permitted overtime for women and young persons. Some of the most important amendments are noted in the September issue of the *British Ministry of Labour Gazette,* and are dealt with under the following headings: "Cubic Space," "Welfare," Basement Bakehouses," "Hours of Employment of Women and Young Persons", "Training of Young Persons", "Protection of Eyes from Injury", "Extension of Control to New Occupations".

Hours of Employment of Women and Young Persons.—The amendments in connection with the "Hours of Employment of Women and Young Persons" provide that the earliest hour at which work can begin in a factory is to be changed from 6 a.m. as set out in the original Bill, to 7 a.m., subject to a power to allow exceptions, but not so as to begin before 6 a.m. For young persons under 16 the latest stopping hour has been changed from 8 p.m. to 6 p.m.

A new section limits, after July 1, 1939, the weekly hours worked by young persons under 16 to 44 instead of 48 as provided in the original Bill, subject to a power to increase the hours up to but not exceeding 48 where certain prescribed conditions are fulfilled.

The number of weeks in which overtime may be worked by women and young persons of 16 years and over has been reduced from 30 to 25. A provision has also been inserted to permit in certain circumstances overtime to be calculated with reference to the individual worker, subject to the proviso that no woman employed under these special conditions may work for more than 75 hours and no young person so employed for more than 50 hours overtime in any calendar year. A further provision gives power to reduce the overtime allowed for any industry if, after an inquiry, the Secretary of State is satisfied that this can be done without detriment to the industry

Training of Young Persons.—A new section which did not appear in the Bill, provides that no young person shall work at any machine prescribed by the Secretary of State to be dangerous unless he has been fully instructed as to its dangers, and has either received a sufficient training in work at the machine, or is under adequate supervision by a person who has a thorough knowledge and experience of the machine.

Survey of employees' attitude toward managerial policies

The September issue of the *Personnel Journal* contains an interesting article entitled "Employees Rate Plant Policies," prepared by Rex B. Hersey of the University of Pennsylvania.

The article gives the results of a survey of employee reactions, conducted through the co-operation of companies with the Department of Industry, Wharton School of the University of Pennsylvania. The object of

the study, carried out through questionnaires and supplementary personal interviews, was to ascertain workers' attitudes toward managerial policies, and to show trends which might prove helpful in determining remedies for personnel difficulties.

According to the results, the four most important managerial policies in 1937 selected by the workers were: "Steady Employment." "Amount of Pay," "Safety," and "Fair Adjustment of Grievances." It was found that these results closely paralleled those of previous investigations, except for the fact that "Safety" received more weight, and "Chance of Promotion" less. It was also found that the workers in every age group, except those from sixty to sixty-nine years, thought that "Steady Employment" was most important to them, the older workers rating "Amount of Pay" as being more important than steady employment. It was further noted that the workers in the oldest group indicated "Insurance Systems and Pensions" as their third choice, this being significant, since this group of workers are approaching retirement age. On the other hand, the younger workers placed "Chance of Promotion" among the most important policies.

In referring to the workers' opinions as to the best-carried-out policies, the author considers that such opinions "are most important, since they give management an idea as to which policies it has been neglecting, and in doing so indicate places for improvement." In this regard, workers chose "Safety," "Working Conditions," "Methods of Pay," and "Insurance Systems and Pensions" in that order as the best-carried-out policies. Mr. Hersey states that "these results differ considerably from those obtained in previous studies. In this study, 'Adjustment of Grievances' and 'Steady Employment' were not mentioned as being best carried out, thus differing from former studies."

The survey for 1937 also revealed that employees considered "Medical and Dental Service," "Safety," "Insurance Systems and Pensions," and "Fair Adjustment of Grievances," in that order, as the most irritating plant policies. In connection with this classification of plant policies, Mr. Hersey observes "By ascertaining the policies most irritating to the workers, management will be able to go directly to the source of the trouble without spending valuable time in guesswork. By correcting the policies that are irritating to the worker, or the attitude of the workers toward those policies, ill-will is minimized and efficiency is increased."

In connection with the safety policy, the survey found that the workers agreed "that safety was well carried out by management, but the strict supervision necessary to make safety regulations effective has made safety irritating. Discipline primarily as a means of education rather than as a primitive measure is, however, indispensable. The important factor in making discipline both effective and acceptable is understanding and ability on the part of the foreman to apply discipline with strict justice."

Similarly, the Survey showed the "irritation factors" present, from the workers point of view, in other features of plant policies.

Resumption of Farm Employment Plan

That the Farm Improvement and Employment plan, which proved so successful last year in meeting the problem of single, homeless and unemployed persons, will again be in operation in the four western provinces during the coming winter, was the substance of a recent announcement by the Hon. Norman McL. Rogers, Minister of Labour.

This decision was based on the report of Mr. Humphrey Mitchell, who directed the Plan last year and who has recently completed a survey of conditions in Western Canada. While conditions show distinct improvement in certain areas over those of a year ago, the widespread drought has caused a definite check to employment opportunities over a large section, making a difficult situation as it affects the single unemployed. To meet this condition and to limit the interprovincial movement of transients and as a means of providing shelter and a useful occupation under infinitely more congenial conditions than remaining on relief in urban centres, the Plan will be placed in operation by the provinces as circumstances warrant.

Last season the Plan absorbed 46,000 persons, of which 21,833 remained on the farms for the summer months, after the allowances had been discontinued.

As outlined in the Labour Gazette for October, 1936, page 1099, an arrangement between the Dominion and the provinces of British Columbia, Alberta, Saskatchewan and Manitoba provided a bonus of $5 per month to the worker and $5 per month to the farmer with an additional $2.50 per month bonus to the former if completing the period of engagement. (The same provisions applied to the province of Quebec except that no allowance was paid to the farmer.)

Where lack of funds prevented relief recipients in urban centres proceeding to farm employment, an agreement was made with the provinces on a fifty-fifty basis to pay the transportation of the worker to a job within

the province and to furnish clothing assistance to the value of three dollars.

Supplementary plans included forestry projects, public works, roadways, etc., in Manitoba, Alberta and British Columbia for those not fitted for farm work.

The total costs were shared on a fifty-fifty basis between the Dominion and the provinces, the administration expense being borne by the latter.

Action toward termination of direct relief in Quebec

Establishment of a joint committee of federal and Quebec departments of labour with a view to terminating direct relief by substituting work and re-training projects, was announced on October 8 by the Hon. Norman McL. Rogers, Dominion Minister of Labour, after a conference with Hon. William Tremblay, Minister of Labour for Quebec, and Mr. Arthur B. Purvis, chairman of the National Employment Commission. The announcement by Hon. Mr. Rogers was as follows:

"We have been seeking common ground in a joint effort to bring direct relief to an end as soon as possible in the province of Quebec. That objective, of course, extends to all provinces. We have been considering the means of reaching this goal by a combination of work projects which have a definite value in refitting those on relief for absorption into private industry, and re-training plans for increasing employability through restoration of skill, physique and morale as recommended by the National Employment Commission. A joint committee of federal and provincial departments of labour will be set up to assist in developing the kind of program we have in view."

The I.L.O. Year-book 1936-37

The seventh issue of the I. L. O. Year-Book has just been published and forms a volume of over 600 pages. It contains a brief record of the principal events which took place in 1936 and the first few months of 1937 in the whole field of social conditions throughout the world.

The volume opens with a short general introduction giving a brief survey of the activities of the International Labour Organization during the period under consideration, which is the year 1936, and in some cases the first quarter of 1937. This is followed by eight chapters dealing with the following subjects: economic developments; conditions of work (hours, holidays, hygiene, safety, women's work, protection of children and young persons, and factory inspection); social insurance; the remuneration of labour; employment, unemployment, and migration; workers' living conditions (vocational training, utilization of spare time and housing); workers' general rights (right of association, profit sharing and participation in management, collective agreements, conciliation and arbitration, participation of workers in national economic life, etc.); and special problems of certain categories of workers (salaried employees, professional workers, home workers, agicultural workers, seamen, Native labour, and prison labour).

Appendices are added giving lists of the States Members of the Organization, of the permanent delegates accredited to the International Labour Office and the League of Nations, showing the distribution of the 50 ratifications registered from March 16, 1936 to March 15, 1937, representation at the Conference and composition of delegations, and the composition of the Governing Body and committees, and statistics of international and national federations of trade unions.

Finally, the volume contains a full geographical and subject index.

According to a recent press report, the first industrial hospital to be built in South Africa is under construction in Johannesburg on behalf of the Chamber of Mines. The hospital, which will start with 108 beds, will treat cases for which employers are held responsible under the Workmen's Compensation Act. It is stated that the hospital will be one of the best-equipped industrial hospitals in the world.

Under authority of the Alberta Tradesmen's Qualification Act, 1936, the Government has appointed boards of examiners for the following trades:—electrical work, refrigerator mechanics, acetylene gas welding, electric welding, radio mechanics and construction and repair of motor vehicles. It has been announced also that the chairman of the Board of Industrial Relations of Alberta and four wage inspectors, including two women, have been charged with the supervision and enforcement of the provisions of any codes enacted under the Department of Trade and Industry Act, 1934, relating to minimum standards of wages and hours of employment.

RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

AN application for the establishment by the Minister of Labour of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act was received in the Department of Labour on September 18 from coal miners employed by the Hillcrest Collieries, Limited, at Hillcrest, Alberta, being members of Local Union No. 1058, United Mine Workers of America. Two hundred and sixty employees are stated to be directly affected by the dispute, which relates to the men's request for union recognition and an agreement covering wages and working conditions. The Western Representative of the Department visited Hillcrest towards the close of the month and conferred with the representatives of the employees and the General Manager of the Company. The Department is also in touch with the officials of the company at their headquarters in Montreal.

Settlement Effected

The Department of Labour was advised towards the end of September of the acceptance by both the employers and employees concerned of the findings of the Board of Conciliation and Investigation which dealt with a dispute respecting wages and certain working conditions between the Corporation of the City of Fort William and the Public Utilities Commission of the City of Port Arthur, on the one hand, and their street railway employees being members of Division No. 966, Amalgamated Association of Street and Electric Railway and Motor Coach Employees of America, on the other hand. The unanimous report of the Conciliation Board in regard to this case appeared in the September (1937) issue of the LABOUR GAZETTE, page 955.

Report of Board in Dispute Between the Winnipeg Electric Company and Certain of its Employees Being Members of the Street Railway Employees' Unit and Winnipeg Electric Substation and Hydro Plant Unit of the One Big Union.

A Board of Conciliation, established during June to deal with a dispute respecting wages and working conditions of approximately 1,200 employees of the Winnipeg Electric Company, reported to the Minister of Labour at the beginning of October. The following classes of employees are affected by the dispute—motormen, conductors, busmen, mechanical and track department employees, operators, mechanics, meter repairers, maintenance and construction employees, telephones and signal repairers, patrolmen and appliance repair employees. The majority findings of the Board are signed by the chairman, Mr. Arnold Smith, and the member nominated by the employees, Mr. R. B. Russell. Mr. W. C. Hamilton, K.C., the company's nominee on the Board, submitted a minority report. The texts of the two reports follow:—

Text of Report of Board

Re Industrial Disputes Investigation Act and re difference between the Winnipeg Electric Company and certain of its employees being motormen, conductors and busmen, mechanical and track department employees, members of the Street Railway Employees' Unit, One Big Union, and certain other employees being operators, mechanics, meter repairers, patrolmen, and appliance repair employees, members of the Winnipeg Electric Substation and Hydro Plant Unit, One Big Union.

To the Hon. Norman Rogers, M.P.,
Minister of Labour, Ottawa, Ontario.

Sir,—The Board of Conciliation and Investigation appointed by you, namely, Arnold Smith, Chairman, W. C. Hamilton, K.C., representing the employers, and R. B. Russell, representing the employees, to enquire into the above disputes, met in Winnipeg on July 16.

The company was represented by Mr. C. H. Dahl, Vice-President in charge of Operations; Mr. L. Palk, Vice-President in charge of Executive Matters, and Mr. W. L. Blodgett, Vice-President in charge of Finances and Accounting, along with Mr. G. T. McIntosh, acting as Secretary.

The representatives of the employees were Mr. E. Armstrong and T. McClure, representing the Traffic employees; Mr. J. Tompkin and Mr. N. S. McLean, representing the Mechanical employees, and Mr. John Laweskey and Mr. E. Armstrong, representing the Track employees; Mr. S. Shea, Mr. K. Williams, Mr. A. Lea, and Mr. S. Richardson, representing the Substation and Power Plant Operators and Mechanics, Meter Repairmen, Patrolmen and Appliance Repair employees.

At the first meeting the members of the Board were duly sworn and received copies of the reference.

Every facility was accorded to both sides to place the Board evidence, statistics, facts and argument to explain and support their respective contentions and claims. Throughout the inquiry a friendly and frank manner was adopted by the parties, and every assistance and courtesy was extended to the Board. The matters discussed and investigated were exhaustively dealt with and ably presented, and the Board is appreciative of the thorough and painstaking care with which the cases were advanced.

The presentation of the case by the various representatives occupied the sittings of the Board for nine days, during which time 37 lengthy exhibits were presented.

The matters in dispute are those set out in the application, and in a general way are as follow: establishment of a 44-hour week the whole year round for the Track Department, an agreement covering employees of the Electrical Appliance Repair Department, and restoration of wages to all the men covered by this application.

There are also smaller matters, namely, shortening of the period during which holidays are taken, change in the overtime rates for the Maintenance Construction employees, and changing of the wording of the training period clause for the substation operator.

With reference to the items mentioned in the preceding paragraph, the Board are of the opinion that satisfactory settlement can be arrived at by direct negotiation between the two parties.

With reference to the 44-hour week for the Track Department employees, we are happy to say that Mr. Dahl, on behalf of the company, stated before your Board that the company was prepared to concede this request, and in view of his statement we recommend that this change be embodied in the agreement.

With reference to the agreement for the employees of the Electrical Appliance Repair Department, in this connection we would refer you to Mr. Palk's letter to Mr. Sidney Shea of May 17, in which he says that it is a comparatively small matter and when the wages and working conditions of the Operating Department have been settled they will give consideration to the matter, and in view of his offer that this matter will be taken up when the major item is settled, we now recommend that an agreement be made with the Electrical Appliance Repair Department, for, after all is said and done, the number of employees concerned is a very small percentage of the total number working for the company.

There remains the chief bone of contention, namely, the restoration of wages. After carefully reviewing all the statements as submitted by the company and the men, we recommend that settlement of the wage question be made on the basis of the company restoring to the men one-third of their reduction, either nine per cent or thirteen per cent as the case may be, as of May 1, 1937, and this restoration to continue until May 1, 1938, when a further third shall be restored, making a total of two-thirds, until May 1, 1939, when the remaining third shall be given to them, making restoration in full as from May 1, 1939.

We believe and suggest for your approval that this is a reasonable sacrifice for both parties to make.

Dealing with a public utility such as the Winnipeg Electric, the welfare of the general public must be always kept in mind, and if the men were to enforce the strike vote they have already taken, the effect on this community would be disastrous and might lead to a calamity.

A reference was made by the company to the effect that certain taxes and charges paid by them to the City of Winnipeg made their position difficult, to say the least, when dealing with wage increases. We, therefore, recommend that a sincere endeavour be made by the City of Winnipeg to do away with these charges, which time and circumstance have made unreasonable.

(Sgd.) Arnold Smith,
Chairman.
(Sgd.) R. B. Russell,
Representing the Employees.

Text of Minority Report

The Honourable the Minister of Labour,
Ottawa, Ontario.

Re: Industrial Disputes Investigation Act and *re* differences between the Winnipeg Electric Company and certain of its employees being (1) motormen, conductors and busmen, and Mechanical and Track Department Employees, members of the Street Railway Employees Unit, One Big Union, and (2) operators, mechanics, meter repairers, maintenance and construction employees, telephone and signals repairers, patrolmen and appliance repair employees, members of the Winnipeg Electric Substation and Hydro Plant Unit, One Big Union.

Sir: In view of the fact that I cannot concur in the report of the other members of the Board of Conciliation appointed to deal with the above mentioned dispute, I desire, by means of my own report, to set forth my conclusions in the matter, as well as my reasons for dissenting from the report of the majority of the Board.

As I understand the scope and purpose of the Industrial Disputes Act, a board appointed under it should first attempt, by conciliatory methods, to bring the parties into agreement; and, failing in this, proceed to deal with the merits of the dispute as disclosed by the evidence before the Board and make a recommendation to the Minister based on what such evidence may show.

In the present instance, every effort was made by the Board as a whole, as well as by

its individual members, to effect a settlement, but without success. As I see the matter, it therefore now becomes necessary to consider the facts for a possible basis for a recommendation, apart altogether from any suggestion upon which it was sought to induce the parties to reach an agreement. I infer from the character of the report of the majority of the Board that they are not in agreement with me on my construction of the duties of the Board. At least, their report would so indicate, inasmuch as it discloses no ground whatever for the recommendation therein contained. I, therefore, proposed to briefly review the situation.

Although there was a considerable amount of material placed before the Board, there was in reality almost no dispute as to the essential and important facts. I might also mention that the discussions were entirely lacking in anything of an acrimonious nature, and there seemed to be a minimum of ill feeling between the employer and the employees. The employees sought to have their wages restored to the rates at which they stood in the year 1929. It was not suggested that the rates paid at that time were unreasonable, even under the then circumstances when business activity and prices of commodities were at their highest. In fact it was impliedly conceded that the rates were fair at that time. From the end of 1929, and through several years succeeding, the revenues of the Winnipeg Electric Company, in common with all other classes of business, sustained appalling decreases. Notwithstanding such decreases on the one hand, as well as the lowered cost of living on the other, the Company continued to pay wages at the high rates until a time in the year 1932. This action on the part of the Company, evidencing as it does, the highest good faith and an unusual consideration of its employees, appears to have been entirely overlooked in the discussions.

In 1932 it became apparent that it was impossible for the Company to longer continue the rates referred to. The employees, realizing the position, agreed to the reductions which it is now sought to have restored. The employees recognized that the financial ability of the Company to pay must be the governing factor in determining the rate of wages to be given to the employees. That principle is still recognized by the employees, because their main contention before the Board was that the Company's financial difficulties have been so sufficiently repaired as to now justify the restoration of the reduction. This was the main issue before the Board, and any other disputes were of decidedly minor importance.

Having in mind the ground upon which the employees' case has been based, as well as the terms of the reference itself, I am of the opinion that before making any recommendation the Board must find that the Company is financially in a position to pay an increase. A reference to the report of the other two members of the Board discloses no such finding to have been made. As a matter of fact, no such finding could be made, as there is no material before the Board upon which it could be based.

Between the years 1929 and 1935, the Winnipeg Electric Company passed through a time of unusually great financial difficulty. The situation became so serious that a complete reformation of its financial structure became necessary. This was only accomplished after long and strenuous efforts and extended negotiations, resulting, among other things, in a rearrangement with the Company's bondholders which gave it a substantial measure of relief, and brought its outgoings somewhat more in keeping with its revenues. That settlement was accomplished in the year 1935. The Company has only had a period of one year's operations within which to test the benefit which may accrue to it from the financial revision, namely the year 1936, and it is on that year's results alone that the Board must decide the question of the financial ability of the Company to increase its wage scale at this time.

The Company pointed out that it would require approximately $350,000 a year to effect a restoration of the reduction to all of its employees. This was not disputed by the representatives on the other side. They met the point in a rather different way. They claimed that it would not require anything like that sum to restore the cut to those concerned with the present applications. In a veiled way, the inference was left that because the other employees do not belong to any labour organization, that the Company need not fear any difficulty with them, nor any pressure which they might bring. As to the ethics of such a suggestion, nothing need be said. The Company replied that all employees received the same cut at the same time, regardless of their affiliations, and that it would be neither fair nor feasible to make restoration to one group without similarly treating the others.

The Company's balance sheet for the year 1936 was submitted to the Board, and it confirms the position taken by the Company before the Board to the effect that it cannot make a restoration of such magnitude without seriously jeopardizing its financial position.

It is not contended that the present rates are unfair under existing circumstances. In fact it would be impossible to uphold such a contention, as the present rates, when taken

in conjunction with the cost of living, are relatively higher than the rates prevailing in the year 1929. The employees take the position that the old rates should be treated as the rates established for 1932, and should be considered as such. Undoubtedly, they were the rates actually paid in 1932, and also in the years 1930 and 1931, for which, as already pointed out, the Company has received no credit. Those rates, however, were not settled in view of 1932 conditions, but were established upon the peak conditions as they existed in 1928.

Subsequent to the reduction so made, in 1932 the Company made provision to give all its employees two weeks' vacation with pay in each year, a privilege which was not enjoyed previous to the year just mentioned. The Company alleges that the cost of such vacation is, of itself, equivalent to a four per cent restoration. The employees, while not disputing the percentage, appear to treat the matter as something, which having been given to them, they are entitled to keep regardless of any other factor. The result of a restoration of the full reduction would therefore leave the employees actually in a much better position than they were in the years 1928 and 1929.

As I see this matter, there is no material before the Board upon which it could recommend that the financial position of the Company justifies any restoration. On the contrary, the material shows the opposite. I can only assume that the other members of the Board must have come to the same conclusion. Had they thought otherwise they would undoubtedly have included it in their report.

I find myself unable to concur in the report submitted to the Minister by my colleagues on the Board for the following among other reasons:—

1. It completely ignores the evidence and other material which was placed before the Board by the parties at the hearing, and in particular the financial position of the Company.

2. It fails to make any finding of fact or to disclose any ground upon which the recommendation can be supported. As for myself, I have been unable to discover any such ground, and am of the opinion that none exists.

3. The recommendation suggested by the report is of a purely arbitrary character, put forward without any conclusion upon the merits of the dispute.

4. It does not take into consideration the granting of vacation with pay, and thereby, in the result, would give the employees higher rates than they received prior to the reduction.

5. On the strength of one year's experience under the new financial arrangement, it attempts to commit the Company to a financial program and additional heavy obligations extending over a three-year period. This involved speculation as to future years, and in my opinion such an element should not be allowed to enter into a report of the nature of the one in question. The reference did not require any consideration of the Company's future ability to pay, but only what it is able to do at this time.

6. I can see no object in recommending "a settlement" when the Board, after exhausting every effort, failed to bring the parties into agreement. In my humble opinion the situation then called for a recommendation based on the merits of the dispute—otherwise the whole reference must become a futility.

In this report I am proceeding on the theory that in a matter of this kind, the mere fact that employees make a request for an increase and the establishment of a Board of Conciliation, does not of itself require that some allowance must be made. Any other view would seem to me to be in direct conflict with the purpose of the statute.

Throughout the hearing, I was impressed by the attitude of the Company's representatives. I think that they were sincerely desirous of maintaining the present apparently cordial relations with the employees, but they were also genuinely apprehensive that any added expenditure would seriously affect the new financial structure so recently accomplished after long and arduous efforts. It was further quite evident that at the time the matter was before the Board, conditions were even less favourable than when the application was first launched. The Company has paid no dividends to shareholders for years, and it is apparent that there is no possibility of any dividend for many years.

I think the application is premature and that the employees would be well advised to wait at least another year and then reconsider the situation. The fact that the Company continued the high rates of pay throughout three of the most difficult of the depressed years would of itself seem to justify the suggestion.

While I am unable to agree with my colleagues in their final disposition of this matter, I would nevertheless like to record my appreciation of their efforts during the conciliatory period of the Board's work, as well as of the many personal courtesies extended to me.

All of the above is respectfully submitted.

Dated this 6th day of October, A.D. 1937.

(Sgd.) W. C. Hamilton,
A member of the Board of Conciliation.

CONCILIATION WORK OF THE DEPARTMENT OF LABOUR FROM JULY 1, 1937, TO SEPTEMBER 30, 1937

CONCILIATION proceedings are carried on by the Department of Labour for the most part under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned. In connection with disputes coming within the direct scope of the Industrial Disputes Investigation Act (those in mines and certain public utility industries), preliminary inquiries and mediation by officers of the Department result frequently in the settlement of the matters in dispute without the necessity of the establishment of Boards of Conciliation and Investigation.

The Department of Labour has on its staff conciliators and mediators who are stationed at Vancouver, Toronto, Ottawa, and Montreal. The territory of the officer resident in Vancouver comprises the four western provinces. The conciliation officer resident in Toronto confines his activities to Ontario, while the officer in Montreal covers the province of Quebec and the Maritime Provinces. The headquarters of the Chief Conciliation Officer are at Ottawa.

The following statement covers the more important conciliation matters dealt with during the period July 1 to September 30, 1937. (An article covering the period April 1 to June 30, 1937, appeared in the LABOUR GAZETTE, July, 1937, page 721.)

RAILROAD CONDUCTORS AND TRAINMEN, QUEBEC CENTRAL RAILWAY COMPANY, SHERBROOKE, P.Q.—In the October, 1936, issue of the LABOUR GAZETTE a reference was made to a dispute then before the Department of Labour involving the Quebec Central Railway Company and its conductors and trainmen. For a number of years these two groups had been covered by one agreement, negotiated through a committee representative of both classes. Early in the summer of 1936 when this committee requested a revision of the agreement they were advised that a newly constituted committee representing the conductors had requested a separate agreement covering that class only. The former committee objected to the company's recognizing the new committee and conceding to it the right to negotiated a separate agreement, and the management stated that the employees must first reach an agreement among themselves before negotiations could be considered. Officials of the Department of Labour endeavoured for several months to settle the dispute but their efforts were unavailing and serious friction developed. Consequently, early in September, 1937, His Honour, Albert Constantineau, Judge of the County Court for the Counties of Prescott and Russell, Ontario, was appointed a Commissioner under the provisions of Part I of the Inquiries Act to investigate the dispute. The appointment was made on the recommendation of the Minister of Labour in accordance with the provisions of Section 65 of the Industrial Disputes Investigation Act.

PRINTING PRESSMEN, HAMILTON, ONT.—On June 28, 1937, the services of a conciliation officer of the Department of Labour were requested in connection with a dispute between the National Paper Goods Company, Limited, Hamilton, and certain of its employees in the press room. The officer assigned to the case ascertained that the seven men involved had, on numerous occasions, requested wage increases. The request not having been granted, the men, on June 18, asked for their pay and ceased work. Some of them secured temporary employment elsewhere. The company at once started replacing the men and by the 23rd had employed sufficient help to continue the work. The general manager of the company stated that he was quite willing to re-engage his former employees when vacancies occurred but refused to discharge any of the men then working.

CLERKS, CHECKERS, ELEVATOR OPERATORS AND FREIGHT HANDLERS, DIGBY, N.S.—On July 17, 1937, an application was received in the Department of Labour for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act to deal with a dispute involving 46 clerks, checkers, elevator operators and freight handlers, members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, employed by the Canadian Pacific Railway Company at Digby, N.S. The application stated that the management of the company had declined to meet the employees' request for their inclusion in the agreement covering similar employees at Reed's Point Wharf, Saint John, N.B., and an adjustment in wages to conform to those specified in this agreement. Mediation by officers of the Department of Labour resulted in a settlement of the issue without the necessity of Board procedure. The agreement, which became effective September 1, 1937, covered the employees at Digby only and provided in-

creased rates of pay and minor changes in working conditions.

Tannery Employees, Toronto, Ont.—At the request of representatives of the Shoe Workers' Union and Allied Crafts, made on July 19, 1937, a conciliator of the Department of Labour endeavoured to reopen negotiations with the management looking to the reinstatement of certain former employees who had ceased work when a strike had been called by the union on June 1 in protest against the employment by the company of a non-union worker. The officials of the union had failed in their efforts to bring about an agreement covering wages and working conditions. The conciliator found that while the manager refused to confer with officers of the union and also that most of the vacancies had been filled, it was still possible to find employment for about 40 men. The attitude of the management was made known to the strikers' representatives, and, though the strike was not called off, a large majority of the men registered with the company for employment.

Cotton Factory Workers, Cornwall, Ont. —On July 20, 1937, a strike occurred of approximately 1,700 textile workers, members of the Cornwall local of the United Textile Workers of America, employed in three plants of Canadian Cottons, Limited, Cornwall, Ont., when the management of the company delayed in replying to a demand of the union for increased wages, certain changes in working conditions and recognition of the union. The conciliation services of the Department of Labour were requested by the local member of Parliament and by representatives of the union. Accordingly a departmental officer conferred, on July 22, with the general manager and other officials of the company at the head office in Montreal, and later the same day at Cornwall with a committee representing the strikers. The conciliator found that the strikers' committee was quite willing to co-operate with him, but there was no disposition on the part of the company to do likewise. For this reason he was unable to make any worth-while headway. Early in August, when efforts made by other parties had failed to dispose of the issue, the union again appealed to the Minister of Labour for intervention. The Minister at once offered to establish a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act with the understanding that work would be resumed at once pendong the setting up of the Board, which offer was accepted by the employees but rejected by the management on the ground that it preferred to have the matter dealt with by the Industry and Labour Board of Ontario. As the dispute was not one coming within the direct scope of the statute mentioned a Board could be established only on the joint consent of both parties. The case was later dealt with by the provincial Industry and Labour Board.

Hat Factory Workers, Brockville, Ont.— On June 26, 1937, a strike occurred of approximately 175 members of Hatters' Union No. 74, United Hatters, Cap and Millinery Workers' International Union, employed by the John B. Stetson Company (Canada) Limited, Brockville, Ont. The demands included increased wages, union recognition with a closed shop agreement, the elimination of the Bedeaux system, and certain minor concessions. The plant continued operations with about one-third the normal staff. Officials of the Ontario Department of Labour endeavoured to bring about a settlement, and officials of the federal Department of Labour also were kept informed of developments. A deadlock was reached, however, and early in August, the company announced that the ladies' hat division had been permanently moved to another centre and all the work in connection with fall orders for men's hats contracted for at outside points, but that if a sufficient number of the strikers would signify their desire to be retained as employees of the company an effort would be made to carry on a portion of the work at Brockville. Officers of both the federal and provincial Departments of Labour thereupon took joint action to bring about an adjustment. It was found that an understanding could be reached on all points with the exception of union recognition, but the strikers refused to drop this demand and the management of the company remained adamant in its refusal to make this concession. Subsequently further negotiations instituted by officials of the provincial Government resulted in an agreement being concluded on August 19. Provisions of the agreement included the abolition of the Bedeaux system, the reinstatement of all former employees as quickly as production permitted, the submission of the question of wages, hours and conditions of employment to the Industry and Labour Board under the provincial Industrial Standards Act, and the establishment of a shop committee to be elected by the workers. Provision was also made for the reference to an arbitration board of any future disputes which the shop committee and the management should be unable to settle.

Coal Miners, Cumberland and Nanaimo, B.C.—In the spring of 1937 miners, members of District No. 18, United Mine Workers of America, employed by the Western Fuel Corporation, Limited, Nanaimo, and Canadian

Collieries (Dunsmuir), Limited, Cumberland, B.C., which are under joint management, requested an agreement giving recognition to the union and providing increased rates of pay and changes in working conditions. Early in July, negotiations between the management and representatives of the miners having been unsuccessful, a conciliation officer of the Department of Labour endeavoured to arrange further conferences between the parties involved. The management stated, however, that it could not enter into any agreement which would entail increased operating costs. As the miners threatened to strike the conciliator urged that application be made for the establishment of a Board of Conciliation and Investigation as required by the Industrial Disputes Investigation Act. The application was subsequently made and a Board established. The dispute was terminated through this procedure.

Commercial Artists, Toronto, Ont.—At the request of representatives of the Commercial Artists' Union of Toronto, Ont., a conciliator of the Department of Labour interviewed, the latter part of July, the manager of the Stanley Manufacturing Company, Limited, in an effort to bring about the reinstatement of certain artists who had ceased work the latter part of April when a strike occurred of commercial artists employed by a number of firms in the city. Agreements had been reached in all the other cases. The manager of the company stated that the strikers had been replaced but that he could find employment for at least two of the men and, further, that he would be willing to re-employ the others when vacancies should occur. He declined, however, to reopen negotiations or to meet a committee for the purpose of reviewing the situation. Seven artists were involved in this particular dispute.

Grain Elevator Employees, Port Arthur and Fort William, Ont.—During the latter part of September, 1937, the Vice-President of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, informed the Department of Labour that difficulty was being experienced in securing agreements with the Manitoba Pool Elevators, Limited, the Saskatchewan Pool Terminals, Limited, the McCabe Brothers Grain Company, Limited, and the Eastern Terminal Elevators, Limited, covering their employees at the Head of the Lakes, and a request was made for mediation. An officer of the Department of Labour conferred with officials of the employing companies and officers of the union in Winnipeg, and later in Port Arthur and Fort William. It was ascertained that the employees desired an agreement covering wages and working conditions and recognition of the union as well. Officials of all the companies concerned stated that they were unaware that the employees had any grievances either as to wages or conditions of employment, and all stated that they were quite willing to meet a committee of the workers to discuss such matters. With the exception of the McCabe Brothers Grain Company, the companies stated they had no objection to a union representative attending any such meetings in an advisory capacity. The right of the Brotherhood to represent the majority of the employees involved was questioned but enquiries by the departmental officer showed that the majority of the men concerned were members of the union. At the close of September the indications were that a conference between the parties directly affected would be arranged. It was estimated that approximately 200 men are employed at these elevators.

Coal Miners, Hillcrest, Alta.—On September 18, 1937, an application was received in the Department of Labour, on behalf of coal miners employed by the Hillcrest Collieries, Limited, Hillcrest, Alta., for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act when efforts to secure an agreement with the company giving recognition to the United Mine Workers of America and embodying wages and working conditions had failed. The miners, members of Local Union No. 1058, threatened strike action. A mediator of the Department of Labour visited Hillcrest and interviewed both parties to the dispute. The general manager contended that there was an agreement in effect which did not expire until 1938 and, moreover, that he was unaware of any dissatisfaction as to wages or working conditions. He further stated that the United Mine Workers of America did not represent a majority of his employees, and he definitely refused to meet the committee of union members which had been appointed to represent the miners. The committee, upon being informed by the departmental officer as to this attitude, submitted in writing a list of their demands. The reply of the general manager indicated the possibility of a settlement on all points with the exception of union recognition, but he again refused to meet the committee on this ground, and the miners remained firm in their stand that this must be a feature of any agreement concluded. At the close of September the case was still before the Department. The application stated that 260 miners were affected by the dispute.

Seamen Employed on Ships Operating on the Great Lakes.—Announcement was made in September, 1937, by the Canadian Seamen's Union that a general strike would occur at midnight of September 28 of seamen, members of that union, employed by 22 shipping companies operating on the Great Lakes, unless agreements could be reached with the employers providing for wage increases of 15 to 20 per cent. It was also intimated that approximately 6,000 longshoremen, members of an International organization, would join in a sympathetic strike, thereby completely tying up shipping and preventing the fall shipments of grain from the Head of the Lakes to winter ports to be available for export purposes. The mediation services of the Department of Labour were requested by the secretary-treasurer of the union at Montreal, and a mediator at once arranged conferences between officials of several of the larger companies and representatives of the men. On the morning of the 28th the Department was advised that a settlement had been reached between the Canada Steamship Lines, the largest employer, and the Canadian Seamen's Union, and that negotiations with the other companies were under way. It was stated that more than 6,000 seamen would benefit by the increases of 15 per cent to 25 per cent. Approximately 3,500 seamen are affiliated with the union.

CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

Summary of Recent Decisions

REPORTS have been received of three cases settled recently by the Canadian Railway Board of Adjustment No. 1. Earlier decisions were outlined in the Labour Gazette, July, 1937, page 723, and in previous issues; and the sixth report of the proceedings of the Board, covering the period from October 1, 1933 to September 30, 1936, was issued as a supplement to the February, 1937, issue of the Labour Gazette.

The Board was established under a voluntary agreement concluded in 1918, between the various railway companies and certain of the railway organizations, its original purpose being to secure uninterrupted service on the railways during the continuance of the war. It has power to determine all differences arising between the railway companies and the members of any of the six railway brotherhoods, "including the interpretation of wage schedules or agreements having due regard to the rights of the several classes of employees and of the railways respectively."

The Board consists of six representatives of the railway companies and six representatives of labour, one for each of the following Railway Brotherhoods: The Brotherhood of Locomotive Engineers; The Brotherhood of Locomotive Firemen and Enginemen; the Order of Railway Conductors; the Brotherhood of Railway Trainmen; the Order of Railroad Telegraphers; and the Brotherhood of Maintenance of Way Employees and Railway Shop Labourers.

Case No. 461—The Canadian Pacific Railway (Western Lines) and the Order of Railway Conductors

This case, considered at Montreal on April 13, 1937, and September 14, 1937, concerned a dispute arising over the claim of a conductor from Calgary for 235 miles which he lost when displaced from a caboose at Wetaskiwin.

Employees' Contention.—The employees contended that the conductor making the claim, lost his caboose at Wilkie and had no other alternative but to go to Wetaskiwin and claim one of the cabooses which was vacant at that terminal. It was contended that he should not have been required to wait at the terminal until two conductors made another trip, or two trips, and endeavour to ascertain from these two men what they intended to do or whether or not one or both of them decided to go and fill the vacancies at Wetaskiwin. It was indicated, however, by one of the local officers that the conductor concerned could have taken one of the other conductor's place right out of Wilkie. The employees stated that this was not possible as the conductor whose place he could have taken made a trip out of Wilkie after he had been notified of the vacancies at Wetaskiwin. The conductor making this trip claimed to the operator on duty, that on account of being a senior conductor he had a right to claim the caboose standing "first out." It was also contended by the employees that the seniority articles of the schedule gives a senior conductor the preference in bidding on favoured runs or assignments but does not permit a senior conductor "in the chain gang" to claim a caboose first out when there are still other vacancies in a caboose in unassigned service.

Company's Contention.—The company claimed that none of the men involved were working out of Wetaskiwin, and none of them arrived in the terminal in working service, and that there can, therefore, be no contention

that they were entitled to be run out of the terminal in the order in which they arrived. The Company further contended that there was no vacancy until a crew was required, and that, in manning the caboose, seniority should prevail.

General Statement.—Representatives of the parties appeared before the Board and presented orally additional evidence and information. It developed that the real issue was the desire of the Conductors for an interpretation of the seniority provisions of the schedule for application under conditions as stated in the submission to the Board, and not particularly the claim for lost mileage in the individual case involved. It was the opinion of the Board that, when at any terminal vacancies exist for conductors in regularly set-up vans, senior classed conductors displaced as such elsewhere are entitled to be assigned to the vans in which vacancies exist, in the order of their booking-on at such terminal, until the crews in all set-up vans are complete. If before the vans in which the vacancies previously existed leave the terminal another conductor displaced elsewhere books-on for work he will, if his seniority entitles him to do so, take the van to which the junior conductor has been assigned.

In rendering its decision the Board sustained the contention of the employees in so far as it applies to the application of seniority rights. Regarding the conductor's claim, the Board was of the opinion that in all the circumstances in the case, good faith being evident in the action taken, the matter would be fairly disposed of if the conductor were allowed a minimum day's pay in lieu of any mileage lost.

Case No. 462—The Canadian Pacific Railway (Western Lines) and the Brotherhood of Locomotive Engineers.

This case, heard at Montreal on September 15, 1937, concerned the disputed claim of an engineer for switching time at Leoville in the Saskatchewan District.

The engineer making the claim was assigned to a series of mixed train runs between Prince Albert-Meadow Lake and North Battleford, and in the course of certain of the trips, runs from Panton Junction to Leoville and return, a distance of 4·1 miles in each direction, and the dispute was for the time at Leoville when making such trips.

Employees' Contention.—The employees contended that according to the Engineers' Schedule, switching is to be paid for at junctions and turn around points from time of arrival until the departure of the train, and that as the time table indicates Leoville is a turn around point for the trips in question time should be paid for as provided in the schedule rule.

Company's Contention.—The Company maintained that engineers have been paid miles or hours, whichever is the greater, on the trips between Meadow Lake and North Battleford which include the movement between Panton Junction and Leoville and the Company contended this was the proper method of payment under the agreement.

The Company further contended that Leoville was not a turn around point within the meaning of the rule. There are two classes of turn around points, first the intermediate point on a Subdivision at which a train may be turned back to its original terminal, and second that which is known as an established turn around point, where trains are regularly turned for tonnage purposes and where it is mutually agreed between the Company and the men that such point will be regarded as a turn around point. Leoville does not come within either of these categories.

Additional evidence was presented to the Board by the parties to the dispute, the Board ruling that under the conditions stated in this particular case Leoville could not be considered a turn around point within the meaning of the rule cited by the employees and therefore the claim of the employees was not sustained.

Case No. 463—The Canadian National Railways (Western Region) and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen

This case, heard at Montreal on September 15, 1937, concerned the claim of a conductor and crew for dead head mileage from Harlech, Alberta, to Mirror, Alberta, October 9, 1935. The conductor and crew involved in the dispute were employed in pile driver service just west of Harlech, and finished on October 9, 1935. On the same date their caboose was picked up by Extra 2168, East and deadheaded to Mirror.

Employees' Contention.—The employees contended that the crew in question, who were regularly assigned, to the pile driver service referred to, are entitled under the provisions of Rule 5, Article 5, Conductors Schedule; and Rule 6, Article 5, Trainmen's Schedule, to be paid deadhead mileage between the points where they finished work and the home terminal for crews on that particular division.

Company's Contention.—The Company maintained that it could not agree that liability for deadhead payment has been incurred due to the fact that the crew were moved from a certain point between two terminals.

Representatives of both parties to the dispute appeared before the Board and presented, orally, additional evidence and information.

The decision of the Board sustained the claim of the employees for payment of deadhead mileage to Mirror, Subdivision terminal.

STRIKES AND LOCKOUTS IN CANADA DURING SEPTEMBER, 1937

THE following table shows the number of disputes, workers involved, and time loss for September, 1937, as compared with the previous month and the same month a year ago:

Date	Number of disputes	Number of employees involved	Time loss in man working days
*Sept., 1937.....	34	7,007	44,378
*August, 1937.....	39	17,966	297,827
Sept., 1936.....	27	6,554	33,577

*Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes".

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

The number of strikes and lockouts recorded for September was slightly less than in August, but the number of workers involved and the time loss were lower because in August the strike of cotton factory workers in the Province of Quebec alone caused 200,000 days' time loss, and the strikes of cotton factory workers at Cornwall, Ont., steel workers at Sorel, P.Q., and lumber workers in New Brunswick resulted in considerable time loss, the total being the greatest in any month since 1925. During September there were no disputes involving large numbers of workers or causing great time loss except that of steel workers at Sorel, P.Q., carried over from August. Information has also been received as to a number of disputes for which particulars have not been furnished or verified so that they cannot be included in the statistical table, several of these being noted in later paragraphs and this number is greater than is usual. In September, 1936, strikes of silk factory workers at Cornwall, Ont., fur workers at Winnipeg, Man., and coal miners at New Waterford, N.S., and at East Coulee, Alta., caused most of the time loss.

Nine disputes, involving 1,823 workers, were carried over from August, including that of women's clothing factory workers at Toronto, Ont., which was reported to the Department too late for inclusion in the statistical table for the September issue of the Labour Gazette. Twenty-five disputes commenced during September. Of these thirty-four disputes, twenty-five terminated during the month, five resulting in favour of the workers involved, four in favour of the employers concerned, two being partially successful, while compromise settlements were reached in eleven cases, and the results of three were recorded as indefinite. At the end of September, therefore, there were nine disputes recorded as strikes or lockouts, namely: women's clothing factory workers, Toronto, Ont.; steel foundry workers, Sorel, P.Q.; coal miners, Midlandvale, Alta.; coal miners, Carbondale, Alta.; rubber factory workers, Kitchener, Ont.; wooden box factory workers, St. Boniface, Man.; brush factory workers, Gravenhurst, Ont.; dairy employees, Toronto, Ont., and scrap metal workers, Winnipeg, Man.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received, indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to six such disputes, namely: motion picture projectionists, Toronto, Ont., July 11, 1932, two employers; coastwise longshoremen, Vancouver, B.C., November 23, 1936, several employers; meat packing employees, Vancouver, B.C., December 29, 1936, one employer; beverage dispensers, Toronto, Ont., March 4, 1937, one employer; tannery workers, Toronto, Ont., June 1, 1937, one employer; and custom tailors, Toronto, Ont., May 20, 1937, one employer, the last being added to the list this month.

Disputes involving men on unemployment relief work who are not paid wages but receive subsistence or allowances for which work is performed or may be required are not included in the record, no relation of employer and employee being involved.

A strike of twelve employees in one skirt factory in Toronto, Ont., on August 18, members of the International Ladies' Garment Workers' Union, to secure increases in wages, was not reported in time for inclusion in the September issue of the Labour Gazette. Adjustments have been made and a union agreement signed. Work was resumed on August 24.

A minor dispute involving five bakers in one establishment at Hamilton, Ont., for less than a day on August 28 resulted in a closed shop agreement with the Bakery and Confectionery Workers' International Union. This was reported too late for the September issue of the Labour Gazette.

A minor dispute involving restaurant employees in one establishment in Vancouver, B.C., on September 8, owing to the dismissal of a cook, was settled in twenty minutes, reinstatement being secured.

A minor dispute involved four steel rod workers for four hours on a construction job at Vancouver, B.C., on September 9, resulting in a sub-contractor agreeing to pay union rates.

A strike of eighteen truck drivers on a highway construction job near Cochrane, Ont., for one hour on September 9 was reported to have resulted in an increase in wages.

A strike of five longshoremen at Sault Ste. Marie, Ont., for a few minutes on September 26 was reported to have resulted in an increase in wages from 30 cents per hour to 40 cents. On September 30 a similar dispute involved thirty longshoremen for two hours, demanding an increase in wages from 35 cents per hour to 45 cents, securing 40 cents.

A strike of three electricians at Kingston, Ont., on September 27 for an increase in wages from 70 cents per hour to 75 cents was reported to have been unsuccessful, the workers returning after two days.

A dispute involving moving picture machine operators in four theatres at Montreal, P.Q., occurred when the agreement between the International Alliance of Theatrical Stage Employees and Moving Picture Machine Operators of the United States and Canada and the management expired on August 31. The latter offered to agree to only part of a wage increase proposed, and a renewal of the agreement not being effected, members of a Canadian union were employed. The international union then refused to allow stage hands to work for a stage production in another theatre operated by the same management and certain performances were, therefore, reported to have been cancelled.

The crew of one steamship refused to move the ship in port to another wharf at Sarnia, Ont., on September 29 for a few hours until word had been received from Montreal as to the settlement of a dispute, referred to elsewhere in this issue, between the Canadian Seamen's Union and various shipping companies operating on the Great Lakes. A general strike had been called effective from midnight September 28 if a demand for increases in wages was not conceded.

Disputes by Industries

The following is a review of disputes by industries in which strikes and lockouts occurred during the month, giving particulars as to certain disputes in addition to the information given in the tabular statement.

Mining

One dispute involving coal miners at Wayne, Alta., was carried over from August and seven began during September. Two of these were unterminated at the end of the month.

The strike of coal miners at Wayne, Alta., from August 25 to September 8 involved one colliery where a new management proposed to operate on a co-operative basis. It was finally agreed that fifteen miners would do so, the remaining sixty-five being paid wages at the union scale.

The strike of coal miners at Midlandvale, Alta., which commenced on September 15 involved one company, the miners objecting to a change in the basis of payment for "bone" (rock-like coal) from that provided for in the agreement. A settlement was not reached by the end of the month.

A strike of coal miners at New Waterford, N.S., from September 21 to September 25 was against the transfer of pan shifters to other work every second day. The mine was closed, indirectly affecting 1,200 men. Work was resumed pending negotiations between the union and the management.

The strike of coal miners at Florence, N.S., was to secure increased wages for short wall miners. Work was resumed next day pending negotiations.

Manufacturing

VEGETABLE FOODS.—The strike of bakery workers in one establishment at Hamilton, Ont., for one day on September 13 resulted in a closed union shop agreement with increases in wages for bakers and a better scale for salesmen. It was reported that several other establishments not involved in the strike signed agreements with union wages and working conditions.

The strike of flour mill employees at Port Colborne, Ont., from September 22 to September 29 involved a number of the workers, members of a local of the National Council of Grain Processors of America. The management negotiated with the union representatives and stated its willingness to recognize the union if it included a majority of the employees, but not otherwise. Some time before the strike a union member was dismissed. Finally a resumption of work was arranged as a result of negotiations with union officials, a more satisfactory distribution of work in slack periods being agreed to but union recognition was not conceded. The plant was operated during the strike although pickets prevented some workers from entering.

Rubber Products.—The strike of workers in one establishment at Toronto, Ont., commencing in June owing to the discharge of union members, was terminated by the return of some workers and the application of others for their positions when available.

The strike of rubber workers at Kitchener, Ont., on September 23 was reported to involve all the employees in one establishment except office workers and foremen. The workers had joined the United Rubber Workers of America and demanded increases in wages with overtime rates and seniority rights, claiming that wages were lower than in other rubber plants in the locality. The management stated that an increase of seven and one-half per cent had been given in February with a holiday bonus and that it was not possible to increase wages further owing to the prices at which orders had been placed. On September 28 it was reported that a conference attended by a representative of the Ontario Department of Labour had not resulted in a settlement and at the end of the month the strike was unterminated. The establishment was picketed but no disorder occurred except that some windows were broken by boys who were turned over to the police by the pickets.

Boots and Shoes, Leather.—The strike of shoe factory workers at Port Colborne, Ont., on September 29 was settled on that day, the management conceding the demands of the strikers, except that on wages a compromise was reached.

Textiles, Clothing, Etc.—The strike of journeymen tailors in one establishment in Toronto, Ont., is recorded as lapsed, employment conditions being no longer affected and is included in the list of such disputes not called off or declared terminated by the unions involved.

The dispute involving employees in a children's dress factory in Toronto resulted from the dismissal of certain workers who had joined the International Ladies' Garment Workers' Union. It was reported that the employer agreed to reinstate the dismissed workers but later refused to do so and a settlement had not been reported by the end of the month. The dispute was not reported in time for inclusion in the September issue of the Labour Gazette.

The strike of silk factory workers at Acton Vale, P.Q., which commenced on August 11 was terminated by the end of September. Some of the workers returned on September 10 and the others were replaced. The employer secured an injunction against picketing and a number of pickets charged with assault, carrying arms and rioting were remanded for trial at the next assizes, while charges against others were dropped and one was convicted but released on suspended sentence.

The strike of men's clothing factory workers at Cornwall, Ont., which commenced on August 25 was terminated on September 15 as a result of negotiations. It was agreed that the employees would be classified by the inspectors for the industry under the Industrial Standards Act and paid according to the scale; hours of work to be eight per day and forty-four per week, improvements in sanitation, ventilation and factory conditions to be arranged between the management and union committee.

The strike of silk factory workers on September 4 at Louiseville, P.Q., was terminated as a result of conciliation by an official of the Quebec Department of Labour. It was agreed that work would be resumed on September 13, that a dismissed union worker would be reinstated and that wages would be in accordance with a scale for the industry to be established under the Quebec Fair Wage Act; also that there would be freedom of association and preference in employment for union members.

The strike of embroidery workers in twenty-four establishments in Montreal on September 9 followed conferences between the International Ladies' Garment Workers' Union and the employers, an agreement not being reached. Ten of the employers were reported to have signed agreements, these employing about sixty per cent of the workers in the industry. On September 10 an agreement was reached with nearly all of the others providing for the forty-four hour week, increases in wages of $2.00 per week to women and $5.00 per week to men, closed union shop, a joint committee to consider further changes in wages, the result to be embodied in a collective agreement with an arbitration clause to be submitted for approval by the government and made binding on the industry under the Quebec Workmen's Wages Act, 1937.

Miscellaneous Wood Products.—The strike of lumber mill workers and loaders (longshoremen) at Campbellton, N.B., on August 27 involved employees in one sawmill, one sash and door factory and about one hundred longshoremen employed to load and unload lumber, pulp., etc., at the port. The strikers demanded recognition of the New Brunswick Farmer-Labor Union, a minimum wage of 28 cents per hour in the mills and 50 cents for loading ships. The employers proposed that work be resumed pending a decision by the

provincial Fair Wage Board appointed on August 4 but this was refused. The sawmill operator offered to increase the minimum wage to 28 cents but the strikers decided to remain out until the sash and door factory operator also agreed. The Fair Wage Board arrived in the town on August 30 and being unable to deal with the dispute until work was resumed, were reported to have interviewed some of those involved. One employer of longshoremen agreed to pay 50 cents and 75 cents for overtime and a boat was unloaded and loaded. The local president of the union was arrested on September 2 on a charge of causing a public disturbance in connection with picketing and was released on bail. A citizen's committee mediated between the parties in the dispute and a settlement was reached providing for 28 cents as a minimum for mill workers and a reduction in hours from ten per day to nine. Longshoremen resumed work on September 6 and the mill workers on September 7.

The strike of furniture factory workers at Preston, Ont., was due to a dispute as to classification under the code for the furniture industry under the Ontario Industrial Standards Act (Labour Gazette, April, 1937, pp. 410 and 457) following a strike in various localities in March. A settlement as to the application of the code was reached. Union recognition was not conceded but a shop committee to deal with grievances was agreed upon.

The strike of box factory workers at St. Boniface, Man., was due to a dispute as to seniority when staff was reduced. The workers claimed that men were laid off and boys retained because the minimum wage for them was lower. A dispute in July had been settled by the Manitoba Department of Labour under the Strikes and Lockouts Prevention Act, 1937, a schedule of wages and working conditions being agreed to by the employer and delivered to the Department. The provincial investigator, in accordance with the terms of this undertaking, met the parties to the dispute but a tentative settlement providing for a minimum rate of 25 cents per hour for men displacing boys was not ratified by the management. The men later ceased work when called on to work overtime and when more men were laid off. At the end of the month a settlement had not been reached.

Metal Products.—The strike of foundry and shipyard workers at Sorel, P.Q., which commenced on August 4 as a result of dissatisfaction with an arbitration award following strikes in May and June, was not terminated by the end of September. By the end of August the plants were in partial operation, several hundred of the strikers having resumed work. On September 6 the Premier of Quebec called the representatives of the parties in dispute to meet him. The employers' offer of a settlement under the Quebec Fair Wages Act was referred to a vote of the strikers and defeated on September 12. On September 20 the strikers asked the Mayor to attempt a settlement and to prohibit the entry of outsiders into the city to work and have the provincial police withdrawn since there were no more disturbances. On September 24 picketing was resumed and a number of pickets were arrested on charges of intimidation and remanded on bail for trial. The Mayor reported that the employers refused to recognize the union or negotiate with it. Early in October a settlement was reached, the employers signing an agreement with the union.

The cessation of work in the bar mill of the steel plant at Sydney, N.S., on September 15 resulted from a dispute as to the employment of a substitute rollerman following a change in the distribution of men employed, alleged to be disadvantageous to union employees. The union claimed that the men on one shift were locked out when the shift was shut down owing to the illness of a roller, the company refusing to employ either of two men recommended by the union on a seniority basis, and called out on strike the men on the other shifts. The Deputy Minister of Labour of Nova Scotia was asked to intervene and he proposed that work should be resumed pending a settlement. Failing to agree on the man to be employed as substitute in the meantime, the men in the rod mill ceased work and this led to the wire and nail departments being closed later, involving about forty per cent of the plant indirectly and curtailing work in a nail mill at St. John, N.B. On September 24 at a meeting of the provincial Deputy Minister of Labour with the management and union representatives headed by the Nova Scotia International Board Member of the United Mine Workers of America, in charge of organization for the Amalgamated Association of Iron, Steel and Tin Workers of America, a settlement was reached providing for a rearrangement of the staff and provision for a substitute roller. Work in the bar and rod mills was resumed on September 25, and it was expected that the other departments indirectly affected would resume work in a few days.

The strike of moulders in Guelph, Ont., was due to the layoff of two moulders, the union claiming discrimination while the management said business had fallen off and an injured man had returned to work. As a result of negotiations between union representatives and the management a settlement was reached providing that one man would be given work else-

STRIKES AND LOCKOUTS IN CANADA DURING SEPTEMBER, 1937*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(a) Strikes and Lockouts in progress prior to September, 1937				
MINING, ETC.—				
Coal miners, Wayne, Alta.	1	80	560	Commenced Aug. 25, 1937; against working on co-operative basis; terminated Sept. 8, 1937; negotiations; compromise.
MANUFACTURING—				
Rubber Products—				
Rubber factory workers, Toronto, Ont.	1	35	300	Commenced June 21, 1937; against discharge of workers alleged to be for union activity; terminated Sept. 11, 1937; return of workers; in favour of employer.
Textiles, Clothing, etc.—				
Tailors (custom), Toronto, Ont.	1	20	200	Commenced May 20, 1937; for union recognition, wage increases, etc.; employment conditions no longer affected by end of September; replacement; in favour of employer.
Dress factory workers (children's), Toronto, Ont.	1	5	130	Alleged lockout of union workers, commenced Aug. 2, 1937; unterminated.
Silk factory workers, Acton Vale, P.Q.	1	100	1,200	Commenced Aug. 11, 1937; for closed shop agreement with increased wages; terminated Sept. 30, 1937; return of workers and replacement; in favour of employer.
Men's clothing factory workers, Cornwall, Ont.	2	250	3,000	Commenced Aug. 25, 1937; for union recognition and against dismissal of union workers; terminated Sept. 15, 1937; negotiations; in favour of workers.
Miscellaneous Wood Products—				
Lumber mill workers and lumber loaders, Campbellton, N.B.	.....	300	1,500	Commenced Aug. 27, 1937; for increased wages, reduced hours and union recognition; terminated Sept. 6, 1937; compromise.
Metal Products—				
Steel foundry and shipyard workers, Sorel, P.Q.	5	900	15,000	Commenced Aug. 4, 1937; dissatisfaction with wage rates reached in settlement of strike on June 3; unterminated.
Non-Metallic Mineral Products—				
Lime plant workers, Blubber Bay, B.C.	1	133	1,000	Commenced July 23, 1937; for union recognition and increased wages; terminated Sept. 9, 1937; negotiations; compromise.
(b) Strikes and Lockouts commencing during September, 1937				
AGRICULTURE—				
Fruit pickers, Vernon, B.C.	1	38	38	Commenced Sept. 6; for increased wage rates; terminated Sept. 6; replacement and return of workers; in favour of employer.
Greenhouse employees, Brampton, Ont.	1	40	25	Commenced Sept. 9; for increased wages; terminated Sept. 9; negotiations; compromise.

STRIKES AND LOCKOUTS IN CANADA DURING SEPTEMBER, 1937*—*Continued*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(b) Strikes and Lockouts commencing during September, 1937—Continued				
MINING, ETC.—				
Coal miners, New Waterford, N.S.	1	900	900	Commenced Sept. 2; against change to night shift for one worker; terminated Sept. 2; negotiations; compromise.
Coal miners, Caledonia, N.S.	1	230	460	Commenced Sept. 8; *re* substitution of worker; terminated Sept. 10; return of workers pending negotiations; indefinite.
Coal miners, Aerial, Alta.	1	104	520	Commenced Sept. 7; alleged violation of agreement as to working conditions; terminated Sept. 11; negotiations; in favour of workers.
Coal miners, Midlandvale, Alta.	1	100	1,400	Commenced Sept. 15; against change in payment for "bone"; unterminated.
Coal miners, Carbondale, Alta.	1	11	121	Commenced Sept. 18; for increased wages; unterminated.
Coal miners, New Waterford, N.S.	1	14 (a)	56	Commenced Sept. 21; against change in working conditions; terminated Sept. 25; negotiations; indefinite.
Coal miners, Florence, N.S.	1	600	600	Commenced Sept. 30; for increased wages; terminated Sept. 30; return of workers pending negotiations; indefinite.
MANUFACTURING—				
Vegetable Foods—				
Bakery workers, Hamilton, Ont.	1	51	38	Commenced Sept. 13; for union recognition, increased wages, reduced hours and improved conditions; terminated Sept. 13; negotiations; in favour of workers.
Flour mill workers, Port Colborne, Ont.	1	65	390	Commenced Sept. 22; for recognition of union, reinstatement of discharged union worker and better distribution of work in slack periods; terminated Sept. 29; negotiations; partially successful.
Rubber Products—				
Rubber factory workers, Kitchener, Ont.	1	600	4,200	Commenced Sept. 23; for increased wages, overtime rates after ten hours, etc.; unterminated.
Boots and Shoes—				
Shoe factory workers, Port Colborne, Ont.	1	400	400	Commenced Sept. 29; for union recognition, wage increase, reduced hours; terminated Sept. 29; negotiations; partially successful.
Textiles, Clothing, etc.—				
Textile factory workers, Louiseville, P.Q.	1	730	5,000	Commenced Sept. 4; for increased wages and reinstatement of union workers; terminated Sept. 11; conciliation (provincial); compromise.

STRIKES AND LOCKOUTS IN CANADA DURING SEPTEMBER, 1937*—*Concluded*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(b) Strikes and Lockouts commencing during September, 1937—Concluded				
Embroidery factory workers, Montreal, P.Q.....	24	500	1,500	Commenced Sept. 9; for union agreement, increased wages and reduced hours; terminated Sept. 11; negotiations; in favour of workers.
Miscellaneous Wood Products—				
Furniture factory workers, Preston, Ont.....	1	60	180	Commenced Sept. 9; for adjustment in wage rates and for union recognition; terminated Sept. 11; negotiations; compromise.
Wooden box factory workers, St. Boniface, Man..	1	80	1,040	Commenced Sept. 16; alleged violation of seniority rule; unterminated.
Metal Products—				
Steel (bar mill) workers, Sydney, N.S.....	1	150	1,500	Alleged lockout, commenced Sept. 15; *re* employment of substitute workers; terminated Sept. 25; conciliation (provincial); compromise.
Steel (rod mill) workers, Sydney, N.S.....	1	140 (b)	1,100	Commenced Sept. 16; sympathy with dispute in bar mill (Sept. 15); terminated Sept. 25; conciliation (provincial); compromise.
Moulders, Guelph, Ont....	1	48	144	Commenced Sept. 18; against dismissal of workers; terminated Sept. 21; negotiations; compromise.
Miscellaneous—				
Brush factory workers, Gravenhurst, Ont.....	1	148	1,036	Commenced Sept. 23; for closed shop agreement; unterminated.
Construction—				
Railway (Electric)—				
Labourers, Galt district, Ont.....	1	40	80	Commenced Sept. 14; for increased wages; terminated Sept. 15; conciliation (provincial); in favour of workers.
Transportation—				
Water—				
Longshoremen, Quebec, P.Q.....	1	40	20	Commenced Sept. 11; for increased wages; terminated Sept. 12; negotiations; compromise.
Trade—				
Dairy employees, Toronto, Ont.....	1	55	660	Commenced Sept. 17; for closed shop union agreement; unterminated.
Scrap metal workers, Winnipeg, Man.....	1	40	80	Commenced Sept. 29; for increased wages, reduced hours and recognition of union; unterminated.

* In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

(a) 1,200 indirectly affected.

(b) 450 indirectly affected.

where in the plant and the other recommended for compensation for silicosis.

NON-METALLIC MINERALS.—The strike of workers in an establishment at Blubber Bay, B.C., on July 23, operating a limekiln, quarry and fuel plant, involved members of the Lumber and Sawmill Workers' Union, who demanded union recognition and wage increases of seven and one-half cents per hour. The strikers were supported by unions in Vancouver and by longshoremen's and seamen's unions in the United States refusing to handle shipments from the plant. As a result of negotiations a settlement was reached on September 8, the management agreeing to increase wages by three and one-half cents per hour with corresponding increases for piece workers and for loading boats; time and one-half for overtime and recognition of a shop committee, but not of the union, being also agreed upon.

MISCELLANEOUS MANUFACTURING.—The strike of brush factory workers at Gravenhurst, Ont., involved members of the Gravenhurst Unit No. 1, Transport and General Workers of Canada, affiliated with the Canadian Federation of Labour, organized in April. The management had negotiated with the union and agreed on wages with the understanding that an agreement would be signed later. The negotiations for this broke down and the strike followed, no settlement being reached by the end of the month.

Construction

RAILWAY (ELECTRIC).—Labourers engaged on alterations in the right-of-way, made necessary by the construction of a provincial highway, demanded the rate of pay for highway construction, 35 cents per hour, instead of 25 cents, the railway rate for extra gang work. The company referred this to the government and on its approval, work was resumed after two days.

Transportation

WATER.—Longshoremen at Quebec, P.Q., employed for river steamboats, demanded increases in wage rates from 32 cents per hour for day work and 35 cents for night work to 40 cents for day work, 50 cents for night work and 60 cents for Sunday. While this was under consideration a boat arrived and the longshoremen refused to handle the cargo, and this was done by the crew. On the following day the employer agreed to pay 40 cents for day work, 45 cents for night work and 50 cents for Sundays. Work was performed on the next boat arriving.

Trade

Dairy employees, members of the Milk Drivers' and Dairy Employees' local of the International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers, employed by one dairy company in Toronto, Ont., ceased work on September 17 when negotiations during some months for a closed shop agreement did not result in a settlement. The union sought changes in wages but the closed union shop appears to have been the point on which negotiations broke down. No settlement had been reported by the end of the month.

The strike of scrap iron workers, members of the Metal Workers' Union, was stated by the employer to be contrary to the terms of the Manitoba Strikes and Lockouts Act, 1937, and he applied to the government for the appointment of a Board under the Act.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

The latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the March issue, in the review of Strikes and Lockouts in Canada and Other Countries, 1936. The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the several countries for which such figures were available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the figures are not for relatively recent dates. Statistics given in the annual review and in this monthly article are taken as far as possible from the government publications of the various countries concerned, while information as to particular disputes is obtained for the most part from newspaper reports.

Great Britain

The number of disputes beginning in August was 134 and 12 were still in progress from the previous month, making a total of 146 in existence during the period, involving about 74,500 workers, with a resultant time loss of about 228,000 man working days. While the number of strikes shows an increase of 60 per

cent over the number for July, there is a decrease of almost 40 per cent in the number of workers involved and a decrease of about 55 per cent in the time loss.

Of the 134 disputes beginning in August, 37 arose out of demands for increases in wages, 3 were against decreases in wages, and 34 were over other wage questions; 8 were over questions of working hours, 22 were over questions respecting the employment of particular classes or persons, 12 were over other questions regarding working arrangements, 13 were over questions of trade union principle, 1 dispute was due to sympathetic action and 4 arose out of demands for the withdrawal of summonses against certain workers for breach of contract.

Final settlements were reached in 107 disputes of which 23 were settled in favour of the workers, 57 in favour of the employers and 27 resulted in compromises. In the case of 13 other disputes work was resumed pending negotiations.

United States

Preliminary estimates of strikes in July, 1937, which as the Bureau of Labour Statistics points out, are based on "scattered information from newspapers and other sources, and are subject to revision as more definite reports are received," show 475 strikes as beginning during the month, which with 340 unterminated at the end of June, made a total of 815 in progress during the period. The number of workers involved was 345,000 and the time loss was 2,900,000 man working days. As compared with the preceding month, these figures indicate decreases of 20 per cent in the number of workers involved in the strikes beginning during the month and 36 per cent in time loss in man working days. As compared with July, 1936, the estimates for July of this year show increases of 175 per cent in the number of strikes, 334 per cent in the number of workers involved, and 162 per cent in the amount of time loss.

On September 1, a dispute between the International Longshoremen's Association, an affiliate of the Committee for Industrial Organization, and the International Teamsters and Chauffeurs' Union, affiliated with the American Federation of Labour, arose at San Francisco over matters of jurisdiction. Both unions claim the right to organize warehousemen.

The teamsters refused to handle any freight to or from the docks after pickets connected with the Committee for Industrial Organization had refused them admission to a packing plant. The striking teamsters numbered about 500 but the longshoremen who were affected numbered about 2,500 men at work with about the same number subject to call. The dispute spread to other western ports affecting seamen and in some cases other industries dependent on water transportation for the distribution of their products. At one time the teamsters threatened to call out their entire membership on the west coast. On September 28, it was announced that a "truce" had been arranged in response to a request of the farmers of California and out of respect for the welfare of the people of San Francisco.

Railroad-Labour Productivity in the United States

According to an article entitled "Productivity, Hours, and Compensation of Railroad Labour, 1933 to 1936," appearing in the *Monthly Labor Review* published by the United States Department of Labor, the average man-hour output of employees of Class I steam railroads in the United States, excluding principal salaried employees, increased 81 per cent in the period 1916 to 1936, and 33 per cent from 1926 to 1936. Much of this increase in productivity accompanied the recent upturn in business, although it is observed that in 1936 the amount of revenue traffic was still 26 per cent less than in 1926. The main causes of the increased productivity are attributed to a wide variety of technological changes. It is stated that these changes and the depression most seriously affected the unskilled groups such as truck and roadway section labourers.

Manitoba Fair Wage Rates

The Fair Wage Schedule fixing minimum rates of wages and maximum hours per week on public and private works as these are defined in the Fair Wage Act which was approved by the Manitoba Minister of Public Works in May, 1937, and published in the Labour Gazette, June, 1937, has been amended to increase by five cents the minimum rate per hour for certain classes of workmen employed in the City of Winnipeg, or within a radius of 30 miles from September 1, 1937. The schedule is to remain in effect until May 1, 1938, unless amended.

"Private works" means the construction, demolition or repairing of any work costing more than $100 but does not include work which is on property or under the immediate direction of the owner or tenant if not more than three men are employed and if the work is not done with a view to the sale or rental of the property.

The new rates are based on an agreement made between certain employers and employees and are as follows: bricklayers $1.10; carpenters ·85; marble setters $1.05; mosaic and tile setters $1.05; operating engineers and firemen on construction, class A, ·95, Class B, ·90, class D, ·55; and plasterers $1.10.

FIFTY-THIRD ANNUAL CONVENTION OF THE TRADES AND LABOUR CONGRESS OF CANADA

Proceedings Featured by Discussions on Right to Organize, B.N.A. Act Amendment, Trade Union Unity and International Peace.

THE fifty-third annual convention of the Trades and Labour Congress of Canada, held in the Chateau Laurier Hotel, Ottawa, September 13-18, 1937, was one of the largest and most representative ever held by that body. Credentials were received from 478 delegates, including 47 representatives of international organizations which had the whole of their Canadian memberships in affiliation with the Congress, 4 representatives of provincial federations and associations, 38 representatives of trades and labour councils, 14 representatives of system divisions of telegraphers, 373 representatives of local branch unions, and 2 fraternal delegates, one representing the American Federation of Labor and the other representing the British Trades Union Congress.

The formal opening of the convention was presided over by P. J. Tompkins, president of the Ottawa Allied Trades and Labour Association, who welcomed the visiting delegates to the capital city on behalf of local organized labour. The civic welcome was extended by Mayor Stanley Lewis, who in the course of a short address referred to his interest in the work of the Congress, and to the respected position of that body in the national life of the Dominion. Addresses of welcome were also given by Alderman Rodolphe Gratton of Hull and Alderman H. D. Marshall of Ottawa.

Featuring the opening session was the address of the Honourable Norman McLeod Rogers, Minister of Labour, representing the federal Government, and the keynote speech of President P. M. Draper. During the week the convention also heard addresses by the following: R. A. Henning, fraternal delegate from the American Federation of Labor; F. J. Hancock, fraternal delegate from the British Trades Union Congress; Ernest J. Dash, president of the Amalgamated Society of Railway Servants of New Zealand; W. S. Sparks, general chairman of the Brotherhood of Railway and Steamship Clerks for Newfoundland; Lucien Rodier, solicitor for the Montreal Trades and Labour Council; and J. S. Woodsworth, M.P., Winnipeg.

Address by Minister of Labour

Hon. Mr. Rogers, in extending to the delegates an official welcome on behalf of the Dominion Government, declared that labour's viewpoint is worthy of careful consideration by all governments in the development of social and economic policies. At the same time, he expressed his confidence that the delegates would conduct their deliberations in a spirit of tolerance and with a view to the best interests of the nation as a whole. The Minister recalled that over a period of years the Congress had been urging amendment of the British North America Act to enable the passage of effective social legislation. "No one," he continued, "who is aware of what is happening in other countries can doubt the increasing importance of measures designed to relieve the insecurity of industrial employment and the value of such measures in removing some of the basic causes of industrial unrest. In Canada our lack of a precise assignment of legislative jurisdiction over industrial relations and social services has led in some cases to duplication of services and in other cases to hesitation and inaction in dealing with problems of vital importance to industry and labour. Whether we favour national or provincial jurisdiction as the proper method of dealing with particular aspects of the industrial problem, it is clear, I think, that the responsibilities of the Dominion parliament and the provincial legislatures should be reviewed and clarified in order that we may know our proper obligations in each jurisdiction and be held accountable accordingly for what we do or fail to do." The Minister stated his belief that organized labour would take full advantage of its opportunity to place its views before the recently-appointed royal commission on Dominion-provincial relations.

Referring to industrial peace, Hon. Mr. Rogers emphasized that it is equally important to employers, to labour and to the community as a whole. The exercise of reason, forbearance, goodwill and mutual respect he listed as prerequisites to industrial peace on just and honourable terms. Granted the existence of these conditions, he said, "our experience has proved that much can be accomplished once employers and employees are brought into an habitual relationship of conference and direct negotiation, and with a sense of obligation to the community as a whole." Goodwill and good faith in the observance of agreements, he declared, are indispensable in the development of collective bargaining.

The Minister concluded his address with the following remarks in support of the view that collective bargaining is the path most likely to lead to industrial peace in a democracy:

"The practice of collective bargaining has been founded on the principle of freedom of association. The right of the individual to associate with others for all lawful purposes is a vital element in our inheritance of freedom, ranking with freedom of speech and freedom of the press. It has been the cornerstone of the labour movement in this and other countries. Like other rights it carries with it the obligation that it shall be exercised with a sense of responsibility to the national community which stands above all other associations whether of employers or employees. In the long run our recognition of the obligations attached to freedom is the true measure of our ability to enjoy the advantages of self-government. I believe the practice of collective bargaining will go steadily forward in Canada as it becomes more and more apparent that organized labour while insisting on its rights is conscious also of its responsibility to contribute to goodwill and mutual confidence in the conduct of industrial relations."

President's Address

Mr. P. M. Draper, president of the Congress, expressed appreciation of the complimentary references of previous speakers to himself and to the international labour movement. He congratulated the Hon. Mr. Rogers "on his admirable address, as the points dealt with are vital to our movement and as such will receive the attention of the delegates during the convention." It was the desire of those represented by the Congress that collective bargaining should be negotiated on a just and honourable basis. In referring to proposed amendments to the British North America Act the president expressed what he believed to be the opinion of the delegates, that these amendments were long overdue. The delegates were urged to make proper representations to the Royal Commission that had been appointed to secure information on this very important question. The speaker expressed the hope that the Government would implement the recommendations of the Commission.

President Draper drew a comparison of the meeting of the Congress held in Ottawa 37 years ago, when the numerical strength of that body was 9,000, with the present convention, when approximately 150,000 members were paying their per capita tax. In a reference to the automobile workers' strike at Oshawa, which followed a disagreement with their employers, the president congratulated the members of the union for the manner in which they conducted the strike and the peaceful efforts put forth to better the conditions of the workers.

In drawing the attention of the delegates to legislation passed by the government of the province of Quebec, President Draper referred particularly to the Act Respecting Workmen's Wages and the Fair Wage Act, neither of which, he contended, recognized a trade union. He warned the workers to guard against losing their freedom of association and the right to join unions of their own choosing. The speaker was emphatic in declaring that labour was not going to submit to regimentation by any government.

The Prime Minister and his Cabinet were commended for the stand they took on resisting attempts made to have the immigration law changed so as to prevent organizers of international unions from the United States coming into Canada.

The delegates were asked to demonstrate that they stood for unity and loyalty to the trade union movement.

Addresses of Fraternal Delegates

Delegate from American Federation of Labor.—After extending fraternal greetings from the American Federation of Labor, Mr. R. A. Henning, of the International Association of Machinists, informed the delegates that the A. F. of L. did not interfere with the organizational activities of national or international unions, its main function being the securing of favourable labour legislation through Congress and the assisting of the various state federations in securing state legislation. Mr. Henning mentioned a number of laws which were of special interest to labour that had been enacted in the United States during the past year. Other matters of concern to labour were the elimination of the various superannuation schemes on the different railroads and the taking of a census of the unemployed. Figures were quoted to show the large reduction in the number of unemployed since March, 1933. Reference was made to the efforts put forth to secure the necessary number of state legislatures to ratify the Child Labour Amendment in order that the Constitution might be changed accordingly. Mr. Henning disagreed with the political pronouncements of some of the speakers. It was his opinion that the workers' real strength lay in labour organizations.

The speaker observed that at the coming convention of the American Federation of Labor the numerical strength of that body would approximate 4,000,000, and cited some fourteen affiliated organizations that had made large gains. Referring to the shop crafts, Mr. Henning stated that these organizations had been adversely affected since 1922

but at the present time they had reached the peak in the history of the crafts.

Delegate from the British Trades Union Congress.—Mr. F. J. Hancock, president of Midland Miners' Union, expressed his pleasure in being permitted to convey to the officers and delegates the fraternal greetings from the British Trades Union Congress. He traced the development of the British movement and cited the many difficulties that had to be overcome before it reached its present standing.

In referring to the unemployed organizations, the speaker informed the delegates that these associations were not affiliated with the Congress but that the local organizations had a place for them within their ranks. These unemployed workers pay a small contribution and are therefore entitled to representation on the various bodies.

Mention was made of the National Insurance Act, which Mr. Hancock stated was a boon to the British worker. It is a contributory scheme after the worker has been employed for a short period, and if payments are maintained he is entitled to certain benefits. When the worker reaches the age of 65 years he receives a pension, and if he dies the pension is paid to his widow.

He considered that in the establishment of a new order of society the workers, manual and brain, should have first consideration. Mr. Hancock expressed the opinion that there were goods sufficient for all but no money to buy—no work, no pay—and he believed that this question could not be solved by the trade union movement alone but the workers would have to use the political arm of the movement as well.

The speaker traced the development of the National Labour Party, which, he stated, aims to bring together all those who subscribe to its policy. This policy was not to confiscate but to compensate.

In speaking of the co-operative movement, Mr. Hancock was surprised that this movement was not more thoroughly established on the North American continent. In Great Britain, he stated, there are 8,000,000 people purchasing from the co-operative establishments.

The membership of the British Trades Union Congress was stated to be over 5,000,000.

Report of the Executive Council

In opening its report the executive referred to the legislative program submitted to the Dominion Government on December 18, 1936, (a summary of the legislative program was published in the January, 1937, issue of the Labour Gazette, page 38). The report contained a review of the second session of the eighteenth parliament, giving a summary of the more important items coming before the House, as well as briefly outlining the legislative work of the Congress in the various provinces.

Workers' Right to Organize.—Under this heading the report set out the steps taken by the executive to carry out the instructions of the Montreal convention in this respect. A conference between the executive council and representatives of affiliated organizations was called to consider the whole question. Following this conference, the executive prepared a draft bill, the chief purpose of which was to render it lawful for employees to form themselves into trade unions. In view of the fact that under the British North America Act such enactments were the prerogative of the provinces, the draft bill, accompanied by legal opinion, was submitted to the various legislatures. The bill was enacted by the legislatures of the provinces of Alberta and Nova Scotia, while the Manitoba legislature accepted the principle. The statement issued on December 30, 1936, by Hon. Norman McL. Rogers, federal Minister of Labour was quoted to show the position of the present Canadian Government in relation to the question of the workers' right to organize. The executive recommended that the federal Government be requested to insert the conditions contained in the draft bill in all contracts awarded by the Dominion and in those to which the Dominion contributes directly or indirectly, as is now done with respect to fair wages and hours of labour.

British North America Act.—The report showed that as early as 1887 the Congress had urged revision of the British North America Act. Reference was made to the decision of the Judicial Committee of the Privy Council on a number of social and labour enactments which declared these laws unconstitutional on the general ground that the provinces alone have the necessary legislative jurisdiction. The amendments to the British North America Act sought by the Congress are as follows:

1. To ensure full competence of the Federal Government to enact any social and labour legislation affecting Canada as a whole, and particularly that included in the draft conventions and recommendations of the International Labour Office (League of Nations).

2. To permit Federal control over industrial and commercial activities essential to ensuring observance of proper labour standards and to eliminate unfair competition between provinces.

3. To empower the Federal authorities to regulate highway transport, thus eliminating unsafe standards of operation and unfair com-

petition with other established methods of transportation.

4. To restrict powers of the Senate to veto any bill passed at three separate sessions of the House of Commons, which practice is in harmony with that of the British Parliament.

5. To abolish appeals to the Privy Council.

Use of Injunction in Industrial Disputes.—The report drew attention to the number of injunctions against labour unions which had been issued by the courts during the past year. The executive recommended that a model act should be prepared, following the lines of the English Trade Disputes Act of 1906 and the various statutes of the United States dealing with the subject, setting forth exactly what trade unions may be permitted to do in connection with trade disputes, and with a provision that the process of injunction should not be permitted by the courts in such cases, this model act to be presented to the various provincial Governments with the request that it be enacted at the next session of their respective legislatures. The committee on officers' reports added another clause which instructed the executive council to endeavour to have the Criminal Code amended so that the workers may have the undisputed right to picket.

Free Speech, Press and Assemblage.—Attention was called to the alleged invasion of the domain of free speech, press and assemblage during the past year. It was contended that the safety of free life and free government lies in maintaining freedom of speech, press and assemblage, and the executive council recommended that the provincial executive committees and federations of labour urge upon the various provincial governments, where such freedom has been invaded, to repeal these restrictions.

Among other subjects dealt with in the executive council's report were: International Labour Conference; international peace and disarmament; the closed shop; the unemployed youth; independent labour political action; immigration; signed wage agreements; holidays with pay; and employers who oppose trade unions.

Report of Secretary-Treasurer

The financial statement presented by Mr. R. J. Tallon, secretary-treasurer, showed total receipts from all sources for the fiscal year ending August 31, 1937, including the balance brought forward from last year and revenue from Congress headquarters, amounting to $33,232.68, with expenditures totalling $22,570.48, leaving a balance of $10,662.20.

The total membership upon which per capita tax had been paid was 131,105, an increase of 18,133 as compared with that reported for 1936. The secretary-treasurer explained that the membership reported did not include those who, while still active members of affiliated organizations, were relieved, because of unemployment or other causes, from payment of their regular contributions. The report further showed that there were 62 international and four Canadian central bodies in affiliation with the Congress.

The Audit Committee, to which the secretary-treasurer's report was referred, found the financial statement correct and its recommendation of approval was adopted.

Committee on Legislative Activity

In the report of the committee on legislative activity the federal Government was criticized for the lack of effective measures taken to supplement the legislative demands of the Congress, especially as regards unemployment and more particularly the unemployed youth of the country. It was also pointed out by the committee that the Government had not taken action on the recommendation of the National Employment Commission nor on the request of the Trades and Labour Congress regarding a housing program, slum clearance, etc. It was considered that the Government had not co-operated with the provincial legislatures with respect to social legislation. The action of the Government in granting pensions to the blind was commended, but it was the opinion of the committee that the pensions were inadequate and should apply to all blind persons. Regret was expressed that no action had been taken at the last session of parliament in regard to amending the British North America Act. Approval of the Canadian National Railways Act was expressed, as it gave a clearer understanding of the position of the railway and would bring about a more equitable financial set-up. On foreign policy and war the committee urged the Government to give a clearer and more definite pronouncement.

The report reviewed the provincial legislative activity and commended the various provincial executive committees and federation officers for their work in this connection, especially in regard to the right to organize.

Convention Resolutions

British North America Act.—There were six resolutions submitted by various organizations calling for amendments to the British North America Act. After considering the resolutions presented, the committee on reso-

lutions submitted the following substitute, which was unanimously adopted:—

Resolved—That this Trades and Labour Congress of Canada request the Dominion Government to so amend the British North America Act to make possible the Dominion Government taking over unemployment and all social legislation that is interprovincial in its character; that an economic conference composed of all sections of society be called by the Dominion Government in view of formulating a plan to bring the changes mentioned above; and be it further resolved that, pending the enactment of said amendments to the British North America Act, efforts should be made, through an interprovincial conference or other agencies to co-ordinate the social legislation of the various provinces, thereby creating laws that would be Dominion-wide and overcome the objections made to most, if not all, of the social legislation of the federal Government because of some clause or technicality in the British North America Act.

Political Action.—Under this heading there were nine resolutions favouring political action by the Trades and Labour Congress of Canada. The committee favoured as a substitute the resolution adopted by the 1936 convention, the conclusion of which reads as follows:—

Therefore, be it resolved, that Labour political autonomy be left in the hands of the established labour political parties, and inasmuch as the Platform of Principles of this Congress contains the epitome of the best thought of organized labour during the whole period of its existence and struggles, that this Congress continue to act as the legislative mouthpiece for Organized Labour in Canada independent of any political organization engaged in the effort to send representatives of the people to Parliament, the Provincial Legislatures or other elective bodies of this country.

Trade Union Unity.—Thirteen resolutions were presented on this particular subject, each of which called for unity in the international trade union movement as represented in Canada by the Congress.

Throughout the discussion which followed the presentation by the committee of a substitute resolution, there appeared to be a keen desire that the unity which has heretofore prevailed within the Congress should be continued. Some of the delegates asserted that an organization affiliated with the Committee for Industrial Organization was "raiding" established international unions affiliated with the American Federation of Labor, while others contended that the purpose of the C.I.O. was to organize the unorganized in the mass-production industries. Opposing the continuance of the "status quo" until the next convention of the Congress, one delegate considered that it should only be continued until the convention of the American Federation of Labor. Another delegate, while opposed to creating a division in the ranks of the Congress, believed that there must be some sovereignty and that sovereignty should be respected. When a decision is made by the A. F. of L. the Congress would have to abide by it, he contended.

After a very thorough discussion on a great many phases of the question, the following substitute resolution was adopted by the convention:

Whereas, a condition has developed as ably expressed in the resolutions above enumerated which endangers the effectiveness not only of this Congress but of its affiliated Provincial Federations of Labour and Central Trades and Labour Councils as the legislative mouthpieces of the international trade union movement in Canada; and whereas, on the one hand the unseating of delegates representing local, central, provincial, national or international unions, because of their suspension, expulsion, or voluntary withdrawal from the American Federation of Labor, either from the Congress, Provincial Federations or Central Labour Councils would result in what is now only a potential danger becoming a reality. While on the other hand to openly defy or disregard the disciplinary policies of the international unions affiliated with the American Federation of Labor would, undoubtedly, result in the withdrawal from the Congress of many of the large international unions affiliated with the A. F. of L. who loyally adhere to its policies and laws; and whereas, it is the urgent desire of the Congress to work in harmony with and to respect the laws of the A. F. of L. and its affiliated international unions and at the same time to avoid either the wholesale suspension of one section of its membership or the wholesale withdrawal of another section. Therefore, be it resolved, that the incoming officers of this Congress, at the earliest possible opportunity, arrange a meeting with the officers or the Executive Council of the American Federation of Labor for the purpose of pointing out the position as outlined above and negotiating a clear and definite understanding regarding the continued affiliation with this Congress and our other Canadian legislative bodies of our present affiliated organizations on terms acceptable to the international unions and thus avoiding any disregard for or defiance of their laws and policies; and be it further resolved, that all affiliated international unions, Provincial Federations of Labour and Trades and Labour Councils be immediately advised that such a meeting is being arranged or sought and requested to maintain the status quo pending the outcome of such negotiations or until the next Congress convention; and be it further resolved, that the incoming officers of the Congress are hereby authorized and instructed to immediately communicate with the American Federation of Labor and with the Committee for Industrial Organization offering their services in a mediatory capacity in the present dispute and to use every legitimate effort to secure a meeting representative of both parties with a view to bringing the present deplorable division in the ranks of labour to an end.

Subsequently, President Draper in addressing the delegates, expressed the belief that a solution had been arrived at that would, within a very few months, see the end of the strife between the American Federation of Labor and the Committee for Industrial Organization, of which John L. Lewis is chairman. Continuing, Mr. Draper said he considered the strife a fratricidal one. "I think," he declared, "that both in Canada and the United States we shall be able to organize all the men and women

who work for wages within the constitutions of the American Federation of Labor and the Trades and Labour Congress of Canada."

War in Spain.—In lieu of a series of resolutions, some of which would have committed the Congress to expressions of definite sympathy for the Spanish Loyalist Government, the resolution committee brought in a substitute which was amended to read:

"That this Congress endorses the action of the International Federation of Trade Unions in its consistent and persistent struggle for the maintenance of democracy and our democratic form of government."

Provincial Federations.—A number of resolutions favouring the formation of provincial federations of labour were presented to the convention. The committee on resolutions reported that it was in accord with the general demand for the establishing of provincial federations as contained in the various resolutions, provided that these federations should comply with the constitution of the Congress. The incoming executive of the Congress was instructed to set up rules and regulations to govern these federations. The report of the committee was adopted.

Other Resolutions Adopted

Among the recommendations contained in other resolutions adopted were those:

Seeking amendments to the British North America Act to give the Dominion Parliament the power to pass legislation which will give legal protection for the workers in their right to organize.

Favouring the principle of collective bargaining as enunciated by international organized labour.

Instructing executive committees and federation officers to use their best efforts to have strengthened certain features of the draft bill entitled "The Right to Organize."

Urging the federal authorities to make money available at interest rates not to exceed 1½ per cent for new construction and renovating older premises.

Favouring a house-building program recognizing the following principles: (*a*) all work undertaken under this program to be paid for at union rates; (*b*) organized labour to be represented on all commissions that may be appointed in connection with the program; (*c*) and the price of the monthly rent of the houses built not to exceed one-fifth of the tenant's wages.

Seeking changes in the civil and criminal codes to make picketing legal.

Proposing the completion of the Montreal terminal buildings.

Demanding a program of public works to eliminate the direct relief system, and petitioning the provincial Governments to enact legislation guaranteeing the workers' wages against attachment for one year after leaving relief rolls to engage in gainful occupations.

Favouring the adoption of the 30-hour week with wages based commensurate with requirements of a 44-hour week.

Protesting against wages and working conditions of employees in hotels, restaurants and taverns in the province of Quebec.

Seeking an amendment to the Weekly Day of Rest Act in the province of Quebec so that persons employed in places of amusement shall be entitled to one day's rest of twenty-four consecutive hours each week.

Recommending an increased salary rate for letter carriers.

Recommending the preparation of amendments to the Act Respecting Workmen's Wages and the Fair Wage Act of the province of Quebec.

Urging that extra gang men on all Canadian railways be paid at least the regular section men's standard wages.

Requesting that Dominion Government Public Works office cleaners be paid on an annual salary basis as permanent employees, including the privileges of sick leave, holidays with pay and retiring allowances.

Seeking legislation compelling all employers of labour to grant vacations with pay to all classes of their employees.

Recording opposition to any employers' doctor acting as medical referee or adviser to Workmen's Compensation Boards.

Advocating a uniform amendment to all provincial Workmen's Compensation Acts embodying the principle of "blanket coverage" of occupational diseases and 100 per cent compensation for all accidents and occupational diseases.

Favouring the inclusion of firemen under the Industrial Disputes Investigation Act.

Recommending a more speedy carrying out of the provisions of the Industrial Disputes Investigation Act.

Granting conciliation boards to civic employees, even though the city councils do not agree to a board.

Asking abolition of the federal sales tax.

Urging the exempting from taxation the first $1,000 assessment of all homes assessed for less than $4,000.

Favouring the return of a percentage of the licence fees of motor vehicles owned within the municipalities and a percentage of the gasoline tax collected to each municipality.

Pressing for higher licence fees for commercial motor vehicles in the various provinces.

Recommending legislation drastically reducing interest on all public debts and private mortgages.

Recording unalterable opposition to war and favouring a referendum of the people before a declaration of war is made.

Calling upon the International Federation of Trade Unions to continue to do all in its power to achieve world-wide trade union unity and the establishment of one trade union world centre.

Opposing amalgamation of the Canadian National Railways and Canadian Pacific Railway.

Protesting against the pooling of trains on the two Canadian railways.

Asking revision of the Fair Wage Act so as to cover all operations of steamship companies who are receiving financial aid from the Government in the form of subsidies or subventions.

Insisting that the Canadian National Steamships (West Indies) Limited, be instructed to comply with the recommendation of the Standing Committee on Industrial and International Relations as to the proportion of Canadian citizens to be employed with respect to stewards and firemen.

Opposing immigration to Canada in view of the present status of unemployment.

Recommending the following changes to the Old Age Pension Act:

(1) Payment of pensions at 60 years of age.

(2) That pensions for both man and wife be paid when the man reaches 60.
(3) Increase in the present rate.
(4) Removal of stipulation that calls for the signing over of property to the government before a pension is given.
(5) That a residential qualification of 15 years in Canada be required.
(6) No deductions to be made from incomes of less than $1,000.

Seeking legislation along similar lines to the United States Railroad Retirement Act for employees of Canadian railways.

Urging a federal Government monopoly in the development of radium in Alberta.

Recommending that a larger quantity of Canadian coal be used.

Demanding the nationalization of the nickel industry and armaments manufacture.

Favouring the setting up by the Ontario Government of a government printing office.

Advocating a government program of production for use and the creation of social ownership of the producing, processing and distribution of the necessities of life.

Approving of woman suffrage in provincial elections of the province of Quebec.

Favouring the awarding of certificates to school children on recommendation of teacher for work done in a school year rather than by final examination at end of school year.

Requesting municipal purchasers to secure bread, milk, clothing, etc., from shops where union conditions and recognition prevail.

Demanding the immediate installation of wireless on all ships plying the Great Lakes and on all coastwise vessels, regardless of tonnage.

Calling for the three-watch system on all steamers operating on the Great Lakes and coastwise waters.

Pressing for the early ratification of the several conventions and recommendations passed at the twenty-first conference of the International Labour Organization, Geneva, October 24, 1936, with respect to seamen.

Favouring the issuance of federal charters to Canadian members of international unions who desire to relinquish jurisdiction over such members.

Seeking the right for Canada to print and bind its own Bibles.

Advocating that the benefits of the Mariners' Sick Benefit Fund be extended to cover the province of Ontario.

Urging the re-appointment of the Dominion fair wage officer for the Maritimes.

Resenting the term "foreign unions" as being used with reference to international trade unions.

Instructing the Trades and Labour Congress of Canada to try and unite within the Congress the various existing trade union bodies in Canada.

Favouring reforestation in Canada.

Advocating state hospitalization and medicine.

Encouraging the further development of sports and recreational activity by local unions and trade councils.

Seeking special legislation embodying heavy penalties against the offence of highgrading (selling gold stolen from Canadian mines).

Demanding legislation making the employment of spies against workers by employing corporations a criminal offence.

Urging the Quebec government to recognize road construction as being construction work and to pay the workers accordingly.

Advocating an amendment to the Trade Regulations Act so that wages of apprentices in the motor vehicle repair trade may be increased.

Recommending that trades councils and local affiliates give all possible assistance and co-operation to the Canadian Youth Congress.

Demanding that permits be granted labour unions in the province of Quebec to show motion picture presentations.

Favouring a system of national unemployment insurance.

Advocating the placing of all inland water traffic and highway traffic under the control of a Federal Transportation Commission.

Urging the members to discourage the sale in Canada of goods from Fascist countries.

Three resolutions were introduced with the consent of the convention at its last session, the first two of which were adopted, while the third was referred to the incoming executive, as follows:—

(1) Advocating the boycotting of a certain packing plant in British Columbia until such time as the officials recognize collective bargaining.

(2) Instructing the executive of the Congress to prepare briefs for the guidance of provincial federations and trades and labour councils in the preparation of material for presentation to the Royal Commission on the British North America Act.

(3) Drawing to the attention of the Prime Minister and Minister of Justice the activity of certain organizations advocating Fascism and Nazism and asking that an investigation be made.

Election of Officers

The election of officers resulted as follows: President, P. M. Draper, 172 McLaren St., Ottawa; Vice-presidents, P. R. Bengough, Vancouver, R. Trepanier, Montreal, W. D. Morrison, Glace Bay; Secretary-treasurer, R. J. Tallon, 172 McLaren St., Ottawa.

Provincial Executive Committees: Nova Scotia, W. W. Clark (chairman), Halifax; A. M. Sullivan, Halifax; Howard Tattersie, Springhill; A. A. McKay, Glace Bay. Quebec—G. Francq (chairman), Montreal; P. Lefebvre, Montreal; J. Cuppello, Montreal; Omer Fleury, Quebec. Ontario—A. Barron (chairman), Toronto; Fred. Collins, Toronto; Rod Plant, Ottawa; Sam Lawrence, Hamilton. Manitoba—R. Hewitt (chairman), Winnipeg; D. S. Lyons, Winnipeg; J. B. Graham, Winnipeg; S. Herbst, Winnipeg. Saskatchewan—A. M. Eddy (chairman), Saskatoon; H. Davis, Prince Albert; W. E. Cocks, Regina; A. Baker, Moose Jaw. British Columbia—E. H. Morrison (chairman), Vancouver; Birt Showler, Vancouver; Harry Pearson, Vancouver; C. M. Stewart, Vancouver.

The Provinces of Alberta and New Brunswick having provincial federations chartered by the Congress, the executive officers carry on the legislative work of these provinces.

Fraternal delegate to the American Federation of Labor, Rod Plant, assistant secretary, Trades and Labour Congress of Canada, Ottawa.

Fraternal delegate to the British Trades Union Congress, R. Hewitt, vice-president of the Brotherhood of Railway Carmen, Winnipeg.

Niagara Falls, Ont., was selected as the convention city for 1938.

CONFEDERATION OF CATHOLIC WORKERS OF CANADA

Proceedings of Sixteenth Annual Convention

THE sixteenth annual convention of the Confederation of Catholic Workers of Canada was held at Jonquière September 12-15. One hundred and fifty-three official delegates and about fifty fraternal delegates took part in the meeting. According to the report of the secretary, the membership of the Confederation has increased during the past year from 43,000 to 50,000 workers organized in syndicates affiliated with eleven federations. Thirty-seven new unions joined the Confederation in the last twelve months.

The constitution of the Confederation was amended at the annual meeting to provide that instead of being governed exclusively by the executive committee, it should be directed in future by a Confederal Bureau comprising the executive committee, which is made up of the president, vice-presidents, treasurer and secretary, and one representative of each of the federations and of each central council affiliated with the Confederation. It was decided to establish a federation of study circles for the training of new leaders. The officers of this federation are: President, Maurice Doran, Hull, Vice-President, Louis Morency, Quebec, and Secretary-Treasurer, Dollard Gagné, Hull. A resolution to affiliate with the International Confederation of Christian Trade Unions with headquarters in Belgium was laid over until the next meeting.

The President, Mr. Alfred Charpentier, reported on the matters dealt with by the executive during the year. He dwelt particularly on the strikes involving members of Catholic Unions most of which arose from the refusal of the employers to enter into negotiations with unions. These include strikes in the asbestos industry, the textile industry at St. John's and St. Hyacinthe and the more extensive textile strike involving the employees of the Dominion Textile Company at different places. Mr. Charpentier declared in favour of the closed shop as a necessary means of improving the lot of the workers and indicated the opposition of the Confederation to the organization of shop committees in certain industries instead of bona fide trade unions.

Resolutions adopted by the convention advocated:

Creation of a provincial economic council;

Establishing a special Labour Court for the trial of labour cases;

Abolition of night work in bakeries;

Provision for holidays with pay;

Appointment of a woman as a member of the Fair Wage Board;

Reduction of the pensionable age under the Old Age Pensions Act from seventy to sixty-five;

Appointment of a representative of the National Catholic Unions as a member of the labour group in the Canadian delegation to the International Labour Conference and Establishment of a commission to investigate the price of bread.

Workmen's Wages Act

Amendments urged in the Workmen's Wages Act, formerly the Collective Labour Agreements Extension Act, include the application throughout the province of the section requiring certificates of competence, an increase in the fee for a certificate of competence from $2 to $5 and the repeal of the words "bona fide" as applied to a syndicate or group of employees in the definition of "association" thus requiring an "association" capable of making a collective agreement to be a legal entity. It was requested, also, that a workman who refuses information to the joint committee enforcing an agreement be subject to a penalty as well as the employer.

Fair Wage Act

A resolution was adopted asking for the repeal of subsection B of section 2 of the Fair Wage Act which provides that the Act shall apply

in all cases wherein it is shown to the Board's satisfaction that an association of employees cannot agree with an association of employers or with one or more employers contracting personally for the adoption of a collective labour agreement in virtue of the said Act respecting workmen's wages.

However, this Act shall not apply to an agriculturist, a settler or a farmhand, nor to a domestic servant working in a private house. The Act would then apply

to all the employees who have not availed themselves, or who do not desire or are unable legally to avail themselves, of the provisions of the Act respecting workmen's wages.

Attention was drawn, also, to lack of any provision in the Fair Wage Act for the recovery of wages due workmen by the Fair Wage Board. It is left to the workman to bring an action.

Workmen's Compensation

Amendments were asked to the Workmen's Compensation Act to enable compensation to be based on the normal hourly wage of the workman calculated on the yearly basis of three hundred working days intsead of being

based on the average weekly earnings for the past year.

Workers' Education

The provincial government is to be requested to give financial assistance for the establishment of a Labour Normal School for the training of labour leaders and the promotion of education among the workers of different centres by establishing labour libraries, study circles and classes in sociology.

The following officers were elected for the ensuing year: President, Alfred Charpentier, Montreal; Vice-Presidents, Henri Quevillon, Hull, Emile Tellier, Three Rivers; Treasurer, Alphonse Bourdon; General Secretary, Gerard Picard, Quebec.

The new Confederal Bureau includes the aforementioned officers together with the following representatives of Federations and Central Councils: Osias Filion, Montreal; G. A. Gagnon, Montreal; Alphonse Roberge, Quebec; Philippe Lessard, Port Alfred; Albert Coté, Montreal; Romeo Gilbert, Montreal; Jos. O. Landry, Thetford Mines; Alfred Lauzon, Victoriaville; J. T. Robitaille, Quebec; Albany Balchard, St. Hyacinthe; J. Tho. Gagnon, Jonquière; Eugene Caron, Sherbrooke; Albert Bouchard, Chicoutimi; J. Harmeneigh, St-Joseph d'Alma.

Employee Savings Programs in the U.S.A.

The Industrial Relations Section of the Department of Economics and Social Institutions, Princeton University, issued recently a report entitled "Employee Savings Programs—An Analysis of Recent Trends."

The object of this study was to determine the status of employee savings plans in the United States, just prior to, and at the end of the depression, and to learn how they had fared through the intervening period. "The aim," the report states, "has been to organize and present the available information in such a way as to afford a bird's-eye view of trends and to show strengths and weaknesses of particular types of plans."

The 322 companies, on which the study is based, were selected from a much larger group which co-operates with the Princeton Industrial Relations Section by supplying information on all phases of their industrial relations activities. These companies were chosen more or less at random, except for the controlling factor that definite information was available in each case concerning the existence or non-existence of an employee savings plan both in 1929 and 1936. Only 64 of the 322 companies reported no plan both in 1929 and 1936.

The report deals with the general trends in employee savings programs 1929-1936 stating that "the extremes of an apparently never-ending appreciation in investment prices and of a sudden and prolonged depression placed a strain even on the most conservative plans." Discussing the relative rate of survival of various plans, the report observes that "of 117 employee stock purchase plans established prior to 1929 only 30 have continued through the depression; of the 27 credit unions inaugurated prior to the depression, only one has been discontinued."

Analyses of the rate of survival by the number of workers employed revealed that in companies of less than 1,000 employees, 61 per cent of plans established prior to 1929 have continued; in companies of more than 1,000 employees, only 48 per cent have survived. It was found that the percentage of continuation is in inverse ratio to the size of the companies.

In the opening paragraph of the Conclusions section of the report it is stated:

"Employee savings plans, as an institution, have weathered the depression. However, great changes have occurred both in the comparative number of different types of savings plans and in the prevailing opinion as to their desirability and value. Employee stock ownership survives, but with an entirely different status than in 1928. The excellent experience with credit unions as well as a reorientation of thinking concerning the purposes of employee savings plans has given this particular type of organization a great impetus for growth. Bank deposit plans which were badly affected by the banking crisis, have found new strength in the confidence given by Federal Deposit Insurance. Other types of plans are profiting by the lessons of the depression and rebuilding on more solid foundations. Building and loan associations, in particular, have been strengthened and will continue to meet a specific need."

The report is divided into four main sections under the following headings: Introduction, General Trends in Employee Savings Programs, 1929-1936, Company Experience with Particular Plans and Conclusions. A selected bibliography is also appended to the report which gives references to sources of information supplementing the data in the report."

WORKERS' EDUCATIONAL ASSOCIATION OF CANADA

Summary of Annual Report and Convention Proceedings

WITH the establishment of branch associations in the western provinces, the Workers Educational Association of Canada has now emerged as a national organization. Such was the feature of the annual report of the general secretary, Mr. Drummond Wren, presented at the convention recently held at the Ontario Agricultural College, Guelph.

Some idea of the development of the association is contained in the secretary's report to this year's convention indicating the 1936-37 advance in comparison with past years, and especially since the formation of the central body in 1930. In 1936-37, there were 29 associations (exclusive of study circles) with a net enrolment of 2,194 in 44 classes; as compared with 22 associations, 43 classes and a net enrolment of 2,012 in 1935-36; and with 2 associations, 10 classes, and a net enrolment of 425 in 1930.

Dealing with the back-ground of the movement and its present position in Canada, the secretary notes:

"In older countries, the beginning of the present century saw the complete emergence of the collective working man out of the individual poor man. With that emergence Workers' Education became an established movement, encouraged by successive, enlightened governments and supported by an intelligent labour movement which had already begun to amalgamate to meet new situations arising out of the progressive mechanization of industry. The important part Workers' Education could play in a democracy was readily recognized, the emphasis on an educational policy that would serve social purposes was appreciated, and the necessity for independence conceded. These are principles we have only begun to cope with in Canada thirty years after they had been established in Britain and other parts of Europe. I maintain, therefore, that during the past year we entered a new era, one fraught with difficulties and problems but, at the same time, replete with hope and encouragement."

Extension to Other Provinces

While the organization is comparatively on a stronger basis in Ontario, yet steady progress is being registered in other provinces. A section of the secretary's report reviews the extension of the work to other sections of the Dominion.

In Nova Scotia, an association, sponsored by the Trades and Labour Council, was formed last year at Halifax. This year a provisional association was established at Liverpool, while workers at Bedford will be temporarily under the direction of the Halifax branch. From contacts made by the Halifax secretary it is hoped to establish other associations. An interview with Mr. D. W. Morrison, president of District 26, United Mine Workers, and a member of the executive of the Trades and Labour Congress, resulted in a voluntary undertaking to recommend to the Nova Scotia locals of the U.M.W.A. their affiliation with the W.E.A. and their adoption of plans for study circles.

As a result of an interview with the premier of Nova Scotia and the provincial Minister of Education, the general secretary was assured of a grant to maintain tutors for three or four classes.

Reporting on his tour of the western provinces, the secretary stated:—

"That tour resulted in active associations being formed in Winnipeg, Calgary, Edmonton, and Victoria, and in contacts being made that will, whenever we are prepared to offer suitable material, result also in other associations forming in Medicine Hat, Lethbridge, Saskatoon, and other districts.

"In the organization of new district associations, a policy of working in co-operation with, and under the sponsorship of trades and labour councils, local unions and universities have been strictly adhered to. Each new district association, including Halifax, has been formed from among representatives of affiliated labour organizations.

"We are now, truly, a national association. Only two provinces are not numbered among our district associations—Saskatchewan and New Brunswick—and with these it is only a matter of time and money to do it."

Relationship With Organized Labour

Reviewing the year's activity with organized labour, the secretary observed in part:—

"The impetus given to labour organization in most of the eastern provinces at the beginning of 1937 and the momentum it has gathered since then, especially in the rubber, auto, iron and steel, and diversified industries, has placed within our reach a vast field for cultivation and expansion of our work. The auto workers and rubber workers have already definitely expressed their desire for educational facilities.

"We have been in constant contact with large numbers, not only of new organizations, but also with those that have been long established. During the past few months, several of our districts have been directing their efforts towards the formation of Workers' Educational Trade Union Committees within their boards of management. These committees will comprise representatives from affiliated local unions and trades and labour councils. The particular duties and responsibilities of such committees will be the development of study circles within their respective organizations as well as the furtherance of workers' education generally. . . ."

Among the other matters dealt with by the secretary were those relating to the develop-

ment of study circles; negotiations with the Canadian Radio Corporation; technical schools curriculum; the annual summer school; the Labour Research Institute; and the "invaluable services" of universities and tutors.

Resolutions Adopted

The resolutions adopted at the annual convention were based chiefly on relevant features in the annual report of the general secretary. One resolution expressed appreciation to Hon. Angus Macdonald, Prime Minister of Nova Scotia, "on his action in providing a direct grant to the W.E.A., making possible the establishment of classes and, at the same time, allowing them their independence."

The convention supported the executive body "in the endeavour to further the W.E.A. as an independent, democratic organization."

With regard to organized labour, the convention adopted the following resolution:—

"Whereas the needs of the working class for instruction and guidance have greatly increased within the year 1937, be it resolved that a special effort should be made to develop leaders of study circles drawn from the ranks of the workers."

Among the recommendations contained in other adopted resolutions were:—

Continuance of the policy to establish study circles, using tentatively the list of studies suggested by the general secretary;

Instructing the executive to consider giving radio broadcasts to the working class population of Quebec;

Expressing appreciation to the manager of the radio corporation, to the management and tutors of the summer school, to various Canadian universities "for generous support," and to the Canadian Association for Adult Education for assistance in extending the scope of association activities;

Increasing publicity concerning the value of the Labour Research Institute;

Approving the proposal of the Toronto Association to form a W.E.A. headquarters and urging all members to further this enterprise.

PROVINCIAL CONFERENCE OF INTERNATIONAL UNIONS IN QUEBEC

At a representative conference of international unions in the Province of Quebec held in Three Rivers it was decided to apply to the Executive Council of the Trades and Labour Congress for a charter establishing a provincial Federation of Labour. (At present there are two provincial federations of the Congress—New Brunswick and Alberta—with provincial executives functioning in the other provinces.)

In a report of this provincial meeting appearing in the current issue of *The Canadian Congress Journal,* official publication of the Trades and Labour Congress, it was stated that the keynote of the conference "was the consolidation of the international labour movement, and the promotion of closer relations among the various units belinging to it."

The conference was attended by 169 delegates representing 85 organizations. Five sessions were held under the chairmanship of Mr. Raoul Trepanier, chairman of the Quebec executive of the Trades and Labour Congress with Messrs. Gus Francq and J. E. Gariepy acting as secretary and assistant secretary, respectively.

Featuring the sessions was the question of the formation of a provincial federation of labour. There were two main expressions of opinion on this subject with some delegates favouring a federation as a means of achieving greater solidarity, and others maintaining that the same objectives could be achieved through the provincial executive of the Trades and Labour Congress, supplemented by an annual convention. Two resolutions were submitted to the conference. In lieu of these the Committee on resolutions adopted a substitute resolution as follows:

"1. That this Conference pronounce itself in principle in favour of the formation of a Provincial Federation of Labour in Quebec;

"2. That request be made to the Trades and Labour Congress of Canada for the granting of a charter as a Provincial Federation of Labour;

"3. That in the interim of a grant of charter and the proper functioning of a Provincial Federation of Labour, this Conference decide to select a Committee of five members who, jointly with the Provincial Executive Committee that will be elected at the incoming convention of the Trades and Labour Congress of Canada, will take ways and means to call a Provincial Conference of Labour in the course of 1938;

"4. Said Conference to be held in the City to be designated by the Committee;

"5. Said Committee to have power to create a secretariat of labour, that shall be used as a central office of publicity, propaganda and information, so as to co-ordinate the efforts of organized labour of the Province of Quebec;

"6. The subject of a per capita tax to be paid to said body to be decided at the next Provincial Conference."

Upon a roll call vote this compromise resolution was adopted by a ballot of 91 to 51.

The conference elected the following organization committee to act in conjunction with the provincial executive in the convening of a conference in 1938: Messrs. Gus Francq, Montreal; Jos. Matte, Quebec; L. P. Lacroix, Three Rivers; J. A. D'Aoust, Hull; and Ben Dutchburn, Sherbrooke.

(Subsequently an application for a charter for the formation of a Quebec Federation of Labour was received by the Trades and Labour Congress executive. The question of chartering provincial federations was dealt with at the annual convention of the Trades and Labour Congress, reviewed elsewhere in this issue.)

Recent enactments of the provincial Legislature—in particular the Act respecting Workmen's Wages and the Fair Wage Act—were criticized in two adopted resolutions which were to be submitted to the convention of the Trades and Labour Congress.

Among the recommendations contained in other adopted resolutions were:

Establishment of a national system of unemployment insurance by means of a re-enacted B.N.A. Act and with the support of public bodies, churches, etc.;

Promotion of organization activity among unorganized workers;

Affirmation of freedom of association and collective bargaining.

Other resolutions dealt with the working conditions of hotel and restaurant employees; employment of female labour in taverns; organization of a union label trades department within the Trades and Labour Congress; registration of union shop cards and buttons, etc.

CONVENTION OF CANADIAN LEGISLATIVE BOARD, BROTHERHOOD OF LOCOMOTIVE FIREMEN AND ENGINEMEN

At its regular session held in Ottawa from August 23 to 28, the Canadian Legislative Board of the Brotherhood of Locomotive Firemen and Enginemen re-affirmed its position in favour of legislation to ensure the right of association and collective bargaining, and pledged co-operation with the Trades and Labour Congress of Canada in support of that organization's draft bill on this subject. The Brotherhood also re-affirmed its stand in favour of a national unemployment insurance plan, and decided to "institute a vigorous campaign in favour of necessary amendments to the British North America Act."

The text of other resolutions adopted at the convention was as follows:

That we re-affirm our former declarations in support of measures to ensure the maximum safety in all means and forms of transportation.

That we continue our efforts, in co-operation with other organizations, in support of a more equitable regulation of all forms of transport competing with the steam railways.

That with a view to ensuring a more extensive use of the steam railways for transportation purposes by manufacturers, distributors, retailers and shippers that a vigorous campaign be instituted in co-operation with other labour railway organizations throughout Canada to encourage the formation of "Ship by Rail" committees in the various railway localities.

That consideration be given to the recommendation of the Sub-Committee to establish a Research and Statistical office to be maintained jointly by the Standard Railway Labour Organizations from Grand Lodge funds.

That any form of consolidation of railroads be opposed, unless and until the interests of employees and public are protected.

That we approve of an effort being made which will tend to secure the co-operation of the working classes for the purpose of concentrating and effectively utilizing their voting strength in the pursuance of progressive labour legislation and we hereby instruct our Legislative Chairman to give every assistance to such a movement.

That the Chairman be instructed to have the watch inspection changed from the 1st and 3rd week in every month to the same regulations in effect on the Michigan Central Railways, that is, once a month between the 10th and 20th. Further we consider that the cleaning of watches should not be necessary every fifteen months and our Chairman be instructed to attempt to have Railway Commission Order on watch cleaning modified to twenty-four months.

Regarding request of lodge 735, we re-affirm our former action seeking uniform compensation laws and instruct our Chairman to use every effort to bring about the desired change with increased benefits in conjunction with the Joint Legislative Committees and other labour bodies.

In view of the many and various progressive political parties and movements at present seeking to improve the economic and social conditions of our people, we do not deem it advisable to commit ourselves to any political party at the present time.

Election of Officers

Mr. W. L. Best was unanimously re-elected chairman and Canadian legislative representative. Other officers elected were: Assistant chairman, J. G. McLean, St. Thomas, Ont., secretary-treasurer, George Snider of Smith's Falls; provincial vice-chairmen—British Columbia, H. Elliott, Vancouver; Alberta, G. W. Yeats, Calgary; Saskatchewan, D. Campbell, Saskatoon; Manitoba, Alderman H. Spafford, Brandon; Ontario, H. B. Crawford, Smith's Falls; Quebec, C. Masse, Montreal; Nova Scotia, Alex. Macdonald, Glace Bay; New Brunswick, J. Frank Caine, Moncton; Prince Edward Island, Angus Cameron, Charlottetown.

On the board of directors are: J. G. McLean, St. Thomas, chairman; S. Carther, Windsor, secretary; John R. Stewart, New Glasgow, N.S.

In conformity with the changes made at the recent Grand Lodge Convention, the legislative board hereafter will meet every four years, instead of three.

LABOUR AND INDUSTRY IN BRITISH COLUMBIA IN 1936

Annual Report of Provincial Department of Labour

SUMMING up the year 1936, "as a year of solid fulfilment of the bright promise of 1935," the nineteenth annual Report of the Department of Labour of British Columbia reviewing the administrative activities of that department during the year 1936 states that: "The statistical period under review was marked by a further notable recovery from the long period of depression that followed the collapse of the 1929 boom." There was a further improvement in industrial payrolls, an increase of $16,537,451 being recorded for the year 1936 over 1935, the total industrial payroll for the year being $142,349,591. The average weekly wage for all adult male employees during 1936 was $26.36 an increase of $2.27 over 1935. The average number of wage earners also continued to increase; in January 1936, there were 60,656 employed, which figure increased to a peak during September with 81,203, declining to 69,957 for the month of December, a total of 9,301 in excess of the beginning of the year.

Industrial Statistics, Payrolls, Etc.—The report indicates the industrial situation as reflected through statistical data of payrolls, employment, hours of labour, etc. The total number of firms reporting in time for tabulation in the tables given in the report was 4,357 compared with 4,153 in 1935—an increase of 204, which, the report observes, "refutes the claim made by some that labour legislation has been responsible for firms being forced out of business."

The payroll of the 4,357 firms making returns to the Provincial Department of Labour amounted to $107,492,076. This figure should be supplemented by the following other figures: $553,965, in returns too late for classification; $1,350,000, as an estimate for firms, included in the Department's inquiry, but did not send in returns; $12,153,550 ascertained rayroll of transcontinental railways; $5,500,000, for Dominion and Provincial Government workers; $2,900,000 for wholesale and retail firms; $3,500,000 for cartage, warehousing, auto transportation, etc.; $7,500,000 for ocean services and express companies, and $1,400,000 as miscellaneous—making in all a total provincial industrial payroll of $142,349,591. During 1933 the statistics for the same classifications revealed a payroll of $99,126,653, the figures for 1936 thus showing an increase of $43,222,938 over the three-year period.

The percentage of the total payable to wage-earners has again shown an increase. Of the total payroll, wage earners received 77·76 per cent; clerks, stenographers and salesmen 11·70 per cent; and officers, superintendents, and managers, 10·54 per cent. An analysis of the payroll statistics for 1936, reveals that of the twenty-five industrial groups, twenty-three show an increased payroll, while two reveal a decrease. The lumber industry again headed the list of industries with an increase of $5,446,047, followed by contracting with $1,379,909 and Coast shipping with $1,322,060; metal-mining increased by $1,252,308; food products with an addition of $1,072,582, followed by metal trades with $877,637; wood (N.E.S.) showed an increase of $659,519; public utilities, $608,265; oil-refining, $437,116; smelting, $402,628; pulp and paper mills, $400,688; coal-mining, $352,028; explosives and chemicals with $265,333; miscellaneous trades, $203,286; house-furnishings, $172,512; builders' materials, $149,569; printing and publishing, $99,019; breweries, $98,532; laundries, cleaning and dyeing, $90,086; paint-manufacturing, $73,399; garment-making, $51,459; jewellery-manufacture, $15,446; leather and fur goods, $13,436.

The two industries showing a decrease in the annual payroll were headed by cigar and tobacco manufacturing with $17,223 and shipbuilding, $1,444.

Weekly Wage Rates.—In the accompanying table, the average weekly wage is shown for 1929, 1935, and the year reviewed by the 1936 report as follows:—

Average Full Week's Wages in each Industry (Adult Males only)

Industry	1929	1935	1936
Breweries	$27 70	$25 79	$25 00
Builders' materials	28 04	22 07	22 28
Cigar and tobacco manufacturing	26 58	16 59	17 75
Coal-mining	30 18	28 49	28 75
Coast shipping	32 84	26 23	31 61
Contracting	30 57	22 72	24 13
Explosives and chemicals	24 61	25 34	23 76
Food products, manufacture of	26 56	22 00	23 16
Garment-making	28 68	21 29	22 74
House-furnishing	26 74	20 05	21 29
Jewellery, manufacture of	36 61	31 54	34 39
Laundries, cleaning and dyeing	23 16	21 92	22 25
Manufacturing leather and fur goods	29 03	20 06	20 48

Manufacturing of wood (N.E.S.)	25 49	18 69	20 32

From the table it will be observed that the average weekly wage for adult male employees increased in twenty of the twenty-five occupational classifications. The report points out however, that "it is not claimed the averages shown would be the same for the whole year, as in many industries there is always broken time to contend with; the figures have been computed on the same basis as previous years and thus offer a fair comparison." Increases in the average weekly wage ranged from ·21 cents in builders' materials to $2.85 in the manufacturing of jewellery. Of the five industries reporting decreases, paint manufacturing registered the smallest (·09 cents) and explosives and chemicals the largest ($1.58).

The report also gives tabular statistics indicating the number of wage earners in each industry. The following table is a summary of all such tables and indicates the number of employees by weekly wage groups in 1936.

Classified Weekly Wage Rates (Wage Earners Only)

British Columbia, 1936

For Week of Employment of Greatest Number	Males		Females		Apprentices.
	21 Yrs. & over	Under 21 Yrs.	18 Yrs. & over	Under 18 Yrs.

Totals	86,431	4,047	10,029	622	902

Apprenticeship.—The number of apprentices as shown in the sumary of all tables is given as 902 but the report explains that this total should not be confused with the number of registered apprentices (261) as shown in the report of the Director of Apprenticeship. It was further pointed out that "under both Male and Female Minimum Wage Acts, the Board of Industrial Relations grants apprenticeship permits in occupations where the Minimum Wage Orders are in effect and which have not at this date been brought within the scope of the 'Apprenticeship Act.' This partially accounts for the difference in the figures."

Industries in which apprentices have found opportunities during the year are: Explosives and chemicals—increase 5; garment-making, 16; house-furnishings, 17; leather and fur goods, 6; metal trades, 14; pulp and paper manufacturing, 7; smelting, 26; street-railways, etc., 12; metal-mining and ship-building, 1 each.

Decreases are noticeable in the food products group, 42; laundries, etc., 34; miscellaneous metal trades, 16; printing and publishing, 21; contracting, lumbering, and wood (N.E.S.), 4 each; breweries and coast shipping, 1 each.

The fiscal year of 1936 was the first complete year of the operation of the Apprenticeship Branch established under the provisions of the "Apprenticeship Act" (Labour Gazette, June, 1935, page 522).

The Director of Apprenticeship, makes the following remarks concerning the operation of the Act during 1936:—

"During this first year's operation of the Provincial Act the principle of apprenticeship in skilled trades has become generally recognized and firmly established, and, with extending facilities and continued stability in business generally, the youth of this Province and industry should materially benefit and the number of apprentices should steadily increase. Care, however, is being taken that these increases are controlled to the extent that apprentices shall not displace qualified help and that there is every reasonable likelihood of continued employment in the industry at the end of the period of training.

"Minimum wages with periodic increases have been established in all trades designated under the Act, and it is a matter of some interest that over one-third of the apprentices indentured are already receiving more than the required minimum.

"The period of apprenticeship varies in different occupations, and in individual cases may be shortened, at the discretion of the Committee, where the prospective apprentice is able to show some previous experience or special training and aptitude in any trade.

"At the last session of the Legislature an amendment to the 'Apprenticeship Act' was passed to make it possible to extend the benefits of apprenticeship to those over 21 years of age. This was thought necessary owing to the large number of young people from 21 to 25 years who, during the depression period, had materially suffered through lack of opportunity. Some of these are now learning a trade and are signed up under contract at wages considerably above the minimum.

"The Provincial Apprenticeship Committee have under advisement at the present time a recommendation to bring the metal trades under the provisions of the Act and to extend the scope of the activities of the Branch in other suitable channels."

Employment Service.—The report submitted by the General Superintendent of the Employment Service for the year 1936 shows a marked increase in the number of applicants and re-applicants seeking employment, which amounted to 202,264 for the year, against 118,040 for 1935.

Reviewing the work of the Handicap Section the Superintendent states: "The Dominion Government continues to recognize its responsibility for the care of unemployed handicapped ex-service men and maintains a staff in the Vancouver and Victoria offices. With the passing of the years, the problems which confront this class of applicant grows greater. This is due to the fact that the men are growing older and many of them, due to their experiences, are prematurely aged. The situation which confronts these men is not only intensified by the continuation of the depression, but also by the application and speeding-up of machinery, which makes it almost impossible for them to successfully compete in the labour market. Here again there continues to be a steady influx of ex-service men into this Province, not only seeking employment, but also the more congenial climatic conditions to be found here."

Unemployment Relief.—As shown in the report of the administrator of unemployment relief, there was a more marked improvement in the relief situation in 1936 than in the previous year. The decrease in the average monthly numbers receiving relief in the Province as a whole was over 10 per cent. In unorganized territory, the percentage reduction was almost double that shown in the municipalities, being 16 per cent, as compared with 8 per cent reduction in organized territory. The peak number receiving relief was in March, 1933, when 128,858 received assistance; the lowest number was 64,996 in October, 1936.

The report of the administrator also deals with various phases of the relief problem and the steps taken to cope with it under such headings as "registration," "grub-stakes," "assistance to settlers' plan," "forestry-training plan;" "placer-mining training plan;" "winter work projects."

Trade-Schools Regulation Act.—The report also refers to the operations during 1936 under the "Trade-Schools Regulation Act," (Labour Gazette, December, 1936, page 1131) which had as its object "the protection of the public and particularly the young people of the province by correcting abuses and eliminating unfair practices in the operation of trade schools." The Act came into force on January 1, 1937, and allowed thirty days for registration, and it was noted that "practically all business colleges and trade schools operated in the Province readily complied with requirements of the Act."

Discussing the problems arising in connection with the administration of the new legislation, the report states:—

"By far the greatest problem that has arisen in connection with the administration of the Act occurs in connection with some correspondence and home-study schools. It has been found that such schools, operating under the cloak of educational institutes or college, prostitute the name and objects of the legitimate educational organization. Misrepresentation, excessive charges for out-of-date instruction, unfair contracts, advertising and sales talks that are misleading, and false promises of many descriptions have been uncovered. Such schools usually approach inexperienced youths and their parents and obtain their signatures on the dotted line of an irrevocable contract frequently for a course that is unsuitable and that seldom opens up the avenues of employment represented."

Factory Inspection.—The report of the factory inspection branch reviews the activities of the year in accident prevention, prosecutions, factory conditions, investigations into complaints and inspections of passenger and freight elevators During 1936, there were 1,840 inspections and re-inspections of factories made.

Home-Work.—Featuring the report of the Factory Inspection Branch were the observations on home-work. The background of the problem is stated thus:

"Recognizing the introduction of industrial home-work in the Province as an industrial and social evil, the 1936 second session of the Legislature passed a very important amendment to the 'Factories Act,' making it a statutory requirement for every employer who in his trade or business in personal or household articles gives out any work to be performed in the home, to first obtain a permit from this Department."

It was further pointed out that home-work, when thus given out, could only be performed by home workers in possession of a permit from the provincial Department of Labour. Accordingly, firms manufacturing personal or household articles, were requested to furnish the Department with the names and addresses of all persons performing work in the home. From the replies received and the investigations made, it was revealed "that home-work of considerable magnitude was

being performed almost exclusively by Japanese women."

The Report then proceeds:

"Owing to the irregularity of the work, it was impossible to obtain information regarding hours worked from the home-workers visited, as it was stated that household duties were included in the day's work. We were, however, successful in a number of instances, where a time record was kept and the piecework rate set, in establishing the fact home-workers were being paid as low as 27 cents for an eight-hour working-day. One of the outstanding facts brought out during the investigation was that the small remuneration received by home-workers was not the only source of income, as in most instances the husbands were employed in some line of industry.

"Our survey has proven there is no justification for such a large volume of work being performed in homes, and we have, without exception, refused to grant Japanese applicants either an employer's or home-worker's permit authorizing work to be given out or performed in the home, as we are of the opinion this should be carried out in factories where it can be regulated in accordance with the statutory requirements relating to the industry. This policy has resulted in home-work being discontinued, and contractors that previously had the work performed in homes have requested us to inspect several proposed factory premises previous to leases being taken and power-driven machinery installed."

Labour Disputes and Conciliation.—The report refers to 1936 as one of "comparative peace," sixteen strikes occurring affecting 5,741 employees and resulting in 75,311 working days being lost.

Report of Board of Industrial Relations

The report of the Board of Industrial Relations—administering the Female Minimum Wage Act, the Male Minimum Wage Act and the Hours of Work Act—is also contained in the report of the Department. It notes that by the revision of existing regulations minimum wages in some occupations have been raised, and by the application of the additional statutory powers vested in the Board by legislative amendments relating to conditions of labour some improvement in that direction has been accomplished.

That the recovery in industry and business has had its effect upon wages is clearly demonstrated in the statistical tables. "The legal minimum has by no means become the standard, but rather has proved to be the fundamental incentive that has stimulated and maintained the upward trend so gratifying to record."

Female Minimum Wage Act.—During the year 3,565 employers (an increase of 293) reported 21,924 women and girl employees gainfully employed compared with 19,934 so employed in 1934. For one week their total earnings are given as amounting to $324,005.04. The weekly average wages for both experienced and inexperienced workers are a little higher for the year under review than for 1935. During 1936 the average weekly wages for employees over 18 years or experienced were $15.19 compared with $14.96 in 1935; for employees under 18 years or inexperienced the wages were $9.33 and $9.07 for the two years respectively. For the entire working force of 21,924 women and girl employees their week consisted on an average of 41·98 hours in 1936 compared with 41·79 hours in 1935.

Tabular statistics are given showing the numbers and proportions in each industry receiving the actual minimum wage, those in receipt of more than the legal minimum and those getting less. "Those whose wages were held to the exact minimum amounted to 5,185 or 23·65 per cent, which is over 4 per cent more than appeared in this category in 1935. Over 10,000 employees received pay-cheques in excess of the legal minimum, so that 48·16 per cent of all women and girl employees were paid more than the law actually required. In the section that shows 6,180 employees, or 28·19 per cent of the total getting less than the minimum for experienced workers there are included the less skilled or younger girls, inexperienced employees over 18 years working under permit, and employees working short time. This group contains 4 per cent less than appeared in a similar classification last year."

Under the Female Minimum Wage Act there were 72 prosecutions during the year with 62 convictions and 10 cases withdrawn or dismissed. There were 40 cases under the Male Minimum Wage Act, in 38 of which convictions were registered 2 being dismissed or withdrawn; while under the Hours of Work Act there were 56 cases in 53 of which convictions were obtained and 3 withdrawn or dismissed. Other cases were as follows: Factories Act, 9, with 9 convictions; semi-monthly Payment of Wages Act 3, with 3 convictions; and one case under the Truck Act which was classified as "withdrawn or dismissed."

"Steadily and systematically inspections and investigations have been made during the year in all parts of the Province. These inspections amounted to 10,245, and as a result the sum of

$60,172.72 was collected and paid over to men and women who had not received wages in accordance with the requirements of the various Orders under which they had been working. Of this amount, $34,796.31 was distributed among men and boys and $21,227.86 to women and girls. The balance, $4,148.55, was ordered paid to employees as a result of Court cases. In all, 1,044 firms were affected and 2,043 employees experienced this very tangible benefit of the protection afforded by the Acts and Orders of the Board."

Male Minimum Wage Act.—Summaries of the Orders issued under the Male Minimum Wage Act have been published from time to time in the LABOUR GAZETTE.

Hours of Work Act.—The report states that during 1936, 4,357 firms, reporting 90,871 employees, stated that 87·12 per cent of these employees worked 48 hours or less per week, 6·42 per cent worked between 48 and 54 hours per week and 6·46 per cent worked in excess of 54 hours.

The average weekly working hours of all employees during 1936 was 47·63 compared with 47·17 hours in 1935 and 47·32 hours in 1934.

In concluding the Board reported:—

"Enforcement of the Hours of Work Act during the year has been very satisfactory, and employers are now realizing that overtime cannot be worked without first making application for a permit.

"During the year under review 1,053 such permits were granted for emergency work not exempt by regulations made pursuant to the Act.

"Prior to the Hours of Work Act employees on a weekly or monthly rate had to work overtime when required, usually with no remuneration for the additional hours.

"In an endeavour to curtail overtime the Board of Industrial Relations has adhered as closely as possible to the policy that overtime permits be granted on condition that not less than time and one-quarter of the employee's rate of pay be paid; this ruling has been a boon to many workers who would otherwise have worked the additional hours without additional remuneration.

"A return of overtime worked must be made to the Department showing the names of the employees who worked overtime, their rate of pay, and the amount paid under the permit, thus affording a complete check on each permit.

"Although the number granted for 1936 exceeds the previous year, this has resulted from closer inspection on the part of the staff, who are on the lookout, even after business hours, for any infraction of labour legislation.

ANNUAL REPORT OF SASKATCHEWAN BUREAU OF LABOUR AND PUBLIC WELFARE

THE annual report of the Bureau of Labour and Public Welfare of Saskatchewan reviews the activities of this provincial department during the year ending April 30, 1936. This report is the sixteenth since the establishment of the Bureau of Labour and Industries and the second since the Bureau of Labour and Public Welfare was formed. (During the session of 1934-35, the Legislature enacted legislation whereby a Bureau of Labour and Public Welfare was organized to take over some of the administrative duties previously under the old Department of Railways, Labour and Industries—LABOUR GAZETTE, November, 1934, page 986.)

In the subsequent re-organization, the new Bureau of Labour, in addition to matters relative to relief, had the administration of the following Acts under its jurisdiction: The Factories Act; the Building Trades Protection Act; the Employment Agencies Act; the One Day Rest in Seven Act; the Weekly Half-Holiday Act; the Minimum Wage Act; and the Workmen's Wage Act. It is also charged with the operation of free public employment offices; the collection and publication of information and statistics relating to employment; wages and hours of labour throughout the province; strikes and other labour difficulties; trade unions and labour organizations; the relations between capital and labour, and other subjects connected with industrial problems; the commercial, industrial and sanitary conditions of employment.

In September, 1935, that branch of the Bureau having to do with relief to settlers in the northern areas of the province and the administration of the Relief Settlement Plan was set up as a separate unit of the Department of Municipal Affairs, entitled the Northern Settlers Re-establishment Branch and directly responsible to the Deputy Minister of that Department.

Fair Wages.—As the report points out, the Commissioner of the Bureau is the Fair Wage Officer of the provincial government and has authority to fix rates of wages and hours of labour on contracts let by the government for the construction of public works or in the carrying out of any other undertaking the cost of which is borne wholly or in part by the government.

Included in the report is the schedule of wages and hours for government work in 1936.

Factories.—During the year ended April 30, 1936, seven hundred and forty-two inspections were made of industrial establishments coming

under the provisions of the Saskatchewan Factories Act. Two hundred and twenty-nine inspections of saw-mills, including twenty-nine custom cordwood cutting saws, were made. Recommendations for safety devices have been ordered in practically every mill.

In the freight and passenger elevator division, there were two hundred and twenty-three inspections. One hundred and fifty-eight of these inspections were of freight elevators and sixty-five passenger, and four service elevators.

One Day Rest in Seven Act.—In order to enforce compliance with the One Day Rest in Seven Act the Bureau laid twenty-eight charges against firms who had previously been warned. Fines were imposed in every case, the majority of which involved male employees.

Employment Service.—The report of the Employment Service Branch indicated the volume of transactions for the year ended April 30, 1936, to be as follows: applicants, 37,027; vacancies, 35,978; placements, 33,201. For the previous year the comparable statistics were: applicants, 30,557; vacancies, 28,226; placements, 26,393.

Farm Wages.—The average wage for farm work prevailing throughout the year was: (winter) $5 plus Government bonus; (spring) $10 to $25 per month; (harvest) $2 to $3.50 per day; (fall) after threshing to freeze up, $15 to $25 per month. Wages for men working in the lumber camps averaged $13 per month.

Immigration.—The total number of immigrants reported as coming to Saskatchewan in the period 1930-1935 (inclusive) was 10,412, the yearly statistics being as follows: 1930, 6,435; 1931, 1,352; 1932, 971; 1933, 727; 1934, 519; 1935, 408.

Direct Relief, 1935-36.—Direct relief administration in 1935-36, was reviewed under three main categories, viz.—federal assistance, provincial direct relief, and municipal direct relief. Under the first heading, details were given of federal government assistance by monthly grants-in-aid and through winter farm relief. This last was instituted in 1931, and from it there developed a system of bonuses to those accepting farm employment. The cost to the Federal government in bonuses to 6,371 persons under the scheme during 1935-36 was $104,331.11. (This system was superseded in October, 1936, by the Farm Improvement and Employment plan.)

Other phases of relief problem—particularly those which came under provincial or municipal jurisdiction or both—were dealt with under such headings as "provincial public works"; "transient families and single homeless persons"; "southern local improvement districts"; "urban municipal direct relief" and "distribution of potatoes."

Tabular summaries indicated the cost of relief during the period under review.

Minimum Wage Act

The activities of the Minimum Wage Board for the fiscal year April 30, 1936, is also contained in the Bureau's report.

During the year under the Minimum Wage Act, there were 1,119 general inspections and 183 special investigations made in 415 places of business, in which there were 1,891 experienced and 314 inexperienced females employed; in addition 290 were employed on part time, making a total of 2,495.

By negotiation with employers the inspectors were successful in collecting $6,468.14 in back wages to the benefit of 186 women.

In thirty-five instances it was necessary to lay charges in court against employers for infractions of The Minimum Wage Act and regulations. There were six cases on account of wages, and three withdrawn. One charge was laid on account of an infraction of the regulations for failing to keep a register. Fines were imposed in thirty-two cases.

Eighty overtime permits were issued as follows: fifty-nine to retail stores, ten to mail order houses, and eleven to laundries and factories.

The report contains a tabular summary indicating the number of female employees and wages paid in shops, stores, laundries, factories, mail order houses, beauty parlours, and barber shops in the cities of the province during the year 1935-36. These statistics indicated that there were in these cities 254 firms, employing a total of 1,845 females, of whom 1,366 were classed as experienced workers, 206 as inexperienced and 273 part time. The largest number (482) were in the $14 per week wage group, while 416 were paid $15 per week and 251 received $16 per week and over.

Home Improvement Loans

A statement issued recently by the Hon. C. A. Dunning, Minister of Finance, shows that Home Improvement Loans in cities and towns of Canada with a population of 5,000 or upward numbered 16,269 and amounted to $6,530,054.01 on August 31, according to reports sent in by the lending institutions.

These totals, it is emphasized, should not be confused with those covering loans for all of Canada, both rural and urban under the plan, which numbered 23,762 and amounted to $9,204,178.25 on September 15.

PRODUCERS' AND CONSUMERS' CO-OPERATION IN CANADA, 1936

Annual Report of National Executive of the Co-operative Union of Canada

FROM time to time the Labour Gazette has published information indicating the position and progress of producers' and consumers' co-operation in Canada (Labour Gazette, November, 1936, page 990, December, 1935, page 1087). A comprehensive article, entitled "The Co-operative Movement in Canada" is also to be found in the 1937 edition of the *Canada Year Book*, page 776, published recently.

Although the annual statistical review published by the Co-operative Union of Canada specifically refers to the operations of retail societies, buying clubs, wholesale societies, marketing, dairy, producers, and transportation societies affiliated with that organization, such statistics give an indication of the extent and growth of the co-operative movement throughout the Dominion.

The annual report for 1936 of the National executive of the Co-operative Union of Canada published in *The Canadian Co-operator* for September, states that "between the years 1929 and 1933 inclusive the experience of the movement reflected the prevailing depressed economic condition of the country. In 1934 an upward trend was noted, and in 1935, this satisfactory showing was not only maintained but substantially improved. The statistics for 1936, now reviewed, again indicate satisfactory progress."

The aggregate membership of the forty-one retail societies making returns to the Union was 13,696, or 2,410 more than was reported by thirty-six societies in the previous year. Including those of the reporting buying clubs (737), marketing organizations (140,244), dairy societies (2,219), and transportation and garage society (527)—the total membership of the reporting affiliated societies was 157,425. In addition thereto, the wholesale societies had a membership of 152 local associations and a producer society, 56.

Retail Societies.—The report gives figures concerning the operation of forty-one co-operative retail societies during 1936, compared with thirty-six for the previous year, and thirty-three for 1934. Reference is also made to the recent organizing of buying clubs preparatory to the establishment of co-operative stores, six such clubs reporting their operating existence for 1936.

The aggregate sales for 1936 of the forty-one retail societies as reported to the Union amounted to $4,445,338.97. Thirty-one retail societies reported increases during 1936 aggregating $501,533.59, compared with twenty-four and a total of $532,998.25, for 1935. Six societies, compared with seven for the previous year, reported reduced sales aggregating $171,536.99; making a net increase in sales of retail societies of $329,996.60. Of the six buying clubs, five were in business operation and their aggregate sales volume was $4,269.13.

The share capital of the reporting retail societies is given as amounting to $478,563.53, an increase of $51,529.77 during 1936. For the previous year there was an increase of $7,890.68. The loan capital increased by $10,906.85 to $158,448.05. The combined investments in share and loan capital were $637,011.58, an increase of $62,436.62.

The total amount of purchase dividends distributed in 1936 by thirty-seven retail societies (three not reporting aggregate purchase dividends) was $163,952.44, an increase of $33,434.90 over the previous year. The purchase dividends of the buying clubs aggregated $246.74.

Dairy and Wholesale Societies.—Three co-operative dairies, the same number as for the previous year, reported to the Union sales of $1,021,611.50, compared with $896,325.45 in 1935. Two of these dairies sell to consumers, and the third to the retail dairy trade.

Including the turnover of the dairy societies and the buying clubs, the total volume of sales of the distributive societies amounted to $5,471,219.60, an aggregate increase of $698,698.83 over 1935. The aggregate sales of three affiliated provincial co-operative wholesale societies (situated in Alberta, Manitoba and Saskatchewan) amounted to $857,422.90, contributed by each as follows: Alberta, $30,522.64; Manitoba, $296,000; and Saskatchewan, $530,900.26. The Alberta Co-operative Wholesale reported a net surplus of $644.45, while those of Manitoba and Saskatchewan made $13,820 and $8,783.57, respectively.

The purchase dividends of the producers' societies amounted to $26,007.37, wholesale societies, $15,589.97.

Total distributive turnover, wholesale and retail in 1936, was therefore $5,803,539.69, and total purchase dividends amounted to $208,238.92. Including the sales of the dairy societies, the distributive business of Canadian Live-stock Co-operative (Maritimes), $208,572.86, and the garage and bus services and sales of the Transportation Society, $48,136.06, the total volume was $7,081,860.11. The report states that these figures are exclusive of

the turnover of two large grain marketing associations—the Manitoba Pool Elevators Ltd, and the Saskatchewan Co-operative Wheat Producers Ltd., both members of the union—which are not reported, and also exclusive of the marketing transactions of the Saskatchewan Co-operative Livestock Producers, Ltd., $2,271,893.93, and Canadian Livestock Co-operative (Maritimes), $182,502.38.

Provincial Sections of Co-operative Union.—During the year, provincial sections of the Co-operative Union of Canada have been established in Alberta and Saskatchewan, each of which has held an annual conference this year. Commenting on the establishment of these provincial sections the report states: "As the movement grows, it will be desirable to organize such sections for the other provinces, but it is necessary before doing so that there should be a number of successful societies affiliated with the Union and in a substantial way of business. It is possible through such provincial sections to engage in more intensive work to stimulate to a greater extent sound organization and to protect the interests of the movement in relations with governments, legislatures and other public bodies much better than would otherwise be possible. . . . . The objective of the Union should be to have all organizations of an interprovincial, provincial, regional and local character co-ordinated through membership in the National Union."

Producer-Consumer Co-operation.—Referring to the co-ordination of producer and consumer activities in Saskatchewan as "one of the most satisfactory developments" during the year reviewed, the executive's report states that "the fact is becoming appreciated that the co-operative interests of a member of a co-operative society as producer and consumer cannot be divorced; that business facilities provided for his use as a producer should, wherever possible, be used for his advantage as a consumer, and that educational and other service-giving facilities provided for one co-operative purpose should be made available for all co-operative purposes. Saskatchewan has led the way in this respect. For some time past there has been a working arrangement for commercial purposes between the Saskatchewan Wheat Pool and the Saskatchewan Co-operative Wholesale Society, and recently the producers and consumers co-operatives in that province have associated to provide a field service for all co-operatives throughout Saskatchewan."

45016—4

Another interesting aspect of the co-operative movement in Saskatchewan is the affiliation with the Co-operative Union of what the report claims to be "the only co-operative refinery of petroleum products on this continent." The Consumers Co-operative Refineries Limited, which owns and operates a "skimming" plant at Regina for the service of its affiliated retail oil and gasoline co-operatives reported a net surplus for 1936 of $24,923.60, on a share capital of $46,669.19 (had it been so distributed) and returned purchase dividends on its products aggregating $26,007.37. Sales for the year totalled $496,508.69.

Employment in Co-operatives.—The report of the Co-operative Union also shows that Canadian Co-operative Societies employed 890 employees who received $1,053,632.67 in salaries and wages during 1936.

New Regulations in the Coal Mining Industry of Saskatchewan

Two Orders in Council of September 22, 1937, amend regulations of August 16, 1935, under the Saskatchewan Coal Mining Industry Act, 1935. This Act empowers the Lieutenant-Governor in Council to license operators of coal mines, fix conditions for licences and, after consultation with employers and workpeople if deemed necessary, to set up standards for the industry, including minimum prices, hours of labour and wages.

The first order in council amends the conditions to which coal operators' licences are subject by requiring operators to maintain the minimum price scale approved by the Government until a new scale has been approved, even though the period for which the old scale was to be effective has expired. The Minister may suspend or cancel a licence for failure to observe the conditions and also, as formerly, for contravention of the regulations or of regulations made under the Coal Mines Safety and Welfare Act.

The second order in council approves an agreement as to minimum prices for the season, September 1, 1937, to August 31, 1938, entered into by coal operators representing approximately 85 per cent of the established tonnage produced in the province. To assist in carrying out the agreement, shipping mine operators have, with the approval of the Minister, agreed to appoint a committee to investigate and report to the Minister any infractions of the agreement or of the Coal Mining Industry Act or of the Coal Mines Safety and Welfare Act or of regulations.

MINIMUM WAGES ESTABLISHED FOR MALE WORKERS IN ALBERTA

The first Order under the Alberta Male Minimum Wage Act, 1936, has been made by the Board of Industrial Relations to be effective from October 1. The Order applies to all male employees within the province with the following exceptions: farm workers and domestic servants, employees in any industry covered by an agreement as to wages and hours of labour made binding under the Industrial Standards Act; employees "hired to perform casual, seasonal or temporary work by others than employers engaged in any industry, business, trade or occupation for work in such industry, business, trade or occupation," and, finally, such employees as may be from time to time exempted by special order of the Board.

Workers are divided in the Order into two classes: (1) "those who are employed by the week or any period in excess of one week" including those who work on commission or at piece-work; (2) "employees who are employed in any manner otherwise than by the week of for any period in excess of one week."

For an employee in the first class, employed by the week or any period in excess of one week who is under 21 years of age and who has not worked in a similar employment to that in which he is engaged for an aggregate period of 24 months, the minimum rate for the first year of such employment is to be 20 cents an hour and in the second year, 23 cents an hour. For an employee in this class who is 21 years of age or over and who has not had one year's experience in his employment and an employee who is under 21 years of age and has had two years' experience, the minimum rate in the first six months of such employment is to be 28 cents an hour and in the second six months, 30 cents. For all other employees in this class, that is, those over 21 years of age with at least one years' experience and those under 21 with at least two years' experience the rate is 33⅓ cents an hour. An employee in this class must be paid for 42 hours a week even if he has worked less than 42 hours.

An employee in the second class under 21 years of age, who has not had an aggregate of 24 months' experience in the work in which he is engaged, must be paid an hourly rate of 23 cents for the first year and for the second year, 25 cents. For a worker in the second class who is 21 years of age and over and who has had less than a year's experience in the aggregate, or one under 21 years of age who has had at least 24 months' experience, the minimum rate for the first six months is 30 cents an hour and for the second six months, 35 cents an hour. For all other employees in the second class, that is, those over the age of 21 years who have a year's experience and those under the age of 21 years who have had two years' experience, the minimum rate is to be 40 cents an hour. A minimum rate of 40 cents an hour is also fixed for any employee who is employed for not more than 4 consecutive hours and the employer is required to pay such employee for 4 hours.

The provisions of this Order do not relate to any overtime worked by any employee to which the Hours of Work Act relates, "nor shall any payment made in respect of overtime be taken into account in the computation of the minimum wage payable to any employee."

Administration of Factories Act in India

The first report on the operation of the Factories Act 1934, of India has recently been received. The Act which came into force on January 1, 1935, introduced important changes in working conditions in that country, including the reduction of the maximum working hours for adults from 60 to 54 in "perennial" factories except in continuous processes where the hours may be extended to 56. The legislation reduced the daily limits for work for men in "perennial" factories and for women in all factories from 11 to 10 hours, and enforced a consecutive period off work of at least 11 hours for adults; it limited the working hours of children (persons between the ages of 12 and 15) to 5 instead of 6 hours daily and limited the spreadover of their work to 7½ hours. The Act also accords protection to adolescents (persons between the ages of 15 to 17) who cannot be employed as adults until they are certified as fit for adult work.

Other new provisions include the protection of workers against serious discomfort due to high temperatures in factories, tests of stability for new buildings or extensions, control of mechanical transport, and protection from industrial disease.

The total number of registered factories, according to the report, increased fom 9,759 to 9,918—the highest figure ever recorded. The average number of operatives employed during the year reviewed (1935) by the report increased from 1,487,231 in 1934 to 1,610,932 in 1935. The employment of women in India increased 4 per cent during 1935 as compared with 1934 while the employment of children declined 15·8 per cent.

STATE LABOUR LEGISLATION IN THE UNITED STATES, 1937

Summary of Recent Enactments

IN a recent issue of the "Labour Information Bulletin," published by the Bureau of Labour Statistics of the United States Department of Labour a survey is made of the major State labour legislation enacted since the first of the year. According to this study (made by Clara M. Beyer, Assistant Director, Division of Labour Standards, United States Department of Labour), labour standards in a number of states have been improved by the passage of new laws or by amendments to existing statutes. Laws relating to hours of work, minimum wages, industrial homework, workmen's compensation, etc., have been clarified and strengthened. An unemployment compensation law has been passed in every State that still lacked one, and, in addition many states broadened their social security programs by providing public assistance to the needy aged, the needy blind, and to dependent children.

The following paragraphs dealing with various phases of the state labour legislation have been taken from the survey.

Hours of Work

Although no State has yet enacted a law limiting the maximum hours of work to 40 a week, Pennsylvania adopted a 44-hour week, together with an 8-hour day for all workers, men as well as women. This is the lowest maximum in any State hours law. In addition to Pennsylvania, an 8-hour workday for women in a broad coverage of occupations has been established this year in Illinois and Ohio, and a 48-hour week has been fixed for women in these two States as well as in Nevada, New Hampshire, and North Carolina. As a result of the progress made during the past year in this field, 16 States and the District of Columbia now have the 8-hour day for women and 18 States and the District of Columbia provide for a maximum workweek of 48 hours or less for women. North Carolina, while lowering the maximum hours of work for women from 55 to 48 per week, applied, with some exceptions, the former women's standard of 10 hours a day and 55 hours a week to men.

While none of the State laws regulating weekly hours of work cover wage earners employed in all types of gainful occupations, progress has been made in broadening the number of occupations covered by these laws. For example, in New York the limitations on hours of work governing the employment of wage earners in stores, factories, and other establishments were extended to apply to hotel and restaurant workers. All boys between 16 and 18 years of age and waitresses and chambermaids will come under the regular 8-hour day, 48-hour and 6-day week provisions, and all workers must be given one day of rest each week. Illinois extended its 8-hour day and 48-hour week law to cover employment of women in beauty parlors, barber shops, and private institutions. At the same time the Illinois 1-day-of-rest-in-7 law which applies to both men and women was amended to include all workers in hotels, hospitals, laundries, telephone and telegraph establishments, banks and brokerage houses, and contracting businesses.

Child Labour

Two southern States, North Carolina and South Carolina, this year joined the States which have fixed 16 years as the basic minimum age for employment. With such legislation already in existence in Connecticut, Montana, New York, Ohio, Pennsylvania, Rhode Island, Utah, and Wisconsin, this enlightened standard now protects children in 10 States.

Four States—Kansas, Kentucky, Nevada, and New Mexico—ratified the proposed child-labour amendment to the Federal constitution. Twenty-eight States have now approved this amendment and only eight more States are needed to secure its adoption.

Minimum Wages

Consideration of State minimum-wage legislation received an impetus from the Supreme Court's favourable decision on the Washington minimum-wage law for women and children. Arizona, which was one of the States whose earlier law was invalidated by the Supreme Court, called a special session of its legislature and enacted a new minimum wage law. Nevada, Oklahoma, and Pennsylvania adopted minimum-wage laws for the first time during 1937. New York and Massachusetts re-enacted with some modifications their former laws relating to minimum wages for women and children, and Colorado, Connecticut, Minnesota, and Wisconsin strengthened their existing laws.

The Oklahoma minimum-wage law, which was enacted during the recent session of its legislature, is closely modeled after the Washington statute. But by applying the terms of the act to men as well as to women and children it goes further than any other State minimum-wage law. The Nevada statute sets as the standard minimum wage $3 for an 8-hour day, or $18 for a week of 6 days.

The other minimum-wage laws passed this year provide for the establishment of wage boards in each industry in which a substantial number of women and minors are found to be receiving oppressive wages. The wage boards may recommend minimum-wage rates and other necessary administrative regulations. Orders are first enforced by the publication of the names of those employers who are not paying the wages recommended by the wage board. After a preliminary period the minimum-wage order may be made mandatory by the State labour department. In Arizona minimum-wage orders automatically become mandatory after 3 months, provided no appeal has been made from the wage standards which have been established. In Washington the orders of the minimum-wage board are mandatory at the outset. In Massachusetts, New York, and Pennsylvania any worker who has been paid less than the legal minimum wage may assign his claim for back wages to the labour department, which is authorized to collect it for him. The legislation in this field during 1937 brings the number of States having minimum-wage laws for women to 22, exclusive of the District of Columbia, whose former minimum-wage law again became effective after the decision of the Supreme Court in the Washington minimum-wage case.

Social Security

Unemployment-compensation laws have now been enacted for all the States, the District of Columbia, and the Territories of Alaska and Hawaii. Payment of benefits will start in most States after January 1, 1939. Wisconsin, however, which passed its unemployment-compensation law in 1932 (LABOUR GAZETTE, March, 1932, page 323, April, 1932, page 379, September, 1937, page 952), started paying benefits last year. About half of the unemployment-compensation laws will be administered under the State labor departments. In the other States separate agencies have been set up to administer the provisions of the State unemployment law.

By June 30, 1937, all but four States—Kansas, Nevada, South Carolina, and Virginia—had enacted plans for old-age benefits which met the approval of the Social Security Board. Similarly, 32 States and the District of Columbia had enacted legislation providing aid for the needy blind, and 34 States and the District of Columbia had adopted plans for aid to dependent children which were approved by the Social Security Board.

Labour Relations Acts

State labour relations acts, intended to supplement the National Labor Relations Act, were enacted in Massachusetts, New York, Pennsylvania, Utah, and Wisconsin. These laws create boards or commissions which are empowered to forbid certain defined unfair labour practices, and to hold elections and certify the proper representatives for collective-bargaining purposes when controversies arise between various employee groups.

The unfair labour practices which are prohibited vary among the States. The New York act, for instance, goes into considerable detail and prohibits employers from engaging in labour espionage and surveillance, blacklisting, and initiating, participating in, or financially supporting employee organizations. Employers are also forbidden to require employees to sign anti-union contracts, to encourage membership in company unions, or to discourage membership in labour organizations by discriminating in regard to hire or tenure or terms of employment. They are also forbidden to discharge or discriminate against any employee for testimony or complaints filed under the act, or to refuse to bargain collectively with duly elected representatives of workers. Finally, an employer is enjoined from doing other acts which interfere with, restrict, or coerce employees in the exercise of their legal rights.

Pennsylvania and New York have supplemented their labour relations acts by mediation statutes in order to provide more adequate machinery for the prompt adjustment of industrial disputes, and Wisconsin has empowered its labour relations board to mediate and conciliate labour disputes wherever possible. Wisconsin has also provided some novel conference machinery whereby it is hoped that sources of friction can be eliminated by the joint action of employers and workers. The labour relations board is to appoint annually a committee representative of bona fide labour organizations in the State and a committee of representative employers. Complaints concerning abuses or unfair practices by either side—except complaints involving practices prohibited by the act itself—may be referred to these committees for either separate or joint investigation.

Although a number of bills aimed at restricting union activities were introduced this year, the only ones that passed were brief enactments aimed at sitdown strikes in Vermont and Tennessee. In Massachusetts, occupation of the premises to force settlement of a labour dispute is declared an unfair labour practice in the State labour relations act.

Industrial Homework

Illinois, Massachusetts, and Pennsylvania this year adopted laws enabling their labour

departments to make more drastic regulations governing the manufacture of goods and employment of individuals engaged in industrial homework. In Texas the authority to regulate industrial homework was placed in the hands of the State department of health. Most of the State laws prohibit outright the manufacture or processing of certain kinds of articles in homes. Homework by children under a certain age (which varies from 14 to 16 years) is forbidden. The Massachusetts and Pennsylvania laws, like those previously adopted in New York, Connecticut, and Rhode Island, also empower the labour department to prohibit the giving out of homework in industries where the continuance of this type of work may injure the health or welfare of the homeworkers or undercut standards established by law or agreement for factory workers.

Workmen's Compensation

Increases in compensation benefits for industrial injuries will be obtained by workers in a number of States as a result of laws adopted this year, notably in Georgia, New Hampshire, New Mexico, Ohio, Pennsylvania, and South Carolina. More extended medical care for injured workers has been authorized in Georgia, Kentucky, Indiana, Iowa, New Mexico, Pennsylvania, Wisconsin, and Wyoming. Compensation will be paid for certain enumerated occupational diseases in Delaware, Indiana, Michigan, Pennsylvania, and Washington. Twenty-one States and the District of Columbia now compensate workers for certain occupational diseases arising out of industrial employment, but only 8 of these States and the District of Columbia compensate workers exposed to all kinds of occupational diseases.

Payment of Wages

Laws relating to the time and medium of wage payment, the use of scrip, wage assignments, and settlement of claims for unpaid wages were enacted in 22 States. Labour commissioners in Illinois, New Mexico, New York, and Utah have been authorized to accept assignments of wage claims and to collect unpaid wages for claimants through suit in the civil courts.

Provisions governing pay days, payment of workers who are discharged or who quit, and payment of employees who are on strike or who are locked out, have also been clarified and strengthened in at least a dozen States. Still more important, the enforcement of these regulations has been definitely lodged in the labour department in the case of Illinois, New Mexico, South Carolina, and Utah. This means that thousands of wage earners can now obtain the aid of their State department of labour in securing the wages owed them.

Consumers' Co-operatives in Alberta

At the annual conference of the Co-operative Societies, called under the auspices of the Alberta Section of the Co-operative Union of Canada, and reported in "The Canadian Co-operator," Mr. A. H. Christensen, Supervisor of Co-operative Activities in the Alberta Department of Trade and Industry, stated that "Consumers' Co-operatives were gradually gaining ground in Alberta, the forty-one reporting associations showing total sales of $1,309,726; assets of $635,677; and current liabilities of $150,509. The paid-up capital was $207,086, reserves and surpluses, apart from depreciations and bad debt allowances, $277,646." Referring to consumer co-operatives in dried out areas he said that these organizations were "holding good reserves and maintaining their positions."

A resolution adopted at the conference in referring to consumers' co-operation recommends "that the Alberta Co-operative Wholesale Association, together with the Alberta Co-operative Supervisor, contact all co-operative associations in the province with the objective of securing as much co-operative purchasing volume as possible, and that this effort be carried out under the auspices of the Alberta Co-operative Wholesale Association."

Another resolution adopted stated "Whereas many of the efforts made in recent years to organize the consumers of Alberta have been developed independently, and have had little or no relation to each other, and whereas some of the co-operative organizations thus established have become competitive with each other in certain commodities and areas, and whereas this is detrimental to, and subversive of, the aims of the co-operative movement, be it resolved that every effort be made to co-ordinate the co-operative buying associations of the Province with the end in view of maintaining one central wholesale, and one educational unit, for the whole co-operative movement in Alberta."

Hon. Ivan Schultz, Manitoba Minister of Education, has announced that the federal-provincial youth training project in Manitoba will be directed by a commission headed by Dr. H. C. Etter, provincial superintendent of education.

TRADES UNION CONGRESS OF GREAT BRITAIN

Sixty-ninth Annual Trades Union Congress

THE sixty-ninth annual Trades Union Congress was held at Norwich, England, from September 6 to 10, with Mr. E. Bevin presiding. In all, 623 delegates were appointed to attend the Congress representing 169 affiliated organizations with a membership of approximately 4,009,000, an increase of 394,096 compared with that of a year ago. Membership increases were registered in nearly all the principal groups of organizations; the textile group however showed a decline of over 2 per cent. The following paragraphs are taken from the report of the convention appearing in the current issue of the British *Ministry of Labour Gazette*.

In his opening address, the President, Mr. E. Bevin, referred to the revival of membership in the trade union movement, but urged the need for further organization, particularly among clerical and administrative workers and among women employed in industry. He welcomed the extension of trade union association with the medical, scientific, and technical professions, and referred to a decision of the General Council to establish a scientific advisory council, whose purpose would be to enable the Congress and its constituent unions to secure the help and advice of leading scientists in a systematic and regular way. On the subject of industrial legislation he said that the new Factories Act could be made effective only by vigorous administration and by the vigilance of the trade unions, and claimed that a new Workmen's Compensation Act, and legislation providing for holidays with pay, were also required. As regards statutory regulation of wages and conditions of employment, he urged that careful consideration was necessary; in some industries State regulation was essential, but in others only the legalizing of voluntary agreements should be accepted. He referred to the work of the International Labour Organization, and appealed for a review of the Government's attitude towards the Organization. As regards labour matters overseas, he urged that a strong trade union movement in India was more than ever necessary, and advocated an investigation into labour conditions in the Colonies. With regard to trade and employment, he advocated that preparations should be put in hand forthwith to meet the decline which might take place on the completion of the re-armament program.

The Congress then proceeded to consider the General Council's Report, taking in connection therewith a number of resolutions prepared by the General Council or proposed by affiliated unions. The first resolution asked for protective legislation for young workers, including the raising of the school-leaving age to 16, with an adequate maintenance allowance, a 40-hour week (to include time for education), the abolition of overtime for all workers under 18, and the provision of adequate facilities for technical training. This resolution was adopted.

A resolution was passed by the Congress welcoming the Minister of Labour's statements advocating the extension of voluntary collective agreements in the distributive trades, and approving his action in bringing together representatives of employers and of workpeople in those trades for the purpose of discussing the regulation of wages and working conditions. It also urged workers in those trades to join the appropriate trade union, in order that such collective agreements might be secured and maintained.

A resolution was adopted criticizing the Government for its failure to give legislative effect to many of the important conventions adopted by the International Labour Organization. It called upon the Government to ratify the 40-hour week convention of the International Labour Organization, and instructed the General Council to make every effort to secure a 40-hour week without reduction in wages, and to support trade unions in their endeavours to secure a shorter working week. A resolution was also passed urging the Government to give legislative effect to the International Labour Organization's conventions on holidays with pay, and pledging support to the General Council in their continued efforts to that end.

Approval was given to a contributory pensions scheme prepared by the National Council of Labour, proposing weekly pensions of £1 (for single persons) and £1 15s. (for married couples) for persons of 65 years of age, qualified under the Old Age Pensions Acts, conditionally upon their retirement from gainful employment. The scheme also proposed that unemployed persons, aged 60-65, upon being certified by the Unemployment Assistance Board as unlikely to regain normal employment, should receive pensions at these increased rates, and that children's allowances should be increased. A resolution was also adopted urging that the salary limit for non-manual workers under the National Health and Unemployment Insurance Acts should be raised to £500 a year.

A statement prepared by the National Council of Labour on International Policy and Defence reviewing the international situation was adopted by a large majority. The statement expressed the view that war can be prevented, the arms race stopped, and the League of Nations made strong again, provided "that a British Government soon comes to power basing its policy on the declarations of the British labour movement."

Other resolutions that were passed dealt with the situation in Spain and in China; the extension of the hours limitation for young persons, contained in the Shops Act, 1934, to adult workers; the proposals of H.M. Government regarding the distribution of electricity; malnutrition and physical development; employment in cinemas; and conditions in the British film industry.

SESSIONS OF BRITISH COMMITTEE ON HOLIDAYS WITH PAY

THE Minister of Labour (Great Britain) announced, in the House of Commons, on March 25, the appointment of a committee "to investigate the extent to which holidays with pay are given to employed workers and the possibility of extending the provision of such holidays by statutory enactment or otherwise and to make recommendations."

Since its appointment, the Committee has invited evidence (in writing) from all persons and bodies interested in the subject. There has been received to date the published minutes of evidence taken before the Committee at its sittings on April 27, June 8, and June 15.

The memorandum of evidence submitted by the Ministry of Labour at the sitting of April 27, reviewed the development of the movement for annual holidays with pay in Great Britain, the position in foreign countries, and the action taken by the International Labour Office.

Dealing with the situation in Great Britain, it was pointed out in the Ministry's memorandum, that before the war, wage-earners were not, as a rule, paid wages for holidays. Although the Factory and Workshop Act of 1901 provided that holidays amounting to six days per annum must be granted to factory workers under eighteen, yet payment of wages for these holidays was not stipulated.

It was indicated, however, that while the foregoing was true for industry generally, nevertheless in the railway service and public utility and municipal services and the newspaper printing industry, it was the practice for the majority of wage earners to be granted annual holidays with pay, ranging from three to twelve days per annum.

Immediately after the war, the practice of granting holidays with pay spread to a considerable number of other industries, until in August, 1920, there were approximately sixty general and district collective agreements (known to the Department) between employers and workpeople in which provision was made for payment of wages during annual holidays.

In the next few years, according to the Ministry's memorandum of evidence the number of district agreements continued to increase, and by December, 1922, one hundred were known to the Department. At March, 1925, it was estimated that agreements then in force covered approximately 1½ million manual wage earners. Since the beginning of 1925, there has been a relatively small increase in the number of new agreements, and the Ministry lists some of the more important of these.

It was explained in the Ministry's submission of evidence that the increase since 1926 in the number of agreements providing for holidays with pay has been offset to some extent by the lapsing or termination of certain agreements in which the provision for granting holidays formed only a part of a clause dealing with other conditions of employment. In such cases it is not known to what extent individual employers have continued to observe the arrangements as to holidays made by the former agreement.

At the present time it is estimated that the number of workpeople covered by the operative agreement is between 1½ and 1¾ million. In comparing this estimate with that for 1925, it was further explained that not only have some agreements been terminated but that in the railway service (which is the largest industry in which such provisions exist) there has been a considerable decline in the number of persons employed.

On the seocnd day's sitting (June 8) there was submitted the memorandum of evidence by the Trades Union Congress. The evidence on behalf of the Congress was presented by Sir Walter Citrine, K.B.E., (General Secretary of the Congress General Council). He was accompanied by Mr. H. Berry (Amalgamated Engineering Union), Mr. W. Holmes (National Union of Agricultural Workers), Mr. W. Lawther (Mineworkers' Federation of Great Britain), and Mr. G. Woodcock (Congress Headquarters).

At this sitting, also, there was heard the evidence of Mr. A. S. Comyns Carr, K.C., in

regard to a contributory scheme for the payment of holidays in connection with unemployment insurance.

At the third meeting (June 15) evidence was presented by the Co-operative Union Limited, and the Parliamentary Committee of the Co-operative Congress as well as on behalf of the National Federation of Meat Traders' Associations, the Theatre Managers Association and the Entertainments Protective Association.

INSTRUCTIONAL COURSES FOR UNEMPLOYED YOUTH IN GREAT BRITAIN

UNDER the provisions of the Unemployment Act, 1934, courses of instruction for unemployed boys and girls were made one of the statutory duties of Local Educational Authorities for Higher Education in England and Wales, and of Education Authorities in Scotland.

As pointed out in the September issue of the *Ministry of Labour Gazette* (Great Britain) this scheme has been in operation in its present form since the autumn of 1934. In May, 1936, the Minister of Labour invited the National Advisory Council for Juvenile Employment (England and Wales) and the corresponding Council in Scotland to review the operation of the scheme generally, and also to express their views upon certain points of difficulty which had emerged in its administration. The reports of these two advisory councils on the points submitted to them have now been published.

These reports are summarized in the *Ministry of Labour Gazette* from which the following information is extracted.

The report of the Council for England and Wales discusses the difficulties experienced by Authorities in establishing centres and classes under the 1934 Act. These were chiefly (*a*) the difficulty of making the assessment of the immediate employment position and the future trend of employment, without which Authorities could not determine the accommodation required, and (*b*) the difficulty of securing premises of the standard which was required with the passing of the 1934 Act, particularly in certain built-up areas, mountainous districts, and areas undermined by coal workings, where a high proportion of the total juvenile unemployment is located.

The Council examine, and in some cases make recommendations on, certain points of administration, such as the hours of attendance, opening and closing criteria, staff ratio, curriculum, premises and equipment. They recommend that the rule as to travelling expenses should be altered, so that return fares should be paid for boys and girls residing three miles or more from a course, and single fares for those residing between two and three miles from a course.

The Council recommend that Local Education Authorities should be encouraged to take full advantage of their powers to provide medical and dental treatment for the boys and girls in attendance at Courses of Instruction. This service should be so administered as to make treatment readily available for all juveniles who are in need of it.

In the report of the Scottish National Advisory Council attention was drawn to the difficulties which Authorities have experienced in estimating the number of boys and girls for whom accommodation should be provided, and in providing suitable premises. They also examine the various points of administration considered by the Council for England and Wales. On the subject of travelling expenses they suggest that return fares should be paid to juveniles residing more than two miles from a course.*

With regard to medical services, they point out that medical treatment cannot be provided for juveniles attending authorized courses in Scotland under the present law. They recommend that legislation should be introduced to enable medical services to be provided in Junior Instruction Centres in Scotland, of the same nature and extent as those which may now be provided in the centres in England and Wales.

There is appended to the Report of each Council an interim Report on the provision of meals in Junior Instruction Centres.

The English Council reach the conclusion that a certain number of juveniles attending centres are under-nourished, and cannot derive full advantage from instruction without supplementary nourishment. The Council suggest certain modifications in the procedure for the supply of milk as medical treatment, and go on to recommend that, in view of the fact that it is the function of the centres to maintain and improve employability, and that a

*The Minister of Labour has now informed Education Authorities in Scotland that, though he is unable to adopt this recommendation in full, he is prepared to modify the present rules so that return fares may be paid for those juveniles who reside three miles or more from a course, and that the cost of the single journey may be paid for those residing between two and three miles from a course.

large proportion of the instruction is devoted to manual work and physical training, milk and biscuits should be provided for all juveniles attending centres as a normal accompaniment of their physical education.

The Council are also of the opinion that there are some juveniles attending centres for whom milk is not enough, and for whom meals are desirable if they are to profit fully from instruction.

The Council for Scotland reach the conclusion that a certain number of juveniles attending centres are under-nourished, and make similar recommendations regarding the provision of meals and of free milk and biscuits for juvenile attending centres.

In answer to a question put to him in the House of Commons on 27th July, 1937, asking whether he had considered the Report of the National Advisory Council for Juvenile Employment (England and Wales) on the provision of meals for juveniles in attendance at Junior Instruction Centres, the Minister of Labour stated that he had decided to adopt these recommendations, and that he proposed to take the necessary steps to give legislative effect to them at the earliest opportunity.

LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

Australia and International Labour Conventions

In the course of the debate in the Senate of the Commonwealth of Australia on the reports of the Australian delegates to the Twenty-first and Twenty-second (1936) Sessions of the International Labour Conference, the Minister for External Affairs, on June 29, 1937, referred to the attitude of the Commonwealth Government towards the Conventions adopted by these Sessions and also to the ratification by Australia of International Labour Conventions in general.

The Minister stated that in answer to the consultation of the States on the question of what Conventions they were willing that the Commonwealth should ratify, replies had already been received from Victoria, Western Australia and Tasmania. If the replies received from the other States were equally satisfactory, the Commonwealth should be able to proceed with the ratification of at least ten or twelve Conventions. The question of securing the co-operation of the States where necessary with a view to ratification would be vigorously pursued.

The Maritime Conventions.—He pointed out that the Navigation Act was in advance of the provisions laid down in the Shipowners' Liability (Sick and Injured Seamen) Convention, 1936 (No. 55). The Commonwealth Seamen's Compensation Act moreover made provision for compensation in the case of long illness, total or partial incapacity, or death.

The Seamen's Welfare in Ports Recommendation, 1936 (No. 48), which fell mainly within the jurisdiction of the States, had been referred to them for consideration and advice. The Commonwealth Government would endeavour to obtain the co-operation of the States in the application of the principles of this Recommendation, which it regarded as very desirable in the general interests of the seamen.

In the Commonwealth House of Representatives, on June 30, 1937, the Minister representing the Minister for External Affairs stated, in reply to a question, that in the case of all the Conventions adopted by the Maritime Sessions of the Conference in 1936, with the exception of the Hours of Work and Manning (Sea) Convention, 1936 (No. 57), on which no action by the States was needed, it was necessary for full compliance with their provisions to obtain the co-operation of the States in relation to intra-State trade. The Conventions had been referred to the States for consideration of the question of giving effect to the provisions of them, and the question of the amendment of the Commonwealth Navigation Act so as to comply fully with the provisions so far as the Commonwealth was concerned was receiving attention.

The Economic Situation

A warning that the rapid rise in the prices of raw materials, whilst contributing to the prosperity of the main producing countries, "holds out the possibility of a dangerous reaction at a later stage," is sounded by the International Labour Office Year-Book for 1936-37, which has just been published.

"Judged by the general standards of economic activity," says the Year-Book, "1936 was a year of great improvement. Throughout the world production was on a higher level, both quantitatively and from the point of view of profitability. Countries which as late as 1935 were still in the trough of the depression finally succeeded in emerging, at least to some extent, into a phase of increasing activity.

"General indices of production are, however, scarcely an adequate criterion of prosperity. In the first place, the phenomenon of chronic mass unemployment has not completely disappeared. Not only is the volume of total unemployment some 25-50 per cent above the 1929 level, but in certain countries there are clearly defined

groups which have remained untouched by the general improvement.

"The fact that the general quantum of international trade remained some 15 per cent below the 1929 level furnishes a partial explanation of this failure. Certain of the recovery features, moreover, are double-edged. The rapid rise in the prices of raw materials, whilst contributing to the prosperity of the main producing countries, is already threatening manufacturing countries with an unwelcome rise in industrial costs and holds out the possibility of a dangerous reaction at a later stage.

"Furthermore, the favourable picture of recovery as a whole is modified to no small extent by the fact that national economies have, in a varying degree, come to be dependent on policies of hurried rearmament. This dependence, it is true, is of decisive importance in but two or three countries; elsewhere the influence of rearmament is less dominating. But the fact remains that expansion is unhealthy to the extent that it is based on the special demand created by abnormal defence measures."

Discussing the rise in prices, the Year-Book points out that while the prices of foodstuffs are still mainly below the 1929 level, those of industrial raw materials have to some extent recovered their former position.

"The prices of non-ferrous metals and of rubber," it says, "have, indeed, risen even more sharply during the first quarter of 1937. In general, the tendency to reduce the gap between industrial and agrarian prices, already noted in 1935, continued during 1936."

The Social Implications of Recovery

Reviewing "The Social Implications of Recovery," the 1936-37 edition of the International Labour Office Year-Book, says that economic well-being probably reached a higher level in 1936 than in any of the five preceding years.

Although admitting that no all-inclusive index can be cited, the Year-Book explains:—

"That recovery in various countries has been found to coincide with a change from a policy of active or passive deflation to a policy of monetary management and the application of some form of expansionist technique is one of the most suggestive social-economic developments of recent times. It is a fact of vital interest both to employers and to workers. It has shown the employer that the state and the banking system together can take measures to increase, decrease or maintain the total volume of effective demand; and that when goods in general throughout the world cannot find markets at remunerative prices, the situation is not entirely one beyond human control. It has shown the worker that the total volume of employment depends to a great extent on the monetary and financial policy followed.

"This does not mean that the difficulties of particular industries and of particular areas can invariably be dealt with by monetary measures. Nor does it mean that every country is master of its own economic destiny. But the lessons of the period 1929-1936 give good reason to believe that suitable monetary and financial management in the various countries, provided it is internationally co-ordinated, can help to prevent depressions of the depth, severity, and duration of that through which the world has just passed. . . .

Steam Railways in 1936

The preliminary report on steam railways in Canada for 1936 recently issued by the Dominion Bureau of Statistics shows that gross revenues of all Canadian railways for 1936 amounted to $334,768,557 as compared with $310,107,155 for 1935, an increase of $24,661,402, or 8 per cent. This was the third year to show an increase since 1933 when the low point was reached. Operating expenses also increased from $263,942,899 in 1935 to $283,345,968, or by $19,403,069, or 7·4 per cent. This increased net operating revenues from $46,164,256 to $51,422,588. Railway taxes were raised from $8,843,006 to $9,572,616. Interest on funded and unfunded debt was reduced from $116,789,749 to $112,204,370. This includes interest on Government advances to the Canadian National railways and the financing of deficits since 1932 has stopped the yearly additions to debt and interest due to deficits. The net corporate income of all railways carried to the profit and loss account was a debit of $79,626,219 as against a debit of $84,827,858 in 1935. This included $36,428,873 interest on Government advances to the Canadian National system in 1936.

The number of employees increased from 127,526 for 1935 to 132,781, or by 4·1 per cent, and the total pay-roll was increased from $172,956,217 to $182,638,364, or by $9,682,157, or 5·6 per cent. The report also shows the average earnings per day or per hour by occupations and classes of employees. The general average of hourly compensation was 56 cents as compared with 55·7 in 1935. For workers on maintenance of way and structures the average per hour was 41·4 cents; maintenance of equipment, 59 cents; for transportation (engine, train, telegraph and station service) 71·7 cents.

The number of passengers killed in train accidents was reduced from 10 in 1935 to six, but the number injured was increased from 432 to 657. During the year 83 employees were killed, including 47 trainmen and 22 trackmen, and 1,293 were injured. The number of trainmen killed increased by 114 per cent and the number of trackmen killed by 145 per cent. Other persons killed in train accidents amounted to 273, including 119 at railway crossings and 104 at other places on the track. The highway crossing accidents included 105 motorists killed and 266 injured.

EMPLOYMENT AND UNEMPLOYMENT IN CANADA IN AUGUST, 1937

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on September 1 was 10,336, the employees on their pay-rolls numbering 1,174,041 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for August was 1,835, having an aggregate membership of 201,458 persons, 7·6 per cent of whom were without employment on September 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from the 64 offices of the Employment Service of Canada showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

(1) The Employment Situation at the Beginning of September, 1937, as Reported by Employers

The firms furnishing monthly returns on employment to the Dominion Bureau of Statistics reported at the beginning of September further substantial improvement in the situation, the upward movement extending to all five economic areas and to most of the industrial groups. Statements were received from 10,336 employers with an aggregate payroll of 1,174,041 persons, or 30,581 more than at August 1; this increase was larger than that recorded at September 1 in any other year of the record. Reflecting this gain, the crude index (average 1926=100) rose from 120·0 in the preceding month to 123·2 at September 1, 1937, when it was higher than at that date in any other year for which data are available, except 1929.

According to the experience of the years since 1920, the average change between August 1 and September 1 is very slight, increases in a number of these years just about offsetting declines in the remainder. The marked advance at the latest date therefore resulted in a gain in the seasonally-corrected index, which rose from 114·9 at August 1 to 118·1 at the beginning of September, 1937.

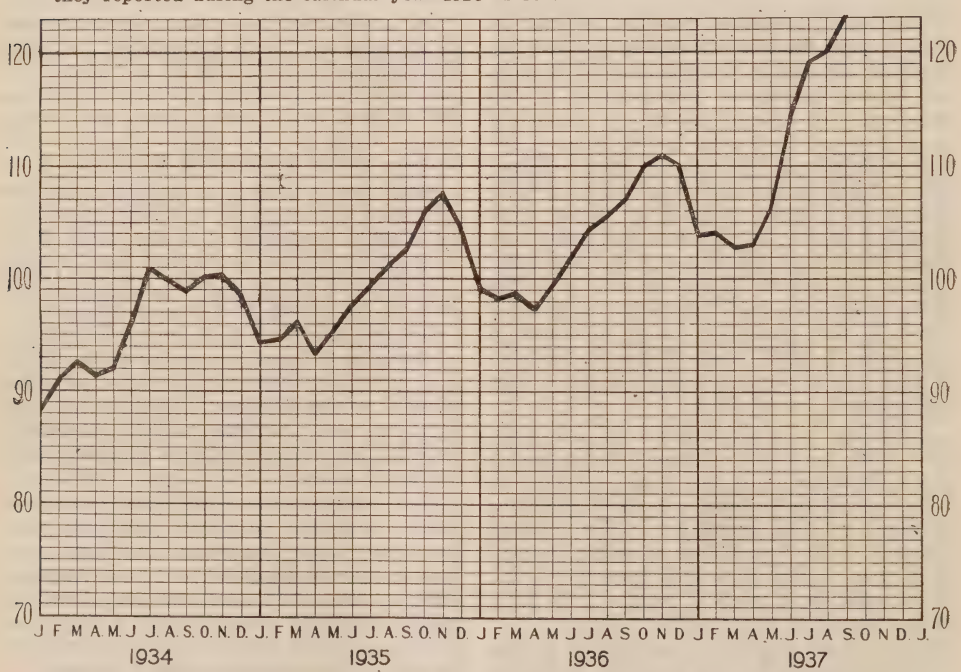
The following are the unadjusted indexes for September 1 in the seventeen years of the record: 1937, 123·2; 1936, 107·1; 1935, 102·7; 1934, 98·8; 1933, 88·5; 1932, 86·0; 1931, 107·1; 1930, 116·6; 1929, 126·8; 1928, 119·1; 1927, 111·0; 1926, 106·2; 1925, 97·8; 1924, 94·2; 1923, 101·2; 1922, 94·8, and 1921, 89·8.

An analysis of the returns by industries shows expansion in manufacturing, in which employment has declined in seven and increased in nine of the previous Septembers for which statistics are available, the average change being a very slight falling-off. The advance at the beginning of September in the present year compares favourably with this average reduction, and was larger than that recorded at September 1 in any other of the years in which the trend has been upward. The greatest gains in manufacturing at the date under review occurred in food and in textile factories, while there were moderate, seasonal losses in iron and steel plants. Among the non-manufacturing industries, logging, mining, communications, transportation, construction and services showed heightened activity. On the other hand, employment in trade was quieter.

The employers furnishing data for September 1, 1936, had numbered 9,967 and their employees had aggregated 1,014,532, which was an increase of 14,562 over their August 1, 1936, payrolls. The improvement then had also been fairly general, there having been gains in each of the five economic areas and in most of the main industrial divisions.

Employment by Economic Areas

Firms in all provinces except New Brunswick showed considerable gains, those in Quebec and Ontario being most pronounced. The situation generally in each of the five



economic areas was more favourable than at the beginning of September of last year, or of any other year of the record except 1929; indeed, in the Maritime Provinces and Quebec, the index numbers also exceeded those for September 1, 1929.

Maritime Provinces.—Employment in the Maritime Provinces as a unit showed expansion at September 1; the advance, though not large, is especially interesting because it is contrary to the usual seasonal trend at this time of year, the experience of the years since 1920 showing, on the average, a decline between August 1 and September 1. Most of the gain at the date under review took place in manufacturing and coal-mining, while curtailment was recorded in construction and maintenance, mainly of highways and roads. Statistics were received from 715 firms in the Maritime Provinces, whose staffs aggregated 97,762 workers at September 1, 1937, compared with 97,043 in the preceding month. A rather smaller increase had been recorded at the beginning of September of last year, when the 701 employers furnishing data had reported 82,130 persons on their payrolls; the index then was many points lower than at the latest date, when it stood at 135·4. The following shows indexes for each of the Maritimes in the last four months:—

Provinces	Relative Weight	Index Numbers (1926=100) Sept. 1, 1937	Aug. 1, 1937	July 1, 1937	June 1, 1937
Prince Edward Island..	1·7	87·9	85·2	79·7	82·0
Nova Scotia..	52·5	133·5	131·5	138·3	124·3
New Brunswick..	45·8	140·5	140·8	136·1	121·4
Maritimes..	100·0	135·4	134·3	135·8	122·0

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

Note.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

Quebec.—Increased employment was noted in Quebec, mainly in manufacturing, logging, mining, construction and maintenance and services; within the first-named, the textile, vegetable food, leather, pulp and paper, electric current, iron and steel, non-ferrous metal and some other groups showed improvement. The working force of the 2,468 employers co-operating in Quebec stood at 346,778 persons, as against 336,505 at August 1. This gain considerably exceeded the average increase indicated at September 1 in

the years, 1921-1936. An advance on a smaller scale had been registered at the beginning of September, 1936, and employment then was generally in lesser volume, the index standing at 103·0, as compared with 124·5 at the latest date. Statements for September 1 of last year had been tabulated from 2,353 establishments employing 285,430 workers, compared with 280,865 in the preceding month.

Ontario.—In this province, 4,581 firms reported considerable increases in personnel, enlarging their staffs from 475,903 at the first of August, to 486,959 at September 1. Less pronounced improvement had been noted at the same date last year, when the index, at 108·1, was many points lower than at the latest date, viz., 125·0. Manufacturing recorded a substantial increase; there were large seasonal increases over August 1, 1937, in the vegetable food and textile divisions, together with smaller gains in leather, pulp and paper, chemical, rubber, non-ferrous metal, electrical apparatus, tobacco and beverage and some other groups, while there were small declines in lumber and considerable losses in iron and steel factories, where they were seasonal in character. Among the non-manufacturing industries, logging, communications, transportation, construction and services reported heightened activity, while trading establishments showed reductions in personnel.

The 4,406 employers co-operating at the same date in 1936 had employed 418,296 persons, as compared with 414,473 at August 1 of last year.

Prairie Provinces.—A further important advance was indicated on the whole in industrial employment in the Prairie Provinces at the beginning of September; the index was two points higher than at September 1, 1936, when a rather smaller increase had been recorded by the firms making returns. Data were tabulated for the date under review from 1,473 employers of 139,494 workers, as compared with 134,664 in the preceding month. Mining, transportation and construction and maintenance afforded heightened employment, the gains in the last-named being most extensive; manufacturing showed little general change, while retail trade was slacker. The following shows index numbers for each of the Prairie Provinces in the last four months:—

Provinces	Relative Weight	Index Numbers (1926=100) Sept. 1, 1937	Aug. 1, 1937	July 1, 1937	June 1, 1937
Manitoba	44·0	100·2	99·0	100·3	97·4
Saskatchewan	24·3	128·3	118·8	110·2	103·9
Alberta	31·7	111·0	107·1	105·7	99·4
Prairies	100·0	109·4	105·6	104·0	99·3

For September 1, 1936, 1,447 firms had reported 136,342 employees, or 4,524 more than in the preceding month.

British Columbia.—Employment in British Columbia showed a marked increase at September 1. A decidedly smaller advance had been indicated at the same date of last year, when the index, at 109·3, was considerably lower than at the latest date, (viz., 121·2). Manufacturing, on the whole, was much brisker than at August 1, 1937, the improvement occurring largely in lumber, animal and vegetable food and metal-using factories. Logging, mining and transportation also showed heightened activity, while highway and railway construction released some workers. The personnel of the 1,099 firms furnishing data rose from 99,345 persons in the preceding month, to 103,048 at the beginning of September. At the same date last year, 1,057 employers had made returns, showing an aggregate working force of 92,334.

Table 1 gives index numbers by economic areas.

Employment by Cities

Employment advanced in Montreal, Quebec City, Toronto, Hamilton, Ottawa, Winnipeg and Vancouver, while curtailment was noted in Windsor. The situation in each of these centres was more favourable than at September 1 in any of the last few years.

Montreal.—Employment in Montreal increased at the beginning of September, 3,654 persons having been added since August 1 to the paylists of the 1,415 co-operating firms, who employed 161,838. Considerable improvement was noted in manufacturing, particularly in textiles, but food, rubber, electrical apparatus, iron and steel and non-ferrous metal factories were also busier. In addition, construction and services showed heightened activity. In trade there was little general change, while transportation was quieter. A smaller advance had occurred at September 1, 1936, when data were received from 1,355 employers of 141,569 men and women; the index was then over thirteen points lower.

Quebec.—An increase was registered in Quebec, according to 178 establishments having 14,686 workers, as compared with 14,503 in the preceding month. Manufacturing, especially of leather products, transportation

and services were rather more active, but construction and trade showed a slight falling-off. Employment was brisker than at the beginning of September of a year ago, when an advance had also been indicated by the 173 concerns making returns, whose payrolls had aggregated 13,064.

Toronto.—Manufacturing showed substantial improvement, chiefly in the leather, vegetable food, pulp and paper, textile, chemical, electrical apparatus and metal divisions; services also afforded considerably more employment, while trade was slacker. Statements were received from 1,552 firms with 136,989 employees, or 2,735 more than at August 1. Expansion on a similar scale had been indicated at the same date of a year ago, but employment was then below its present level, according to the information furnished by 1,486 employers with 128,010 persons on their staffs.

Ottawa.—Heightened activity was noted in Ottawa, chiefly in manufacturing and building construction. The 204 establishments making returns reported 15,093 on their staffs, compared with 14,959 in the preceding month. At September 1, 1936, an increase had also been noted in the forces of 196 employers, who reported 14,661 men and women at work; the index was then slightly lower.

Hamilton.—Manufacturing afforded more employment, mainly in iron and steel, while the changes in the remaining industries were on a comparatively small scale. Two hundred and ninety-one concerns had 38,500 persons on their payrolls, as compared with 37,957 at August 1. Curtailment had been indicated at the beginning of September of a year ago, when industrial activity was at a much lower level, according to data from 287 firms with 31,482 employees.

Windsor.—A reduction was registered in Windsor, where the 179 firms making returns reported 18,032 workers, as against 18,428 in the preceding month. Iron and steel factories showed diminished activity and trade

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS

(AVERAGE CALENDAR YEAR 1926=100)

—	Canada	Maritime Provinces	Quebec	Ontario	Prairie Provinces	British Columbia
Sept. 1, 1921	89·8	104·9	83·3	89·1	97·8	84·8
Sept. 1, 1922	94·8	101·4	87·3	97·9	100·5	90·5

Aug. 1	120·0	134·3	120·8	122·2	105·6	116·9
Sept. 1	123·2	135·4	124·5	125·0	109·4	121·2
Relative Weight of Employment by Economic Areas as at Sept. 1, 1937	100·0	8·3	29·5	41·5	11·9	8·8

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated area, to the total number of all employees reported in Canada by the firms making returns at the date under review.

was also slacker, while construction afforded employment for a larger number of persons. A much greater loss had been noted at the same date of last year, and the index was then decidedly lower; a combined working force of 14,582 had then been reported by the 176 employers furnishing statistics.

Winnipeg.—Employment in Winnipeg advanced on the whole; manufacturing and construction showed improvement, while transportation was not quite so active. An aggregate staff of 42,422 men and women was reported by the 488 co-operating establishments, which had employed 41,922 in the preceding month. A decrease had been recorded at the same date in 1936, when the index was somewhat lower. Statements had then been received from 484 firms whose employees had numbered 39,878.

Vancouver.—There was an upward movement in industrial activity in Vancouver, according to information received from 452 employers of 38,650 persons, as against 37,877 at August 1. Manufacturing plants reported larger payrolls, the greatest gains being in iron and steel, and transportation and construction also showed improvement, while little general change occurred in the other industries. Employment was more active than at the same date of a year ago, when a smaller increase had been noted in the personnel of the 439 co-operating employers, who had reported 35,351 workers.

Index numbers by cities are given in Table 2.

Employment by Industries

Manufacturing.—Employment in manufactures showed an important advance at September 1, the 6,013 co-operating employers enlarging their payrolls from 599,997 at August 1, to 615,962 at the date under review. Reflecting this increase, the index rose from 118·1 in the preceding month to 121·2 at September 1, when it was higher than in any other September for which statistics are avail-

Relative Weight of Employment by Cities as at Sept. 1, 1937	13·8	1·3	11·7	1·3	3·3	1·5	3·6	3·3

Note.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated city, to the total number of all employees reported in Canada by the firms making returns at the date under review.

able; the latest index was just over a point above that for September 1, 1929, but was fractionally lower than the all-time maximum of 121·6, recorded at August 1, 1929.

The improvement at the beginning of September, 1937, is especially interesting because factory operations have very often been curtailed in the early autumn of the years since 1920, the average index showing a small fractional reduction between August 1 and September 1; the gain at the date under review exceeds that noted at September 1 in any of the years in which the trend has been upward at that date. The crude index, when adjusted for seasonal movement, therefore showed an advance, rising from 114·8 at the first of August to 117·9 at September 1, 1937.

An analysis of the returns from manufacturers shows substantial increases in the animal and vegetable food and textile divisions, in which they were seasonal in character. Improvement was also noted in leather, pulp and paper, rubber, tobacco and beverage, chemical, electric current, electrical apparatus and non-ferrous metal plants. On the other hand, seasonal contractions on a scale decidedly smaller than usual at the time of year, were indicated in iron and steel. While the trend in factory employment was upward in almost all provinces, the gains in Ontario were most pronounced.

The unadjusted indexes of factory employment at September 1 in the seventeen years of the record are as follows: 1937, 121·2; 1936, 105·9; 1935, 100·8; 1934, 94·3; 1933, 86·8; 1932, 83·1; 1931, 94·7; 1930, 108·2; 1929, 119·8; 1928, 115·9; 1927, 106·8; 1926, 104·8; 1925, 96·8; 1924, 91·5; 1923, 100·7; 1922, 93·6 and 1921, 85·8.

For September 1, 1936, 5,812 manufacturers had reported 536,420 employees on their staffs; the increase over the preceding month had then been much smaller than at the date under review.

TABLE III.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES

(AVERAGE CALENDAR YEAR 1926=100)

Sept. 1	123·2	121·2	143·4	159·1	90·9	89·7	144·5	146·6	130·9
Relative Weight of Employment by Industries as at Sept. 1, 1937	100·0	52·5	3·5	6·3	2·1	9·2	14·6	2·7	9·1

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated industry, to the total number of all employees reported in Canada by the firms making returns at the date under review.

Animal Products, Edible.—Marked improvement was indicated in fish canneries, while meat-packing plants were rather busier and other branches of this group showed little general change. The payrolls of the 314 co-operating factories aggregated 29,562 employees, as compared with 28,034 in the preceding month. Employment at September 1, 1936, had suffered a large decrease, and the index number then was decidedly lower than at the date under review.

Leather and Products.—An increase was shown in leather factories, chiefly in footwear plants; the general gain in the group was somewhat smaller than that noted at the beginning of September of last year, but employment then was not so active. Statements were received from 301 manufacturers having 24,419 persons in their employ, as against 23,869 at August 1, 1937. Ontario firms reported the most marked advances.

Lumber and Products.—Moderate reductions were made in sawmills, but container, furniture and other lumber-using factories were rather more active. The result was an increase of 87 persons in the staffs of the 893 lumber establishments furnishing data, whose payrolls aggregated 52,847. A small loss had been reported at September 1, 1936, when the index was nearly twelve points lower.

Musical Instruments.—Slight gains were recorded in musical instrument works, 35 of which enlarged their labour forces by 33 persons to 1,682 at September 1. A greater increase had been indicated at the beginning of September, 1936, but employment was then at a lower level.

Plant Products, Edible.—Confectionery and chocolate and fruit and vegetable preserving factories reported heightened activity, the additions to staffs in canneries being particularly pronounced. The general improvement

[1] The "Relative Weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by the firms making returns on the date under review.

was on a much larger scale than at the same date last year, when the index stood at 133·3, compared with 152·7 at the beginning of September, 1937. Data were compiled from 492 firms in the vegetable food division, whose payrolls rose from 37,320 at August 1, to 44,775 at the date under review. Ontario recorded the most marked advances.

Pulp and Paper Products.—Employment in this group showed further improvement, in which all branches shared—pulp and paper, paper products and printing and publishing plants. A reduction had been noted at September 1 of last year, when the index, at 103·6, was 11·7 points lower than at the date under review. The forces of the 615 co-operating establishments included 70,339 persons at the beginning of September, as compared with 69,398 in the preceding month.

Rubber Products.—The trend was upward in rubber factories, 55 of which employed 14,128 workers, compared with 13,903 at August 1, The situation at September 1, 1936, had also shown a betterment as compared with the preceding month, but employment was then at a lower level, the index standing at 101·5, as against 110·9 at the date under review.

Textile Products.—Seasonal increases occurred in textile factories, 1,104 of which had 109,958 employees, as against 106,592 at August 1. Most of the advance took place in Quebec and Ontario. Garment and personal furnishing factories registered the bulk of the gain, while headwear, woollen, silk and knitting mills were also busier. Although at the same date of last year the increase reported had involved a large number of workers, the index then was lower.

Tobacco, Distilled and Malt Liquors.—Heightened activity was noted in these industries at September 1 as compared with August 1, since when 353 persons were added to the payrolls of the 187 co-operating factories, which employed 17,378 operatives. The level of employment was higher than at the beginning of September, 1936, when a reduction had been indicated in the group as a whole.

Chemical Products.—An upward movement was shown in this division, according to statistics from 206 employers of 12,961 persons, compared with 12,542 at August 1. The situation in the chemical industries was decidedly more favourable than at the same date a year ago.

Clay, Glass and Stone Products.—Factories producing these classes of building materials reported moderately greater activity; statements were received from 209 plants, having 11,404 workers, as against 11,328 in the preceding month. A similar gain had been noted at the beginning of September last year, but the index then was many points lower.

Electric Light and Power.—Considerable expansion was shown in electric current plants, 96 of which employed 16,547 persons, or 253 more than at August 1. Employment was brisker than at September 1, 1936, when an increase had also been indicated.

Electrical Apparatus.—Employment in this group considerably increased at the beginning of September, 755 workers having been added since August 1 to the forces of the 126 co-operating establishments, which had 21,615 employees. The gain occurred mainly in Ontario. A smaller advance had been noted at the corresponding date in 1936, and the index then was much lower.

Iron and Steel Products.—The crude, rolled and forged, agricultural implement, sheet metal and vehicle divisions of the iron and steel group recorded contractions in employment, while the heating appliance, structural iron and steel, foundry and machine shop divisions were busier. On the whole, there was a reduction of 1,167 in the forces of the 879 co-operating iron and steel manufacturers, who employed 136,704 persons at the beginning of September. The largest losses were in Ontario. The trend at September 1, 1936, had also been downward, but the decline was much larger, and the index number then was nearly twenty-two points lower than at the date under review, when it stood at 104.8.

Non-Ferrous Metal Products.—The precious and base metal and the smelting and refining divisions reported heightened employment; 175 manufacturers in the group as a whole employed 26,601 operatives, as against 25,602 at August 1. Improvement on a smaller scale had been indicated at the same date last year, when general activity was decidedly less.

Non-metallic Mineral Products.—Employment in this group showed little change on the whole, according to statements from 146 establishments with 15,767 persons on their payrolls, as against 15,835 at the beginning of August. The index was higher than at September 1, 1936.

Logging

Employment in logging camps showed important expansion at the beginning of September, according to the 324 co-operating firms, whose pay-rolls aggregated 41,005 workers, compared with 35,593 in the preceding month. The number engaged in the bush at September 1 was much greater than at the same date

in 1936, being also larger than in other years of the record.

Mining

Coal.—Data were received from 101 operators having 24,304 men on their pay-rolls, as compared with 22,273 at the beginning of August. Improvement was noted in both Eastern and Western coal-fields, that in Alberta being most pronounced. Much smaller gains had been made at the same date a year ago, when the index number was rather lower than at the date under review.

Metallic Ores.—Employment in metallic ore mines showed a further increase, according to returns from 220 firms whose forces rose from 38,670 persons at August 1, to 39,041 at the beginning of September. A more marked advance had been shown at September 1, 1936, but employment was then in lesser volume.

Non-Metallic Minerals (other than coal).—A slight gain was reported in this group, in which 92 firms enlarged their staff by 54 workers to 10,149 at September 1. Larger additions had been noted at the corresponding date of last year; the level of employment then, however, was considerably lower.

Communications

Further improvement occurred in the communications division, in which the companies reporting employed 24,267 workers, as compared with 24,003 in the preceding month. The index was higher than in the early autumn of 1936, although the gain then noted had exceeded that recorded at September 1 of the present year.

Transportation

Street and Electric Railways, Cartage and Storage.—A contraction was shown in local transportation at the date under review, for which the 244 employers furnishing data reported 26,982 workers, or 180 fewer than in the preceding month. The decline took place chiefly in the Prairie Provinces. Employment increased at the beginning of September, 1936, when the index was slightly higher.

Steam Railway.—There was a gain in the number employed in steam railway operation at September 1, according to the 99 companies and branches from which returns were received, and which had 62,962 employees, compared with 61,805 at August 1. Employment was at practically the same level as at the corresponding date last year, when the indicated advance had been on a smaller scale. The improvement reported at the beginning of September, 1937, took place mainly in Quebec, Ontario and the Prairie Provinces.

Shipping and Stevedoring.—Reductions in staffs were noted in the water transportation group, in which activity was slightly greater than at the same date in 1936, when the tendency also had been downward. Statements were received from 111 employers of 17,950 workers, as against 18,157 at August 1, 1937.

Construction and Maintenance

Building.—Important expansion was shown in building construction, in which employment was much brisker than in the late summer of 1936. Data were received from 779 contractors, whose pay-rolls stood at 33,469 at September 1, 1937, as compared with 31,588 at the beginning of August. The trend was favourable in most of the provinces, but Quebec and Ontario reported the greatest gains.

Highway.—There was a further pronounced increase in this group, 4,564 men being added to the forces of the 394 co-operating organizations, who had 105,502 workers. There were large advances in Quebec and Saskatchewan. Activity was generally greater than at September 1, 1936, when a smaller advance had been reported.

Railway.—Further curtailment in employment was indicated by the 39 employers furnishing data in this division, who employed 32,995 persons, as against 33,810 in the preceding month. Moderate improvement occurred in Ontario, but the trend was downward in most other provinces. Additions to staffs had been noted at the corresponding date in 1936, and the index number was then many points higher.

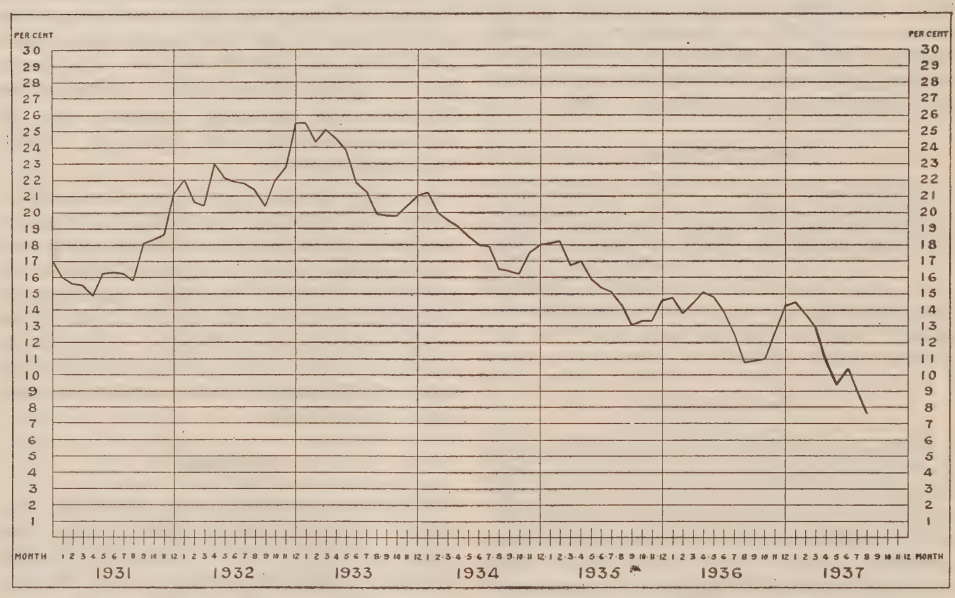
Services

Continued expansion was shown in the service group, in which business this year has generally been brisker than in 1936. The 479 firms furnishing information for September 1, 1937, reported 32,175 assistants, or 1,080 more than at August 1. There were gains in hotels and restaurants and in laundries and dry-cleaning establishments.

Trade

Employment in retail trade experienced a further falling-off, while wholesale houses added to their working forces. In each of these divisions, activity was greater than in the late summer of last year, when little general change had been indicated by the

firms making returns in the group as a whole. Statistics for September 1, 1937, were received from 1,358 trading establishments employing 107,278 persons, compared with 108,274 at the beginning of August, 1937.



Tables

Index numbers of employment by economic areas, leading cities and industries are given in the accompanying tables, in which the columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns at the date under review.

(2) Unemployment in Trade Unions at the close of August, 1937

Unemployment as used in the following article has reference to involuntary idleness due to economic causes. Persons who are occupied at work outside their own trades or who are idle owing to illness are not considered as unemployed. Unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

Continued improvement in conditions was manifest among local trade unions at the close of August, unemployment standing at 7·6 per cent, the lowest point that has been reached in our records since October, 1929. This percentage for August was based on the reports received from 1,835 labour organizations with an aggregate of 201,458 members, 15,213 of whom were without work on the last day of the month. At the close of July, 8·9 per cent of idleness was reported. An upward movement of employment was also reflected from August of last year, when 10·8 per cent of inactivity was recorded. Alberta members were afforded a considerably greater volume of work than in July, the determining factor in this better situation being the recovery noted in the coal mining industry. Quebec unions reported more moderate employment advancement, and minor gains were apparent among Ontario, New Brunswick, Manitoba, Saskatchewan and British Columbia unions. Nova Scotia members alone, showed some slowing up in activity. Compared with the returns for August of last year Quebec and Ontario each reported noteworthy increases in employment during the month reviewed, and heightened activity on

a smaller scale was evident in Nova Scotia, New Brunswick, Manitoba and British Columbia. In Saskatchewan and Alberta an adverse tendency was noted, though the variations from August a year ago were quite slight.

A separate compilation is made each month of unemployment affecting local trade union members in the largest city in each province, with the exception of Prince Edward Island. Of these, Edmonton unions registered employment expansion on a substantial scale during August over the preceding month, and in Montreal more moderate gains occurred. The level of activity for Halifax, Saint John, Toronto, Winnipeg, Regina and Vancouver unions was also slightly above that of July. All cities used for comparative purposes, as in the previous analysis, reflected a more favourable trend of employment than in August, 1936, Saint John and Halifax unions showing marked improvement in conditions, while in Montreal and Toronto the recovery evident was fairly noteworthy. Edmonton and Vancouver unions registered advances of somewhat lesser degree, and in Winnipeg and Regina the tendency was slightly better.

From the chart, which appears with this article and shows the trend of unemployment by months from January, 1931, to date, it will be noticed that the curve during August pursued a slightly downward course from July, indicative of a favourable trend of activity. In this movement curve followed a course similar to that of the corresponding month of last year, though the level attained at the close of the month reviewed was lower than that of August, 1936.

The manufacturing industries, with 510 associations, reporting a total of 72,214 members during August, showed that 5,898, or a percentage of 8·2 were out of work on the last day of the month, contrasted with a percentage of 8·6 in July. Hat, cap and glove, and glass workers showed a decidedly improved situation when compared with July which, however, had little effect on the percentage for the group as a whole as their combined membership was rather small. Increases in employment of much lesser degree were evident among textile and carpet workers, meat cutters and butchers, and metal polishers, and the situation for garment, jewellery, brewery and wood workers, bakers and confectioners, and printing tradesmen tended in a slightly favourable direction. Of the recessions in employment, which were of a largely offsetting nature, the most pronounced were recorded by general labourers, though among leather, iron and steel, and cigar and tobacco workers, and paper makers there was some falling off in available employment. Contrasted with the returns for August last year in the manufacturing industries, when 10·8 per cent of the members reported were unemployed, an encouraging measure of recovery was manifest by general labourers, metal polishers, glass, garment, jewellery, leather and cigar and tobacco workers. Heightened activity, on a more moderate scale, was evident among textile and carpet, brewery and wood workers, printing tradesmen, and bakers and confectioners, while

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

among iron and steel workers a slightly better tendency was reflected. Meat cutters and butchers, on the contrary, were much slacker than in August last year, and employment for paper makers was considerably curtailed. Retarded activity of lesser importance was indicated by hat, cap and glove workers.

Employment in the coal mining industry was better maintained during August than in the preceding month according to the returns compiled from 52 organizations, embracing a membership of 18,092 persons. Of these, 2,014 were reported idle on the last day of the month, a percentage of 11·1 as contrasted with 15·0 per cent in July. Conditions were, however, slightly less favourable than in August a year ago, when 9·3 per cent of unemployment was reported. The improvement registered from July was entirely confined to the Alberta coal fields, Nova Scotia and British Columbia members showing a slight tendency toward retarded activity. Increased slackness was, however, reflected in the Alberta mines from August of last year, and slight employment recessions were apparent in Nova Scotia mining areas. British Columbia members, however, were much better engaged during the month under review. In addition to the members reported as entirely out of employment during August a number were shown as working at considerably reduced time.

Further stimulus in building and construction activity was noted during August, the percentage of idleness standing at 15·6 as compared with a percentage of 22·4 in July. Employment revival was also apparent from August of last year, when 29·9 per cent of the members reported were out of work. For the month reviewed reports were forwarded by 207 associations of building tradesmen, with 21,107 members, 3,291 of whom were unemployed on the last day of the month. Definite proof of returning activity in building and construction operations is demonstrated in the fact that there has been a steady increase in work available since the beginning of the year, and that the situation during the month under review has been the most favourable in our records since 1929. An outstanding feature in the improvement registered from July was the decided betterment in conditions noted among carpenters and joiners, and plumbers and steamfitters, though among bricklayers, masons and plasterers, steam shovelmen, and electrical workers gains of much lesser magnitude occurred. Tile layers, lathers and roofers, however, were considerably quieter than in July. Recesssions in employment of more moderate proportions were evident among granite and stonecutters, and painters, decorators and paperhangers, while lesser declines were recorded among hod carriers and building labourers, and bridge and structural iron workers. In making a comparison with the returns for August of last year employment recovery on a large scale was indicated by bricklayers, masons and plasterers, plumbers and steamfitters, bridge and structural iron workers, carpenters and joiners, and granite and stone cutters. Steam shovelmen also reflected noteworthy advancement and gains of somewhat lesser degree were registered among electrical workers. Hod carriers and building labourers, on the contrary, suffered severe losses in available work, and considerable curtailment of activity was reported by tile layers, lathers and roofers. Among painters, decorators and paperhangers, employment declined slightly from August last year.

Little variation in the level of activity for transportation employees was reflected during August from the previous month, though the tendency was favourable as manifest by the returns tabulated from 814 organizations, involving a membership of 62,543 persons. Of these, 2,732, or 4·4 per cent were reported idle, compared with a percentage of 4·6 in July. The situation also improved slightly from August last year, when 5·3 per cent of unemployment was recorded. Navigation workers showed moderate employment expansion from July, while among steam railway employees, whose returns included nearly 79 per cent of the entire group membership reported, and among street and electric railway employees the change from July was very slight, though adverse. Teamsters and chauffeurs reflected the same percentage of idleness in both months under comparison. Navigation workers, steam and street and electric railway employees, and teamsters and chauffeurs, all participated in the better employment movement noted in the transportation industries from August, 1936, the gains in the navigation division being the most substantial.

No unemployment was reported by retail shop clerks during August, as in the previous month, while in August of last year 4·7 per cent of idleness was recorded. Reporting for the month under review were 3 associations, combining a membership of 1,010 persons.

The situation for civic employees during August remained much the same as in July, according to the reports tabulated from 78 local unions, with a membership aggregate of 9,513 persons. Of these, 54, or a percentage of 0·6 were out of work on the last day of the month, as compared with a percentage of 0·5 in July. Moderately better conditions prevailed than in August a year ago, when 3·7 per cent of idleness was recorded.

TABLE II.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY GROUPS OF INDUSTRIES

There was a slight tendency toward increased employment in the miscellaneous group of trades during August from the preceding month, and improvement in greater measure was manifest from August a year ago. This was evident from the returns compiled from 136 associations, with a total of 8,556 members, 531, or 6·2 per cent of whom were without work at the end of the month, as compared with percentages of 6·9 in July and 10·2 in August, 1936. Theatre and stage employees, stationary engineers and firemen, barbers, and hotel and restaurant employees all shared slightly in the better situation noted from July, while among unclassified workers, rather noteworthy employment curtailment was recorded. When contrasted with the reports for August, 1936, stationary engineers and firemen were afforded a considerably better volume of work during the month under review, and fairly substantial gains were registered by theatre and stage employees. Advances of minor importance were shown by hotel and restaurant employees, and among barbers the trend was upward, though the variation from August last year was less than one per cent. Unclassified workers, as in the previous comparison, reflected less favourable conditions.

Fishermen during August, with 3 unions reporting a membership of 615 persons, showed that 100, or a percentage of 16·3, were unemployed on the last day of the month, contrasted with percentages of 16·1 in July, and 4·2 in August last year.

Employment for lumber workers and loggers was maintained at a high level during August, as in both the preceding month and August, 1936, the 2 unions making returns, with 772 members, showing an unemployment percentage of 1·4 as compared with a percentage of 1·7 in July, and with 1·5 per cent in August, 1936.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1919 to 1936 inclusive, and also the percentage of unemployment by provinces for August of each year from 1919 to 1934 inclusive, and for each month from August, 1935, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

(3) Employment Office Reports for August, 1937

During the month of August, 1937, reports from the offices of the Employment Service of Canada showed gains in the average daily placements of nearly 3 per cent and 26 per cent, respectively, over those of the preceding month and over those effected during the corresponding period a year ago. All industrial groups, except construction and maintenance, mining and farming recorded increases under both comparisons, construction and maintenance showing a substantial decline from July and mining a nominal loss, while farming reported a marked reduction from August a year ago. The highest gain over the previous month was registered in farming and over August last year in construction and maintenance, logging and services.

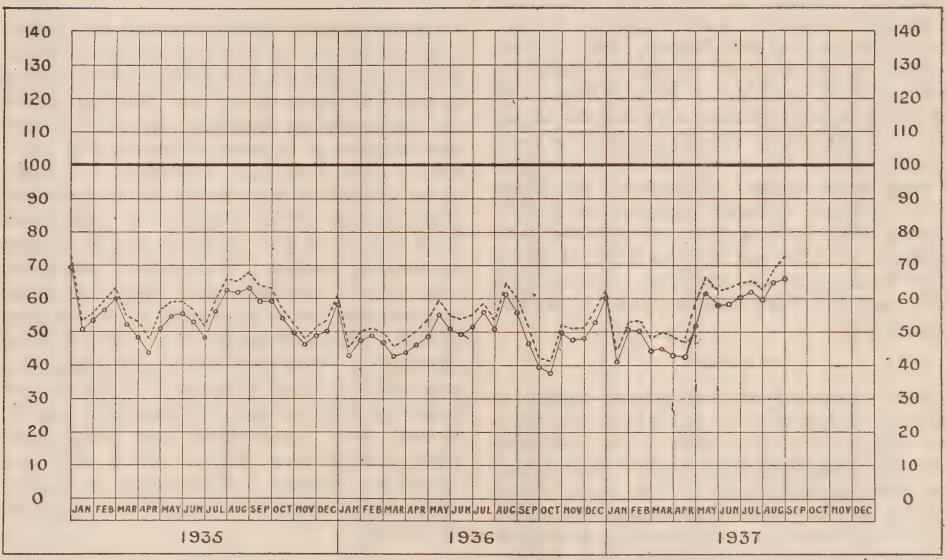
The accompanying chart shows the trend of employment since January, 1935, as represented by the ratio of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, compilations being made semi-monthly. It will be seen from the graph that the curves of vacancies and placements in relation to applications followed a sharp upward trend throughout the period under review and at the close of August had attained levels considerably higher than those recorded at the end of the corresponding month a year ago. The ratio of vacancies to each 100 applications was 68·7 during the first half and 72·9 during the second half of August, 1937, in contrast with the ratios of 64·7 and 60·1 during the corresponding periods of 1936. The ratios of placements to each 100 applications during the periods under review were 64·8 and 66·1, as compared with 61·3 and 55·6, respectively, during the corresponding month of 1936.

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during August, 1937, was 1,612, as compared with 1,521 during the preceding month and with 1,259 in August a year ago.

The average number of applications for employment received daily by the offices of the Service during the month under review was 2,270, in comparison with 2,384 in July, 1937, and with 2,019 during August last year.

The average number of placements made daily by the offices of the Service during August, 1937, was 1,487, of which 1,103 were in regular employment and 384 in work of one week's duration or less, as compared with a total daily average of 1,450 during the preceding month. Placements in August a year ago averaged 1,179 daily, consisting of 833 in regular and 346 in casual employment.

During the month of August, 1937, the offices of the Service referred 39,613 persons to vacancies and effected a total of 38,659 placements. Of these, the placements in regular employment were 28,676, of which 24,189 were of men and 4,487 of women, while placements



in casual work totalled 9,983. The number of vacancies reported by employers was 30,981 for men and 10,915 for women, a total of 41,896, while applications for work numbered 59,005, of which 45,507 were from men and 13,498 from women. Reports for July, 1937, showed 39,532 positions available, 61,963 applications made and 37,675 placements effected, while in August, 1936, there were recorded 32,721 vacancies, 52,475 applications for work and 30,651 placements in regular and casual employment.

Nova Scotia

During the month of August, 1937, positions offered through employment offices in Nova Scotia were over 13 per cent less than in the preceding month, but over 85 per cent more than during the corresponding month of last year. There was a decrease in placements of over 14 per cent, when compared with July, but an increase of nearly 87 per cent in comparison with August, 1936. All industrial divisions participated in the increase in placements over August of last year, the largest gains being in construction and maintenance, services and logging. Industrial divisions in

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications ———— Vacancies - - - - - - - - Placements o—o—o—o—o—o

The following table gives the placements effected by the offices of the Employment Service of Canada, each year, from January, 1927, to date:—

PLACEMENTS

Year	Regular	Casual	Totals
1927	302,723	112,046	414,769
1928	334,604	135,724	470,328
1929	260,747	137,620	398,367
1930	187,872	180,807	368,679
1931	175,632	295,876	471,508
1932	153,771	198,443	352,214
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937 (8 months)	174,674	70,223	244,897

which most of the placements were effected during the month were manufacturing 35; logging 114; construction and maintenance 738 and services 387, of which 290 were of household workers. During the month 817 men and 93 women were placed in regular employment.

New Brunswick

There was a decrease of over 11 per cent in the number of positions offered through employment offices in New Brunswick during August, when compared with the preceding month, but an increase of nearly 57 per cent in comparison with the corresponding month of last year. Placements declined over 14 per cent, when compared with July, but

showed an increase of over 50 per cent in comparison with August, 1936. More placements were effected in all industrial divisions than during August of last year, the most important increases being in construction and maintenance, logging and services. Placements by industrial divisions included manufacturing 40; logging 95; construction and maintenance 180; trade 58 and services 603, of which 455 were of household workers. Regular placements numbered 288 of men and 122 of women.

Quebec

The demand for workers, as indicated by orders received at employment offices in the province of Quebec during August, was over 2 per cent less than in the preceding month, but over 60 per cent higher than during the corresponding month of last year. There was a loss in placements of over 9 per cent, when compared with July, but a gain of 65 per cent in comparison with August, 1936. A large increase in the highway division of construction and maintenance was mainly responsible for the gain in placements over August of last year, although, with the exception of a nominal decline in trade, all industrial divisions showed improvement. Placements by industrial divisions included manufacturing 275; logging 613; farming 135; construction and maintenance 2,264 and services 2,511, of which 2,080 were household workers. There were 3,551 men and 1,412 women placed in regular employment.

Ontario

Orders received at employment offices in Ontario during August called for nearly 10 per cent more workers than in the preceding month and nearly 43 per cent more than during the corresponding month of last year. There was an increase, also, in placements of nearly 6 per cent when compared with July and of nearly 39 per cent in comparison with August, 1936. Except for nominal declines in mining and transportation, all industrial groups showed an increase in placements over August of last year. Gains in farming and logging were quite substantial and fairly large increases were also reported in services and manufacturing. Placements by industrial divisions included manufacturing 930; logging 1,857; farming 2,776; transportation 177; construction and maintenance 5,739; trade 335 and services 4,019, of which 2,468 were household workers. During the month 10,581 men and 1,456 women were placed in regular employment.

Manitoba

Opportunities for employment, as indicated by orders received at employment offices in Manitoba during August, were nearly 42 per cent better than in the preceding month and nearly 22 per cent above the corresponding month of last year. There was an increase, also, in placements of 35 per cent, when compared with July and of over 23 per cent in comparison with August, 1936. The increase in placements over August of last year was due to gains in construction and maintenance, logging and farming, as no change or a nominal decline, only, was reported in the remaining groups. Industrial divisions in which most of the placements were effected during the month were logging 264; farming, 2,570; construction and maintenance 1,590 and services 574, of which 470 were household workers. There were 4,441 men and 251 women placed in regular employment during the month.

Saskatchewan

During August, orders received at employment offices in Saskatchewan called for nearly 8 per cent more workers than in the preceding month, but nearly 39 per cent less than during the corresponding month of last year. There was an increase of nearly 7 per cent in placements, when compared with July, but a decrease of over 38 per cent in comparison with August, 1936. The reduction in placements from August of last year was due to a large decrease in farming. This decline was partly offset by an increase under construction and maintenance and smaller gains in services and mining. Although losses were reported in all other groups, they were too small to have any appreciable adverse influence. Placements by industrial divisions included manufacturing 62; farming 613; construction and maintenance 1,603, and services 830, of which 471 were household workers. Placements in regular employment numbered 1,966 of men and 501 of women.

Alberta

Employment opportunities, as indicated by orders received at employment offices in Alberta during August, were 17 per cent better than in the preceding month and nearly 3 per cent above the corresponding month of last year. There was an increase also in placements of over 19 per cent in comparison with July and of 2 per cent when compared with August, 1936. Placements in the highway division of construction and maintenance were considerably higher than during August of last year, but this increase was almost entirely offset by declines in farming, logging and services. The changes in all other groups were quite small, although the majority showed improvement. Industrial divisions in which most of the placements were effected during

the month were manufacturing 72; logging 137; farming 650; construction and maintenance 915 and services 473, of which 388 were of household workers. During the month 1,613 men and 339 women were placed in regular employment.

British Columbia

There was a decrease of nearly 16 per cent in the number of positions offered through employment offices in British Columbia during August, when compared with the preceding month, but an increase of nearly 47 per cent in comparison with the corresponding month of last year. Placements were nearly 16 per cent less than in July, but nearly 48 per cent above August, 1936. With the exception of small losses in mining and farming, all industrial divisions showed increases in placements when compared with August of last year. The most important, however, was in the highway division of construction and maintenance and was mainly responsible for the gain reported for the province as a whole. Placements by industrial divisions included manufacturing 103; logging 95; farming 203; mining 136; construction and maintenance 2,340 and services 935, of which 558 were household workers. During the month 932 men and 313 women were placed in regular employment.

Movement of Labour

During the month of August, 1937, the offices of the Employment Service of Canada made 28,676 placements in regular employment, 16,769 of which were of persons for whom the employment found was outside the immediate vicinity of the offices at which they were registered. Of the latter, 842 were granted the Employment Service reduced transportation rate, 733 going to centres within the same province as the despatching office and 109 to other provinces. The reduced transportation rate which is 2·5 cents per mile with a minimum fare of $4.00, is granted by the Railway Companies to bona fide applicants at the offices of the Employment Service who may wish to travel to distant employment for which no workers are available locally.

Transfers at the reduced rate from Quebec centres during August totalled 65 of which 3 were provincial and 62 inter-provincial. The former were of bushmen travelling to employment in the Quebec zone on certificates secured at the Quebec City office. The movement outside the province was also of bushmen, the Hull office despatching 49 to Pembroke and the Rouyn office 13 to Timmins. Vouchers of transportation were issued at Ontario offices during August to 625 persons all journeying to provincial centres. From Port Arthur 273 bush workers, 36 construction employees, 7 mine workers and 3 hotel workers were transferred to employment within the same zone, while from Fort William 79 bush workers, 14 construction employees, 3 mine workers, 2 hotel workers and one electrician, and from Sudbury 35 bush workers, proceeded to various centres within their respective zones. The Toronto office effected the transfer of 100 labourers to Sault Ste. Marie and of one auto mechanic to North Bay. On certificates received at North Bay 14 pulp cutters and 2 mine carpenters were conveyed to Timmins and 2 dish-washers to Sudbury. The Timmins zone was also the destination of one carpenter journeying from St. Catharines. From Ottawa 48 bush workers were shipped to Sudbury and 4 highway construction labourers to North Bay. The movement of labour in Manitoba during August emanated from Winnipeg and comprised the transfer of 56 persons, 10 within the province and 46 to points outside. Provincially all workers were destined to centres in the Winnipeg zone and included 4 farm hands, one farm housekeeper, 3 highway construction workers and 2 mine workers. Of the persons going outside the province 28 journeyed to employment in the Port Arthur zone, among whom were 19 bush workers, 6 mine workers, one blacksmith and 2 construction workers. Despatched to the Timmins zone were 15 building construction workers and one store clerk, and to the St. Catharines zone one construction worker. The one remaining transfer was of a miner conveyed to Prince Albert. In Saskatchewan during August one teacher was granted a certificate at the Saskatoon office for transportation to North Battleford. Those who availed themselves of the reduced transportation rate in Alberta during August numbered 66, of whom 65 travelled to provincial situations and one outside the province. The latter was a thresher transferred from Edmonton to Saskatoon. Within the province the Edmonton office despatched 24 transportation company employees, 8 farm hands, 8 mine workers, 6 bush workers, 5 construction workers, 4 oil refinery workers, 2 fish company employees, one welder, one highway construction cook, one hotel worker and one housekeeper to various points within its own zone, and 2 farm hands to Drumheller. From Calgary 2 farm hands travelled to employment within the territory administered by that City office. Profiting by the Employment Service reduced transportation rate in British Columbia during August, 29 persons were conveyed to provincial employment. The Vancouver office effected the transfer of 7 bush workers, 6 mine workers, 3 farm hands and 3 cannery workers within its own zone, of 4 mine workers and one farm hand to Kamloops and of one

hotel cook to Penticton. From New Westminster 3 fruit pickers were sent to Kamloops and from Prince Rupert one first-aid man to a point within the Prince Rupert zone.

Of the 842 persons who travelled at the Employment Service reduced transportation rate during July, 301 were carried by the Canadian National Railways, 511 by the Canadian Pacific Railway, 16 by the Pacific Great Eastern Railway, 10 by the Temiskaming and Northern Ontario Railway, and 4 by the Northern Alberta Railway.

(4) Building Permits Issued in Canada During August, 1937

The value of the building permits issued by 58 cities during August, 1937, was less than in the preceding month, but greater than in August of last year; these municipalities authorized building estimated to cost $4,216,310 during the month under review, as compared with $5,473,852 in July, 1937, and $3,673,455 in August, 1936. There was, therefore, a decrease of 23·0 per cent in the first comparison, but an increase of 14·8 per cent in the second and more significant comparison.

The value of the building represented by the permits taken out in the first eight months of the present year was $37,671,484; this was higher than the aggregate of $27,026,141 reported in the period, January-August, 1936, and was also decidedly higher than in the first eight months of any other year since 1931. However, the cumulative total for this period in each of these years had been very much lower than in earlier years of the record, being also less than the seventeen-year average of $82,646,241. While wholesale prices of building materials have recently advanced, the index for the first eight months of 1937 was also below the average for the years since 1919.

Some 50 cities furnished detailed statistics showing that they had issued about 440 permits for dwellings estimated to cost over $1,280,000 and more than 2,300 permits for other buildings valued at approximately $2,600,000. In addition, there were three engineering projects valued at $105,950. During July, authority was granted for the erection of some 400 dwellings and 2,000 other buildings, estimated at about $1,400,000 and $3,300,000, respectively.

As compared with July, 1937, Prince Edward Island and Alberta reported gains of $11,370 and $22,113, respectively. Of the reductions elsewhere indicated, those of $15,277 or 69·3 per cent in Nova Scotia, and $607,358 or 22·0 per cent in Ontario were greatest.

Prince Edward Island, New Brunswick, Ontario, Manitoba, Alberta and British Columbia reported higher aggregates of building authorizations than in August of last year; the largest increases were in Ontario and British Columbia, these provinces showing gains of $347,963 or 19·2 per cent and $214,994 or 55·7 per cent, respectively. Of the declines recorded in the remaining provinces, those of $65,652 or 7·8 per cent in Quebec and $54,440 or 37·7 per cent in Saskatchewan were most marked.

Of the four largest cities, Montreal showed a decrease as compared with July, 1937, and also with August, 1936. The Toronto total in August was practically the same as in July, but it considerably exceeded that for August, 1936. Winnipeg showed improvement in both comparisons, while the Vancouver total was lower than in the preceding month, but higher than in August of last year. Of the other centres, Charlottetown, Sydney, Moncton, Quebec, Sherbrooke, Brantford, Fort William, Owen Sound, Port Arthur, Stratford, Sault Ste. Marie, Welland, Saskatoon, Edmonton, Nanaimo and Victoria recorded gains in both comparisons.

The following table gives the value of the building authorized by 58 cities during August, and in the first eight months of each year since 1920, as well as index numbers for the latter, based on the January-August total in 1926 as 100. The average index numbers of wholesale prices of building materials in the first eight months of the years since 1920 are also given, (average 1926=100).

Year	Value of permits issued in August	Value of permits issued in first eight months	Indexes of value of permits issued in first eight months (1926=100)	Average indexes of wholesale prices of building materials in first eight months (1926=100)
	$	$		
1937.....	4,216,310	37,671,484	34·5	95·1
1936.....	3,673,455	27,026,141	24·7	84·6

1929.....	21,582,221	168,894,072	154·6	99·2
1928.....	17,448,542	145,247,485	133·0	96·4
1927.....	29,478,378	126,690,292	116·0	96·2
1926.....	11,672,599	109,211,942	100·0	100·7
1925.....	9,511,008	88,223,328	80·8	103·1
1924.....	9,406,733	81,762,083	74·9	109·0
1923.....	11,425,031	97,551,074	89·3	111·8
1922.....	18,158,932	105,181,416	96·3	108·4
1921.....	10,928,039	77,665,614	71·1	128·6
1920.....	10,805,846	86,303,601	79·0	143·8

The aggregate for the first eight months of this year was 39·4 per cent higher than in 1936, also exceeding that for the same period in each of the preceding four years. The average index number of wholesale prices of building materials, though higher than in any of the years, 1930-1936, was lower than in other years since 1920.

The following table gives the value of building permits issued by 58 cities during July and August, 1937, and August, 1936. The 35 cities for which records are available since 1920 are marked thus "x".

ESTIMATED VALUE OF CONSTRUCTION WORKS AS INDICATED BY BUILDING PERMITS ISSUED BY 58 CITIES

EMPLOYMENT CONDITIONS IN CANADA AT THE END OF SEPTEMBER, 1937

Reports of Superintendents of the Employment Service of Canada

THE employment situation at the end of September was reported by the superintendents of the Employment Service to be as follows:—

Farmers in the Maritime Provinces were busily engaged in harvesting their root crops, particularly mangles, turnips, and potatoes, also the last of their grain. Orchardists in the Annapolis Valley were engaged in harvesting their apple crop. Logging was active in some districts, but very quiet in others, though preparations were being made for a big winter's cut. Sawmills were busy with the manufacture of long lumber and several mills were running night and day shifts, while wood working plants at St. John reported, that owing to the amount of work on hand, they could not handle any more orders at the present time. Fishing was fair. Fresh bait was scarce, but plenty of frozen bait was available. Coal mines in the New Glasgow area operated five and six days per week, while those in Cape Breton and vicinity worked from four to six days. Iron and steel companies, for the most part, were busy, with little idleness reported. Manufacturing showed only a minor change from the level of previous weeks, the general situation being good. Construction, both highway and building, was progressing favourably and the additional amount of fall repair work was responsible for the scarcity of carpenters at New Glasgow. Passenger and freight traffic,

by rail and water, was heavy and trade, both wholesale and retail, was good. A number of requests was received for help in the Women's Division and placements were made accordingly.

Farming in the Province of Quebec was fair, while the demand for loggers was steady. Sawmills, also, were very active, particularly at Matane. Mining was somewhat slack. In the Chicoutimi and Port Alfred districts manufacturing establishments were operating at full capacity. Hull and Montreal, also, reported improvement, especially in the metal, clothing and textile industries, but boot, shoe and tobacco trades were quiet. Construction throughout the Province, except at Quebec City where building was slack and the majority of building workers idle, was active, although the greater part of the work in progress was that sponsored by the Province under relief projects. Transportation and trade were good. Montreal and Quebec reported many orders for domestics, while in other cities the calls for help in the Women's Division were fewer.

Orders for farm help in Ontario were confined to fully experienced men, of whom there was a scarcity. At St. Catharines, peaches, tomatoes and apples were being gathered and as the grape crop was nearly ready for general cutting, work was being supplied to a large number of hands. Logging camps were opening, and all positions available quickly filled with local labour; however, the volume of pulp cutters was not sufficient to fill all vacancies. Activity in producing mines remained normal, but non-producers were slack. Employment in factories remained very steady, with a scarcity reported of machinists, tool and die makers. Canneries and wineries were adding to their staffs and steel companies, also, were working at full capacity. Factories dealing in auto accessories were busily engaged in making tools and dies, preparatory to an active season. Taken as a whole, it was thought that the industrial situation would be better than it had been for several years past. Building and highway construction both progressed favourably, absorbing most of the skilled mechanics and labourers, and at Niagara Falls and Fort Erie terminals, employment for railway workers was higher than it had been for a number of years. A steady demand continued for domestic workers for general housework, while the shortage of experienced female help in that line was reported to be widespread.

Threshing in Alberta was only about 75 per cent completed, due to heavy rains having held up the work, but harvesting in Manitoba and Saskatchewan was practically completed and the demand for farm help small. Numerous requests, however, were received regarding the proposed Farm Help Relief Plan. Lumbering was quiet, nevertheless the call for bushmen was improved. Coal orders were greatly increasing, however, none of the mines, as yet, was running at full capacity. Manufacturing at Winnipeg was fairly good and milling companies at Medicine Hat were working more steadily and had taken back some of their staffs, although no further additional help was required. Construction, except at Winnipeg, was concentrated on highways. In that city the opinion was that the long slump in building was nearing its end and that the 1938 season would see substantial improvement over recent depression years. Some few young men were also directed to the Forestry Training Camps. Trade was slightly better. Little change was noted in the Women's Department, there being many requests for domestics in farm homes under the Farm Employment Plan, but applications for country work very scarce.

Farming was quiet in British Columbia, as harvesting and tomato picking were practically completed. Fruit growers were gathering their first carload of fruit to ship to the dried out districts on the Prairie. Some of the logging camps were active, while others were quiet. Nearly all sawmills and shingle mills were operating on full time, but there was a falling off in lumber shipments. Work at gold mining properties was brisk, and coal mines reported little idle time. Seasonal employment at the canneries at Prince Rupert and salmon fishing there, was about finished. Building construction had slackened somewhat, but work on mining trails and various government projects continued. A few small jobs were in progress at the shipping yards at Prince Rupert. Fish transhipments there from Alaska continued fairly heavy, but work along the waterfronts was less, due to the closing of the fishing season. Longshore work was active at New Westminster and at Victoria where no further labour trouble was reported and shipments of lumber were being sent out. Trade was steady. A number of requests for domestic workers had been received and filled, and hotel and restaurant employees, having completed their summer service, were again reporting at the offices. At Victoria, a large surplus of stenographers and clerks existed and about 400 girls and women were registered, also, for film work, who did not wish for any other type of employment.

Action has been taken by the British Columbia Vegetable Marketing Board setting the minimum wholesale selling price of potatoes at $25 a ton. The Board is charging wholesalers $22 per ton for potatoes of which the producer gets $20 while the Board retains $2 for handling charges. This action has been taken in an attempt to regulate the "spread" in prices between wholesaler and retailer.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

THE British *Ministry of Labour Gazette*, September, 1937, summarized the employment situation as follows:—

Employment at August 23 showed an improvement as compared with July 26; it improved in coal mining, iron and steel manufacture, the wool textile industry, pottery manufacture and the cocoa, chocolate, etc., industry. There was also a substantial reduction in the number recorded as unemployed in the jute industry, following the end of local holidays. On the other hand, there was a decline in employment in the motor vehicle, tailoring and cotton industries, and in the distributive trades. There was also an increase in the number of agricultural workers unemployed.

It is provisionally estimated that at August 23, 1937, the number of insured persons, aged 16-64, in employment in Great Britain, exclusive of persons within the agricultural scheme, was approximately 11,562,000. This was 45,000 more than at July 26, 1937, and 490,000 more than at August 24, 1936.

Among insured workpeople, aged 16-64 (excluding those within the agricultural scheme), the percentage unemployed in Great Britain and Northern Ireland at August 23, 1937 (including those temporarily stopped), was 10·2 as compared with 10·4 at July 26, 1937, and 12·1 at August 24, 1936. In Great Britain the percentage at August 23, 1937, was 9·9, as compared with 10·1 at July 26, 1937, and 11·9 at August 24, 1936.

At August 23, 1937, the numbers of persons on the registers of Employment Exchanges in Great Britain were 1,088,885 wholly unemployed, 205,371 temporarily stopped, and 64,365 normally in casual employment, making a total of 1,358,621. This was 20,838 less than a month before, and 255,319 less than a year before. The total was made up of 1,046,723 men, 45,044 boys, 221,302 women, and 45,552 girls.

The total of 1,358,621 persons on the registers at August 23, 1937, included 602,279 persons with claims admitted for insurance benefit (of whom 2,457 had applications authorized for payment of unemployment allowances in supplementation of benefit), 40,644 claimants whose position under the conditions relating to contributions paid and benefit received had not been determined, and 5,038 persons disqualified for short periods from receiving benefit (of whom 1,656 had applications authorized for payment of unemployment allowances). There were also 549,766 persons (not included in any of the foregoing classes) with applications authorized for unemployment allowances, 789 persons with applications for unemployment allowances under consideration, and 160,105 other persons, of whom 45,608 were juveniles under 16 years of age.

In Great Britain and Northern Ireland the total number of persons on the registers of Employment Exchanges at August 23, 1937, was 1,424,167 as compared with 1,445,328 at July 26, 1937, and 1,678,277 at August 24, 1936.

United States

According to the monthly statement issued by Frances Perkins, Secretary of Labor, approximately 43,000 workers were returned to employment between July and August in the combined manufacturing and non-manufacturing industries surveyed monthly by the United States Bureau of Labor Statistics. It was also stated that weekly pay rolls in these combined industries in August were nearly $8,400,000 greater than in the preceding month.

The following paragraphs have been taken from the statement issued on September 26:

Comparisons of employment and weekly pay rolls in these combined industries in August, 1937, with August, 1936, show increases of more than 1,100,000 workers and $64,100,000 over the year interval.

Factory employment showed a seasonal expansion from July to August and 9 of the 16 non-manufacturing industries surveyed also reported employment gains. These increases, however, were partially offset by seasonal recessions in retail trade employment and decreases in the remaining 6 non-manufacturing industries surveyed.

The increase of 0·8 per cent in employment in manufacturing industries indicates the reemployment of approximately 68,000 factory wage earners. The August factory employment index (102·2), with the exception of May, 1937, exceeds the level recorded in any month since November, 1929, and the August pay roll index (103·7) also exceeds the levels of any month since November, 1929, with but two exceptions, April and May, 1937.

Employment in the non-durable goods group of manufacturing industries showed a further expansion in August, the gain of 2·4 per cent raising the August index (106·6) to the highest level reached since October, 1929. This gain resulted largely from increased activity in such seasonal industries as canning and preserving, beet sugar, cottonseed oil-cake-meal, millinery, fur-felt hats, and men's and women's clothing. In the durable goods group of manufacturing industries, employment declined 0·8 per cent over the month interval. Decreased employment in the automobile industry, caused by temporary shut-downs for changes in models, was a primary factor con-

tributing to this loss. The employment index for the durable goods group (98·1) indicates that for every 1,000 workers employed in this group during the index-base period (1923-1925), 981 were employed in August, 1937, while a similar comparison of the non-durable goods group index shows 1,066 workers employed in August, 1937, for every 1,000 employed during the years 1923-1925.

The combined 16 non-manufacturing industries surveyed showed a net loss of 25,000 workers. This decrease was due chiefly to a decline of more than 50,000 workers in retail establishments, hot weather and vacations causing customary recessions during July and August. In the sub-group, general merchandising, which includes department, variety, and general merchandising stores, and mail order houses, employment decreased 1·9 per cent or by nearly 15,000 workers. The group of "all other" retail establishments showed a seasonal drop of 1·4 per cent in employment or more than 37,000 workers over the month interval. The most pronounced decrease in the separate lines of retail trade was a seasonal recession of 5·3 per cent in retail apparel stores.

Employment in bituminous coal mines rose 4·1 per cent from July to August, indicating the return of 14,000 workers to employment. Resumption of operations following the settlement of labour disputes, which had reduced operations in the preceding month, accounted in large part for this employment gain. Contractors engaged in private building construction reported an increase of 2·1 per cent in number of workers from July to August and metal mines continued to expand their working forces. Employment in this latter industry increased 1·2 per cent from July to August, reaching the highest level recorded since June, 1930. Electric light and power and manufactured gas firms also reported a further gain in employment over the month interval (1·1 per cent), this increase bringing the August index above the level of any month since January, 1931. In the remaining industries reporting increased employment (crude petroleum producing, wholesale trade, hotels, insurance, and telephone and telegraph), the gains ranged from 0·7 to 0·2 per cent.

Private Employment.—Employment and pay rolls in the private building construction industry showed further gains in August. Reports supplied by 9,327 contractors employing 126,751 workers in August showed increases of 2·1 per cent in employment and 4·6 per cent in pay rolls over the month interval. Employment in this industry in August, 1937, was 8·7 per cent higher than in August, 1936, while weekly pay rolls show an increase of 27·3 per cent over the year interval. The reports received from co-operating firms cover only employees engaged in erecting, altering and repairing private buildings and do not include projects financed by Public Works Administration or Reconstruction Finance Corporation funds or regular appropriations of the federal, state, and local governments.

Public Employment.—Employment on projects of the works program in August totalled 1,941,000. Compared with July this was a decrease of 279,000. More than 208,000 of the employees were working on federal projects and 1,599,000 on projects operated by the Works Progress Administration. Work projects of the National Youth Administration employed 134,000 workers. Data on employment and pay rolls for student aid were not available. Total pay roll disbursements on the program amounted to $96,973,000. Material orders placed exceeded $41,635,000.

During August approximately 187,000 workers were employed on construction projects financed by the Public Works Administration, a decrease of 11,000 or 5·7 per cent compared with the number working in July. Of the total number of employees 56,000 were engaged on projects financed by funds provided by the National Industrial Recovery Act and over 131,000 on projects financed from funds provided by the Emergency Relief Appropriation Acts of 1935 and 1936. Pay-roll disbursements in August totalled $15,020,000 on all P.W.A. projects and orders were placed for materials valued in excess of $22,839,000.

There were more than 327,000 workers in the Civilian Conservation Corps, a decrease of 21,000 compared with July. Decreases in employment were registered for all classes of workers with the exception of nurses and supervisory and technical employees. Of the total number of men in camps during August, 274,000 were enrolled personnel, 7,000 reserve officers, 300 nurses, 2,000 educational advisers, and 44,000 supervisory and technical employees. Pay-roll disbursements during the month for all classes of workers totalled $16,409,000.

Approximately 201,000 workers were employed on construction projects financed from regular governmental appropriations. This was an increase of more than 7,000 compared with the preceding month. Pay-roll disbursements totalling $18,934,000 were $666,000 less than in July. Although employment on public road projects increased, the workers were employed a fewer number of hours. Material orders placed during August amounted to $27,780,000.

Over 187,000 workers were employed on the construction and maintenance of roads financed wholly from state funds. Increases in the number of workers employed were shown for both types of road work. The number of workers engaged on new construction totalled approximately 27,000 and 160,000 were working on maintenance. Pay rolls for both types of work amounted to $12,684,000.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the LABOUR GAZETTE for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the Provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of Federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages scales of the respective provinces.

As respects contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight Hour Day Act, 1930." This Act, however, has now in turn been superseded by The Fair Wages and Hours of Labour Act, 1935, which came into force on May 1, 1936. The clause relating to wages and hours in the last-named statute is in the terms following:—

"All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages;

"The working hours of persons while so employed shall not exceed eight hours per day or forty hours per week, except in such special cases as the Governor in Council may otherwise provide, or except in case of emergency as may be approved by the Minister."

The new Act like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation af the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by federal grant in the form of contribution, subsidy, loan, advance or guarantee.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules known as fair wages schedules, are thereupon included by the Department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment, the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed.

The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed, claim therefor may be filed with the Minister of the Department with which the contract has been made and payments of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the Minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Orders in Council, it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts have recently been executed by the Government of Canada.

Department of National Defence

Contracts in Group "A" (Construction, Remodelling Repair, etc.)

Construction of a receiving station at the Royal Canadian Corps of Signals, Chipewyan, Alberta. Name of contractor, Mr. William Brown, Edmonton, Alta. Date of contract, September 15, 1937. Amount of contract, $7,575. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Asbestos and insulation workers	$0 85	8	44
Blacksmiths	0 70	8	44
Blacksmith's helpers	0 40	8	44
Carpenters and joiners	0 75	8	44
Electricians	0 85	8	44
Firemen—stationary	0 40	8	44
Labourers	0 40	8	44
Lathers, metal or wood	0 75	8	44
Painters and glaziers	0 75	8	44
Plasterers	0 90	8	44
Plasterers' helpers (mixing and tempering material)	0 42½	8	44
Plumbers and steamfitters	0 95	8	44
Plumbers' and steamfitters' helpers (all men assigned to help tradesmen)	0 42½	8	44
Roofers, felt and gravel	0 40	8	44
Sheet metal workers	0 75	8	44
Watchman	0 35	8	44

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

Completion of No. 3 Married Quarters, R.C.A.F. Station, Rockliffe, Ont. Name of contractors, Ross Meagher Co., Ltd., Ottawa, Ont. Date of contract, September 9, 1937. Amount of contract, $4,850. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Carpenters—Up to and including Sept. 30, 1937	$0 75	8	44
Carpenters—From Oct. 1, 1937	0 80	8	44
Electricians (inside wiremen)	0 70	8	44
Labourers	0 40	8	44
Motor truck driver	0 45	8	44
Motor truck driver and truck—			
1-2 tons	1 45	8	44
3 tons	1 95	8	44
Plasterers	0 80	8	44
Plasterers' helpers (mixing and tempering material)	0 45	8	44

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Painters and glaziers	0 65	8	44
Plumbers and steamfitters	0 83	8	44
Watchman	0 35	8	44

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

Completion of No. 7 Married Quarters, R.C.A.F. Station, Rockliffe, Ont. Name of contractor, Mr. Ovide Bouvier, Ottawa, Ont. Date of contract, September 24, 1937. Amount of contract, $4,870. The preceding fair wages schedule was also inserted in this contract.

Construction of a Transmitting Station Building for the Royal Canadian Corps of Signals, North Battleford, Sask. Name of contractor, Mr. M. Simenson, North Battleford, Sask. Date of contract, September 27, 1937. Amount of contract, $3,773. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Asbestos insulation workers	$0 75	8	44
Blacksmiths	0 60	8	44
Blacksmiths' helpers	0 40	8	44
Carpenters and joiners	0 70	8	44
Driver	0 35	8	44
Driver, team and wagon	0 65	8	44
Electricians (inside wiremen)	0 75	8	44
Firemen—stationary	0 45	8	44
Labourers	0 35	8	44
Lathers—metal	0 70	8	44
Lathers—wood	0 65	8	44
Motor truck driver	0 40	8	44
Motor truck driver and truck—			
1 and 2 tons	1 40	8	44
3 tons	1 90	8	44
Painters and glaziers	0 65	8	44
Plasterers	0 90	8	44
Plasterers' helpers (tempering and mixing material)	0 42½	8	44
Plumbers and steamfitters	0 80	8	44
Roofers, felt and gravel	0 40	8	44
Sheet metal workers	0 65	8	44
Watchmen	0 30	8	44

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

Construction of a sewer line from the hangars at Jericho Beach, Vancouver, B.C. Name of contractors, Walsh Construction Co. Ltd., Vancouver, B.C. Date of contract, September 7, 1937. Amount of contract, $6,000. A fair wages schedule was included in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Cement finishers	$0 75	8	44
Labourers	0 45	8	44
Pipe layers (tile pipe)	0 57½	8	44
Cement and concrete mixer operators (gas)	0 60	8	44
Carpenters	0 90	8	44
Motor truck drivers	0 50	8	44
Motor truck drivers and 1–2 ton truck	1 50	8	44
Watchmen	0 45	8	44

Contracts in Group "B" (Manufacture and Repair of Equipment and Supplies)

The following is a statement of contracts awarded by the Department of National Defence during the month of September, 1937, for the manufacture and repair of various classes of equipment and supplies, which contracts included in all cases the "B" labour conditions above referred to:—

Nature of contract	Contractor
Spurs	Steel Co. of Canada, Ltd., Montreal, P.Q.
Cotton bandoliers	Hamilton Gerhartt Manufacturer Ltd., Toronto, Ont.
Black shoes	J. A. & M. Cote, Ltd., St. Hyacinthe, P.Q.
Connecting tubes and mandrels.	B. F. Goodrich Rubber Co. Ltd., Kitchener, Ont.
Blue serge for caps	The Paton Mfg. Co., Ltd., Montreal, P.Q.
Embroidery badges	Raoul Vennat Enr'g., Montreal, P.Q.
Serge jumpers and trousers	Gault Bros., Ltd., Vancouver, B.C.
Blue serge for uniforms	The Paton Mfg. Co., Ltd., Montreal, P.Q.
Circular Tents	J. B. Roebuck Ltd., Midland, Ont.
Spare parts for aircraft	Canadian Vickers, Ltd., Montreal, P.Q.
Metal lined powder cases	A. Deslauriers & Fils Ltee, Quebec, P.Q.

Contracts for the Manufacture, Overhaul and Reconditioning of Aircraft

Complete reconditioning and modification of Fleet Model 7 Landplane 196. Name of contractors, Fleet Aircraft, Limited, Fort Erie, Ontario. Date of contract, September 22, 1937. Amount of contract, $2,301. A fair wages schedule was included in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Engine Assembly—			
Fitter (A.E.)	$0 60	Hours not more than 48 per week	
Fitter's helper (A.E.)	0 40		
Machinist	0 65		
Machinist's helper	0 40		
Machine operators	0 50		
Sandblasters	0 55		
Labourers	0 35		
Airframe construction and Assembly—			
Fitter (A.F.)	0 60		
Fitter's helper (A.F.)	0 40		
Machinist	0 65		
Machinist's helper	0 40		
Machine operator	0 50		
Woodworker (joiner)	0 60		
Woodworker's helper	0 40		
Welder	0 60		
Welder's helper	0 40		
Electrician	0 65		
Electrician's helper	0 40		
Painter and doper	0 55		
Painter and doper's helper	0 40		
Fabric worker—female	0 40		
Fabric worker's helper	0 30		
Upholsterer	0 55		
Upholsterer's helper	0 40		
Sandblaster	0 55		
Labourer	0 35		
Erector	0 60		
Erector's helper	0 40		
Sheet metal worker	0 60		
Sheet metal worker's helper	0 40		
Riveters	0 50		
Riveters' helpers	0 40		
Apprentices to fitters, machinists, and sheet metal workers only—(16 to 21 years of age)—			
1st year	0 20		
2nd year	0 25		
3rd year	0 35		

Note.—Only one helper to be employed to each journeyman. No more than one apprentice to be employed to each five journeymen.

Alterations and additions to Tiger Moth 82 Aircraft 238. Name of contractors, The De Havilland Aircraft of Canada Ltd., Toronto, Ont. Date of contract, September 28, 1937. Amount of contract, $1,100. The preceding fair wages schedule was also inserted in this contract.

National Harbours Board

Contracts in Group "A" (Construction, Repair, Demolition, etc.)

Construction of Shed No. 4 at Three Rivers, P.Q. Name of contractors, Newton Construction Co., Ltd., Sherbrooke, P.Q. Date of contract. Sept. 13, 1937. Amount of contract, $231,496.00. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Blacksmiths	$0 55	8	44
Blacksmiths' helpers	0 40	8	44
Brick and hollow tile layers	0 70	8	44
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 40	8	44
Carpenters and joiners	0 55	8	44
Cement finishers	0 50	8	44
Cement and concrete mixer operators—			
Steam	0 60	8	44
Gas. or elec.	0 45	8	44
Compressor operators (gas or elec.)	0 45	8	44
Crane operators (gas. or elec.)	0 50	8	44
Drill runners	0 45	8	44
Driver, horse and cart	0 50	8	44
Driver, team and wagon	0 60	8	44
Drivers	0 35	8	44
Electricians (inside wiremen)	0 60	8	44
Engineers, operating, steam—			
Single or double drums	0 65	8	44
Three or more drums	0 75	8	44
Engineers on steel erection	0 75	8	44
Firemen, stationary	0 40	8	44
Hoist operators, gas. or elec.	0 45	8	44
Labourers	0 35	8	44
Machinists	0 55	8	44
Millwrights	0 55	8	44
Motor truck drivers	0 40	8	44
Motor truck driver and truck—			
1 to 2 tons	1 40	8	44
3 tons	1 90	8	44
4 tons	2 40	8	44
5 tons	2 90	8	44
Painters, spray	0 60	8	44
Painters and glaziers	0 50	8	44
Pipe fitters (surface, temp. work)	0 50	8	44
Pipe layers, caulkers and solderers	0 45	8	44
Pile driver foreman	0 75	8	44
Pile driver engineer	0 65	8	44
Pile driver fireman	0 40	8	44
Pile driver derrick engineers	0 65	8	44
Pile driver derrick firemen	0 40	8	44
Riggers, general	0 45	8	44
Roofers, felt and gravel	0 40	8	44
Rodmen, reinforced steel	0 45	8	44
Sheet metal workers	0 60	8	44
Structural steel workers	0 75	8	44
Tractor operators	0 45	8	44
Watchmen	0 30	8	44
Welders and burners (on steel erection)	0 75	8	44

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

Post Office Department

Contracts in Group "B" (Manufacture and Repair of Equipment, Supplies, etc.)

The following is a statement of contracts awarded by the Post Office Department during the month of September, 1937, for various classes of manufactured goods, which contracts

in all cases included the "B" labour conditions above referred to:—

Nature of contract	Contractor
Metal dating stamps and type, brass crown seals, cancellers, etc.	Pritchard-Andrews Co., Ltd., Ottawa, Ont.
Rubber stamps, daters, etc., and repairs thereto.	Pritchard-Andrews Co., Ltd., Ottawa, Ont.
Letter carriers' uniforms	Pollack & Dorfman, Quebec, P.Q.
Letter carriers' uniforms	London Shirt Corporation, Montreal, P.Q.
Letter carriers' uniforms	Horn Bros. Woollen Co., Ltd., Lindsay, Ont.
Letter carriers' uniforms	Kaufman Rubber Co., Ltd., Kitchener, Ont.
Letter carriers' uniforms	Miner Rubber Co., Ltd., Granby, P.Q.
Letter carriers' uniforms	Canadian General Rubber Co., Galt, Ont.
Stamping machine parts, etc.	Machine Works, Ltd., Montreal, P.Q.
Scales	Pritchard-Andrews Co., Ltd., Ottawa, Ont.

PUBLIC WORKS DEPARTMENT

Contracts in Group "A" (Construction, Remodelling, Repair, or Demolition)

Painting and general repairs to public building at Nelson, B.C. Name of contractor, Mr. J. A. Spencer, Nelson, B.C. Date of contract, September 13, 1937. Amount of contract, $3,841. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Brick and hollow tile layers	$0 90	8	44
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45	8	44
Carpenters and joiners	0 70	8	44
Cement finishers	0 60	8	44

N.B.—The wage rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by Provincial legislation.

In any case where, by agreement or current practice, the working hours of any class of workers are less than 44 hours per week, such lesser hours shall not be exceeded on this work.

Docking, cleaning, painting and repairing Dredge P.W.D. No. 303 (*Fruhling*). Name of contractors, Burrard Dry Dock Co., Ltd., North Vancouver, B.C. Date of contract, September 21, 1937. Amount of contract, $13,900. The labour conditions included the following clause:—

(1) All workmen, labourers, or other persons who perform labour on the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district in which the work is being performed for the character or class of work in which they are respectively engaged. In no event shall the wages be less than those set out in the schedule of minimum rates hereunder. The working hours shall not exceed eight hours a day, unless for the protection of life or property, or for other cause shown to the satisfaction of the Minister of Labour, longer hours of service are required.

Removal of certain derelicts, wooden piles, etc., now lying in the Inner Harbour at Kingston, Ontario. Name of contractors, Sincennes-McNaughton Tugs, Ltd., Montreal, P.Q. Date of contract, September 27, 1937. Amount of contract, $8,500. The preceding fair wages schedule was also inserted in this contract.

Statistics of Telegraph Systems in Canada, 1936

According to a report issued by the Dominion Bureau of Statistics gross revenues of all telegraph systems in Canada increased from $9,741,394 in 1935 to $10,378,873, operating expenses increased from $8,416,329 to $8,710,349 and net revenues were increased from $1,325,065 to $1,668,524.

The number of telegrams originated in Canada and received from the United States for delivery in Canada were 11,001,936 and 1,733,250, respectively, or a total of 12,735,186, and the number of cablegrams forwarded and received were 740,170 and 651,733, respectively. The total value of money transferred by telegraph amounted to $4,296,738 as against $3,834,458 in 1935.

The number of full time employees increased from 5,903 to 6,064 and salaries and wages increased from $7,030,830 to $7,360,193, exclusive of commissions amounting to $340,284 in 1935 and $354,343 in 1936.

Minimum Wages on United States Government Contracts

According to the *Monthly Labor Review* for September, published by the United States Department of Labor, minimum wage rates of 32½ cents to 67½ cents per hour for employees engaged on Government contracts were established in seven industries by the Secretary of Labor in July, 1937, under powers granted by the Walsh-Healey Act. In only one case—the production of men's underwear—was a geographical differential introduced. For this industry employees in specified southern states might receive a minimum hourly rate of 32½ cents instead of the 35 cents established elsewhere. The other industries covered are men's neckwear, hats and caps, raincoats, cotton garments, seamless hosiery and work gloves. Six of the seven determinations permit special rates below the industry minima for learners, handicapped or superannuated workers, or a combination of these classes. The 40-hour work-week is the maximum under all seven decisions.

The Division of Labor Standards of the United States Department of Labor recently issued four pamphlets Nos. 10, 11, 12 and 13 continuing its Industrial Health and Safety Series.

The pamphlets, which give the cause and prevention of various forms of industrial poisoning, are entitled as follows: Wood Alcohol Poisoning; Carbon Tetrachloride Poisoning; Carbon Bisulphide Poisoning; and Carbon Dioxide Asphyxiation.

Census of Unemployed in the United States

Plans for a postal registration of the unemployed in the United States were recently approved by President Roosevelt in an executive order which provides for an expenditure of up to $5,000,000 in this connection.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received in the department. Such agreements are summarized each month in the Labour Gazette. In the majority of cases the agreements are signed by both the employers and the employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In each agreement or schedule, the rates of wages for the principal classes of labour are given, with other information of general interest.

Manufacturing: Pulp, Paper and Paper Products

Hull, Quebec.—The E. B. Eddy Company, Limited, and the International Brotherhood of Papermakers (Local No. 243) and the International Brotherhood of Pulp, Sulphite and Paper Mill Workers (Local No. 50).

Agreement to be in effect from May 1, 1937, to April 30, 1938, and thereafter from year to year until notice.

The company recognizes the unions as representing their membership for collective bargaining. Any employee now a member or who later becomes a member of one of these unions is expected to maintain membership in it. Preference in employment to be given union members; any others employed permanently must join one of these unions.

Hours: day workers to work the hours scheduled by each department; any time over 10 hours will be paid at overtime rates. Tour workers to work 8 hours.

Overtime: time and one-half for work over 10 hours for day workers and over 8 hours for tour workers.

A mutual interest board of eight members to be formed for the discussion of employees' welfare.

Disputes are to be taken up by the union with company officials. If this is unsuccessful, they will be referred to a board of arbitration consisting of one representative of the company, one representative of the union and a third party chosen by the first two. The decision of this board to be final and binding. No strikes or lockouts to occur during the life of this agreement.

Employees are not expected to do dangerous work. If ordered to do so, they may refuse without penalty. Otherwise they must assume all risks.

Iroquois Falls, Sturgeon Falls, Espanola, Sault Ste. Marie and Fort William, Ontario.—Abitibi Power and Paper Company Limited, the International Brotherhood of Papermakers, the International Brotherood of Pulp, Sulphite and Paper Mill Workers and other Unions (Machinists, Electrical Workers, Carpenters, Operating Engineers).

Agreement to be in effect from May 1, 1937, to April 30, 1939, subject to 30 days' notice (which is not effective before 1939).

The agreement which was summarized in the Labour Gazette, July, 1934, page 701, with changes and renewals as noted in the Labour Gazette, December, 1934, page 1148, July, 1935, page 692, and July, 1936, page 657, is renewed until April 30, 1939, with the following changes:—

Wages: all wage rates covered by the agreement which were in effect on April 30, 1937, are first to be increased 2 cents per hour and then from the rates resulting from such increase, the following increases will be made for the period May 1, 1937, to December 31, 1937: rates between 45 and 65 cents, an increase of 6 cents per hour; rates between 66 and 79 cents, an increase of 7 cents; rates between 80 and 93 cents, an increase of 8 cents; rates between 94 cents and $1,10, an increase of 9 cents; rates between $1.11 and $1.27, an increase of 10 cents; rates between $1,28 and $1.44, an increase of 11 cents; rates from $1.45 and up, an increase of 12 cents. For the period January 1, 1938, to April 30, 1939, the following additional increases will be made: rates of 51 cents per hour to be increased 3 cents per hour; all other rates covered by this agreement to be increased by 2 cents per hour.

Certain hourly wage rates at Sault Ste. Marie from May 1, 1937, to December 31, 1937: paper machines—boss machine tenders $1.70 and $1.75, machine tenders $1.15, $1.25, $1.28, $1.31 and $1.34, back tenders 98 cents, $1.01, $1.07, $1.11, $1.13, $1.16, third hands 80 cents, 83 cents, 86 cents, 89 cents, 91 cents, fourth hands 67 cents and 69 cents, fifth hands 64 cents, 67 cents and 68 cents, beater engineer 99 cents. Pulpwood handlers 51 cents, grindermen 53 cents, chippermen 51 cents, acid makers 77 cents, sulphite mill cook 92 cents, helpers 51 and 65 cents, blow pit men 51 cents, screenmen 51 cents, wet machine men 51 cents.

Port Arthur, Ontario.—Thunder Bay Paper Company Limited and the International Brotherhood of Papermakers (Local (249), the International Brotherhood of Pulp, Sulphite and Paper Mill Workers Local 134) and the International Brotherhood of Operating Engineers (Local 865).

The agreement is in effect from May 1, 1937, to April 30, 1939, subject to 30 days' notice (which is not effective before 1939). The agreement is similar to the one previously in effect and summarized in the Labour Gazette, April, 1930, page 453, with amendments noted with amendments to other agreements in other mills operated by the Abitibi Power and Paper Company and noted in the Labour Gazette, November, 1932, page 1222, October, 1933, page

1034, with changes in wages in 1934, a renewal in 1935 and a further renewal in 1936, as noted in the Labour Gazette, July, 1936, page 657. The following changes are made in the 1937 agreement:—

Wages: all rates covered by this agreement as of April 30, 1937, to be increased 2 cents per hour and on the rates resulting from such increase, the following increases covering the period between May 1, 1937, to December 31, 1937, will be made: on rates between 45 and 65 cents, an increase of 6 cents per hour; on rates between 66 and 79 cents, an increase of 7 cents per hour; on rates between 80 and 93 cents, an increase of 8 cents; on rates between 94 cents and $1.10, an increase of 9 cents; on rates between $1.11 and $1,27, an increase of 10 cents; on rates between $1.28 and $1.44, an increase of 11 cents; on rates from $1.45 and up, an increase of 12 cents.

From January 1, 1938, rates of 51 cents are to be increased 3 cents per hour and all other rates 2 cents per hour.

Pine Falls, Manitoba.—Manitoba Paper Company, the International Brotherhood of Papermakers (Local No. 245), the International Brotherhood of Pulp, Sulphite and Paper Mill Workers (Local No. 101) and Other Unions (Machinists and Electrical Workers).

Agreement to be in effect from May 1, 1937, to April 30, 1939, subject to 30 days' notice, which shall not be effective before 1939.

This agreement renews the one previously in effect and summarized in the Labour Gazette, July, 1931, page 832, with the exception of the wage scale.

Wages: the same rates of increases as noted above for the Abitibi Power and Paper Company are provided in this agreement, both from May 1, 1937, and January 1, 1938. Certain of these hourly rates as in effect from May 1, 1937, to December 31, 1937, are as follows: paper machine room—boss machine tenders $1.83, machine tenders $1.63, back tenders $1.45, third hands $1.09, fourth hands 68 cents, fifth hands 63 cents, broke hustlers 51 cents, oilers 63 cents, clothing men $1.09, swipers 51 cents, rewinder helper 63 cents, mechanic 81 cents. Pulp-wood handlers 51 cents, grindermen 79 cents, chippermen 51 cents, cooks and acid makers $1.04, cooks' helpers 73 cents, blow pit men 51 cents, bull screen and knot screen men 51 cents, electricians and machinists 78 to 90 cents.

Fort William, Ontario.—Great Lakes Paper Company and the International Brotherhood of Papermakers (Local No. 257), the International Broterhood of Pulp, Sulphite and Paper Mill Workers (Local No. 39) and Other Unions (Electrical Workers, Machinists, Operating Engineers).

Agreement to be in effect from May 1, 1937, to May 1, 1939.

This agreement renews the one previously in effect (Labour Gazette, November, 1936, page 1077), with the following changes:—

Wages: from May 1, 1937, all rates then in effect were to be increased 2 cents per hour and additional increases over these rates as follows: on rates between 45 and 65 cents, an increase of 6 cents; on rates from 66 to 79 cents, an increase of 7 cents; on rates from 80 to 93 cents, an increase of 8 cents; on rates from 94 cents to $1.10, an increase of 9 cents; on rates from $1.11 to $1.27, an increase of 10 cents; on rates from $1.28 to $1.44, an increase of 11 cents; on rates of $1.45 and up, an increase of 12 cents. Effective January 1, 1938, the minimum of 51 cents to be advanced to 54 cents and all other rates to be advanced 2 cents per hour. Without reopening the agreement the company agrees to discuss and consider with the union any requests for individual adjustments or differentials in rates if requested by the union on May 1, 1938.

Certain hourly wage rates as in effect from May 1, 1937, to December 31, 1937, are as follows: paper machines—machine tenders $1.76 and $1.85, back tenders $1.59 and $1.68, third hands $1.20 and $1.26, fourth hands 73 cents, fifth hands 63 cents, sixth hands 53 cents; boss machine tenders 10 cents per hour per machine higher than the highest paid machine tender, clothingmen $1.20, rewindermen 71 cents, oilers 62 cents. Pulp—grindermen 54 cents, wet machine and pressmen 51 cents, screenmen 54 cents, acid makers 78 cents, cooks 93 cents, blow-pit men 53 cents, finishers 53 cents, electrical workers 80 and 82 cents, machinists, blacksmiths, pipefitters 80 cents.

Port Arthur, Ontario.—Provincial Paper Limited, the International Brotherhood of Papermakers (Local No. 239), the International Brotherhood of Pulp, Sulphite and Paper Mill Workers (Local No. 40) and the International Brotherhood of Operating Engineers (Local No. 865).

Agreement to be in effect from May 1, 1937, to April 30, 1939, subject to 30 days' notice, which is not effective before 1939, and with the following wage increases:—

Wages are to be increased from May 1, 1937, to December 31, 1937, 2 cents per hour over the rates in effect on April 30, 1937, and on the rates resulting from such increases the following additional increases to be made from May 1, 1937: on rates between 45 and 65 cents, an increase of 6 cents per hour; on rates between 66 and 79 cents, an increase of 7 cents; on rates between 80 and 93 cents, an increase of 8 cents; on rates between 94 cents and $1.10, an increase of 9 cents; on rates between $1.11 and $1.27, an increase of 10 cents per hour. From January 1, 1938, to April 30, 1939, the 51-cent rate will be further increased by 3 cents per hour and all other rates by 2 cents per hour.

Merritton, Ontario.—Interlake Tissue Mills Company Limited, the International Brotherhood of Pulp, Sulphite and Paper Mill Workers, Local No. 289, and the International Brotherhood of Firemen and Oilers, Local No. 329.

Agreement to be in effect from June 4, 1937, to June 1, 1938, and thereafter from year to year, subject to notice.

The company recognizes the unions as the bargaining agency for the employees. All employees are to join the union.

Hours not to exceed 48 per week. Any employee called back for emergency work to be paid for at least 4 hours. If over 4 hours on this work time and one-half for all time worked over the regular hours.

Overtime: time and one-half.

Certain wages per hour: machine tenders 85 and 90 cents, back tenders 65 and 70 cents, third hands 55 and 58 cents, fourth hands 55 cents, boss beatermen 70 cents, first hands 50

and 52 cents, second hands 48 and 50 cents, firemen 75 cents, machinists 88 cents, carpenters 82½ cents, labourers 47 cents, printers 75 cents, finishers (men) 55 cents, finishers (girls), labellers 35 cents, cutterman 60 cents.

Disputes which cannot be settled between the company and the union will be referred to a board of arbitration, whose decision will be final and binding.

Thorold, Ontario.—Beaver Wood Fibre Company, Limited, the Beaver Company, Limited, the International Brotherhood of Papermakers (Local No. 192) and the International Brotherhood of Pulp, Sulphite and Paper Mill Workers (Local No. 228).

Agreement to be in effect from May 1, 1937, to May 1, 1938.

The agreement is similar to the one previously in effect and summarized in the Labour Gazette, November, 1936, page 1076, with these exceptions:—

Permanent employees paid on an hourly basis to maintain membership in their respective union. If men are laid off, the older in the service to have preference of employment.

Certain wage rates at Beaver Wood Fibre Company: grindermen 54 cents, wood handlers 54 cents, bull screen operator 49 cents, wet machine operators 47 cents; board machines—machine tenders 90 cents, back tenders 70 cents, third hands 63 cents, fourth hands 52 cents, fifth hands 48 cents, screenmen 46 cents; news machine—machine tenders $1.22, back tenders $1.05, third hands 81 cents, fourth hands 63 cents, fifth hands 60 cents; electrical workers 69 and 80 cents; millwrights, machinists, pipefitter, bricklayer, blacksmith, carpenter 69 cents.

Certain wage rates at the Beaver Company Limited: machine hands 47, 52 and 54 cents, sizing 47 cents, reclaim 47 cents, shippers 52 cents, silicate mixer 52 cents, varnish makers 54 cents.

Thorold, Ontario.—The Ontario Paper Company, Limited, the International Brotherhood of Papermakers, the International Brotherhood of Pulp, Sulphite and Paper Mill Workers and Other Unions (Stationary Firemen, Electrical Workers, Machinists, Carpenters, Operating Engineers, Plumbers).

Agreement to be in effect from May 1, 1937, to May 1, 1939.

This agreement renews the one previously in effect and summarized in the Labour Gazette, October, 1934, page 964, with renewals noted in the issues of December, 1935, page 1153, and November, 1936, page 1076, with the following changes:—

From May 1, 1937, to December 31, 1937, all rates in effect on April 30, 1937, are to be increased 2 cents per hour, and the resulting increased rates are to be further increased as follows: rates between 45 and 65 cents, an increase of 6 cents per hour; rates between 66 and 79 cents, an increase of 7 cents; rates between 80 and 93 cents, an increase of 8 cents; rates between 94 cents and $1.10, an increase of 9 cents; rates between $1.11 and $1.27, an increase of 10 cents; rates between $1.28 and $1.44, an increase of 11 cents; rates of $1.45 and up, an increase of 12 cents. From January 1, 1938, the 51-cent rate will be increased to 54 cents and all other rates increased 2 cents per hour. It is further agreed that without reopening the agreement, the company will discuss possible adjustments in individual rates or differentials if requested by the unions on May 1, 1938.

Kapuskasing, Ontario.—Spruce Falls Power and Paper Company, Limited, the International Brotherhood of Papermakers (Local No. 256) and the International Brotherhood of Pulp, Sulphite and Paper Mill Workers (Local No. 89).

Agreement to be in effect from May 1, 1937, to April 30, 1939, and thereafter from year to year, subject to notice.

The company recognizes the unions for the purpose of collective bargaining. Employees who are or who later become union members shall maintain their membership and new employees, if permanently employed, must join one of these unions.

Hours: 8 per day, a 48-hour week.

Overtime for day workers and work for all on Sundays and holidays, time and one-half. Overtime for tour workers on other than tour work, time and one-half.

Hourly wage rates are increased over the previous rates as follows: former rates of 43 and 44 cents advanced to 51 cents; rates of 45 to 65 cents increased by 6 cents per hour, rates of 66 to 79 cents increased by 7 cents, rates of 80 to 93 cents increased by 8 cents, rates of 94 cents to $1.10 increased by 9 cents, rates of $1.11 to $1.27 increased by 10 cents, rates of $1.28 to $1.44 increased by 11 cents, rates over $1.44 increased by 12 cents. On January 1, 1938, the 51-cent rate will be advanced to 54 cents, and all hourly rates of more than 51 cents will be increased 2 cents per hour.

Certain hourly wage rates in effect from May 1, 1937, to December 31, 1937: Pulp—saw filer 80 cents, sawyers and wood inspectors 57 cents, others in woodyard and rossing plant 51 cents; chippermen 57 cents, grindermen 64 cents, acid makers 90 cents, cooks 97 cents, blow-pit men 62 cents, screenmen 57 cents, wet machine tenders 56 cents, wet pressmen 51 cents. Paper mill—machine tenders $1.70, back tenders $1.52, third hands $1.14, fourth hands 73 cents, fifth hands 68 cents, broke beatermen 51 cents, finishers 55 cents. Mechanical—electrical workers 75 to 85 cents, engineers 85 and 93 cents, firemen 58 to 73 cents, millwrights 85 to 90 cents, machinists 85 cents. (In the mechanical trades, employees to start at a rate 10 per cent below the above rates.)

A mutual interest board to be formed for discussion of employees' welfare. Provision is made for the adjustment of disputes by the union and the management, and if they fail by an arbitration board consisting of one representative of each party and a third chosen by them, or if they are unable to agree, the third arbitrator is to be named by the Minister of Labour for Ontario. No strike or lockout to occur during the life of the agreement.

Kenora and Fort Frances, Ontario.—Kenora Paper Mills, Limited, Fort Frances Pulp and Paper Company, Limited, and the International Brotherhood of Papermakers, Locals Nos. 238 (Kenora) and 306 (Fort Frances).

The agreement which was previously in effect and summarized in the Labour Gazette, December, 1935, page 1154, and November, 1936,

page 1077, is renewed from May 1, 1937, to April 30, 1939, with a new wage scale.

Wages per hour at Kenora: machine tenders $1.57 and $1.60, back tenders $1.37 and $1.42, third hands $1.35 and $1.07, fourth hands 74 cents, fifth hands 63 cents, sixth hands 53 cents, clothingmen $1.07, beater engineer 94 cents, rewinder man 86 cents, rewinder helper 56 cents, head oiler 88 cents, oiler 64 cents.

Wages per hour at Fort Frances: machine tenders $1.28 and $1.60, back tenders $1.11 and $1.42, third hands 86 cents and $1.07, fourth hands 70 and 74 cents, fifth hands 59 and 63 cents, sixth hands 56 cents, clothingman $1.07, beater engineer 94 cents, rewinder man 86 cents, rewinder helper 56 cents, head oiler 88 cents, oiler 64 cents.

Fort Frances, Ontario.—Fort Frances Pulp and Paper Company, Limited, and the International Brotherhood of Pulp, Sulphite and Paper Mill Workers, Local No. 92.

The agreement which came into effect May 1, 1936, was renewed with a new wage schedule and certain other changes from May 1, 1937, to May 1, 1938. Either party desiring a change on May 1, 1938, must given 30 days' notice previous to that date.

Preference in employment to be given union members. Others employed are to become union members. Membership of the unions to conform to the regulations as fixed by the American Federation of Labor. Where there is no organization, employees to be members of the International Brotherhood of Pulp, Sulphite and Paper Mill Workers.

Hours: 8 per day, a 48-hour week.

Overtime to be paid at time and one-half, except in case of a tour worker waiting for his regular relief man which work will be done at straight time. Work on holidays, time and one-half.

Wages were increased on May 1, 1937, as follows: all ½ cent rates were advanced ½ cent; rates up to and including 65 cents per hour were increased 8 cents; rates between 66 and 79 cents inclusive were raised 9 cents; rates between 80 and 93 cents inclusive were raised 10 cents. From January 1, 1938, the then existing rates are to be raised 2 cents per hour and the 51 cent rate raised to 54 cents. It is also provided that should a further increase in wage rates be agreed upon between the Minnesota and Ontario Paper Company and members of this international union at International Falls, Minnesota, that a similar increase will be made by a settlement between the two parties to this agreement.

Certain wage rates in effect May 1, 1937, to December 31, 1937: labourers in pulpwood, storage and wood room 55 cents, grindermen 56 cents, screenmen 60 cents, swiper 58 cents, broke beater men 55 cents, coreman 55 cents, finishers 57 cents, journeymen electricians 98 cents, hydro operator 74 cents, engineers 84 cents, fireman 74 cents, oilers 63 cents; millwrights, carpenter, pipefitter, machinists, 80 and 83 cents.

Seniority to be considered in promotions and lay-offs.

Grievances arising between union members and the company to be taken up by the union with company officials. If no settlement is reached, the matter will be referred to an arbitration board, consisting of one representative of each party and a third chosen by them, or, failing this, the third member of the board to be appointed by the provincial Minister of Labour.

In case of negotiations for a new agreement, if a satisfactory settlement cannot be reached, negotiations will be resumed after a lapse of thirty days or a longer period if mutually agreed upon and then brought to a final conclusion.

Kenora and Fort Frances, Ontario.—Kenora Paper Mills Limited, the Fort Frances Pulp and Paper Company, Limited, and the International Brotherhood of Electrical Workers, Local No. 731.

The agreement which was summarized in the Labour Gazette, December, 1934, page 1149, has been renewed from May 1, 1937, to April 30, 1939, and from year to year thereafter, subject to notice. Adjustments in the wage schedule may be considered if the union requests 30 days before April 30, 1938.

Certain wage rates in effect May 1, 1937, to December 31, 1938, at Fort Frances: journeymen electricians 98 cents, hydro operators 74 cents, electrician's helper 58 cents. From January 1, 1938, all wage rates to be increased by 2 cents per hour.

Work on Easter Sunday to be paid at time and one-half; work on Labour Day, double time.

Kenora, Ontario.—Kenora Paper Company, Limited, and the International Union of Operating Engineers, Local No. 940.

Agreement to be in effect from May 1, 1937, to April 30, 1938.

The Company recognizes the union.

Hours: 8 per day. Any employee required to go on duty for repair work to receive at least 4 hours' pay.

Overtime: time and one-half for day workers. Tour workers required to work overtime at other than tour work and tour workers required to work on Sundays to be paid time and one-half.

Certain hourly wage rates reported to be in effect from May 1, 1937: operating engineers 86 cents, firemen 74 cents, coal men and helpers 56 cents.

Manufacturing: Other Wood Products

Fort Frances, Ontario.—A Certain Lumber and Saw Mill Operator and the United Brotherhood of Carpenters and Joiners, Local No. 2558 (Saw Mill Workers).

Agreement to be in effect from April 16, 1937, to April 15, 1938, and thereafter from year to year, subject to notice.

Preference in employment to be given union members. Others employed must join the union.

Hours: 8 per day.

Overtime: time and one-quarter. Work on Sundays and five specified holidays, time and one-quarter, with the exception of such work as watchmen, firemen, barnmen or those whose work requires that they work every day.

Wages were increased from 2 to 9 cents per hour on May 1, 1937. Certain hourly wage rates are: sawyers $1.12½, gang sawyers 69½ cents, tail sawyers 47½ and 50 cents, edgermen 61 cents, millwrights 61 and 65½ cents, engineers 60 and 60½ cents, lath mill employees 43, 50 and 53 cents, green lumber workers 47½, 50 and 56 cents; dry lumber workers 43 to 56 cents, planing mill and dry shed 50 to 60 cents; labourers 43 cents.

Manufacturing: Textiles and Clothing

Cornwall, Ontario.—An Artificial Silk Manufacturing Company and the Cornwall United Textile Workers Federal Union No. 3 (Rayon Section).

Agreement to be in effect from September 10, 1937, to September 9, 1938, and thereafter from year to year, subject to notice.

The Company recognizes the union as the collective bargaining agency for the employees who are members of it.

Hours are unchanged from those previously in effect.

Overtime: all work in any day beyond the normal working day and all work on Sundays and on four specified holidays, time and one-half. Work done by drying room girls on Saturday after 2 p.m., time and one-half.

Holidays: all employees who on June 1, 1938, have been in the employ of the Company for at least a year will be given one week's holiday with pay between July 1 and September 1. Employees who do not receive the four specified statutory holidays with the exception of one department will be given ten consecutive days holidays with pay between May 1 and October 1.

Wages for all employees covered by the agreement are increased 3 cents per hour. The attendance bonus for female workers is cancelled.

Wages per hour for helpers in the maintenance and engineering department: new starters 43 cents for first two years, 47 cents for third and fourth years, 53 cents for fifth year, 58 cents after five years; lead burner helpers 56 cents for fifth year and 65 cents after five years. A helper after five years to be advanced to tradesman's rate at the discretion of his foreman and the chief engineer.

In making promotions, seniority to be considered.

Any grievances or change in working conditions which cannot be settled between the shop steward and the foreman or superintendent will be negotiated between the Company and the Union.

Construction: Buildings and Structures

OTTAWA, ONTARIO—CERTAIN SHEET METAL FIRMS AND THE SHEET METAL WORKERS INTERNATIONAL UNION, LOCAL NO. 47.

Agreement to be in effect from May 1, 1937, to April 30, 1938, and thereafter from year to year, subject to notice.

Only union members to be employed, if available. This does not apply to the manufacture of standard manufactured articles made in quantity in factory part of plant. If a sufficient number of members not available, other sheet metal workers may be employed but must join the union.

Hours: 8 per day, 4 on Saturdays, a 44-hour week.

Overtime: time and one-half up to 10 p.m. Overtime from 10 p.m. to 8 a.m. and Saturday after 5 p.m., Sundays and seven specified holidays, double time.

Wages for journeymen sheet metal workers in shop or on the job: 82 cents per hour.

For work out of the city, employers to provide transportation.

Apprentices are governed by the Ontario Apprenticeship Act.

A joint adjustment board to be formed for the settlement of disputes.

VANCOUVER, B.C.—CERTAIN ROOFING AND SHEET METAL FIRMS AND THE SHEET METAL WORKERS' INTERNATIONAL ASSOCIATION, LOCAL NO. 280.

Agreement to be in effect from June 1, 1937, to June 30, 1938, and thereafter from year to year, subject to notice.

The contractors agree to employ only union members and the union members agree not to work for any contractors or firms who do not agree to comply with the terms of this agreement.

Hours: 8 per day, Monday to Friday inclusive, a 40-hour week. If, however, it is necessary to work on Saturdays, the hours between 8 a.m. and 12 noon to be worked at straight time.

Overtime: time and one-half for first four hours; double time thereafter; work on Saturday afternoons, Sundays and seven specified holidays, double time.

Minimum wages for journeymen sheet metal workers: $1 per hour.

Apprentices are governed by the Provincial Apprenticeship Committee, but not more than one apprentice allowed to each three journeymen and one advanced apprentice to every four journeymen. Advanced apprentices must be paid at least 75 per cent of journeyman's wage.

For work out of the city, fare and board and lodging to be paid by the contractor.

Disputes are to be referred to representatives of both parties. If they cannot agree, a permanent joint conciliation board to be formed, whose decision shall be binding. If this board cannot reach a decision the dispute will be referred to the president of the Building and Construction Industries Exchange and the general office of the international union.

Construction: Miscellaneous

VICTORIA, B.C.—SCHEDULE OF WAGES AND TRADE RULES FOR THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS, LOCAL 2415 (PILE DRIVERS, BRIDGE, DOCK AND WHARF BUILDERS).

This schedule is the same as that for Local 2404 of the union at Vancouver, which was noted in the LABOUR GAZETTE, June, page 689.

Workmen's Wages Act, Quebec

The following agreements and amendments to agreements have recently been made obligatory by Orders in Council and are noted on the following page:

Barbers and Hairdressers, Chicoutimi and neighbouring towns.

Shoe Manufacturers, Province of Quebec.

Cloak Makers, Province of Quebec.

Barbers and Hairdressers, Three Rivers.

Building Trades, Sherbrooke (Amendment).

Industrial Standards Act of Ontario

The following schedules have recently been made binding by Orders in Council and are noted on the following page:

Barbers, Collingwood.

Barbers, Guelph.

INDUSTRIAL STANDARDS ACT OF ONTARIO

Schedules of Wages and Hours Recently Approved by Orders in Council

THE Industrial Standards Act of Ontario, the text of which was printed in the Labour Gazette, June, 1935, page 534, with amendments in the issue of May, 1936, page 410, provides that the Minister of Labour for Ontario may, upon petition of representatives of employees or employers in any industry, convene a conference or series of conferences of employees and employers in the industry, in any zone or zones to investigate the conditions of labour and practices in such industry and to negotiate standard rates of wages and hours of labour. The employees and employers in attendance may formulate and agree upon a schedule of wages and hours of labour for all or any class of employees in such industry or district. If, in the opinion of the Minister a schedule of wages and hours for any industry is agreed upon in writing by a proper and sufficient representation of employees and of employers, he may approve of it, and upon his recommendation, the Lieutenant-Governor in Council, may declare such schedule to be in force "during pleasure" or for a period not exceeding twelve months stipulated in the schedule and thereupon such schedule shall be binding upon every employee and employer in such industry in the whole or any part of the province designated by the Minister, such schedule not coming into effect until ten days after publication of the Order in Council in *The Ontario Gazette*. The Minimum Wage Board has authority to enforce the provisions of the Act and of the regulations and schedules. Beginning with the July, 1935, issue of the Labour Gazette, summaries are given in this article of the schedules which have thus been approved.

Barbers, Collingwood.—An Order in Council dated September 14 and published in *The Ontario Gazette,* September 18, makes binding the terms of a schedule of wages and hours governing the barbering trade in the town of Collingwood.

Hours for employees and employers to be the hours during which barber shops are permitted to be open by municipal by-law. No work on eight specified holidays, nor after 12.30 noon on Wednesdays.

Minimum wage rates: persons employed full time on a straight salary basis, $18 per week; persons employed full time on a commission basis, $13 per week plus 70 per cent of proceeds over $19 from work of the employee; persons employed four hours or less from Monday to Fridays and all day or less on Saturday, $12.50 plus 60 per cent of proceeds in excess of $7.50 from the work of the employee; persons working on Saturdays or the day before a holiday and on previous evening only, $5 per week plus 60 per cent of the proceeds in excess of $7.50 from the work of the employee; persons working on Saturday or the day before a holiday only, $4 per day or part thereof plus 60 per cent of proceeds over $6; persons working on days other than Saturday or the day before a holiday, $2.50 per day or part thereof plus 60 per cent of the proceeds in excess of $4 from the work of the employee. A scale of minimum prices for each operation in the barbering trade is included in the schedule.

No deduction to be made from wages for materials supplied, laundry service or operating expense of any kind.

The advisory committee to be appointed under the Industrial Standards Act is authorized to exercise all the powers that may be conferred upon an advisory committee for the barbering industry.

Barbers, Guelph.—An Order in Council, dated September 14 and published in *The Ontario Gazette,* September 18, makes binding the terms of a schedule governing the barbering trade in the city of Guelph.

The schedule is similar to the one summarized above for barbers at Collingwood with these exceptions:

Minimum wages for persons employed full time on a commission basis, $15 per week plus 50 per cent of the proceeds in excess of $23 from the work of the employee; persons employed four hours per day or less from Monday to Friday inclusive and all day or less on Saturday, $7.50 per week plus 50 per cent of the proceeds in excess of $12.50 from the work of the employee; persons working on Saturdays or the day before a holiday and the previous evening only, $5 per week plus 50 per cent of the proceeds in excess of $7.50; persons employed only for Saturday or the day before a holiday, $4 per day or part thereof plus 50 per cent of the proceeds in excess of $6 from the work of the employee; persons working on days other than Saturdays or the day before a holiday $2.50 per day or part thereof plus 50 per cent of the proceeds in excess of $4 from the work of the employee.

WORKMEN'S WAGES ACT, QUEBEC

Agreements Recently Made Obligatory and Other Proceedings

AN Act respecting Workmen's Wages which which summarized in the July issue of the Labour Gazette, page 745, replaces the Collective Labour Agreements Extension Act but stipulates that the agreements and regulations made under the former Act continue in effect for the period for which they were made. Under the Workmen's Wages Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may

apply to the Lieutenant Governor in Council through the provincial Minister of Labour to have those terms of such agreement which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant Governor in Council may deem in conformity with the spirit of the Act, made obligatory on all employers and employees in the trade, industry, commerce or occupation within the district determined in the agreement. Notice of such application is published, and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable, with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date of publication of the Order in Council in the *Quebec Official Gazette*. The agreement may be amended through the same procedure. A joint committee must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and published in the *Quebec Official Gazette*, the committee is constituted a corporation. A joint committee may require certificates of competency from workers within the scope of the agreement if in towns of 5,000 or more, and such by-law must be approved by Order in Council and published in the *Quebec Official Gazette*. Proceedings under the Collective Labour Agreements Extension Act were summarized in the Labour Gazette from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act are noted in the issues beginning July 1937.

Recent proceedings under this Act include the extension by Orders in Council of agreements affecting barbers and hairdressers at Chicoutimi, Quebec and Three Rivers, shoe makers and cloak makers throughout the province and an amendment to the agreement governing building trades at Sherbrooke, all of which are summarized below. Requests for the extension of agreements affecting furniture workers throughout the province, aluminium company employees at Shawinigan Falls and Arvida and office workers and retail store employees at Jonquière and other towns were published in the *Quebec Official Gazette* September 11; for the extension of agreements affecting sand and gravel workers throughout the province, paint manufacturing workers throughout the province, drug store employees at Montreal and iron oxide miners at Red Mill in the issue of September 18; for the extension of an agreement affecting chemical employees at Shawinigan Falls in the issue of September 25, and agreements affecting printers and bookbinders at Quebec and bakers and bread deliverymen at Quebec, in the issue of October 2. A correction to the request for the extension of the agreement affecting horseshoers and wheelwrights at Victoriaville was published in the issue of October 2. Requests for amendments to the agreements affecting printing trades at Montreal and granite cutters and ornamental iron workers at Montreal were published in the issue of September 18.

An Order in Council approving the constitution and by-laws of the joint committee in the shoe manufacturing industry was published in the issue of September 18 and those of the barbering and hairdressing trades at Chicoutimi and shoe repairing at Victoriaville in the issue of October 2.

Barbers and Hairdressers, Chicoutimi and Neighbouring Towns.—An Order in Council, approved August 20 and published in the *Quebec Official Gazette*, September 4, makes obligatory the terms of an agreement between Le Syndicat Catholique National des Employés-Barbiers-Coiffeurs de Chicoutimi et de la Baie des Ha! Ha! (The National Catholic Union of Employed Barbers and Hairdressers of Chicoutimi and Ha! Ha! Bay.)

The agreement is to be in effect from September 4, 1937, to September 3, 1940.

The territorial jurisdiction includes the towns of Chicoutimi, Arvida, Bagotville, Port Alfred, Grand-Baie, Jonquière, Kénogami and Ste Anne de Chicoutimi and within a radius of two miles of them.

Hours: from 8 a.m. to 6 p.m. Monday to Thursday, 8 a.m. to 10 p.m. Friday and 8 a.m. to 11 p.m. on Saturdays and the eves of holidays with two hours off for meals.

Minimum wages: journeymen barbers $12 per week for first year and $15 for a journeyman with two years' experience or more, plus 10 per cent of the gross receipts taken in by the employee during the week; female hairdressers, a minimum of $12.50 per week. A schedule of minimum wages for barbers and hairdressers working on contract or by the job is included. Journeymen, handicapped by age or otherwise, may have their wage rates revised by the Joint Committee.

Wages for apprentices: first three months, no wage; second three months $1 per week; third three months, $2 per week; fourth three months, $3; first half of second year $4, second half $6, first half of third year $8, second half $10.

Not more than one apprentice in a shop. Apprenticeship to be for three years and to be under the control of the Joint Committee.

Shoe Workers, Province of Quebec.—An Order in Council, approved August 27 and published in the *Quebec Official Gazette*, Sep-

tember 4, makes obligatory the terms of an agreement between certain shoe manufacturers and La Fédération Nationale du Cuir et de la Chaussure du Canada, Inc. (The National Federation of Leather and Shoe Workers of Canada, Incorporated.)

The agreement applies to both male and female workers employed in the manufacture of shoes of all kinds except shoes with toe pieces entirely or partly made of rubber and manufactured by methods different to those of leather shoe manufacturing establishments.

The agreement is to be in effect from September 4, 1937, and thereafter from year to year, subject to notice by the preponderant group of employees or of employers.

The territorial jurisdiction includes the whole Province of Quebec, divided into three zones: Zone I comprises the Island of Montreal and five miles from its limits; Zone II the city of Quebec and five miles from its limits; Zone III the whole Province of Quebec with the exception of Zones I and II.

Minimum wages: a classification of operations in the industry is made which divides operations into six classes according to the skill required.

Class	Wage Rate Per Hour Zone I	Zone II	Zone III
I	.55	.52½	.48
Apprentice	.33	.31	.29
II	.45	.42½	.39
Apprentice	.26	.25	.23
III	.35	.33	.31
Apprentice	.21	.20	.18
IV	.25	.24	.22
Apprentice	.18	.17	.16
V	.18	.17	.16
VI	.13	.12½	.11½

(The classification of operations is different to that in the previous agreement in effect under Order in Council, but the minimum rate for the highest class of operators in the new agreement is 15 to 16 cents per hour higher than the highest minimum in the previous agreement, while the lowest minimum is practically the same in both agreements.)

Minimum wage rates for women or men when they take the place of women employees, on an operation not mentioned in the classified list of operations which is in the agreement (women workers were not included in the previous agreement) are as follows:—

Minimum Weekly Wage Rates

	Zone I	Zone II	Zone III	Zone IV
20% of female employees..	$ 7.00	$ 6.00	$ 6.00	$ 6.00
15% of female employees..	9.00	8.00	7.50	7.00
65% of female employees..	11.00	10.00	9.50	9.00

(The zones for women workers are evidently the zones defined in the Minimum Wage Order, in which Zone I is the Island of Montreal and within a radius of 10 miles of it, Zone II the city of Quebec and within a radius of 10 miles of it, Zone III other municipalities of a population of 3,000 or more and within a radius of 5 miles of them and Zone IV the rest of the province.)

Any contractor or subcontractor undertaking work for a manufacturer, wholesaler or retailer or any other person, directly or indirectly, is considered an employee for the purpose of this agreement. No work is to be given employees to be done at home.

The Joint Committee may permit piece work in establishments provided these rates in their opinion do not pay less than the hourly rates fixed in the agreement. The Joint Committee may also establish lower wage rates for handicapped workers.

Apprentices: the total number of apprentices in an establishment shall not exceed 10 per cent of the total number of male employees of Classes I, II, III, and IV. Apprenticeship to be six months for Classes I and II and three months for Classes III and IV.

In case of a dispute over this agreement, the Joint Committee will take the matter up and their decision will be final and binding.

Cloak Makers, Province of Quebec.—An Order in Council approved September 11 and published in the *Quebec Official Gazette*, September 18, makes obligatory the terms of an agreement between the Association of Manufacturers of Cloaks, Suits and Ladies' Garments of the City of Montreal and the International Ladies' Garment Workers' Union and the Montreal Joint Council of the Cloak, Suit and Dressmakers' Union, composed of cutters local No. 19, operators and finishers local Nos. 43 and 112 and pressers local No. 61, and such other local unions as may or will form part of this international union and this joint council.

Agreement to be in effect from September 18, 1937, with the terms retroactive to June 30, 1937, and is to remain in effect until June 30, 1940, and thereafter from year to year, subject to 90 days notice. After notice, 60 days before July 1, 1939, the wage scale may be reviewed and, if mutually agreed upon, wage rates may be raised, but not lowered.

This agreement is similar to the one previously in effect and summarized in the Labour Gazette, December, 1935, page 1156, March, 1936, page 275, April, page 371, and February, 1937, page 218, with certain changes:

The hours are unchanged at 8 per day, Monday to Friday, a 40-hour week.

The wage rates are unchanged from those in effect since January 1, 1936. Instead of showing the rates for certain female operators as a percentage of the male operators' rates, the special rates for certain female operators are added to the basic piece work wage schedule: skilled operators (male) 80 cents per hour, skilled operators (female) 64 cents per hour, section operators (male or female) 80 cents per hour, semi-skilled operators (male) 55 cents, semi-skilled operators (female) 49½ cents.

No employer to work as an operator, presser, cutter or finisher in his shop during the slack or sample season and may only work in the busy season during the regular working hours.

Overtime: no overtime permitted between March 1 and August 1, nor between October 1 and January 15, except for the production of samples and duplicates. During three months between January to April inclusive, overtime may be worked, but not in excess of 8 hours in any one week or two hours in any one day on the first four days of the week. No overtime

on Friday or Saturday. During three months between July and October inclusive, overtime may be worked, but not in excess of 4 hours in any one week or one hour on any one day on the first four days of the week, with no overtime on Friday or Saturday. During this latter busy season, fur tailors or assistant fur tailors may work 8 hours overtime per week, two hours in any day on first four days of the week. The above overtime may be worked at straight time. In case of emergency, the joint committee may permit additional overtime work, and for such additional overtime, time and one-half to be paid.

No contracting, sub-contracting or sub-manufacturing to be done inside any shop.

Except for sample workers, only one system of work to prevail in any one craft of any one factory, either piece work or week work.

Apprentice skirt makers, lining makers, finishers, button sewers, examiners and general hands, machine basters, hand basters and special machine operators shall complete their apprenticeship at the end of two years and be paid the following weekly wage rates during apprenticeship: during first six months $7, second six months $9, third six months $11, fourth six months $13.

Barbers and Hairdressers, Quebec.—An Order in Council, approved September 11 and published in the *Quebec Official Gazette,* September 18, makes obligatory the terms of an agreement between Le Syndicat des Maîtres-Barbiers et Coiffeurs de Québec, Inc. (The Union of Master Barbers and Hairdressers of Quebec, Incorporated) and L'Union Catholique des Compagnons Barbiers de Québec, Inc. (The Catholic Union of Journeymen Barbers of Quebec, Incorporated).

The agreement to be in effect from September 18, 1937, to May 1, 1940, but may be amended before that date after 60 days' notice has been given.

The territorial jurisdiction consists of four zones: Zone I the city of Quebec, Zone II the city of Levis and within 25 miles of its limits and the area 25 miles outside of the city of Quebec, Zone III the town of Thetford Mines and within 10 miles of its limits, Zone IV the town of Rivière du Loup and within 4 miles of its limits.

Hours: in the city of Quebec, 58 per week, between 8 a.m. and 7 p.m. on Monday to Friday and 8 a.m. to 10 p.m. on Saturday; in this zone a temporary or supernumerary employee must not be employed for less than three days each week except if replacing the master barber or a journeyman. In Zone II, hours 8 a.m. to 9 p.m. on first five days of the week, and 8 a.m. to 11 p.m. on Saturday and eve of holidays.

In Zone III (Thetford Mines) hours are 8 a.m. to noon on Monday, 8 a.m. to 8 p.m. Tuesday to Friday inclusive, and 8 a.m. to 11 p.m. (10 p.m. in summer) on Saturday and eve of holidays. In Zone IV, 64 hours per week, from 8 a.m. to 8 p.m. Monday to Friday, and from 8 a.m. to 11 p.m. on Saturday and the eve of holidays.

A half holiday beginning at noon for the rest of the day must be given to all employees every week.

Minimum wages: in Zones I and III, for journeymen barbers and male hairdressers, $18 per week plus 50 per cent commission on gross receipts in excess of $30; in Zone II, $15 per week plus 50 per cent commission on gross receipts over $25; in Zone IV, $12 per week plus 50 per cent commission on receipts over $22 made by the journeyman.

In shops where the wages of journeymen reach or exceed $1,500 per year, wages to be calculated as 50 per cent of gross receipts. Journeymen of such shops not earning $1,500 will be paid according to the regular method noted above.

In Zones I and III, supernumerary employees to be paid $4 per day starting 4 weeks after the approval of this agreement; in Zones II and IV, $3 per day except Saturday and eve of holiday when $4 must be paid.

Journeymen barbers to be given 60 per cent of gross receipts when these are twice the wages earned.

Wages of female employees in beauty parlours to be those provided in the Women's Minimum Wage Board regulation, subject to revision by the Fair Wage Office or by the joint committee of barbers and hairdressers.

A schedule of prices for each piece of work which must be paid journeyman when work is done on a contract or job basis is included in the agreement.

Handicapped journeymen may have their wage rates revised by the joint committee.

Apprentices: one apprentice allowed for each two journeymen, but not more than two apprentices in each establishment. Apprenticeship lasts three years for barbers and two years for male or female hairdressers.

Wages for apprentices: $3 per week plus 20 per cent of any gross receipts over $10 during first year, $5 with 50 per cent of receipts over $20 during second year, and $10 plus 50 per cent of receipts over $20 during third year.

Barbers and Hairdressers, Three Rivers.—An Order in Council, approved September 11, and published in the *Quebec Official Gazette,* September 18, makes obligatory the terms of an agreement between L'Union National Catholique des Maîtres-Barbiers et Coiffeurs des Trois Rivières (The National Catholic Union of Master Barbers and Hairdressers of Three Rivers) and L'Union National Catholique des Employés Barbiers et Coiffeurs des Trois Rivières (The National Catholic Union of Employed Barbers and Hairdressers of Three Rivers).

Agreement to be in effect from September 18, 1937, to September 17, 1940, and until a new one comes into force.

The agreement may, however, be amended by the joint committee during its term with the consent of the two parties.

The territorial jurisdiction includes the city of Three Rivers and the towns of Cap de la Madeleine, Pointe du Lac, Yamachiche and Louiseville and within a radius of ten miles of their limits and the villages and parishes of Champlain, Batiscan and Ste. Anne de la Pérade.

Hours for barbers and male and female hairdressers: to be between 8 a.m. and noon on Monday, from 8 a.m. to 8 p.m. on Tuesday to Friday inclusive, and from 8 a.m. to 11 p.m. on Saturday and eve of holidays, with two hours off for meals each working day.

Minimum wages for regular time for barbers and male hairdressers $15 per week plus 50 per

cent of all receipts exceeding $25 made by the employee, or a minimum of $18 without the percentage. Minimum wages for female hairdressers $12.50 per week.

For those who work on contract or by the job a schedule of minimum prices which must be paid is included in the agreement.

Apprentices: not more than one apprentice to each shop. Apprenticeship must include a special six months' course in hygiene.

Wages for apprentices $5 per week during second six months, $7.50 during third six months and $10 during fourth six months.

Building Trades, Sherbrooke.—An Order in Council approved September 27 and published in the *Quebec Official Gazette*, October 2, amends the previous agreement for these trades (Labour Gazette, March, 1936, page 273) as follows:

In the schedule of wages in effect in the city of Sherbrooke and other municipalities in the jurisdiction, with a population of 5,000 or more and for work in municipalities of a population of less than 5,000 on contracts of $10,000 or more, the class "metallic framing erectors" is omitted and the following classes added: structural steel workers (erectors) 65 cents, structural steel workers (helpers) 40 cents, sprinkler fitters 65 cents, erectors of weather strips (same wages as carpenters), metal lathers (same wages as carpenters), sheet metal workers (erectors) 55 cents, sheet metal workers (helpers) 35 cents, ornamental iron workers (erectors) 50 cents, ornamental iron workers (helpers) 35 cents.

Joint Committees.—The constitution and by-laws of the joint committees set up under the following agreements were approved by Orders in Council and published in the *Quebec Official Gazette* in the following issues:

Shoe Workers, Province of Quebec (September 18)

Barbers and Hairdressers, Chicoutimi (October 2)

Shoe Repairers, Victoriaville (October 2).

PRICES, RETAIL AND WHOLESALE, IN CANADA, SEPTEMBER, 1937

Cost of Living, Prices of Staple Articles and Index Numbers

In retail prices the cost per week of a family budget of staple foods, fuel and lighting and rent was slightly lower due to a decrease in the cost of foods, while the Dominion Bureau of Statistics weekly index number of wholesale prices was higher at the end of the month than at the beginning, having advanced during the last three weeks, due mainly to higher prices for grains and milled products.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of retail prices in sixty-nine cities was $8.72 at the beginning of September as compared with $8.80 for August; $8.28 for September, 1936; $7.74 for September, 1935; $6.67 for March, 1933 (the low point in recent years); and $11.64 for September, 1929. Sixteen items in the list cost more in the month under review than in the previous month, seven cost less and six were unchanged. Potatoes were substantially lower in cost and there were less important decreases in beef, flour and evaporated apples, while eggs, pork, bacon, butter cheese and bread were higher. Including the cost of fuel and rent with that of foods the total budget cost $17.41 at the beginning of September as compared with $17.48 for August; $16.84 for September, 1936; $16.16 for September, 1935; $15.41 for June, 1933 (the low point in recent years); $21.90 for September, 1929; $20.90 for September, 1922; $26.92 for July, 1920 (the post war peak); and $14.33 for September, 1914. No changes were reported in rent, and in fuel wood averaged somewhat higher.

In wholesale prices the Dominion Bureau of Statistics weekly index number was 85·2 for the week ended October 1, having advanced gradually week by week from September 10 when the index was 84·6, which was the low point in the decline in progress since the middle of July. For the week ended July 16 the figures were 87·7. The latest figures available on a monthly basis are for August when the index number was 85·6 as compared with 76·4 for September, 1936; 72·4 for September, 1935; 63·5 for February, 1933 (the low point in recent years); 97·8 for September, 1929; 94·4 for September, 1922; 164·3 for May, 1920 (the post war peak; and 67·2 for September, 1914. As in recent months, changes in the prices of grains and milled products were an important factor in the movement of the general index in September, being mainly responsible for the recent advance, while prices of raw cotton, raw wool, and non-ferrous metals were considerably lower. The index for Canadian farm products rose from 81·8 for the week ended September 3 to 88 for the week ended October 1.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of September of seventy-two staple foodstuffs groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and

every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The price of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the LABOUR GAZETTE for February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the budget serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended October 1, 1937; monthly figures not yet available.

*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

(Continued from page 1160)

electricity, the figures for the last two being weighted according to population differences in rates in the various cities being greater in these items than in the others. An index number of rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and cost of the various items from 1913 to 1926 weighted according to the importance of each item in workingmen's family expenditure and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

Retail Prices

Beef prices again averaged lower in most of the cities, sirloin steak being down in the average from 29·2 cents per pound in August to 27·9 cents in September and rib roast from 21·2 cents per pound to 20·3 cents. In January the average price of the former was 22·9 cents per pound and of the latter 17 cents per pound. Leg roast of pork averaged about one cent per pound higher in September at 24·6 cents and breakfast bacon also was higher averaging 31·9 cents per pound in September as compared with 30·7 cents in August. Prices of the latter were considerably higher in cities in the western provinces than in the eastern cities. Fresh eggs averaged 34·5 cents per dozen in September, 32·2 cents in August, 25·2 cents in June and 33·5 cents in September, 1936. Milk was unchanged at an average price of 10·7 cents per quart. Creamery butter again averaged higher at 31·4 cents per pound in September as compared with 30·8 cents in August, 28·5 cents in June (the low price to date in 1937) and 29·6 cents in September, 1936. Higher prices for bread were reported from several localities and the Dominion average was fractionally higher at

7·2 cents per pound. In canned vegetables, tomatoes were down from 13·4 cents per tin in August to 13·1 in September and peas from 12·3 cents per tin to 11·9 cents. Onions were again lower averaging 4·7 cents per pound as compared with 5·5 cents in the previous month. Potatoes were generally lower, the Dominion average being $1.11 for 90 pounds as compared with $1.54 in August. Anthracite coal was unchanged in the average.

Following are the prices reported for Welsh coal, "cobbles" and "French nut"; Halifax, $15.50; Charlottetown, $12.90; Moncton, $15.50; Saint John, $13; Quebec, $13.50; Three Rivers, $15 and $14; Sherbrooke, $14.50; St. Hyacinthe, $14.50; Montreal, $14.25 to $14.75; Hull, $15.75; Ottawa, $15.75; Kingston, $14.50; Belleville, $14.75; Peterborough, $16; Oshawa, $14.50; Toronto, $14 and $13.50; St. Catharines, $15; Hamilton, $14 and $13.50; Brantford, $16.25; Galt, $16; St. Thomas, $16; Sudbury, $16.75; Cobalt, $18; Timmins, $18; Port Arthur, $17.25; Fort William, $17.25; Winnipeg, $20.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

The accompanying tables, which appear quarterly, give the official and certain other index numbers of the cost of living, retail and wholesale prices in Great Britain and certain of the principal commercial and industrial countries. The following notes afford information as to recent changes in prices according to groups of commodities in several of these countries.

Great Britain

Wholesale Prices.—The Board of Trade index number, on the base 1930=100, was 111·4 for August as compared with 111·5 for July. Compared with a year earlier there was a rise of 17 per cent in this index. The combined food groups and the combined industrial materials and manufactures groups each declined 0·2 per cent. The greatest change in any one group was a decline of 5·9 per cent in the index for cotton.

The *Statist* index number, on the base 1867-1877=100, was 104·1 at the end of August, a decrease of 1·4 per cent for the month. There were declines in all groups, the most pronounced being in the textile group which declined 2·7 per cent; the sundries group declined 1·9 per cent; the combined foodstuffs group declined 1·1 per cent.

Cost of Living.—The Ministry of Labour's index number on the base July, 1914=100, was 155 at the first of September, this figure having shown no change for the past three months. In the food group, which was also unchanged, increases in the average prices of eggs, butter and bacon, and in some areas of milk, were offset by seasonal reductions in the price of potatoes.

France

Wholesale Prices.—The General Statistical Office index number, on the base 1914=100, was 591 for August as compared with 580 for July, an increase of 1·9 per cent for the month. The combined food groups increased 3·6 per cent while the combined industrial materials groups increased 0·5 per cent. The index in terms of gold, on the base 1914=100, was 68 for August as compared with 67 for July, an increase of 1·5 per cent.

Cost of Living.—The official index number of the expenditure of a workingman's family of four persons at Paris, on the base 1914=100, was 606 for the second quarter of 1937, an increase of 4·3 per cent over the previous quarter.

Germany

Wholesale Prices.—The index number of the Federal Statistical Office, on the base 1913=100, was 106·7 for August, an increase of 0·3 per cent for the month.

Cost of Living.—The official index number, on the base 1913-1914=100, was 126·0 for August as compared with 126·2 for July, showing a decrease of 0·2 per cent for the month. The food group declined 0·4 per cent, rent was unchanged, the heat and light group and the clothing group each increased 0·2 per cent and the sundries group increased 0·1 per cent.

United States

Wholesale Prices.—The Bureau of Labour Statistics index number, on the base 1926=100, was 87·9 for July, an increase of 0·8 per cent for the month. This figure is 9·2 per cent above the level for July, 1936. With the exception of the miscellaneous and the building materials groups, which declined slightly, all groups showed increases over the June figures. The food group increased 1·8 per cent, farm products increased 0·9 per cent, and fuel and lighting materials increased 0·8 per cent.

Dun and Bradstreet's index number (in continuation of Bradstreet's index number)

(a) Average for year. (b) First of month. (c) 15th of month. (d) End of month. (e) New series. (f) Sums total of the prices per pound of 96 articles of common consumption. (g) Until end of 1927, "Dr. Lorenz." (h) Prior to 1929, the number of commodities was 236, from January 1926 to December 1933, 502, and since January, 1934, the number is 567.

which is based on the sum total of the prices per pound of 96 articles of common use, was $11·1928 at August 1, a decrease of 0·7 per cent for the month. The most important change was a decrease of 12·4 per cent in the breadstuffs group; the miscellaneous group declined 6·6 per cent. The livestock index increased 7·3 per cent. Changes in the remaining groups were comparatively unimportant.

Dun's index number based on the cost per capita of a year's supply of commodities was $193·940 at August 1, a decrease of 4·2 per cent for the month. The breadstuffs group declined 17·9 per cent while the dairy and garden products group decreased 12·4 per cent. The meat group increased 6·5 per cent. All other changes were of a minor nature. As compared with the figure for August 1, 1936, the index showed an increase of 6·6 per cent on August 1, 1937.

COST OF LIVING.—The index number of the Bureau of Labour Statistics, on the base 1913=100, stood at 147·4 on June 15, 1937, as compared with 146·0 on March 15, 1937, and 143·0 on July 15, 1936. In the quarter ending June 15 of this year, all groups, except fuel and light which declined 3·6 per cent, showed increases as follows: rent 2·3 per cent, house furnishing goods 2·3 per cent, clothing 1·4 per cent, food 1·1 per cent, miscellaneous 0·5 per cent.

The index number of the National Industrial Conference Board, on the base 1923=100, was 89·0 for August, an increase of 0·1 per cent over the index for July which was 88·9. The food group declined 0·5 per cent, while the other groups showed increases as follows: clothing, 1·2 per cent, housing, 0·8 per cent, fuel and light, 0·4 per cent, and sundries, 0·1 per cent.

VOLUME 37] NOVEMBER, 1937 [NUMBER 11

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

INDUSTRIAL employment showed a considerable increase in Canada at October 1, according to statements received by the Dominion Bureau of Statistics from 10,398 employers, each with a minimum of fifteen employees, whose staffs aggregated 1,197,647 persons, as compared with 1,174,296 in the preceding month. Activity has shown a falling-off between September and October in six, and an advance in ten of the sixteen preceding years of the record, the change on the average being a small increase; the substantial improvement this year is therefore especially interesting. The index (based upon the average for the calendar year 1926 as 100) stood at 125·7 at October 1, 1937, compared with 123·2 at September 1, 1937, and 110·1 at October 1, 1936. At the same date in the fifteen preceding years, the index was as follows: 1935, 106·1; 1934, 100·0; 1933, 90·4; 1932, 86·7; 1931, 103·9; 1930, 116·2; 1929, 125·6; 1928, 118·8; 1927, 110·3; 1926, 106·5; 1925, 99·5; 1924, 95·0; 1923, 100·7; 1922, 95·8, and 1921, 91·3. These returns are representative of all industries except agriculture, fishing, hunting and highly specialized business.

Unemployment in Trade Unions.—At the beginning of October, 1937, reports were furnished to the Department of Labour by 1,847 local trade unions, with an aggregate of 208,833 members, 16,129 or 7·7 per cent of whom were without employment as compared with percentages of 7·6 at the beginning of September and 10·9 at the beginning of October, 1936.

Employment Office Reports.—Reports received by the Department of Labour from the offices of the Employment Service of Canada for September, 1937, showed gains over August of the same year and likewise September, 1936, in the volume of business transacted, as indicated by the average daily placements effected, logging and services showing the highest gains under the first comparison and construction and maintenance, logging and services under the second. Vacancies in September, 1937, numbered 41,549, applications, 64,763, and placements, in regular and casual employment, 38,816.

Prices.—In retail prices the cost per week of a family budget of staple foods, fuel and lighting and rent was $17.51 at the beginning of October as compared with $17.41 for September, the increase being due mainly to an advance in rent. Comparative figures for certain earlier dates are $16.87 for October, 1936; $16.42 for October, 1935; $15.41 for June, 1933 (the low point in recent years); and $21.96 for October, 1929. In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics and based upon prices in 1926 as 100 was 84·4 for the week ended October 29 as compared with 85·2 for the week ended October 1. The decrease was due mainly to lower prices for certain non-ferrous metals and farm products. On a monthly basis the index number was 85·0 for September, 1937; 77·1 for October, 1936; 73·1 for October, 1935; 63·5 for February, 1933 (the low point in recent years); and 96·8 for October, 1929.

Business Statistics.—The most recent statistics available reflecting industrial conditions in Canada are given in the table on page 1174. The Index of the physical volume of business in September was fractionally higher than in the previous month but somewhat lower than in June and July. It was, however, higher than at any time in 1936 and about three per cent above September in that year. Of the principal factors used in the construction of the index, mineral production, electric power output and exports were lower in September than in the previous month while manufacturing, construction, trade employment, car loadings and imports were higher. All of the above mentioned factors were higher in September, 1937, than in September, 1936, with the exception of manufacturing and exports which were lower. Information available for October shows wholesale prices, the number of cars of revenue freight, and contracts awarded at lower levels than in August but higher than in October, 1936, while employment, gross earnings of the Canadian National Railways and the quantity of sugar manufactured showed improvement in both comparisons.

*Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

†For the week ended October 29, 1937.

(1) Calculated from yields of Ontario bonds. (2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations. (4) Figures for end of previous month.

(5) Figures for four weeks ending October 30, 1937, and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending October 9, September 11, and August 14, 1937; October 3, September 5 and August 8, 1936. (7) MacLean's Building Review. (8) Index numbers are adjusted when necessary for seasonal variation. (9) Subject to revision.

Strikes and Lock-outs—The number of strikes and lock-outs during October was 30, involving 7,521 workers with a time loss of 55,692 man working days, as compared with 34 disputes in September, involving 7,007 workers with a time loss of 44,378 days. The most important disputes in October were those involving coal miners at Minto, N.B., and rubber factory workers at Kitchener, Ont., while there were a number of brief strikes of coal miners in Nova Scotia. In September the important strikes were those of foundry and shipyard workers at Sorel, P.Q., rubber factory workers at Kitchener, Ont., and textile workers at Louiseville, P.Q. In October, 1936, there were 19 disputes involving 2,158 workers with a time loss of 11,644 days, the important disputes including strikes of fur workers at Winnipeg, Man., coal miners at Glace Bay, N.S., and Cadomin, Alta. Of the thirty disputes recorded for October, twenty-four were recorded as terminated during the month, four resulting in favour of the employers concerned, six in favour of the workers involved, one being partially successful, while compromise settlements were reached in nine cases, the results of four were recorded as indefinite. Six disputes, involving approximately 2,000 workers were recorded as unterminated at the end of the month. These figures do not include those strikes and lock-outs in which employment conditions were no longer affected but which had not been called off or definitely declared terminated by the unions involved.

Provincial co-operation sought in establishment of unemployment insurance

Preliminary action leading to the introduction of legislation for the establishment of a federal system of unemployment insurance in Canada was taken recently by the Prime Minister Right Hon. W. L. Mackenzie King, when on November 5 he communicated with the provincial premiers requesting co-operation in this objective. In effect, the Prime Minister asked the premiers of the provinces to ascertain if their governments would be agreeable to sanction the necessary amendments to the British North America Act to permit the establishment of a national plan of unemployment insurance.

He further indicated that if there was provincial agreement in this respect, the Dominion Government was prepared to introduce legislation at the next session of Parliament.

The text of the Prime Minister's proposal is given on page 1193 of this issue.

Retraining proposals for higher age groups

The Minister of Labour, Hon. Norman McL. Rogers, at a recent press interview announced that "with the co-operation of the provinces and of industry" it was proposed to extend retraining plans to employables in the higher age groups. The scheme would probably be somewhat along the lines of the youth training program now in operation in all provinces.

The Minister indicated that registration of the employed revealed that the majority of those now in receipt of aid were unskilled. The Department, he stated, was emphasizing their retraining for re-employability through the co-operation of the provinces and industry.

"At present," he added, "there is a shortage of labour in certain trades and in certain centres. Broadly, we believe that the co-operation of industry in training, or retraining, men of middle age will make a large number employable in occupations in which work will be available."

Dominion-Provincial conference on old age pensions

At the last session of Parliament, the Minister of Finance, Hon. Charles A. Dunning, stated that he would call a conference of Dominion and Provincial officials to consider the administration of Old Age Pensions. The Conference met at Ottawa on November 2nd and after a four day session unanimous approval was given to new regulations and to amendments to existing regulations designed to meet the general objectives of the conference. These objectives were to assure that no person justly entitled to old age pension under Dominion and Provincial legislation should be deprived of any of his rights; to secure greater uniformity and efficiency in administrative policies and practices; and to eliminate abuses and unjustifiable costs. The new regulations will not be made public until they have been submitted to and approved by the respective governments.

Public works not regarded as permanent cure for unemployment

In a recent press statement the Hon. Norman McL. Rogers, Minister of Labour, reiterated the official attitude in regard to public works as a means of ending unemployment. Pointing out that this policy was not untried, Hon. Mr. Rogers, declared:

"It has been found by other countries that public works projects are no permanent and certain cure though they may be combined usefully with plans for rehabilitation which

have in view the later absorption of employables in private industry. The National Employment Commission has made definite recommendations on this point (LABOUR GAZETTE, September, page 977) and our discussions with the provinces are proceeding on the basis of those recommendations. It is also clear that in working out a program with any province, the Dominion Government is obliged to attach safeguards to its grants and provide for proper inspection of contracts and expenditures. The Dominion Government is responsible to the taxpayers for its expenditures of public money just as the Provincial Government is responsible to the taxpayers. We must both know how our money is being spent and we must see that it is spent wisely and constructively."

Statistics of Home Improvement Plan

In the November, 1936, issue of the LABOUR GAZETTE (page 988) reference was made to the establishment of the Home Improvement Plan, whereby the Dominion Government with the co-operation of the chartered banks, made loans available to Canadians for the purpose of financing home repairs and improvements.

The Plan was inaugurated in October, 1936, prior to the adoption of the Home Improvement Loans Guarantee Act, 1937, which received Royal assent on March 31, 1937 (LABOUR GAZETTE, May, 1937, page 502), the chartered banks having offered to begin making loans at that time, in order to expedite operations under the scheme and thereby relieve unemployment in the building industry during the fall and winter months. The act provides that the Governor in Council may guarantee lending institutions, approved by him for the purpose of making Home Improvement Loans, against losses which they may sustain as a result of making such loans. The liability of the Government is limited to 15 per cent of the total amount of the loans made by any such institution and may not exceed in all the sum of $7,500,000.

During the year that the Home Improvement Plan has now been in operation the National Employment Commission has carried on an informative and educational campaign, financed by public-spirited concerns and individuals for the purpose of acquainting the public with and inspiring support for the plan. Voluntary committees, provincial and local, have been established across Canada to forward the plan in their respective localities (LABOUR GAZETTE, December, 1936, page 1099).

A year having passed since the inception of this plan it is now possible to make an estimate of its value. Figures issued recently indicate decisively that the plan has been of great importance in the stimulation of the building industry which in turn has resulted in an increase in employment in the building industry, building supplies firms and manufacturing of materials, etc., as well as providing a means whereby Canadian citizens have been able to make long deferred repairs to their homes thereby improving the value and attractiveness of their property.

At the end of October, according to figures supplied by the National Employment Commission loan totals at the end of the first year amounted to 28,275 in number and $11,001,817.52 in value. Provincially, Ontario recorded the greatest number of loans both in numbers and value, 12,072 loans having been contracted, amounting to $4,702,025.54; Quebec followed with 4,328 loans valued at $2,105,293.70; British Columbia, 3,063 loans amounting in value to $1,000,417.85; Alberta, 2,226 loans valued at $736,021.60; Manitoba, 1,903 loans valued at $714,959.73; New Brunswick, 1,201 loans at $418,308.37; Saskatchewan, 789 loans amounting in value to $275,694.37; and Prince Edward Island, 356 loans totalling $97.542.73 in value.

The National Employment Commission in issuing these figures states: "It should be borne in mind that the $11,000,000 loaned does not represent the value of work done as a result of the Home Improvement Plan. In the United States it was found that at least $3 was spent on home modernization and repairs by persons who did *not* borrow to each $1 borrowed. In Canada casual enquiries indicate that, for a number of reasons, the proportion was even higher and the ratio may have been four to one. It is probably safe to assume that expenditures for modernization and repairs resulting from the Home Improvement Plan now approximate $50,000,000.

"Unfortunately it is very difficult to ascertain with any exactitude the extent to which unemployed persons have been given work by the plan. Such statistics as are available concern building and construction generally. Repairs and improvements to homes are placed in no separate category. However, it is a fact which can be proven by statistical data that the building and construction industry has shaken off the lassitude from which it suffered and is moving forward. The Dominion Bureau of Statistics reports a great increase in the value of building authorized during the first nine months of the present

year. In 58 cities of Canada during this period building permits were issued to the total value of $42,750,366, or an increase of $12,066,954 over figures for the corresponding period in 1936. The Bureau comments that this was decidedly higher than in the first nine months in any other year since 1931.

"The aggregate for the first nine months of this year was higher by 39·3 per cent than in 1936, and was also substantially higher than in any of the preceding four years, the Bureau states. The average index number of wholesale prices of building materials, though higher than in any of the years, 1930-1936, was lower than in other years since 1920.

"During the month of September of this year building authorized in the 58 cities was valued at $5,078,882, or an increase of 20 per cent over August, 1937, and of nearly 39 per cent over September, 1936....

"Revival of the building industry, of course, reflects itself in numerous other activities which, in turn, pass on the stimulus received. Not only does the expenditure of money on building mean employment for the carpenter, plumber, bricklayer and plasterer, but it necessarily involves increased activity in all those supply organizations which stand behind them. Distribution and transportation companies are called upon to participate in the general activity, and the result is improvement practically all along the line. In short, the building industry is vital. Let it stagnate and business generally suffers....

"The Home Improvement Plan starts on its second year not as an untried and experimental project, but as a proven method for helping the home-owner, the builder and the unemployed. A year of operation has demonstrated that it can assist materially in solving the grave problem of unemployment."

Maritime Conference on Industrial Relations

A conference on Industrial Relations, attended by representatives of a number of the principal industries in the Provinces of Nova Scotia and New Brunswick, was held in King's College, Dalhousie University, Halifax, on October 29 and 30. Representatives of the federal Department of Labour and of the National Employment Commission were also present on invitation. The initiative for this conference came from a group of industrialists in the Maritime Provinces.

The agenda of the conference comprised the following topics: Wages Determination; the Human Factor in Scientific Management; Recent Labour Legislation in Nova Scotia; Security against Accidents, Sickness and Unemployment; the Need for Skilled Workers; Bringing the Unemployed Back into Industry; Vocational Guidance in Great Britain; the University's Contribution to Industrial Relations.

The conference was opened by an address by Mr. J. E. Macpherson, Vice-President of the Bell Telephone Company of Canada, Montreal, who gave an address on "The Role of Industrial Relations in Modern Industry." Others participating in the Conference were: Honourable Michael Dwyer, Minister of Public Works and Mines for Nova Scotia; Professor L. Richter, Dalhousie University; Mr. F. M. Blois, Superintendent, Stanfield's Ltd.; Dr. F. H. Sexton, Principal of the Nova Scotia Technical College; Dr. F. W. Gray, Assistant General Manager of the Dominion Steel & Coal Co., Ltd.; Dr. A. Calder, President of the Medical Society of Nova Scotia; Mr. H. A. Weir of the Halifax Academy; Professor B. A. Fletcher and Professor H. L. Stewart of Dalhousie University. At a public meeting held on the evening of October 29, Mr. Tom Moore, Vice-Chairman of the National Employment Commission, gave an address on the employment situation in Canada.

It is understood that a second Maritime Conference on Industrial Relations will be convened during the coming year, with representatives in attendance from the different industries in Nova Scotia and New Brunswick.

Appointment of New Canadian Advisory Officer at Geneva

Announcement was made during the past month by the Department of External Affairs of the transfer of Dr. W. A. Riddell, Canadian Advisory Officer, League of Nations, Geneva, to the post of Counsellor at the Canadian Legation in Washington, and of his replacement at Geneva by Dr. H. Hume Wrong, who has served as Counsellor of the Canadian Legation at Washington since its establishment in 1927.

Dr. Riddell was Deputy Minister of Labour of Ontario from 1919 until 1920, when he accepted an appointment on the staff of the International Labour Office in Geneva and five years later was appointed Canadian Advisory Officer to the League of Nations and the International Labour Organization. During the twelve years which have since elapsed, he has attended the successive sessions of the Assembly of the League of Nations, and has also acted for Canada on the Council of the League and at numerous international gatherings. At the same time Dr. Riddell served continuously

on the Governing Body of the International Labour Office as Canadian Government representative and as one of the Government delegates to the seventeen sessions of the International Labour Conference which have been held since 1925, being honoured by election to the chairmanship of the Governing Body for 1935-36.

Mr. H. Hume Wrong during his ten years service in the Canadian Legation at Washington acted for a considerable period as Chargé d'Affaires. Mr. Wrong presented his credentials as Canadian Advisory Officer on October 7 to the Secretary-General of the League of Nations, and to the Acting Director of the International Labour Office on October 28.

"Peace" parleys between C.I.O. and A.F. of L.

The background and course of the dispute between the American Federation of Labor and the Committee for Industrial Organization have been outlined in previous issues of the LABOUR GAZETTE (December, 1935, page 1088; August, 1936, page 680; and December, 1936, page 1142), while a more detailed review of the situation as it developed among the contending factions is given in the 1936 Report on Labour Organization, published by the Department of Labour.

The reaction of the Trades and Labour Congress of Canada to this fratricidal strife in the trade union movement was reflected in the resolution on trade union unity adopted at the recent convention of that body held in Ottawa (LABOUR GAZETTE, October, 1937, page 1084).

Recently there has been a "peace" movement to effect a basis of common action and restore harmony. At the convention of the American Federation of Labor (a report of which is given elsewhere in this issue) the subject of trade union unity was debated at length, and a message was received from the Committee for Industrial Organization, extending an invitation for the appointment of a committee by the A.F. of L. to meet representatives of the C.I.O. in a conference.

Subsequently a conference was held in Washington early in November at which proposals and counter-proposals were put forth by the respective representatives.

It is understood that the C.I.O. representatives proposed that the unified labour movement be effected within the A.F. of L. with the industrial unions established in an autonomous department, thereby permitting continuation of the organization campaign among workers in mass production industries.

The A.F. of L. proposal for reconciliation provided for reaffiliation and restoration of full rights to its 12 suspended affiliates now in the C.I.O., immediate conferences to determine the status of new C.I.O. unions "upon terms and conditions mutually agreeable," and "an aggressive organizing campaign along both industrial and craft lines."

At the time of writing the conference had adjourned for an eight day recess, with neither offer having been accepted.

Enquiry into Working Class Family Budgets in Great Britain

The Ministry of Labour (Great Britain) is conducting an enquiry in order to obtain a representative collection of "budgets" giving particulars of the weekly expenditure of working class households.

The following paragraphs dealing with the objects and methods of the enquiry have been taken from the October issue of *The Ministry of Labour Gazette*.

Objects.—The main object of this enquiry is to provide the material required for a revision of the basis of the official statistics, generally known as the "cost-of-living index figures," showing the percentage changes from month to month in working-class costs of living. These statistics, which are widely used in the regulation of wages, were instituted in the early months of the war in order to provide, month by month, an indication of the average percentage increase in the cost of maintaining unchanged the pre-war standard of living of working-class families; and they have since been regularly compiled on the same basis, and published in the monthly issue of the *Ministry of Labour Gazette*." In view of the changes which have taken place in modes of living and habits of expenditure since 1914 it has now become desirable that the basis on which the statistics are compiled should be revised to correspond more closely with present-day standards of living. For this purpose it is necessary that information should be collected showing in what proportions working-class expenditure is now distributed over the various items included in the budgets of working-class households. Although such information has been collected in a considerable number of oversea countries during recent years, there has been no comprehensive official enquiry in Great Britain since 1918, when consumption and expenditure were greatly affected by the abnormal conditions arising out of the war; and the only previous official enquiry was made as long ago as 1904. The enquiry

which is now to be made will enable the Department to ascertain what changes are necessary, in the light of present-day conditions, in the list of items of expenditure now included within the scope of the cost-of-living statistics, and in the numerical "weights" representing the relative importance of the separate items, used in the calculation of the index figures.

The enquiry is also expected to provide information, as to the kinds and amounts of food bought by working-class households, which will be of special value to the Health Departments of the Government in the study of problems of diet and nutrition. An Advisory Committee on Nutrition which was appointed by the Minister of Health and the Secretary of State for Scotland in May, 1935, has reported that it is essential that early steps should be taken to collect more information than is at present available about the consumption of food by different sections of the population. It is hoped that the enquiry which is now being undertaken will provide information of this kind.

Methods of Enquiry.—In determining the methods by which the enquiry is to be conducted, the Minister has had the advice of an influential Committee, including representatives of the National Confederation of Employers' Organizations, the Trades Union Congress General Council, the Co-operative movement, retail traders, statisticians and the Government Departments concerned.

It would be impracticable to collect particulars of the expenditure of all working-class households throughout Great Britain. A representative selection has been taken of over 30,000 adult wage earners and small-salary earners, distributed over all districts.

The great majority of the households who are being asked for information are those of persons insured against unemployment, including manual workers generally and non-manual workers with incomes not exceeding £250 a year; the enquiry covers agricultural workers as well as workers engaged in industrial, commercial, etc., of the principal classes of manual workers, and of non-manual workers with salaries not exceeding £250 a year, who are not insured against unemployment (e.g., employees in the permanent service of railway companies, local authorities, public utility undertakings, and Government Departments.

Pensions in New Zealand

According to the thirty-ninth annual report of the Pensions Department of New Zealand, total payments for all pensions administered by that department for the fiscal year 1936-37, ending March 31, 1937, amounted to £4,940,428, there being 102,974 pensions in force, compared with payments of £3,659,664, and 84,673 pensions in the fiscal year 1935-36.

The above figures include war pensions; old-age pensions; widows, Maori War, Miners', epidemics, invalidity, and Boer War pensions, sundry pensions and annuities, pensions under the Civil Service Act, 1908, family allowances and War Veterans' Allowances.

Of the total payments for all classes of pensions during the fiscal year 1936-37, an amount of £2,413,103 was expended on 54,134 old-age pensions, and £1,483,345 on 23,711 war pensions.

Referring to legislation passed during the period reviewed the report states that the maximum old-age pension has been increased from £45 10s. to £58 10s. per annum. Receipts during any income year not exceeding £500 by way of legacy, life insurance or compensation for accidental injury or death, where such receipts are expended on a home property or for any other purpose deemed reasonable may also be exempted, the report states. Additional property exemptions include any interest in land, including any interest in any mortgage of any estate or interest in land. The general exemption for other property has also been increased from £50 to £500; and the period of residence in New Zealand to qualify for an old age pension has been reduced from twenty-five to twenty years. Provision has also been made that the deduction in respect of age from the pension of a female applicant under sixty-five years has been eliminated, and a woman of sixty years of age now receives the full pension.

Conditions of work of taxi-drivers in New Zealand

A report has been issued by the Committee appointed by the New Zealand Minister of Transport to investigate the conditions of work in the taxi and town carrier business, a review of this survey being given in a recent issue of *Industrial and Labour Information* published by the International Labour Office.

The report shows that where taxi-drivers in New Zealand are working on a commission basis receiving 25 to 33⅓ per cent of the gross takings (occasionally 50 per cent when they pay for their gasoline and oil), their earnings are very variable and usually very low. Average earnings varied from 2¾d. to 12½d. an hour in the different cities of New Zealand during the period of three months ending in September, 1936. On the other hand, their hours of work were unduly long, averaging 75, 66 and

76 hours per week in Wellington, Christchurch and Dunedin, respectively. In small places average hours ranged from 60 to 102 hours a week, and in many individual cases they reached 120 a week.

These figures include a great deal of waiting time. The report indicates that in Wellington the average driver on a commission basis covers seven miles per hour. He is actually driving and engaged on jobs for between twenty and thirty minutes for each hour he is on duty.

The investigating committee requested the interested parties in several localities to endeavour to arrive at a working agreement, in particular with regard to wages and hours of work. The report points out that having regard to the fact that the taxi is a form of public transport which operates over fairly densely trafficked roads, and that fatigue on the part of the driver is always a potential menace to the safety of the passengers carried as well as to pedestrians and other motor traffic, it is evident that the present long hours on which many taxi-drivers are on duty are inimical to the public interest. The lack of limitation on the hours of work was considered not only a real peril to the public safety, but is also an unfair cause of competition to other forms of transport which are required to observe standards which have been adopted not only for the safety and welfare of the workers engaged but also in the general interests of public safety.

The Committee recommended *inter alia,* that all taxi services be brought under the provisions of the Transport Licensing Act, and that uniformity of working conditions, wages and hours should be effected respecting all drivers of taxi-cabs on the basis of the appropriate industrial awards, such uniformity to be a condition of the licence.

Other recommendations call for the disclosure in the agreement with the taxi-driver of the real rate of interest charged under hire-purchase agreements affecting the purchase of cars used as taxis or trucks, and for the internal reorganization of the taxi business. Should this prove impossible, it is suggested that the Posts and Telegraph Department should take over the systems in the four main cities.

According to press reports from Wellington, the Minister of Transport has announced that he intends to give full effect to the recommendations of the committee.

Compulsory arbitration in collective labour disputes in France

The main provisions of legislation in France establishing compulsory arbitration and conciliation in the settlement of collective industrial disputes were outlined in the LABOUR GAZETTE for March, page 323. This arbitration machinery was instituted by an Act dated December 31, 1936, and by a Decree dated January 16, 1937. For the purpose of facilitating and expediting the process set up by the legislation an amending Decree was issued on September 18.

As previously outlined, the earlier legislation provided conciliation machinery designed to function in three stages, viz: (1) Departmental, or county, conciliation committees, comprising representatives of the local organizations of employers and employees concerned; (2) joint conciliation committees, comprising representatives of the national federations of employers and employees in the industry concerned; (3) a national inter-occupational conciliation committee, comprising representatives of the two principal national confederations of employers and employees organizations in the various industries and occupations. Failing settlement through these successive conciliation stages, arbitration was to be effected by an award of arbitrators, or, if they failed to agree, by the award of an umpire.

The Minister of Labour has issued a statement on certain new amendments designated to further expedite the above process.

The new features provided in the most recent Decree are thus summarized in the October issue of the *Ministry of Labour Gazette* (Great Britain): "For this purpose the Decree stipulates that, if the county or joint conciliation committees decide, by a majority vote, that the full process of conciliation through all its stages would serve no useful purpose, they may call upon the parties to the dispute to have direct recourse to arbitration under the established procedure. Provision is also made for the arbitration machinery to come into operation automatically, if the representatives of one of the parties to the dispute refuse to appear before any of the appropriate conciliation committees. Moreover, authority is given to the Minister of Labour to institute arbitration proceedings forthwith in any case in which one of the federations concerned, or either of the two national confederations of employers and workers, fails to comply with an instruction, by registered letter, to provide for its representation on a joint conciliation committee

or the national inter-occupational conciliation committee, as the case may be.

In order also to obviate delays in the designation of persons authorized by the federations of employers' and workers' organizations to represent them on the joint conciliation committees, the Decree provides for the preparation and submission to the Minister of Labour of standing lists of such persons. Finally, the two national confederations are required to extend the lists, submitted by them, of persons from among whom arbitrators may be appointed by the Minister of Labour. Such lists must now include 40, instead of 15, persons, of whom at least three-fourths must be, or have been, engaged in an industrial or commercial occupation."

Survey of world unemployment situation

A further decline in world unemployment is registered in the quarterly tabular statistics of employment and unemployment published by the International Labour Office in *Industrial and Labour Information* of October 4. This further decrease in unemployment compared with the corresponding period of 1936, continues the trend established in almost all countries during the last four years, which has been referred to in previous issues of the Labour Gazette (August, 1937, page 838; May, 1937, page 481, etc.).

The International Labour Office notes that "the number of workers recorded as being in industrial employment is less than it was in 1929, the last pre-depression year, in a number of countries. These are Belgium, Czechoslovakia, France, Luxemburg, the Netherlands, Poland, Switzerland and the United States of America. Canada and Italy, however, which figured in that list three months ago, now have index numbers of employment which exceeded that of 1929."

In presenting these statistics of employment and unemployment, the International Labour Office emphasizes the limitations of such figures, and states they do not afford any comparison of levels of unemployment or employment in the various countries, as methods applied in compiling such statistics differ from one country to another, and the figures only serve as an indication of the trend of employment and unemployment in the countries concerned.

Statistics based on unemployment insurance schemes indicate declines in unemployment ranging from 7·7 per cent in the Netherlands and 7·2 in Switzerland, to 1·5 in Belgium and 1·9 per cent in the United Kingdom. Other declines over the corresponding period of 1936 were: Czechoslovakia 5·1 per cent and Austraia 3·8 per cent while Denmark showed an increase in unemployment of 2·7 per cent.

Unemployment statistics obtained from returns made by trade unions indicate declines in unemployment ranging from 3·6 per cent in Canada and 3·1 per cent in Australia, to 2·4 per cent in the United States and 1·8 in Sweden.

Statistics based on social insurance schemes show improvement in indices of employment ranging from 8·6 per cent in Czechoslovakia to 4·0 in Belgium over the corresponding period in 1936. Other increases in employment indices were recorded as follows: Great Britain, 4·9; Hungary, 8·5; Latvia, 8·4; and the Netherlands, 8·2.

Returns from selected establishments again reflect the continued widespread improvement in the world employment situation. As in the last quarter, in all countries reporting, the indices of employment advanced, the advance ranging from 21·3 in Estonia to 2·6 in Denmark. The index of employment based on returns from selected establishments in Canada showed an improvement of 12·1 over the corresponding period of 1936. The improvement in other countries was registered as follows: Finland, 8·3; France, 4·7; Italy, 11·9 Japan, 11·8; Luxemburg, 8·2; Norway, 5·0; Poland, 11·2; South Africa, 7·0; Sweden, 9·5; Switzerland, 9·3; and the United States, 10·0.

Note:—*More recent and detailed statistics dealing with the employment situation in Canada are given in the article (four sections) entitled "Employment and Unemployment in Canada in September, 1937," to be found elsewhere in this issue.*

Lighting in Factories and Workshops is the title of a welfare pamphlet (No. 7) issued recently by the British Home Office.

Emphasizing the importance of lighting in factories and workshops it is stated in the pamphlet that proper lighting "has an important bearing both on the health, safety, and efficiency of the worker and on the general quality of the work."

There were 42 firms in Canada engaged wholly or chiefly in the production of printed matter by the lithographic process with a value of products of $9,517,400 in 1936, as compared with $8,835,444 in 1935, according to figures issued recently by the Dominion Bureau of Statistics. The number of persons employed was 2,547 compared with 2,444, with salaries and wages totalling $3,536,212 compared with $3,365,974. Ontario had 27 of these firms, Quebec seven, British Columbia five, Manitoba two, and Nova Scotia one.

RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

The personnel of the Board of Conciliation and Investigation established early in September to deal with a wages dispute between the Corporation of the City of Winnipeg and certain of its employees, 180 in number, being members of the Winnipeg, Pointe du Bois and Slave Falls Units of the Union of Hydro Electrical Workers, was completed on October 9 by the appointment of the Honourable E. A. McPherson, of Winnipeg, Manitoba, as third member and chairman. Mr. McPherson's appointment was made by the Minister of Labour in the absence of a joint recommendation from the other board members, Messrs. Travers Sweatman, of Winnipeg, Manitoba, and Fred Bancroft, of Oakville, Ontario, nominees of the city and employees, respectively.

A wages dispute involving the telephone employees of the City of Fort William and the electrical workers in the employ of the Public Utilities Commission of the City of Port Arthur was amicably settled during October, both the civic authorities and the employees concerned having accepted the unanimous recommendations of the Board of Conciliation and Investigation which had recently dealt with the matter. Over 50 workers, members of the International Brotherhood of Electrical Workers, were directly affected by this dispute. The text of the board's findings appeared in the September issue of the LABOUR GAZETTE, page 957.

STRIKES AND LOCKOUTS IN CANADA DURING OCTOBER, 1937

THE following table shows the number of disputes, workers involved, and time loss for October, 1937, as compared with the previous month and the same month a year ago:

Date	Number of disputes	Number of employees involved	Time loss in man working days
*October, 1937.....	30	7,521	55,692
*Sept., 1937.....	34	7,007	44,378
Sept., 1936.....	19	2,158	11,644

*Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes".

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

Although there was a reduction in the number of strikes and lockouts in October, there were increases in the figures as to numbers of workers involved and time loss incurred as a result of a strike of coal miners in eleven mines in New Brunswick and several brief strikes of coal miners in Nova Scotia involving comparatively large numbers of workers. A strike of rubber factory workers at Kitchener, Ont., caused considerable time loss. In September over one-half of the time loss was due to strikes of foundry and shipyard workers at Sorel, P.Q., rubber factory workers at Kitchener, Ont., and textile workers at Louiseville, P.Q. In October last year the time loss was due chiefly to strikes of fur factory workers at Winnipeg, Man., and coal miners at Glace Bay and River Hebert, N.S., and Cadomin, Alta.

Ten disputes, involving 2,125 workers, were carried over from September, including that of grain elevator employees at Sarnia, Ont., on September 30, which was reported to the Department too late for inclusion in the October issue of the LABOUR GAZETTE. Twenty disputes commenced during October. Of these thirty disputes, twenty-four terminated during the month, four resulting in favour of the employers concerned, six in favour of the workers involved, one being partially successful, while compromise settlements were reached in nine cases and the results of four were recorded as indefinite. At the end of October, therefore, there were six disputes recorded as strikes or lockouts, namely: rubber factory workers, Kitchener, Ont.; children's dress factory workers, Toronto, Ont.; dairy employees, Toronto, Ont.; coal miners, Minto, N.B.; bakery workers, Toronto, Ont.; cleaners and dyers, Toronto, Ont.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received, indicating that employment conditions are no longer affected but which the unions concerned have not de-

cleared terminated. Information is available as to five such disputes, namely: motion picture projectionists, Toronto, Ont., July 11, 1932, two employers; coastwise longshoremen, Vancouver, B.C., November 23, 1936, several employers; meat packing employees, Vancouver, B.C., December 29, 1936, one employer; beverage dispensers, Toronto, Ont., March 4, 1937, one employer; and custom tailors, Toronto, Ont., May 20, 1937, one employer. The dispute involving tannery workers employed by one firm in Toronto, Ont., which commenced on June 1, 1937, and was carried in the above list for some time, is recorded as lapsed by the end of October and has consequently been removed from the list.

Disputes involving men on unemployment relief work who are not paid wages but receive subsistence or allowances for which work is performed or may be required are not included in the record, no relation of employer and employee being involved.

A dispute involving golf caddies at one course in Montreal, P.Q., in July has been reported in the press only recently. A report secured by the Department was that about sixty caddies ceased work for twenty minutes, securing an adjustment in rates of pay.

A dispute involving moulders in one foundry at North Sydney, N.S., about September 10 has been reported in the press. A report secured by the Department stated that two men ceased work for half an hour until piece rates were adjusted.

A dispute involving twelve loggers at Harrison Lake, B.C., was reported on September 21 when they ceased work claiming that a caterpillar driver had been dismissed unfairly. The men secured work elsewhere and were replaced.

A dispute involving thirty-five employees in a woodworking establishment at Preston, Ont., for one day, on October 13, has been reported in the press. Reports to the Department indicate that the stoppage was due to a breakdown in the heating equipment, work being suspended until repairs were made.

A minor dispute occurred on a highway construction job near Rouyn, P.Q., on October 16 when labourers, variously reported as thirty-three and sixty-three, ceased work but were replaced immediately. It was reported that a dispute as to a foreman and as to wage rates was the cause.

A dispute involving coal miners at River Hebert, N.S., about October 21 has been reported in the press, but no particulars have been received.

A dispute involving various building trades workers at Vancouver, B.C., in the last week in October has been reported in the press, but particulars have not been received. It appears that members of the Amalgamated Building Workers of Canada picketed one construction job, claiming that they had been discharged and members of international unions engaged.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

Disputes in Progress Prior to October

Coal Miners, Midlandvale, Alta.—This dispute, commencing September 15, due to the refusal of the men to accept a change in the payment for dead work in removing "bone" (rock-like coal) from that specified in the agreement, was terminated by the closing of the mine on October 2. The employer stated that there was so much "bone" that the mine could not be operated under the terms of the agreement and the miners had stated that it should be closed if that were so. A tentative adjustment had been found unsatisfactory by the miners, earnings not being equal to the minimum wage under the agreement.

Coal Miners, Carbonvale, Alta.—The miners, who ceased work on September 18, claimed that the employer did not pay the piece rates agreed upon and refused to recognize the United Mine Workers of America. Work was resumed on October 2 when the stipulated rates were paid but union recognition was not conceded.

Rubber Factory Workers, Kitchener, Ont.—This dispute, which commenced on September 23, wage increases of twenty per cent for the lower paid classes and five per cent for the others with time and one-half rates for work beyond fifty-five hours per week, seniority rights, etc., being refused, was not terminated until early in November. Conciliation by the Ontario Department of Labour at the end of September and early in October did not result in a settlement, but on October 22 the Minister of Labour for Ontario, after meeting the strike committee, arranged a settlement with the employer which was finally accepted. It was agreed that the Ontario Industry and Labour Board would make an investigation into the industry and set rates of pay, etc. A resumption of work was delayed owing to a dispute as to discrimination against some of the strikers, the employer finally accepting the Minister's interpretation of the terms of settlement, that there would be no discrimination, and work was resumed on November 4. On October 14 strikers prevented the movement of a railway car with goods from the plant, and eighteen men and eight women were charged with obstructing police. The trial was adjourned on October 19 and again on November 2.

WOODEN BOX FACTORY WORKERS, ST. BONIFACE, MAN.—This dispute, commencing September 16, owing to alleged violation of the seniority rule when staff was reduced, was terminated on October 25 as a result of an inquiry by a Board of Conciliation appointed by the provincial government under the Strikes and Lockouts Prevention Act, 1937. The employing company agreed to resume operations at the wages and hours prior to the dispute and to select the fifty men required from among those formerly employed.

STEEL FOUNDRY AND SHIPYARD WORKERS, SOREL, P.Q.—A settlement between the National Catholic Syndicate of Steel Workers of Sorel and the employers involved terminated this dispute which began on August 4. The terms of settlement have not been published but it is understood that a compromise was reached.

BRUSH FACTORY WORKERS, GRAVENHURST, ONT.—An agreement, reached on October 13 between the Gravenhurst Workers' Building Maintenance Union, Muskoka Section, Unit No. 1 (affiliated with the Canadian Federation of Labour) and the employing company, terminated the strike which began on September 23. Conditions as to wages and working conditions had been agreed upon some time before the strike but the company had refused to sign an agreement providing for closed union shop. Conciliation by the Ontario Department of Labour early in October did not result in a settlement. The agreement finally negotiated stipulates that employees may join any union and be represented by any union or may negotiate personally with the management without discrimination, and also provides for ten hours per day, 54 hours per week with time and one-third rates of pay for overtime, seniority, certain statutory holidays, revision of piece rates, minimum rates of pay beginning at 18 cents per hour, rising to 24 cents after one year and 25 cents to 30 cents after two years, settlement of disputes with a grievance committee, dismissal to be the penalty for stoppage of work or strike by any employee. The agreement does not apply to officials, office staff or maintenance employees and is to be in effect subject to mutual consent as to changes until August 31, 1938, and thereafter subject to change.

GRAIN ELEVATOR EMPLOYEES (SHOVELLERS, ETC.), SARNIA, ONT.—Men employed to unload boats for a grain elevator refused to work on September 30 demanding increases of 15 cents per hour over existing rates, 40 cents for shovellers, 45 cents for riggers and 50 cents for trip line men, also pay for waiting time. By October 12, some employees had resumed work and the others had been replaced.

DAIRY EMPLOYEES, TORONTO, ONT.—The strike of thirty-six drivers, sixteen plant employees and three stable and garage employees of one dairy on September 17, for a closed shop agreement, was unterminated but the Ontario Minister of Labour had been attempting to bring about negotiations between dairy companies and the union since October 20 when a general strike of dairy employees was voted by the union members. It was reported that the union had agreements with five of the smaller dairies and members in several of the large companies but was not recognized by these. Six of the strikers were charged with intimidation on October 20 as a result of a clash with a driver at work, the trial being adjourned on October 27.

SCRAP METAL WORKERS, WINNIPEG, MAN.—A settlement of this dispute was reached on October 21 as a result of conciliation by the provincial Department of Labour. An application by the employer for the appointment of a Conciliation Board by the provincial government under the Strikes and Lockouts Prevention Act, 1937, had been made. A compromise was reached on wage increases and hours were reduced to 44 per week.

Disputes Commencing During October

COAL MINERS, FLORENCE, N.S.—The miners ceased work on October 4 for two days demanding increased wages (piece work) for short wall miners owing to a new condition, and negotiations following a strike on September 30 had not been successful. Work was resumed pending further negotiations.

COAL MINERS, MINTO, N.B.—Employees in nearly all of the mines around Minto, N.B., ceased work on October 13 when their demand on September 10 for negotiations with the United Mine Workers of America was not granted. (In recent years the miners have not been organized except that in 1934 the New Brunswick Miners' Union had been organized and a strike involved two mines in April, being unsuccessful.) On October 14 one operator, employing about seventy men, offered to deal with the union and work was resumed on October 18. In another mine with one hundred and ten workers a number had continued to work and on October 16 voted fifty-two to twenty-nine to continue working. The employer stated that wages should be higher but it was not possible until coal prices went up. Another mine with about forty-five men was closed indefinitely. In another mine sixteen men resumed work on October 18 and a few men were reported to be working in a few others. Maintenance work was carried on in all mines involved. The union requested the provincial government to arrange a meeting

with representatives of both parties and the government proposed that the provincial Fair Wage Board deal with the dispute, work to be resumed in the meantime. The union took this under consideration and on October 26 the Acting Minister of Labour directed the Fair Wage Board to investigate conditions at Minto, including wages, working conditions and enforcement of mine regulations. The mines were picketed by small numbers but there was no interference with any men going to work until October 29 when stones were hurled at a motor car, breaking the windows and injuring one man. The union officials stated that picketing would be stopped if not peaceful.

Bakery Workers, Toronto, Ont.—Employees in one bakery ceased work on October 9 when the employer refused to sign a new agreement with higher wages and forty-eight hours per week, stating that he had difficulty in competing with non-union firms under the previous agreement at fifty-six hours. The dismissal of union employees and replacement by non-union workers in violation of the agreement which had still a week to run was also reported. Twelve shops operated by the bakery were picketed. Negotiations for a settlement near the end of the month were unsuccessful.

Cotton Factory Workers, Cornwall, Ont.—Eleven employees, doffers, in one department ceased work on October 14 demanding hourly rates of pay instead of piece rates and the mill, with 502 workers, was shut down for two and one-half days. The stoppage was condemned by the union officials, as the whole wage scale was being dealt with by the Ontario Industry and Labour Board following the strike in August. Work was resumed on October 18 without change.

Cap Factory Workers, Montreal, P.Q.—Employees in fourteen establishments ceased work on October 25 when negotiations for an agreement with the United Hat, Cap and Millinery Workers' Union were not successful. The union proposed a ten per cent increase in wages, and the forty-hour week. As a result of negotiations an agreement was signed on October 29 providing for minimum rates from $12.50 per week to $22 for various classes of work, the forty-four hour week and five per cent increases for those already at the new minimum rates. An application to have the agreement extended to the industry under the Quebec Act Respecting Workmen's Wages, 1937, is to be made.

Photo Engravers, Winnipeg, Man.—Employees in two establishments ceased work on October 9 when negotiations for the renewal of an agreement with the International Photo Engravers' Union failed. The union proposed an increase in wages from $50 per week of forty-four hours to $55 for forty hours. As a result of negotiations a settlement was reached on October 12, the agreement providing for $52.50 and forty hours per week for six months and $55 and forty-four hours during the balance of the twelve months ending September 30, 1938.

Furniture Factory Workers, Hanover, Ont.—Employees in one establishment ceased work on October 1 to secure increased wages for some employees and for the discharge of non-union workers. As a result of conciliation by a local business man it was arranged that wages for certain employees would be increased and the two non-union men joined the union. Work was resumed on November 1.

Wood Factory Workers (Sleds, Wagons, Etc.), Preston, Ont.—A number of employees in one establishment ceased work on October 8, their demand for a twenty per cent increase in wages and reduction in hours from sixty per week to forty-nine being refused. The employees were members of the United Brotherhood of Carpenters and Joiners but union recognition does not appear to have been in dispute. As a result of conciliation by the Ontario Department of Labour a settlement was reached providing for the forty-nine hour week with time and one-quarter rates for overtime, a wage increase of eight per cent with two per cent more on November 12, a minimum scale for boys beginning at 18 cents per hour and up to 27 cents by the fourth year, recognition of shop committee of employees, and no stoppage of work until there had been conciliation by the Ontario Department of Labour. Work was resumed on October 12.

Furniture Factory Workers (Upholsterers, Etc.), Toronto, Ont.—Employees in ten establishments producing upholstered furniture, members of the Upholsterers', Furniture, Carpet, Linoleum and Awning Workers' Union (international), ceased work on October 20 to secure renewal of the union agreement with increases in wages from 55 cents per hour to 65 cents. After three days work was resumed by forty men in three shops when the demand was conceded and in the others at the beginning of the next week when the other employers also signed the agreement.

Jewelry Workers, Toronto, Ont.—Employees in twenty-three establishments ceased work on October 1 when the employers refused to renew the agreement with the International Jewelry Workers' Union with an increase in wages from 67½ cents per hour

STRIKES AND LOCK OUTS IN CANADA DURING OCTOBER, 1937*—*Continued*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(a) Strikes and Lockouts in progress prior to October, 1937				
MINING—				
Coal miners, Midlandvale, Alta.	1	150	300	Commenced Sept. 15, 1937; against change in payment for "bone"; mine closed Oct. 2, 1937; indefinite.
Coal miners, Carbondale, Alta.	1	11	11	Commenced Sept. 18, 1937; for increased wages, piece rates, and union recognition; terminated Oct. 1, 1937; rates increased but union not recognized; partially successful.
MANUFACTURING—				
Rubber Products—				
Rubber factory workers, Kitchener, Ont.	1	700	18,000	Commenced Sept. 23, 1937; for increased wages, overtime rates after ten hours, etc.; unterminated.
Textiles, Clothing, etc.—				
Dress factory workers (children's), Toronto, Ont.	1	5	100	Alleged lock-out of union workers, commenced Aug. 2, 1937; unterminated.
Miscellaneous Wood Products—				
Wooden box factory workers, Winnipeg, Man.	1	80	1,680	Commenced Sept. 16, 1937; alleged violation of seniority rule; terminated Oct. 25, 1937; conciliation (provincial); compromise.
Metal Products—				
Steel foundry and shipyard workers, Sorel, P.Q.	5	900	1,800	Commenced Aug. 4, 1937; dissatisfaction with wage rates reached in settlement of strike on June 3; terminated Oct. 2, 1937; negotiations; compromise.
Miscellaneous—				
Brush factory workers, Gravenhurst, Ont.	1	148	1,628	Commenced Sept. 23, 1937; for closed shop agreement; terminated Oct. 13, 1937; negotiations; compromise.
TRANSPORTATION—				
Water—				
Grain elevator employees (shovellers), Sarnia, Ont.	1	36	72	Commenced Sept. 30, 1937; for increased wages and payment for waiting time; terminated Oct. 12, 1937; replacement; in favour of employer.
TRADE—				
Dairy employees, Toronto, Ont.	1	55	1,430	Commenced Sept. 17, 1937; for closed union shop agreement; unterminated.
Scrap metal workers, Winnipeg, Man.	1	40	720	Commenced Sept. 29, 1937; for increased wages, reduced hours and recognition of union; terminated Oct. 21, 1937; conciliation (provincial); compromise.
(b) Strikes and Lockouts commencing during October, 1937				
MINING—				
Coal miners, Florence, N.S.	1	600	1,200	Commenced Oct. 4; for increase in wages; terminated Oct. 5; return of workers pending investigation; indefinite.
Coal miners, Sydney Mines, N.S.	1	1,000	2,000	Commenced Oct. 4; in sympathy with strike of miners at Florence, N.S., Oct. 4; terminated Oct. 5; return of workers pending investigation; indefinite.
Coal miners, Minto, N.B...	11	1,200	19,000	Commenced Oct. 13; for recognition of union; unterminated.
Coal miners, New Waterford, N.S.	1	280†	560	Commenced Oct. 14; for change in longwall faces; terminated Oct. 15; negotiations; in favour of workers.
Coal miners, New Waterford, N.S.	1	1,300	1,300	Commenced Oct. 15; sympathy with miners on strike on Oct. 14; terminated Oct. 15; return of workers; in favour of workers.

STRIKES AND LOCK OUTS IN CANADA DURING OCTOBER, 1937*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(b) Strikes and Lockouts commencing during October, 1937—Concluded				
MANUFACTURING—				
Vegetable Foods—				
Bakery workers, Toronto, Ont.	1	20	380	Commenced Oct. 9; against discharge of union workers and for increased wages, reduced hours in new agreement; unterminated.
Textiles, Clothing, etc.—				
Cotton factory workers, Cornwall, Ont.	1	11**	27	Commenced Oct. 14; for change from piece work basis of wage payment to hourly rates; terminated Oct. 16; negotiations; in favour of employer.
Cap factory workers, Montreal, P.Q.	14	220	1,000	Commenced Oct. 25; for union agreement providing for increased wages and reduced hours; terminated Oct. 29; negotiations; compromise.
Printing and Publishing—				
Photo engravers, Winnipeg, Man.	2	25	75	Commenced Oct. 9; for renewal of union agreement with increased wages and reduced hours; terminated Oct. 12; negotiations compromise.
Miscellaneous Wood Products—				
Furniture factory workers, Hanover, Ont.	1	75	1,950	Commenced Oct. 1; for increased wages and discharge of non-union workers; terminated Oct. 30; conciliation (local); (wages increased and men joined union); in favour of workers.
Wood factory workers (sleds, wagons, etc.), Preston, Ont.	1	70	175	Commenced Oct. 8; for increased wages and reduced hours; terminated Oct. 12; conciliation (provincial); compromise.
Furniture factory workers (upholsterers), Toronto, Ont.	10	125	500	Commenced Oct. 20; for renewal of agreement with increased wages; terminated Oct. 23; negotiations; in favour of workers.
Miscellaneous—				
Jewelry workers, Toronto, Ont.	23	225	1,200	Commenced Oct. 1, for renewal of agreement providing for increased wages; terminated Oct. 8; negotiations; in favour of workers.
CONSTRUCTION—				
Buildings and Structures—				
Building trades workers, Toronto, Ont.	1	25	25	Commenced Oct. 1; for employment of union members only; terminated Oct. 1; replacement; in favour of employer.
Highway—	1	26	52	Commenced Oct. 18; for increased contract
Truck drivers, Moobeam, Ont.				rates; terminated Oct. 19; negotiations; compromise.
TRANSPORTATION—				
Water—				
Stevedores, Thorold, Ont.	1	12	12	Commenced Oct. 21; for increased wages; terminated Oct. 22; replacement and return of workers; in favour of employer.
SERVICE—				
Business and Personal—				
Cleaners and dyers, Toronto, Ont.	1	10	120	Commenced Oct. 18; for continuation of expired union agreement; unterminated.
Hotel employees, Toronto, Ont.	1	20	160	Commenced Oct. 22; for increased wages, reduced hours and improved conditions; terminated Oct. 30; negotiations; compromise.
Recreational—				
Motion picture projectionists, British Columbia.	.....	108	200	Commenced Oct. 5; for renewal of agreement for two workers on each shift and with increased wages; terminated Oct. 7; conciliation (provincial); in favour of workers.
Motion picture projectionists, Winnipeg, Man.	3	44	15	Commenced Oct. 6; *re* dismissal of union employees; terminated Oct. 6; return of workers pending negotiations; indefinite.

* In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.
†900 indirectly involved.
**500 indirectly involved.

to 75 cents, the forty-four hour week to be continued. The employers offered an increase of two and one-half cents per hour. On the eve of the strike one large firm met the union demands and was not involved. Two firms signed with the union after two days and others later so that only one hundred and fifty were on strike by October 6. On October 8 the others finally agreed to the increase after an offer of five cents per hour was refused.

BUILDING TRADES, TORONTO, ONT.—Employees in several of the trades on one contract ceased work on October 1 in protest against the employment of non-union plasterers but were replaced by non-union men. It was reported that union wages and hours were being observed by the sub-contractor.

CLEANERS, DYERS, ETC., TORONTO, ONT.—Employees in one establishment ceased work on October 18 when negotiations during a month did not result in an agreement with the Cleaners' and Dyers' Federal Union, affiliated with the Trades and Labour Congress of Canada. The previous management had an agreement which expired on May 31, 1937. At the end of the month negotiations between the union and the management were reported. Early in November an agreement was reached.

HOTEL EMPLOYEES, TORONTO, ONT.—A number of the kitchen staff and waiters, members of the Hotel and Restaurant Employees' International Union, ceased work in one hotel on October 22 demanding increases in wages, reduced hours, etc. On October 30 a settlement was reported, with a compromise on wages and hours.

MOTION PICTURE PROJECTIONISTS, BRITISH COLUMBIA.—Employees in thirty-seven motion picture theatres in various localities throughout the province ceased work on October 5 and October 6, negotiations for the renewal of agreements having failed. While an increase in wages was sought, the dispute was chiefly as to the continuation of the provision for two men per shift. The provincial regulations had been amended to require only one projectionist after January 1, 1938, this date being changed later to January 1, 1939. The union demanded that the employers agree to employ two projectionists during the period of the new agreement, two years in some cases and three years in others. This was finally agreed to and wage increases of five per cent during the first year and another five per cent during the second year were conceded by the operators of the principal theatres, while for some of the others, signing three-year agreements, the increase was spread over the three years. In some cases the increases were reported to be greater. Work was resumed in some theatres at 1 p.m. and in others at 7 p.m. on October 7. The provincial Minister of Labour and departmental officials conciliated in the dispute.

MOTION PICTURE PROJECTIONISTS, WINNIPEG, MAN.—Employees in three motion picture theatres ceased work on October 6 for a few hours against the dismissal in another theatre of five employees members of the international union, members of a Canadian union being engaged. Work was resumed pending further negotiations. It was reported that the men dismissed were to be paid pending the negotiations.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

The latest available information as to strikes and lock-outs in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the March issue, in the review of Strikes and Lock-outs in Canada and Other Countries, 1936. The latter included a table summarizing the principal statistics as to strikes and lock-outs since 1919 in the several countries for which such figures were available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the figures are not for relatively recent dates. Statistics given in the annual review and in this monthly article are taken as far as possible from the government publications of the various countries concerned, while information as to particular disputes is obtained for the most part from newspaper reports.

Great Britain

The number of disputes beginning in September was 103 and 24 were still in progress from the previous month, making a total of 127 in progress during the period, involving about 59,000 workers, with a resultant time loss of 228,000 man-working days.

Of the 103 disputes beginning in September, 38 arose out of demands for increases in wages and 20 were over other wage questions; 3 were over questions regarding working hours, 21 over questions regarding the employment of particular classes or persons, 4 on other questions respecting working arrangements and 16 on questions of trade union principle. One stoppage of work was sympathetic action in support of workers involved in another dispute.

During September, final settlements were reached in 86 disputes of which 15 were settled in favour of the workers, 48 in favour of the employers and 23 as the result of compromises. In the case of 16 other disputes, work was resumed pending negotiations.

During the months of September and October there were several strikes of apprentices in the engineering industries. On September 6, apprentices engineers (machinists) in various districts in Lancashire, Cheshire and Yorkshire, ceased work, demanding increases in wages of 3 shillings per week and recognition of trade union representation as a basis for future negotiations. Only a few firms were involved at the beginning of the strike and the majority of the apprentices did not cease work until the second or third week of the dispute, by which time there were about 14,000 apprentices on strike. On September 25 work was resumed, pending negotiations, on terms existing prior to the strike.

On September 27 about 1,000 apprentice engineers, with demands similar to those made by the apprentices in the strike mentioned above, ceased work at Coventry.

Press reports state that delegates representing about 84,000 engineering apprentices throughout England and Scotland are negotiating with the National Employers' Federation in an endeavour to obtain the right to negotiate for the apprentices.

On October 3, 6,000 textile workers at Coventry ceased work, demanding restoration of wage cuts made in 1931. They resumed work on October 10, pending negotiations.

Newfoundland

On or about October 21 about 500 loggers in the Baie Verte district of Newfoundland ceased work, demanding an increase of 50 cents per cord for cutting pulpwood. The men's demands were met by their employers on October 27. According to press reports the strikers, angered by delays in reaching a settlement, took possession of the boat on which negotiations were being held until a settlement was reached. Work was resumed on October 28.

United States

Preliminary estimates of strikes in August, 1937, which, as the Bureau of Labour Statistics points out, are based on "scattered information from newspapers and other sources, and are subject to revision as more definite reports are received," show 425 strikes as beginning during the month, which with 300 unterminated at the end of July made a total of 725 in progress during the period. The number of workers involved in these disputes was 290,000 and the resultant time loss 2,160,000 man working days. The increase in the number of workers involved in strikes beginning during August as compared to those beginning in July was 20 per cent, due largely to a strike of silk and rayon workers. There were fewer workers involved in all strikes in progress during August, and the time loss was about 25 per cent less than in the preceding month.

As compared with the same month a year ago, the August figures show increases of 86 per cent in the number of strikes occurring during the month, 162 per cent in the number of workers involved, and 137 per cent in time loss.

Hon. Gordon D. Conant, Attorney General for Ontario, announced recently that the Workmen's Compensation Board has been transferred from the Department of the Attorney General to the Provincial Department of Labour.

In making this announcement the Attorney General said: "The Workmen's Compensation Board has for the past 14 years been under the jurisdiction of the Attorney General's Department, but now that the Department of Labour has been created with a full-time minister, and since the administration of the Board deals primarily with labour matters and the welfare of labour generally, it is felt by the Government that more effective administration of the Board can be accomplished by its transfer."

Employment and Wages on Railways in Great Britain

The annual return prepared by the Ministry of Transport relating to numbers employed and wages in the railway service in Great Britain has recently been published. According to a summary of this report in the October issue of the *Ministry of Labour Gazette* the total number of persons employed by the railway companies as at March 13, 1937, was 599,652 as compared with 585,611 on March 7, 1936. Of the total number employed in March, 1937, there were 537,647 adult males, 37,392 junior males, 22,455 adult female, and 2,158 junior females.

The total salaries and wages paid in 1936 amounted to £104,012,591 compared with £101,295,242 in 1935.

ANNUAL REPORT OF THE DOMINION DEPARTMENT OF LABOUR

Administrative Activities during the Fiscal Year ending March 31, 1937

THE work of the Dominion Department of Labour during the fiscal year 1936-37 is reviewed in the annual report of the Deputy Minister, Mr. W. M. Dickson. Chapters of the report are devoted to the activities of the department in connection with the administration of legislation under the authority of the Minister of Labour during the period under review, as follows: Labour Department Act; Conciliation and Labour Act; Fair Wages Policy of the Government of Canada (as set forth in Orders in Council passed in 1922, 1924 and 1934 and in The Fair Wages and Hours of Labour Act, 1935); Industrial Disputes Investigation Act; Government Annuities Act; Employment Offices Co-ordination Act; Technical Education Act; The Unemployment Relief and Assistance Act, 1936; and The National Employment Commission Act, 1936. The final chapter of the report describes the department's performance during 1936-37 of its duties arising out of Canada's relations with the International Labour Organization (League of Nations).

Labour Statistics

In the introduction to his report the Deputy Minister presents a statistical summary of changes during the fiscal year in employment and unemployment, wages, the cost of living, and the number and importance of industrial disputes. A similar summary with regard to labour organization in Canada is found in the body of the report.

An analysis of statistics compiled by the Department of Labour and the Dominion Bureau of Statistics reveals appreciable improvement in employment conditions in Canada during the period under review. The Bureau's index of industrial employment (based on the average employment for the calendar year 1926 as 100) rose from 98·9 in March, 1936, to 102·8 in March, 1937, a net increase of four per cent. The percentage of unemployment among trade unionists, as calculated by the department, fell from 14·5 in March, 1936, to 12·9 in March, 1937, a net decrease of eleven per cent.

Wages continued their upward movement of the previous year, the increases being greatest in logging and saw milling, nine per cent, and in automobile manufacturing, eight per cent. Increases were slight in the building, metal and printing trades, and averaged only two per cent in the factory trades. Wage rates were unchanged in steam railways and coal mining until early in 1937, when revisions of agreements between employers and workers provided for increases.

As in the two preceding years, the cost of living showed a slight rise, the average increase between March, 1936, and March, 1937, being about 2·5 per cent. Retail food prices advanced only 4·5 per cent, as compared with about ten per cent in the two previous years. Fuel prices were slightly lower, while house rentals and clothing prices increased by about two per cent. The department's index number of changes in the cost of living, based on 1913 prices as 100, was 129 for March, 1937, as compared with 126 for March, 1936, and 160 for December, 1929.

Strikes and lock-outs were more numerous than in the previous year and involved a slightly greater number of workers, but caused somewhat less time loss. During the calendar year 1936 there were 156 industrial disputes, involving 34,812 workers, with time loss of 276,997 man-working days. There was a pronounced increase in the number of disputes as to union membership and recognition and other union questions.

Trade union membership in Canada showed a marked increase, the total at the end of the calendar year 1936 being 322,473, comprised in 2,886 local branch unions, as compared with a total membership in the preceding year of 280,704, comprised in 2,728 local unions. International organizations had 1,896 branches in the Dominion, with a combined membership of 174,769. Unions operating only in Canada had 990 locals, with a combined membership of 147,704.

Conciliation and Arbitration

The chapters in the report devoted to the administration of the Conciliation and Labour Act and the Industrial Disputes Investigation Act give details of the conciliation and arbitration services performed by the department during the year.

The more important cases in connection with which the departmental conciliation officers mediated at the request of one or both parties to the dispute during the period under review, classified according to industry, were as follows: coal mining, nine; manufacturing, eighteen; construction, three; transportation and public utilities, fifteen; and service, five.

Twenty-one applications for the establishment of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received in the department during the fiscal year 1936-37.

Twelve boards were established, and unanimous conclusions were received from seven of the nine boards which reported during the period. In no case were the findings of a board followed by an interruption of work.

Fair Wages Policy

During the fiscal year under review the department prepared fair wages conditions for insertion in 512 building and construction contracts proposed to be executed by departments of the Government as follows: Agriculture, 1; Government Contracts Supervision Committee, 39; Fisheries, 3; Mines and Resources, 7; National Defence, 156; National Harbours Board, 11; Public Works, 240; Royal Canadian Mounted Police, 1; and Transport, 54. Of these contracts, 317 had been awarded up to the close of the fiscal year, involving an approximate expenditure of $9,533,780. In numerous cases departmental fair wages officers investigated complaints regarding non-observance of the labour conditions in these contracts and adjustments were effected when necessary.

Canadian Government Annuities

Attention is drawn by the Deputy Minister to the continuation during the fiscal year of the rapid increase during recent years of the number of purchasers of Canadian Government Annuities. Both the number of contracts issued during 1936-37 (7,806) and the amount of purchase money received in the same period ($23,614,823.95) were greater than in any other year since the inception of the Government Annuities system. Between September 1, 1908, and March 31, 1937, a total of 36,889 annuity contracts had been issued, and on the latter date 33,685 were still in force. The total amount of purchase money received during the same period was $101,558,694.95.

Employment Service of Canada

During the period under review the department continued to co-operate with the provinces in maintaining the Employment Service of Canada. The statutory grant of $150,000 was again distributed amongst the provinces in proportion to their expenditures on public employment office administration and operation. The total number of placements effected by the service during 1936-37 was 332,195, as compared with 351,886 in the preceding year.

Unemployment Relief

The report points out that, according to figures reported by the provinces and by federal departments, the number of persons afforded relief throughout the Dominion during the fiscal year ending March 31, 1937, was somewhat less on the average than in 1935-36, although seasonal fluctuation was not so great. The lowest number of relief recipients in Canada during the fiscal year was reported for the month of September, 1936, when the total stood at 1,030,804, and the high point was reached in the month of March, 1937, when the total was 1,292,420. Comparable figures for the preceding year show that the low point during that period was reached in the month of September, 1935, with a total of 965,286, and the high point in the month of March, 1936, with a total of 1,472,714.

During the year the Dominion Government continued its policy of supporting and supplementing the relief measures of the provinces and of granting them financial assistance in this connection where necessary. For the twelve months of the fiscal year 1936-37 the total Dominion contribution to the nine provinces by way of monthly grants-in-aid for relief purposes was approximately $29,000,000. In addition, agreements were entered into with each of the provinces providing for Dominion contribution of 50 per cent of the cost of certain relief works projects to be undertaken by the provinces.

Agreements were also made with the three Prairie Provinces providing for Dominion contribution of 100 per cent of the cost, exclusive of administration expenses, of direct relief distributed in the drought areas of those provinces during the period September 1, 1936, to March 31, 1937.

The Government's decision to close the relief camps which had been operated by the Department of National Defence by July 1, 1936, was implemented, the men from the camps being offered summer work on special railway extra gangs and those who so desired given transportation to farm employment.

In order to provide the opportunity of employment to unemployed single homeless adults during the winter of 1936-37 the Government, with the recommendation of the National Employment Commission, executed agreements with the provinces providing for the sharing on a fifty-fifty basis of the cost of placing physically fit single homeless adults at work during the winter months on farms, mine and forest trails, tourist roads, forest protection and development, drainage, and river diversion. By the end of the fiscal year more than 50,000 unemployed persons, of whom over 8,000 were single homeless women, had been placed under these schemes.

Other recommendations of the National Employment Commission, which functioned as an advisory body to the Minister of Labour, on which the Government took action during the fiscal period under review were as follows:

for a national registration and classification of the unemployed on relief as of September, 1936; for training schemes to increase the employability of unemployed young people (to be put into effect in 1937-38); for the carrying out of a nation-wide home improvement plan (this plan was administered by the Department of Finance); and for an audit in the field by the Dominion of all provincial expenditures in connection with the Dominion grants-in-aid for relief purposes.

International Labour Organization

The Deputy Minister reports that Canada was represented at all sessions of the International Labour Conference during the fiscal year 1936-37. Among the items on the agenda of the twentieth session, held at Geneva, Switzerland, in June, 1936, were recruitment, holidays with pay, reduction of hours of work in public works and certain industries, and safety provisions for workers in building construction. The twenty-first and twenty-second sessions, held at Geneva in October, 1936, dealt exclusively with maritime matters.

Increase in Membership of British Trade Unions

Statistics of trade union membership in Great Britain as given in the October issue of the *Ministry of Labour Gazette* indicate a substantial increase during 1936. These statistics relate to all organizations of employees—including those of salaried and professional workers as well as those of manual wage earners—which are known to include among their functions that of negotiating with employers with the object of regulating the conditions of employment of their members.

On the above basis, the total number of unions known to have been in existence at the end of 1936 was 1,041, as compared with 1,054 at the end of 1935. Seventeen small unions, with a total membership of 1,627 at the end of 1935, were reported as having been dissolved in 1936; while 12 unions, with an aggregate membership of 85,000 at the end of 1935, ceased to exist in consequence of amalgamations with other unions.

At the end of 1936 the total membership of all unions included in the statistics was approximately 5,308,000, as compared with 4,868,000 at the end of 1935, making an increase of 440,000, equivalent to 9·0 per cent, on the 1935 total. The number of males was 4,506,000, an increase of over 400,000, or 9·8 per cent, as compared with the previous year; and the number of females was 802,000, an increase of nearly 39,000, or 5·1 per cent.

As pointed out in the *Ministry of Labour Gazette,* many unions are represented in more than one industry, but for the purpose of these statistics the total membership of each union has been included in the group with which the majority of its members are believed to be connected. The group with the largest membership, viz., 975,000, is that for "other transport (road, dock, etc.) and general labour," and of this membership 928,000 is accounted for by two unions, the Transport and General Workers' Union and the National Union of General and Municipal Workers; these unions are represented, to a greater or lesser extent, in most industries, but the figures for the other industrial groups are necessarily exclusive of the memberships of these two unions.

Apart from the above-mentioned group, the mining and quarrying and the metal, engineering and shipbuilding groups each totalled nearly 700,000; while the national and local government group accounted for over 500,000, and the textile and railway groups each had between 400,000 and 500,000 members.

Of the total female membership, over 70 per cent was comprised within the textile, clothing, teaching, and national and local government groups.

The results of the Census for Seamen (Great Britain) for June 15, 1936, recently published, indicates that the number in employment on that date on seagoing vessels other than yachts totalled 149,041, as compared with 169,211 in 1931, and 152,793 in 1935.

The number employed on fishing vessels on the censal date in 1936 was 23,720 as compared with 21,293 on April 26, 1931. There are no corresponding figures for intermediate years as the crews of fishing vessels are enumerated only at quinquennial censuses.

The British Ministry of Labour has issued a bulletin No. 24 in its *Choice of Career Series* entitled "Transport." The pamphlet is one of a series compiled for the purpose of affording "useful and authoritative information to secondary school pupils, their parents, teachers and all who are concerned in advising them on the choice of a suitable career."

The scope of the pamphlet on transport includes services for carrying passengers or merchandise, or both, by road, rail or air, and refers to recent developments in the transport industry, the standard of school education required, professional training after entry, etc.

UNEMPLOYMENT INSURANCE PROPOSAL OF DOMINION GOVERNMENT

Prime Minister Communicates with Provincial Premiers Requesting Co-operation in Securing Necessary Amendments to B.N.A. Act

ESTABLISHMENT of a federal system of unemployment insurance with the co-operation of the provinces, was envisaged in an announcement by the Prime Minister, Rt. Hon. W. L. Mackenzie King, on November 9. The Prime Minister disclosed that under date of November 5, he had communicated with the premiers of the respective provinces requesting them to inquire if their governments would agree to sanction an amendment to the British North America Act which would enable the Dominion Parliament to enact legislation providing for a national unemployment insurance, coupled with the establishing of public employment offices.

In his communication, the Prime Minister referred to the "negative opinion" of the Judicial Committee of the Privy Council upon the constitutional validity of the Employment and Social Insurance Act, 1935 (The Judicial determination of this social insurance legislation by the Supreme Court of Canada was reviewed in the Labour Gazette for July, 1936, page 588, while the text of the decision of the Privy Council was given in the issue of February, 1937, commencing on page 245).

The Prime Minister also pointed out that the subject had been given close attention by the officials of the Dominion Government, and that the federal authorities have had the benefit of the advice and counsel of an expert of the International Labour Office who had specialized in existing systems of unemployment insurance.

Following the Prime Minister's announcement, the Minister of Labour, Hon. Norman McL. Rogers, in a press interview on the government's plans for the retraining of employables, stated that Mr. D. C. Tait, British insurance expert attached to the International Labour Office, had been loaned to Canada to assist in devising insurance legislation.

The Minister of Labour also intimated that the principle to be followed in unemployment insurance would be on a contributory basis by the Dominion, the employer and the employee.

The Prime Minister's letter to the provincial premiers was as follows:

"Ottawa, November 5, 1937.

"My Dear Premier:

"My colleagues and I are convinced that a national system of unemployment insurance would contribute materially to individual security and industrial stability throughout Canada, and would assist in mitigating the distress incident to any recurrence of widespread unemployment.

"A strong recommendation with respect to national control of employment offices, based upon a full investigation of the unemployment situation throughout the Dominion, has been submitted to the Government by the National Employment Commission. We share the opinion that a national employment service within Federal jurisdiction is a necessary complement of any plan of national unemployment insurance.

"We believe it is most desirable that legislation establishing a national system of unemployment insurance and of public employment offices should be enacted. Should it be possible to obtain the co-operation of the governments of the several provinces toward this end, we are prepared, at the next session of Parliament, to introduce the necessary measures.

"You will recall that on January the 28th of this year, the Judicial Committee of the Privy Council gave a negative opinion upon a reference as to whether the Parliament of Canada had jurisdiction to enact the Employment and Social Insurance Act, 1935. Close attention has since been given by officials of the Dominion Government to the resulting situation. We have also had the benefit of the counsel and advice of a member of the staff of the International Labour Office, who is familiar with existing systems of unemployment insurance, and who has been placed at the disposal of the Government for purposes of consultation by the International Labour Office.

"It appears to be the general consensus of view that unemployment insurance, if it is to be effectively carried out, should be national in scope. In view, however, of the limited jurisdiction of the Parliament of Canada, an amendment to the Constitution would seem to be a necessary preliminary to the establishment of a national system.

"In these circumstances, I am writing to the premiers of the several provinces to inquire whether their governments would be agreeable to an amendment being made to the British North America Act empowering the federal Parliament to enact unemployment insurance legislation. I should be obliged if, at your early convenience, you would kindly advise me of the views of the government of (name of province)."

Yours sincerely,
W. L. Mackenzie King.

OLD AGE PENSIONS IN CANADA

Financial and Statistical Summary of Old Age Pensions as at September 30, 1937

The accompanying table gives particulars of operations under the Old Age Pensions Act (Revised Statutes of Canada, 1927, Chapter 156; as amended by Statutes of 1931, Chapter 42), and under the various provincial concurrent acts, as at September 30, 1937. (The text of the Old Age Pensions Act was given in the LABOUR GAZETTE for April, 1927, page 375).

The Act made provision for the establishment of a Dominion-provincial pension system to be effective in such provinces as might enact and give effect to special legislation for this purpose. With the recent entry of New Brunswick and Quebec into the system, all the provinces are now participating and the scheme is completely national in scope.

Under the Old Age Pensions Act a pension is payable to any British subject of 70 years and upwards who is not in receipt of an income of as much as $365 a year and who has resided in Canada for the 20 years preceding, and has also resided in the province in which the application is made for the five years immediately preceding the granting of the pension. The maximum amount of pension payable under the Act is $240 yearly. In cases where pensioners have a private income the amount of their old age pension is subject to a reduction by the amount, if any, that their private income exceeds $125 a year.

Under the provisions of the Act as it was first passed the Department of Labour of Canada (then the administrating Department) paid quarterly to each province one-half of the total amount of the pensions paid by the provincial pension authority during the preceding three months. At the 1931 session of the Dominion Parliament, however, the Act was amended, the amount of the Dominion contribution being increased from fifty to seventy-five per cent of the total expenditure.

In order to avoid duplication of departmental activities and to secure centralization of responsibility in carrying out the provisions of the Act, which involves accounting control and supervision, the administration of the Old Age Pensions Act was by Order in Council dated March 1, 1935, transferred to the Department of Finance from April 1, 1935.

A summary of the recent Dominion-Provincial Conference on Old Age Pensions appears elsewhere in this issue.

The following table has been prepared in the Department of Finance.

OLD AGE PENSIONS—FINANCIAL AND STATISTICAL SUMMARY OF OLD AGE PENSIONS IN CANADA AS AT SEPTEMBER 30,1937

—	Alberta Act effective Aug. 1, 1929	British Columbia Act effective Sept. 1, 1927	Manitoba, Act effective Sept. 1, 1928	New Brunswick Act effective July 1, 1936	Nova Scotia, Act effective Mar. 1, 1934	Ontario Act effective Nov. 1, 1929
Total number of pensioners	9,564	11,298	11,843	10,717	13,779	56,877
Average monthly pension	18·27	19·20	18·68	13·50	14·63	18·31
*Percentage of pensioners to total population	1·24	1·51	1·67	2·46	2·57	1·54
*Percentage of persons over 70 years of age to total population	2·33	3·60	3·09	4·14	5·03	4·39
*Percentage of pensioners to population over 70 years of age	53·13	41·84	53·83	59·54	51·03	35·11
Dominion Government contributions for quarter ending Sept. 30, 1937 $	387,248 82	487,685 63	503,183 24	328,722 39	461,117 93	2,319,095 53

*Percentages based on estimated population as at June 1, 1936—Dominion Bureau of Statistics.

(1) Includes payments from August 1, 1936, for additional pensions granted during quarter.

YOUTH TRAINING PROGRAMS IN PRINCE EDWARD ISLAND, QUEBEC AND NEW BRUNSWICK

Projects provided in Recent Dominion-Provincial Agreements

DURING the past month, youth training agreements have been negotiated between the Dominion Government and the Provincial Governments of Prince Edward Island, Quebec and New Brunswick. All the provinces are now operating under agreements in accordance with the appropriation of $1,000,000 voted for this purpose by the Dominion Parliament at its last session (Labour Gazette, April, page 414). Details with respect to the agreements governing specific training plans in the four western provinces were given in the Labour Gazette for July, page 743, and August, page 858, while the programs for Ontario and Nova Scotia were reviewed in the September issue commencing on page 980.

The official statements issued by the Hon. Norman McL. Rogers, Minister of Labour, announcing the recent agreements with Prince Edward Island, Quebec and New Brunswick, are as follows:—

Agreement with Prince Edward Island

The seventh agreement in connection with the Dominion-Provincial Youth Training Plans was completed with the Province of Prince Edward Island. This agreement provides for the total expenditure of approximately $25,000 which, as in the case of the other agreements, is to be shared equally by the Dominion and the Province.

The projects are open to "unemployed young people" between the ages of eighteen and thirty. Provision is made for the establishment of courses for women in Charlottetown and other centres to provide training for household workers as well as instruction in home management and economics, handicrafts and physical education.

There is also provision for the establishment of special courses at the Prince of Wales College where instruction will be given in agriculture and subjects related to farming. Assistance will also be provided for selected young men to attend the agricultural courses at the Truro Agricultural School as well as the courses in rural leadership and co-operation at St. Francis Xavier University, Antigonish.

Occupational training will be provided in carpentry, blacksmithing and repair of farm machinery by means of special courses.

For the benefit of those engaged in the fishing industry special courses will be given dealing with the curing, processing, packing and marketing of fish.

For young men desiring to become sailors provision will be made for instruction in navigation and seamanship.

Under the terms of the agreement where young people have to attend a course of instruction away from their homes living allowances will be paid.

The agreement is effective up to March 31, 1938.

Quebec Youth Training Agreement

An agreement under the Dominion-Provincial Youth Training Plans initiated by the Dominion Government has been completed with the Province of Quebec. The total amount involved is over $400,000 which will be contributed on a 50-50 basis by the two Governments, with the Province bearing its own administrative costs. Projects which were submitted by the Provincial Government will be open to unemployed young men and women between 18 and 30 years of age, selected by the Province, subject to Dominion approval, without discrimination or favour in relation to racial origin, religious views, or political affiliations. Special provision is made for occupational guidance by qualified individuals for young people wishing to take up courses of instruction, and emphasis is laid on placing in employment those who satisfactorily complete a course of training.

Training will be given in hard rock mining to about 100 young men, selected after a medical and X-ray examination, in a mine operated by the Provincial Government as part of the Youth Training Plan. Board and lodging, mine clothing and a daily training allowance will be given each young man. The work will be supervised by a nucleus of skilled miners and supervisors and class instruction will be given.

Some 200 young men will be given a winter course of training in Forestry for 5 months under the direction of the Quebec Forest Service covering technical instruction at forest schools and practical work in the Provincial Forest Reserves. Travelling expenses will be paid to and from the project and a clothing bonus given those who complete the course. A daily wage will be paid from which the cost of board will be deducted.

Occupational training will be given in the larger urban centres either through the regular technical schools or other specially established schools so that young men and women may have an opportunity of learning a trade. Pro-

vision is made for advisory committees of employers, labour and educational authorities to assist in formulating and carrying out the plans of training.

Women's courses will be carried on in household work, home economics, handicrafts, with the assistance of local advisory committees of representative women. Parish and district courses in farming and agricultural subjects will be given throughout the Province with separate courses for the English-speaking young men. The district courses are designed to train leaders for rural co-operative associations, while in the local courses, instruction will be given in those branches of farming which are specially suited to the area concerned.

A unique feature of the plans is a project for carrying on recreation, leisure-time activities and instruction in health and physical education in the larger urban centres.

These will be conducted through the co-operation of private organizations, both French-speaking and English-speaking, with a view to building up the physical fitness and maintaining the morale of unemployed young men and women.

In those projects where no wages are paid, provision is made for the payment of a living allowance to enable young men and women to attend a course of training away from their own home. The agreement terminates on March 31, 1938, and it is estimated that the various plans provide for 7,000 to 10,000 young men and women.

Youth Training in New Brunswick

Under the Dominion-Provincial Youth Training program an agreement with the Province of New Brunswick has been approved by the Dominion Government. (This is the last agreement to be signed.) All nine Provinces are now co-operating in the plan.

As in the other agreements equal contributions are made by each government with the Province paying its own costs of administration. Projects are open to unemployed young people between 18 and 30 who are in necessitous circumstances with the selection made by the Province, subject to Dominion approval.

Included in the agreement are two projects which provide training in Forestry Camps, surveying and prospecting parties carried on by the Department of Lands and Mines. Much valuable work has been done in general forestry training and in geological surveys with instruction in prospecting and hand-drilling operations. A considerable number of these young men have been placed in employment.

Provision is also made for vocational guidance and occupational training in technical schools or in special centres to prepare young people for specific occupations and living allowances for board and lodging may be paid where necessary, during the training period. A number of young people will be assisted to attend courses at Truro Agricultural School, Woodstock School or other institutions.

In agriculture, arrangements are made for the placing of 50 young men, who wish to follow agriculture, with the best farmers in the Province as apprentices, with supervision and follow-up service by the Provincial district agricultural representative. In return for the instruction given a monthly payment will be made the farmer and training allowances will also be paid the apprentices. Short courses in agricultural subjects will be given throughout the Province during the late fall and winter months, designed to accommodate 600 or 700 young people.

Among the projects for women only, there will be schools for giving training in household work and other specialized forms of employment, as well as classes in handicrafts and homemaking.

In 1936 there were sixteen establishments engaged in the production of distilled liquor, five in Quebec, eight in Ontario and three in British Columbia. These sixteen establishments in 1936 reported a capital investment of $37,987,604, a payroll of 1,968 persons who received $2,303,698 in salaries and wages, and had a value of production of $20,196,185.

About a million and a half workers associated with the railroad industry in the United States are now within the scope of the retirement act for railroad employees (LABOUR GAZETTE, April, 1937, page 394) according to an analysis of this legislation by Mr. Murray W. Latimer, chairman of the Railroad Retirement Board. This Board has already received more than 61,000 applications from workers for old-age or disability annuities. In addition, more than 50,000 railroad employees formerly carried on the pension rolls of private railroad employers are now receiving pensions paid by the Federal Government instead of their private pensions. Approximately 1,450,000 individuals, including about 4,000 employees of railway labour organizations subject to the Railway Labor Act, have already been given account numbers.

The Report of the Railroad Retirement Board, covering its administration for the period ending June 30, 1936, has recently been received in this department.

INTERNATIONAL ASSOCIATION OF GOVERNMENTAL LABOUR OFFICIALS

Proceedings of Annual Convention—Summaries of Reports on Labour Legislation

THE twenty-third Convention of the International Association of Governmental Labour Officials was held in Toronto on September 14 to 16. The last time the Association met in Toronto was in June, 1929. About 100 representatives were present from the United States and Canada. Of the Canadian representatives, three were from British Columbia, two from New Brunswick, one from Quebec, four from the federal Department of Labour at Ottawa, two from the National Employment Commission, and a large number from the Ontario Department of Labour. The latter Department entertained the delegates at dinner at Niagara Falls on Wednesday evening when the speakers were Mr. J. F. Marsh, Deputy Minister of Labour of Ontario, Mr. W. R. Houck, M.P.P., and Mr. W. M. Dickson, Deputy Minister of Labour of Canada.

At the closing session of the conference, it was decided to hold the next meeting in Charleston, S.C., and the following officers were elected: President, W. P. Murphy, Oklahoma; Vice-Presidents, Martin P. Durkin, Illinois, Adam Bell, British Columbia, Miss Frieda Miller, New York, Voyta Wrabetz, Wisconsin, John W. Nates, South Carolina; Secretary Treasurer, Isador Lubin, Commissioner of Labour Statistics, Washington, D.C.

The opening meeting was presided over by the president, Mr. A. L. Fletcher, Commissioner of Labour of North Carolina. Addresses of welcome were given by Mr. W. D. Robbins, Mayor of Toronto, and by Mr. J. F. Marsh, Deputy Minister of Labour for Ontario. The chairmen of other sessions of the conference were T. E. Whitaker of the Georgia Department of Labour, A. W. Crawford, chairman of the Ontario Minimum Wage Board, Joseph M. Tone, Commissioner of Labour of Connecticut, Tom Moore, vice-chairman of the National Employment Commission of Canada and John S. B. Davie, Commissioner of Labour of New Hampshire.

The objects of the Association are, in general, to encourage the co-operation of all branches of federal, state and provincial governments which are charged with the administration of laws for the protection of workers in industry and for improvement of relations between employers and employees, to promote the highest possible standards of enforcement and administrative methods and to provide for the exchange of information among members of the Association.

The organization seeks to achieve these objects partly through the work of standing committees which report annually on the developments in their field during the year and make suggestions for improving standards. A summary of the reports presented by these committees together with some explanatory notes and supplementary information on Canadian conditions in some cases, is given below the following headings: Unemployment Compensation, Old Age Assistance, Minimum Wage, Women in Industry, Child Labour, Wage Claim Collections, Home Work and Civil Service.

Following the discussion of the committee reports, sessions of the conference were devoted to certain phases of labour law or administration not dealt with by committees. Addresses were given by Mr. W. Frank Persons of the U.S. Employment Service on the work of that service, Mr. R. G. Wagenet of the U.S. Social Security Board on Unemployment Compensation Commissions and by Mr. R. A. Rigg, Director of Employment Service of Canada. The Role of State Labour Commissioners in the Improvement of Labour Legislation was discussed by Mr. R. M. Bashore, Secretary of Labour of Pennsylvania, who outlined the extensive legislative program adopted by the Pennsylvania Legislature in 1937.

"Problems of Health and Safety Legislation" was the title of an address by Mr. Verne A. Zimmer, Director of the Division of Labour Standards of the United States Department if Labour. It was pointed out that if much of the detailed regulation necessary for the health and safety of workpeople was embodied in the statute itself, it became too cumbersome and rigid, that about half of the American states have given authority to draw up regulations to some administrative body but that only 12 states have comprehensive powers and have made rules. In the past most attention has been given to safety, protection from fire, boiler inspection and so on, but increasing attention is being devoted to health hazards. Legislation of this kind has been promoted as a result of workmen's compensation laws. The speaker touched on the problem of the small employer in this field, the need for inspection, the frequent lack of sufficient funds to enforce the law adequately and the need

of information on the part of the state authorities. Such information the Division of Labour Standards and other federal services should be able to supply.

Round table discussions were devoted to: "Apprenticeship Training" under the leadership of Mr. V. Wrabetz, of the Wisconsin Industrial Commission; "Enforcement through Inspection" under Mr. Elmer F. Andrews, Commissioner of Labour of New York State; and "Administration of Labour Legislation in Canada" under Mr. Adam Bell, Deputy Minister of Labour of British Columbia.

Labour Legislation in British Columbia

Mr. Bell, while making a general statement concerning labour legislation in Canada, spoke more particularly of his own province. Regulations under the minimum wage laws for men and women and hours of work legislation in British Columbia are made by the Board of Industrial Relations set up in 1934.

"The Industrial Relations Board commenced its work on the principle of restoring to industry the foundations in wage structures that had been shattered by the years of the depression. We have held consistently along that line. Our object being that once a foundation is laid, having in mind the welfare of all workers in any industry, and compatible with the ability of the industry to pay, higher wages for more highly skilled employees can generally be left to the mutual arrangement of employer and employee. At no time have we attempted to fix standards of wages for all classes of labour in their respective and circumscribed occupations. . .

"Enforcement presents its problems. We in British Columbia have tried and are still trying to educate employers and employees to the advantages the legislation affords. In a number of cases we find it necessary to lay charges in the Courts against employers who, when infractions have been brought to their notice, have failed, or refused, to abide by the orders of the Board. During 1936, charges were laid against 181 employers for violation of our labour laws. In 165 cases convictions were registered and the penalties applied; while in 16 cases, the charges were dismissed or withdrawn. . . In the same year 10,245 inspections were made by our Inspectors, detailed reports being made out on regular inspection forms in every case. The sum of $60,172 was collected by departmental officials and paid over to employees who had not received the amounts to which they were legally entitled. This brings up the point of collecting money for employees, many of whom have knowingly worked for less than the legal minimum, and later have used the officials of the Department as collecting agents. Were it not for the additional penalty that is applied to the defaulting employer by the amount he is compelled to pay in the collecting process, I would be constrained to make fewer collections, for I believe we will never achieve the desired measure of enforcement until employees assist the administrative authorities to a fuller extent by making a greater individual effort to take advantage of the protection and help which the law affords."

U.S. National Labour Relations Act

The work of the U.S. National Labour Relations Board and the State Labour Relations Boards in Wisconsin and New York was outlined by members of those boards, Mr. Edwin S. Smith, of the National Labour Relations Board, formerly Commissioner of Labour and Industries of Massachusetts, reviewed the operations of that board which has to do with complaints of "unfair labour practices" by employers engaged in interstate commerce as these practices are defined in the National Labour Relations Act. They include: (1) interfering, restraining or coercing employees in the exercise of their right to organize, bargain collectively through their chosen representatives and to engage in concerted activities for the purpose of collective bargaining or other mutual aid or protection; (2) dominating or interfering with the formation or administration of any labour organization or contributing financial or other support to it; (3) discriminating in regard to hire or tenure of employment or any condition of employment in order to encourage or discourage membership in any labour organization but an employer is not prohibited from making an agreement with a trade union requiring his employees to be members of the trade union; (4) discharging or otherwise discriminating against employees for making a complaint or giving evidence under the Act and (5) refusing to bargain collectively with the representative chosen by the majority of his employees in a unit appropriate for such purposes in respect of wages, hours and other conditions of employment.

While the National Board, Mr. Smith stated, has no specific powers in the matter of mediation in disputes of the kind that fall within the Act, yet from October, 1935, when it began its work until August 1, 1937, it has been successful in settling by mediation over half the cases. A large number of complaints are found to be unsubstantial and are so reported. Again, a great many cases do not reach the National Board but are dealt with by the regional officers. Complaints are thus carefully sifted before the formal complaint is entered and the charge becomes one of violation of a federal statute. Accordingly, only a comparatively small number of cases come before the National Board for formal hearing. Of the first 5,000 cases, only 200 came before the Board for formal decision.

Of the 3,824 cases which have been acted on by the Board, 2,231, involving 427,424 workers were reported by Mr. Smith as closed by agreement between the two parties; 542 cases, involving 73,078 workers were dismissed by

the Board or regional directors before any formal action was taken. The petitioners withdrew 877 cases affecting 147,130 workers. Only 174 cases, involving 46,099 workers, had to be closed in some other way either by ordering compliance with the Board's decision, or by certifying or refusing to certify appropriate bargaining units, or by transferring them to other agencies such as the Conciliation Service of the Department of Labour and State Labour Relations Boards or by issuing "cease and desist orders." If an employer refuses to comply with an order of the Board, the latter may petition the court for the enforcement of the order. Of 18 such cases decided by the circuit courts of appeals, only one was not sustained. The number of strike cases was 826, involving 170,516 workers, of which 610 were settled and 117,542 workers reinstated after strikes or lockouts. Continuing, Mr. Smith observed:—

"Among other things, the Act was designed to give the majority of employees in an appropriate bargaining unit the exclusive right to represent all employees in that unit. . . . The Act provided for a peaceful determination of such controversies, which might otherwise result in strikes, by empowering the National Labour Relations Board to hold an election, or by other appropriate means, to determine which group should be certified as the proper and exclusive bargaining agency of the employees under the democratic doctrine of majority rule."

Elections have been held in 492 cases with 200,962 valid votes cast. Experience with this part of the Act led the speaker to conclude that—

"The more that labour unions are forced to obtain the good-will and allegiance of employees before they conclude agreements with employers, the sounder is the prospect for the union in the future. Unions which are the fruit of an unwilling or half-hearted membership can never attain the solidarity or permanence of those which advance step by step in harmony with the enthusiasm and the ideas of an educated and faithful membership. To the extent that the Wagner Act has resulted in an increased democratization of unions, the rank and file of labour owe it a debt of gratitude."

Reverend F. J. Haas, of the Wisconsin Board of Labour Relations, and Mr. Paul M. Herzog, of the New York State Board, spoke of the operations under the Labour Relations Acts of these states which are similar to the federal statute in the main but apply only to employers engaged in commerce within the state. The Wisconsin Act expressly empowers the Board to appoint conciliators to deal with disputes arising from "unfair labour practices." In New York the State Labour Relations Board has no such functions and the State Mediation Board operates quite independently.

Discrimination against Older Workers in Massachusetts

An address by Mr. Roswell F. Phelps, Director of Statistics of the Massachusetts Department of Labour and Industries, dealt with "Discrimination Against Older Workers in Massachusetts,"* where a statute was passed in 1937 declaring it against public policy to dismiss from employment any person between the ages of 45 and 65, or to refuse to employ him, because of his age. Any provision in any contract or agreement made after October 1, 1937, which prevents or tends to prevent the employment of any person of these ages is declared null and void. The Department of Labour and Industries is charged with the duty of inquiring into any complaint of discrimination on this ground and if it is substantiated the name of the employer may be published.

The Massachusetts statute, the only one of its kind in the United States, was enacted after public hearings. The greater part of the testimony presented "consisted of depressing repetitions of complaints that workers over 45 years old were refused employment without an opportunity to demonstrate efficiency. Discrimination appeared to be greatest when work is seasonal or temporary." A questionnaire from the Department of Labour and Industry to employers of 10 or more persons brought more definite information:—

Further confirmation of this evidence of needless discrimination in manufacturing establishments is found in the fact that 230 factories had no male employees 45 years old or over, 137 had less than 10 per cent, and 434 had 10 per cent and less than 20 per cent; thus 27·6 per cent failed to reach a quota 11 per cent less than that needed to give employment to healthy men seeking work when 45 to 64 years old [31 per cent], and 16 per cent less than the employable men in the general population who are 45 years old or over. . . .

The inconsistent treatment of older men in industry groups other than manufacturing indicates a general need for the arousing of public opinion for the enforcement of more considerate policies in dealing with the employment needs of older workers. . . .

Answers to questions about policies in dealing with older workers indicate that the discrimination which undoubtedly exists is the product of the depression conditions and of unregulated efforts to obtain a working force which will promote profits, rather than of a callous indifference to the welfare of the older workers. . . . The custom of transferring older workers to lighter tasks was more general than the fixing of definite ages of hiring and separation. . . .

*For fuller information, see article by Lucile Eaves in the *U.S. Monthly Labour Review*, June, 1937.

Reports of Committees

Unemployment Compensation

The progress report of the Committee on Unemployment Compensation Laws was submitted by Mr. Glenn A. Bowers, of the New York State Department of Labour. During the year, the validity of the Federal and State legislation on unemployment compensation was cleared of all doubt by judgments of the United States Supreme Court. The following extracts are taken from this report:

The year which has elapsed since the last meeting of this association has witnessed the rounding out of State legislative programs for unemployment compensation; the setting up of State and territorial administrative agencies; and the clarification of State and Federal relationships. . . .

Forty-eight States, the District of Columbia, Alaska and Hawaii have enacted unemployment compensation laws (Wisconsin in 1932; New York, Washington, New Hampshire, California, and Massachusetts in 1935; thirty States in 1936; and fifteen States in 1937).

As of June, 1937, there were approximately 865,000 employers responsible for payment of contributions under these laws. The number of employees covered was approximately 25,000,000.

Twenty-nine of the fifty-one laws embrace employers of eight or more; one (Connecticut) five or more; nine (Kentucky, Maryland, Massachusetts, New Hampshire, New Mexico, New York, Oregon, Rhode Island, Utah) four or more; two (Arizona and Ohio) three or more; and ten (Arkansas, District of Columbia, Delaware, Hawaii, Idaho, Montana, Nevada, Pennsylvania, Wyoming) one or more employees.

In general, these laws exempt employees in domestic service, agricultural employment, government employment, religious, charitable, educational, and scientific employment in non-profit organizations. . .

Approximately $400,000,000 is in the Federal Treasury in the Unemployment Trust Fund credited to the respective states. The rate of employer contributions in 1937 was 1.8 per cent of the defined payroll in all States but five (Massachusetts, New York, Michigan, New Hampshire, Wisconsin, and District of Columbia), in which jurisdictions the rate is two per cent of the payroll. These rates in most instances will be stepped up in 1938 to 2.7 per cent and 3 per cent of the payroll respectively.

In 1937, there are eight States (Alabama, California, Indiana, Kentucky, Louisiana, Massachusetts, New Hampshire, and Rhode Island) which provide for contributions by employees. These range from .5 per cent to 1.5 per cent of wages received. In 1938, Indiana drops from this list, and New Jersey is added to it.

Unemployment benefits in most States amount to 50 per cent of the value of weekly wages. The minimum benefit is ordinarily $5 and the maximum is $15. The waiting period is normally three weeks of unemployment with variations among the States. The duration of benefits ranges from twelve to twenty-six weeks. In twenty-eight States, the duration is sixteen weeks.

The only state paying benefits is Wisconsin which began payments in July 1936. Benefits in other states become payable as follows: twenty-two States, January, 1938; two States, April, 1938 (Indiana and Mississippi); two States, July, 1938 (Iowa and South Carolina); one state, September, 1938 (Idaho); two States, December, 1938 (New Mexico and Oklahoma); sixteen States, January, 1939; four States, July, 1939 (Georgia, Illinois, Florida, Montana).

In forty-four jurisdictions, the unemployment compensation fund is completely pooled. In Vermont, the employer may elect a pooled fund or a company reserve fund. In four States (Indiana, Kentucky, Oregon, South Dakota) there is employer reserve fund with partial pooling. The Nebraska and Wisconsin laws provide for employer reserve funds; however, in these two States there is a small pooled fund for interest earnings, unused balances, and money from other miscellaneous sources. . . . . .

In all but two jurisdictions (Alabama and District of Columbia) the administration of the State Employment Service has been combined with that of the unemployment compensation agencies. This means that employment service is administered with unemployment compensation as integrated functions under a single administrative authority, either a commission or an individual administrator.

In the absence of Federal provision for unified administration of unemployment compensation and employment service, such common action has been attained through an agreement between the Secretary of Labor and the Chairman of the Social Security Board. Under this agreement, concluded March 30, 1937, a joint committee of the United States Employment Service and the Bureau of Unemployment Compensation of the Social Security Board determines State and Federal administration requirements and passes upon budgets for employment services. The Social Security Board has recognized that the supplementary costs of employment service above those provided for under the Wagner-Peyser Act and corresponding State laws, must be borne by the Board. The Social Security Board through the Bureau of Unemployment Compensation, and the Department of Labor through the United States Employment Service, act as if they were a single agency with respect to all matters affecting a State employment service.

An informal association of administrators of State unemployment compensation agencies has met six or eight times to date. There has been developed a plan which will be acted upon at the October meeting of this interstate conference, providing for a duly constituted organization under the name "Interstate Conferences of Employment and Unemployment Compensation Agencies."

A number of troublesome problems have yet to be solved. Among these are the handling of coverage for migratory workers, the proper jurisdiction for interstate workers the determination of seasonal industries, and the status of part-time employment. The ability of the States, large and small, to pay benefits promptly and accurately has yet to be demonstrated.

Old Age Assistance

The report of the Committee on Old Age Assistance Laws, which was read by the Chairman, Mr. H. R. McLogan of the Industrial Commission of Wisconsin, recommended that the pensionable age should be 65 years, that persons who have lived in the United States for 25 years or more should be eligible, that the limit placed on an applicant's real property should be $5,000 and on his personal property $500 in addition to household goods valued at not more than $500. Under the federal Social Security Act, no financial assistance is to be given after January 1, 1940, by the Federal Government to any state scheme for old age assistance under which the pensionable age is higher than 65 years. On the other points there is wide variation in the state laws. It was suggested, further, that a grant for funeral expenses should be allowed, that instead of requiring an applicant to transfer his real property to the state authorities, the law should provide for filing with the registrar of deeds a certificate showing the amount of aid given which then becomes a lien on his real estate. It was also suggested that the state administrative authority should be able to give financial assistance to counties unable to give the same standard of assistance as that given in richer counties.

Minimum Wages in United States

The report of the Committee on Minimum Wage Laws was submitted by the chairman, Miss Frieda S. Miller, New York State Department of Labour, while a special report on the Canadian situation was given by Mrs. Rex Eaton of the British Columbia Board of Industrial Relations.

Since the United States Supreme Court declared valid the Minimum Wage Act of the State of Washington in March, 1937, after having declared unconstitutional the New York State minimum wage law in 1936, the committee's report naturally dealt with the constitutional aspect of this legislation and with the effect of the recent judgment on existing laws. When the judgment was rendered, there were minimum wage laws on the statute books of the District of Columbia and of eighteen states: Arkansas, California, Colorado, Connecticut, Illinois, Massachusetts, Minnesota, New Hampshire, New Jersey, New York, North Dakota, Ohio, Oregon, Rhode Island, South Dakota, Utah, Washington, Wisconsin. Since the judgment, Arizona, Nevada, Oklahoma, and Pennsylvania have passed minimum wage laws and minimum wage boards of nearly all states have shown greater activity in making and enforcing orders.

The report states:—

the adequate enforcement of a minimum wage law calls for the provision of research facilities that will make constantly available to the administrator current, adequate information on wages and working conditions concerning industries covered or to be covered by wage order as well as cost of living data where the latter are to be considered as one of the bases for wage determination. Unless there be a separate research personnel, the necessary work in preparation for new boards, the necessary appraisal of changing conditions in industries already covered by wage orders, but subject to revision, will be only the haphazard, "extra" activity of the enforcement staff. It is futile to expect that those whose immediate job is law enforcement can ever swing free enough of the exactions of inspection work to undertake planned and systematic research. The research staff should be recruited from among trained and experienced research people who have shown their fitness for this kind of work.

Suitably trained personnel for actual enforcement is also a problem. It is to be taken for granted that every new wage order presents first of all an educational undertaking. The purpose to be accomplished, the suitability of the administrative regulations for achieving it, maintaining necessary records, all these and other details must be explained and their reasonableness proved to the bulk of employers subject thereto. Ordinarily, agreement can be expected to follow a full, intelligent, reasonable presentation of the situation and this, with occasional follow-up to see that things go smoothly, is all that is needed in many establishments. But those plants where it by no means completes the job are never lacking. In every industry there will be employers who deliberately evade the provisions of a wage order. To deal with such situations it is necessary that an effective enforcement staff have its quota of trained accountants who can analyze the financial records of an establishment to find the facts. . . .

If a wage order is to accomplish its purpose; if it is really to assure a reasonable minimum to women and minors employed at any industry, the rate set by the wage board must be made to "stick" for everyone. It must not be emasculated by defining as learners large numbers of workers who can then be employed at a lower rate. Nor must earnings be cut into by long stretches of involuntary waiting time, by fines, by excessive charges of one sort or another. . . . The administrative regulations, drafted to deal with these various practices therefore become the vital defences of the standard set. They should be given most careful consideration by the wage board in the light of existing practices and of possible developments in the industry. . . .

There is finally, and most important, the matter of cost of enforcement. Inspection and checking of payrolls must necessarily be a time-taking and therefore an expensive matter. . . . What possibilities are there, or what can be devised, to lessen the cost of this enforcement? As enforcement gets under way in a larger number of states, any shortcuts or savings that are devised should be carefully appraised and made known to all. It would be interesting to know, for example, why California, which long since transferred to the canning industry the cost of a special annual payroll check for that industry, has not extended the practice. . . .

For the administration of state or provincial laws still another problem related to coverage is raised by the interstate, competitive aspect of many of the manufacturing industries to which the act should be applied. It would seem the part of wisdom where one is setting out to apply a new law, to initiate its application in the least controversial fields. By so doing certain extraneous objections can be kept from arising and the enforcement of the order will not be so complicated as would otherwise be the case. Experience with problems inherent in such enforcement, the development of proper techniques, etc., can then proceed more smoothly. However, if state laws are to be our tools for setting decent minima in industries paying substandard wages, those industries which are interstate in character cannot be allowed indefinitely to remain substandard. In putting this decision into effect the administrator of a minimum wage law will do well to recall the many factors other than wage differentials which go into determining the advantages and disadvantages of industry location in a given spot. Access to markets, skill and experience of labour supply, access to raw material, absolescence of plant and many other factors have been repeatedly shown as among these.

But, since the claim of competitive disadvantage arising out of the fixing of legal minimum wages will be made wherever possible, regardless of whether or not in a given situation it is important, it would be well to do whatever is possible to counteract its influence when planning coverage. One possibility would be that contiguous and competing states try so far as possible to study and to cover interstate manufacturing industries at the same time. If this is done, the arrangements should be through informal, administrative conferences. For any formal, rigid machinery set up between the states might easily become a fifth wheel, impeding and slowing down the progress of agencies that had much better remain strictly state agencies unless they can become truly national in character.

Minimum Wages in Canada

For Canada, Mrs. Eaton gave a comprehensive statement of the provincial minimum wage laws, making reference also to the Dominion Government's Fair Wage Policy in connection with contracts for Government supplies and the Fair Wages and Eight-Hour Day Act applying to public works. An Act similar to the latter was passed in Ontario in 1936. Manitoba has also a Fair Wage Act and other provincial governments follow the policy of requiring "fair wages" on government works.

Legislation providing for minimum wages for women was enacted between 1918 and 1930 in all the Canadian provinces but Prince Edward Island. The New Brunswick Act is not yet in force. In 1925 British Columbia enacted the first minimum wage law for men. At the present time all the provinces but Nova Scotia and Prince Edward Island have a minimum wage law applying to men. In Alberta and British Columbia separate statutes relate to the two sexes. In the other provinces, one Act applies to both male and female workers. No orders have as yet been issued in New Brunswick under the statute of 1936 or in Ontario or Quebec under the statutes of 1937.

Reference was also made to the Industrial Standards Acts of Alberta, Nova Scotia, Ontario and Saskatchewan under which minimum wages and maximum hours of labour arrived at by agreement between representatives of employers and employed may be made legally binding on the whole industry in the district concerned. The Nova Scotia Act applies only to the building trades in Halifax and Yarmouth. The Workmen's Wages Act, 1937, of Quebec which replaces the Collective Labour Agreements Extension Act, 1934, enables agreements as to wages, hours and apprenticeship between one or more employers and one or more trade unions or groups of employees to be made obligatory on the whole industry in the district covered by the agreement.

Under the Acts applying to women, orders were issued in Alberta, British Columbia, Manitoba, Nova Scotia, Ontario, Quebec and Saskatchewan relating to women employed in factories, laundries, shops, including beauty parlours, and in hotels and restaurants. Women working in offices are protected by orders in all these provinces except Quebec and Saskatchewan and those in places of amusement in all except Nova Scotia and Quebec. In Manitoba and other western provinces, the Minimum Wage Board has had power to limit hours and this has been done in all the orders issued except where unnecessary owing to other regulation. With the extension of the Saskatchewan Act to male workers, the maximum number of hours allowed to women in shops has been extended from 49 or 51 according to the size of the city to 56 in a week. The Saskatchewan orders apply only to cities and within a five-mile radius thereof.

In British Columbia, where a minimum wage law for men has been in effect for some years, orders have been made governing the following industries: logging, saw and shingle mills, box manufacturing, wood-working, carpentry, construction, baking, fruit and vegetable industry, shipbuilding, transportation other than by rail, water or air, and for bus drivers, taxicab drivers, retail and wholesale stores, stationary engineers, barbers, elevator operators and janitors.

Women in Industry

Miss Mary Anderson, Director of the United States Women's Bureau and chairman of the Committee on Women in Industry, reported on the laws enacted during the past year in this field.

Included in the legislation limiting hours of work which was enacted in various states was

an 8-hour law for women in certain industries in Connecticut, Illinois, Nevada, New York, Ohio, Oregon and Pennsylvania. The new Connecticut law applies an 8-hour day and 48-hour week to shops. Illinois places the same limits on practically all female employment. Nevada extended the scope of its 8-hour day to all private employment and reduced the 56-hour-week limit to 48. New York included in its 48-hour-week law hotels and restaurants in smaller cities, elevator operators, street railway employees and workers in canneries. It also passed a 48-hour law for telegraph and other messengers. Ohio reduced its daily and weekly hours from 9 and 50 to 8 and 45 in factories and 8 and 48 in non-manufacturing industries. In Oregon practically all female workers have now a basic 44-hour week instead of 48 and in Pennsylvania the reduction was from 10 a day and 54 a week to 8 a day and 44 in a week of 5½ days.

North Carolina adopted a 9-hour day and 44-hour week for all female employment instead of an 11-hour day and 55-hour week that had previously been the legal maximum in industrial establishments and 10 hours a day and 55 a week in mercantile establishments. Vermont replaced its 10½-hour day and 56-hour week in factories and certain other establishments with a maximum of 9 hours a day and 50 hours a week. In New Hampshire the reduction in hours for women made by the Legislature was from 10½ hours daily and 54 weekly to 10 hours daily and 48 hours weekly.

For the first time domestic servants have been protected by state legislation in the matter of hours of work. The State of Washington passed an Act limiting weekly hours of all household or domestic workers, male or female, to 60 hours a week.

In Canada new legislation affecting women was enacted in Ontario and New Brunswick in 1937. The Ontario Minimum Wage Act, 1937, which applies to both sexes, gives workers greater protection against overtime by stipulating that no weekly rate for overtime may be less than one-fortieth of the minimum weekly wage. The New Brunswick Factories Act, 1937, which is to come into effect on proclamation, will reduce the maximum weekly hours of employment for girls and women and boys under 18 from 60 to 50 a week, the daily limit remaining at 10 hours. In emergencies on not more than 36 days in the year with the permission of the factory inspector longer hours may be worked. Under the old Act the maximum in such cases was 81 hours a week. Under the new, the maximum is 68. This statute also lengthens the period at night during which women will be prohibited from working in factories. Such night work will be forbidden between 9 p.m. and 7 a.m. instead of between 10.30 p.m. and 6 a.m. as under the old statute.

At the present time the law limits women and girls in factories in New Brunswick and Ontario to a 10-hour day and 60-hour week, and in Quebec to a 10-hour day and 55-hour week. In Alberta and British Columbia, female factory workers have an 8-hour day and 48-hour week and in Saskatchewan the Factory Act provides a 48-hour week for girls and women. In Manitoba, under minimum wage orders there is a 48-hour week for female workers in factories. There is no statutory limitation on hours of work for women in factories in Nova Scotia, except that night work is prohibited between 9 p.m. and 6 a.m.

Child Labour

The report of the Committee on Child Labour, of which Miss McConnell of the Children's Bureau of the United States Department of Labour, is chairman, pointed out that the convention of the International Labour Conference on minimum age for employment had been revised to raise the age from 14 to 15 years. Progress in state legislation was noted thus:

Two of the important textile manufacturing states in the United States, North Carolina and South Carolina, have set a basic 16-year minimum age for the employment of minors, bringing up to ten the number of states with a 16-year minimum age standard, at least for work in factories or for all work during school hours. Included in these ten states are several highly industrialized states which formerly had a large number of employed minors under 16. . . In addition to these ten States, Massachusetts has set temporarily. . . a minimum age of 16 in textile factories. The only other advance in general minimum-age legislation in 1937 was in Vermont, where although the minimum age standard was not raised, the 14-year standard was extended to cover work in any gainful occupation during school hours, instead of applying only to factory and related employments.

In Pennsylvania and South Carolina the compulsory school attendance requirements were raised to accord with recent changes in the minimum age for employment; South Carolina raising the upper age for school attendance of unemployed children from 14 to 16 and Pennsylvania from 16 to 17 in 1938-39, and 18 thereafter. The Pennsylvania law accords with the standard set up by the International Association of Governmental Labor Officials, requiring the minor to attend school for a two-year period after the minimum age for employment is reached, unless he is legally employed. . .

Some advance was made in protection of children from hazardous occupations. In North Carolina specific authority was given the Labor Commissioner to prohibit hazardous occupations under 18 and a number of hazardous occupations were added to the prohibited list already in the law. In other words, when the 16-year minimum age was enacted the protection from hazardous occupations was also stepped up two years so that boys and girls 16 and 17 years

of age now have the same protection as those 14 and 15 had before the new law was enacted. Connecticut likewise raised the minimum age for work in specified hazardous occupations from 16 to 18. The minimum age for work of boys in coal mines was raised in Indiana from 16 to 18. The Massachusettes legislature last year authorized a committee to study the problem of hazardous occupations for minors and it is significant that the committee's report to the State legislature recommended a bill raising the age minimum from 16 to 18 in many hazardous occupations. The bill, unfortunately, failed to pass.

In Canada, the only legislation in 1937 affecting the employment of children was the enactment of a new factory law in New Brunswick which is to come into effect on proclamation. Since 1920 there has been no statutory minimum age for employment in New Brunswick but the new Act will prohibit work in factories under 15 years of age, thus bringing New Brunswick into line with Manitoba, Alberta, British Columbia and with Saskatchewan for girls in the minimum age for factory employment. In Ontario and the cities of Nova Scotia, employment under 16 is forbidden in school hours without a permit and in Quebec children under 16 who are unable to read and write may not be employed.

The standards for legislation on child labour recommended by the I.A.G.L.O. at previous meetings include a uniform minimum age of 16 years for employment in any occupation during school hours and in factories at any time and a 14-year minimum for non-factory work outside school hours; an 8-hour day and 40-hour week for juveniles under 18; prohibition of night work for at least a 13-hour period for those under 16 and for at least an 8-hour period for those between 16 and 18; employment certificates for those under 18; and adequate protection of children under 18 from dangerous work or work involving health hazards. As regards children in street trades, the standards require a minimum age of 14 for boys and 18 for girls selling newspapers or magazines but boys 12 and over may have paper routes in residential districts.

Wage Claim Collections

The 1936 meeting of the I.A.G.L.O. approved a model bill providing for the semi-monthly payment of wages and for machinery for the collection by the Government of wages due workmen unable to take action in the courts. The amount of wages that may be collected under the bill is limited to $200. The bill was based on existing legislation in different states, among which are California, Michigan, Nevada, New Jersey, Oregon, Washington and Wisconsin. Several other states have laws requiring the regular payment of wages but not providing for the collection of unpaid wages for needy workers.

Mr. E. I. McKinley, Commissioner of Labour for Arkansas, reported for the Committee on Wage Claim Collections that in 1937 the model bill was adopted in part at least by Illinois, New Mexico, and Arkansas, and introduced in Connecticut, Kansas, Minnesota, Missouri, Nebraska, New Hampshire, North Carolina, Ohio, West Virginia, and Wyoming. It failed to pass in these states but aroused discussion that was considered to augur well for its enactment in the future.

The bill provides for the semi-monthly payment of wages in cash or by cheque and in this particular is similar to the laws in many American states. In several of the Canadian provinces miners' wages are required to be paid at least semi-monthly and under the Dominion Railway Act and the Railway Acts of Nova Scotia and Quebec a similar requirement is laid down. Minimum Wage Orders in Manitoba require the payment of wages weekly. Only in British Columbia is there a special statute giving protection to all classes of workers in certain industries. The British Columbia Semi-monthly Payment of Wages Act applies to municipal employees, and in lumbering, mining, foundries, machine shops, shipbuilding, pulp and paper mills, and in fishing.

Of outstanding importance in the bill is the stipulation that any employee, while retaining his right to bring an action to collect wages, may assign his claim to the chief officer of the Department of Labour who is given authority to enter suit on his behalf without cost to the claimant or to the department. In Canada there is no legislation of this sort. The need for it was emphasized by Mr. Adam Bell, Deputy Minister of Labour of British Columbia, in a paper on the Administration of Labour Legislation in Canada.

Minimum Wage Boards in Canada have frequently assumed the responsibility of collecting wages due under the Minimum Wage Acts but they have had not statutory authority to bring an action for this purpose. Where an employer is prosecuted for violation of the legal wage scale, the Industrial Standards Acts of Ontario, Alberta, Nova Scotia, and Saskatchewan and all the minimum wage laws, except the Fair Wage Act, 1937, of Quebec, provide that in convicting the accused the magistrate shall order wages to be paid.

The only means open to a workman whose wages have been unpaid, and whose wages are not governed by the above statutes or by the Workmen's Wages Act of Quebec, is that provided by the Master and Servants Acts which have been for many years on the statute books of most of the provinces. These Acts provide

that a workman claiming wages may lay a complaint before a justice of the peace and if the latter is satisfied that the complaint is well founded, he may order the employer to pay the wages and costs. The maximum amount of wages that may be collected in this way ranges from $50 in British Columbia to $200 in Manitoba. In Alberta, not more than two months' wages may be claimed. There are Mechanics' Liens Acts in force in all the provinces but these do not serve the same purpose.

Home Work

The committee on home work reported through its chairman, Mr. Morgan R. Mooney of the Connecticut Department of Labour. A model bill for the control of home work which was drafted for a committee appointed by the United States Secretary of Labour was endorsed by the I.A.G.L.O. last year. The bill would prohibit the manufacture in a home of certain articles, including articles of food or drink, clothing for children up to 10 years of age, toys and dolls, tobacco, drugs and poisons, bandages and sanitary goods, and articles the making of which exposes the worker to substances considered to be dangerous to the health and safety of the workers. The head of a state labour department may investigate, and on the request of 50 or more persons he must investigate, any industry employing home-workers to determine whether the wages and conditions of employment are injurious or whether they menace existing labour standards in factories. After such inquiry and after public hearings he may make an order prohibiting home work in that industry.

All employers and home-workers would be required by the bill to have permits or certificates, an employer's first permit to cost $200 and its annual renewal $50. Home work may be carried on only by workers who have certificates. The latter are issued only to those who are over a specified age, free from infectious disease, resident in the home and working the same hours as persons at similar work in a factory. Every employer is required to pay a quarterly tax of $2.50 for each home-worker to whom he delivers materials.

During 1937, a bill based on the above was enacted in Illinois, Massachusetts, Pennsylvania, and Texas. Rhode Island put a new statute in operation, while Connecticut, New York and Wisconsin already had laws requiring home work to be conducted in accordance with labour laws concerning child labour, minimum wages and hours of labour, and in New York with the workmen's compensation law.

The only provinces in Canada which impose labour conditions in home-work are Ontario and British Columbia. In 1936 both these provinces amended the factory law to require employers and home-workers to have permits issued by the factory inspector on written application in prescribed form. An employer is given a permit only if the inspector is satisfied that he is likely to comply with the provisions concerning home-work and, in Ontario, with the minimum wage law and, in British Columbia, with the minimum wage and hours of work laws. Provisions for safeguarding public health against articles made in unsanitary homes which have been for some years in the factory laws of Alberta, Manitoba and Ontario were added also to the British Columbia statute.

The Report of the British Columbia Department of Labour for 1936 states that inquiries made after the enactment of the home-work law revealed that "home-work of considerable magnitude was being performed almost exclusively by Japanese women." On this subject the Department reported:

"Owing to the irregularity of the work, it was impossible to obtain information regarding hours worked from the home-workers visited, as it was stated that household duties were included in the day's work. We were, however, successful in a number of instances, where a time record was kept and the piece-work rate set, in establishing the fact home-workers were being paid as low as 27 cents for an eight-hour working-day. One of the outstanding facts brought out during the investigation was that the small remuneration received by home-workers was not the only source of income, as in most instances the husbands were employed in some line of industry.

"Our survey has proven there is no justification for such a large volume of work being performed in homes, and we have, without exception, refused to grant Japanese applicants either an employer's or home-worker's permit authorizing work to be given out or performed in the home, as we are of the opinion this should be carried out in factories where it can be regulated in accordance with the statutory requirements relating to the industry. This policy has resulted in home-work being discontinued, and contractors that previously had the work performed in homes have requested us to inspect several proposed factory premises previous to leases being taken and power-driven machinery installed."

Civil Service

Mr. E. B. Patton, of the New York State Department of Labor, reported for the Committee on Civil Service of which he is chairman. This committee was appointed in 1935 to "investigate the efforts which are being made by various organizations looking toward the inauguration of civil service in the different labour departments of the States." It was reported that in 1937 five states, Arkansas, Tennessee, Maine, Connecticut and Michigan adopted civil service laws bringing the total to fifteen. The other ten states are New York, Massachusetts, Illinois, Wisconsin, Colorado, New Jersey, Ohio, California, Maryland and Kentucky. In fourteen other states Bills were introduced in the legislature but failed to pass.

46643—3½

RECENT REGULATIONS UNDER PROVINCIAL LABOUR ACTS

BELOW are summarized regulations recently made under the authority of various provincial statutes. These regulations affect workpeople either directly or indirectly, and include orders relating to minimum wages, apprenticeship, hours of work, health of factory employees and licensing of operating engineers. General regulations governing the operation of the Industrial Standards Act of Ontario have also been made.

Alberta Licensing of Trades and Businesses Act

An order-in-council under the Alberta Licensing of Trades and Businesses Act, 1936, designates flour milling, feed milling, and meat packing as businesses to which the Act is to apply. After September 30, 1937, only persons holding licences from the Minister of Trade and Industry may carry on these businesses in the premises to which licences apply.

Alberta Male Minimum Wage Act

Two orders of the Board of Industrial Relations were approved by orders in council on October 26. The first order exempts, as from October 15, certain establishments from Order No. 1 fixing minimum wages for all male employees in the province with certain exceptions. Order No. 1 was noted in The LABOUR GAZETTE, October, 1937, page 1100. Those exempted are persons employed in saw mills, box factories, wood-working plants and in the manufacture of logging and railway ties when these establishments are situated in rural districts more than ten miles from any city or in towns and villages of less than five hundred inhabitants. All persons employed in fighting forest fires are also declared exempt from Order No. 1.

The second order made on October 26 and effective from October 15, fixes a minimum wage for persons employed in the establishments specified above as exempt from Order No. 1 at twenty-eight cents an hour for a person who had had experience in a similar employment for twelve months in the aggregate and at twenty-five cents an hour for any other person in such establishments. The number of persons paid at the rate of twenty-five cents may not exceed 40 per cent of the average number of all the persons employed in any calendar month in the particular establishment.

Any person who is not employed for more than four consecutive hours must be paid at least thirty cents an hour and no person may be paid for less than four hours. The order does not relate to any overtime to which the Hours of Work Act relates and no payment for overtime may be taken into account in computing the minimum wage payable to any employee.

British Columbia Apprenticeship Act

By order in council of October 25, three new trades have been added to the list of trades to which the Apprenticeship Act applies. These comprise the trades of pattern-maker, boilermaker and of persons employed in automobile maintenance, including painting and finishing, trimming, including fabric tops, upholstering and interior furnishings on automobiles, and radiator work.

British Columbia Hours of Work Act

The British Columbia Board of Industrial Relations has made two orders under the Hours of Work Act continuing in force until September 30, 1938, special exemption for persons employed in shops and drug stores. The regulations first became effective in 1934 and have been re-issued annually since that year.

They exempt from the statutory limit of eight hours a day persons employed in wholesale and retail stores in any part of the province except Vancouver, Victoria, Burnaby, Esquimalt, Oak Bay and Saanich and permit them to work three additional hours on Saturdays and on the day preceding a statutory holiday when the holiday occurs on a Saturday. There is no exemption from the statutory 48-hour week in such cases.

Persons employed in drug stores as apprentices, certified clerks or licenciates in pharmacy are exempt from both the daily and weekly limit but may not be employed more than nine hours a day or more than 52 hours a week.

Ontario Factory, Shop and Office Building Act

Regulations for the control of dust in factories were issued in Ontario on July 22. These orders under the Factory, Shop and Office Building Act, 1932, apply to all factories under the Act and require the removal of dust by vacuum, wet sweeping, wet shovelling or other method approved by the factory inspector. All ventilation systems for the control of dust, including dust-collecting systems, must be constructed in accordance with the established engineering principles for the purpose for which they are to be used and must be approved by the inspector. Air exhausted from any process generating silica dust must be discharged

outside the factory so as not to create a health hazard and must not be returned to the factory. Equipment used in processes producing dust or controlling dust must be kept in good condition.

Special regulations apply to abrasive blasting and similar operations used for cleaning or processing industrial materials inside the factory. All such operations must be carried on in "blasting enclosures" so made and ventilated that no dust can escape into the surrounding atmosphere. A sufficient volume of air must be drawn through the blasting enclosure to enable the air to be changed rapidly and the dust removed after the operation has ceased. Helmets must be supplied by the employer and worn by workmen engaged in such operations. Helmets must be supplied with air provided by an externally-lubricated, low-pressure device used only for such purpose or by other means as directed by the inspector. The air supply to the helmet must be sufficient to prevent the entrance of dust and must be maintained at a satisfactory temperature.

Where the mechanical means for removing dust prescribed by the regulations are impractical in the opinion of the factory inspector, the employer may be required to provide the workmen with filter masks approved by the inspector. Any employer may be required by the inspector to take such additional measures to prevent the production or dissemination of dust as he deems expedient. All dust-producing operations must be ventilated to the satisfaction of the inspector and the latter must be satisfied that the regulations are being carried out.

Ontario Industrial Standards Act

An order in council of September 29 lays down general regulations for the carrying out of the Industrial Standards Act. An employer to whom the regulations apply is defined as an employer within the scope of the Act "who either habitually or in the ordinary course of his business employs a person or persons to do any kind of work which is governed by any schedule of wages and hours and days of labour."

An employer who is bound by such a schedule is required to keep a record of the following: the names and addresses of his employees; the number of daily and weekly hours worked by each; the number of hours of overtime and the number during which an employee was engaged in work at any time other than during the regular working day as set out in the schedule; the wages received by each employee on each pay day and the rate on which they were calculated; particulars of the nature of the work performed by each employee and its location; the quantity of piecework done by each employee and the rate paid per piece; the amount received by each employee working on a commission basis and the rate of the commission; such further information on the above matters as the Labour and Industry Board may require.

Every person who performs work governed by a schedule under the Act and who is not working under an employer who is obliged to keep the above records must, himself, keep such records.

All records must be retained for at least one year and be available for inspection at any time. For the purpose of obtaining information for the proper enforcement of a schedule or for the verifying of records, any person acting under the authority of the Act or of any schedule may enter at all reasonable times the premises of any employer or other person who is required to keep records and any place where work is being done which is governed by a schedule.

The Labour and Industry Board may require an employer to pay to the Board the arrears of wages owing to any employee and the Board in its discretion may direct that the whole or any part of such wages be forfeited to the Crown or paid to the employees concerned.

Each of the advisory committees concerned with the application of the schedules must keep minutes of its meetings and provide the Board with a copy. Wherever an advisory committee makes a decision it must at once communicate the decision to the employer and employees concerned. Any person wishing to appeal must give written notice to the Labour and Industry Board within ten days of the decision from which he is appealing or within not more than thirty days if the Board grants such further extension of time. The Board is to fix the time and place for hearing the appeal and give reasonable notice to all the parties. The Board may affirm or alter the decision of the committee, transmitting to the latter a copy of its decision with such reasons and explanation as it may consider necessary.

Ontario Operating Engineers Act

Under the Operating Engineers Act, 1937, of Ontario, regulations have been made rescinding those issued in 1932. The new regulations contained in an order in council of September 29, 1937, reproduce with some revision the former provisions concerning the qualifications of examiners, the grades of operating engineers and firemen, their duties and qualifications, fees for examinations, conditions on which

certificates are issued, cancelled or suspended, and general regulations governing the operation of plants according to the horse power or other conditions. A new provision enables the Minister to issue, to the owner of any plant to which the Act applies, a certificate of registration showing the total horse power of the plant.

Quebec Fair Wage Board

In Quebec, the Fair Wage Board has recently issued its first orders. Order No. 1, which came into effect on October 23, 1937, provided that the orders of the former Women's Minimum Wages Board fixing minimum wages to be paid to certain classes of female workers should remain in force until modified or replaced. It was pointed out in the order in council that it was desirable to put the orders of the former board in the form of orders of the new Fair Wage Board in order to insure their observance and enforcement.

Order No. 2, which is to come into force on November 20, 1937, stipulates that the "wages to be paid to male wage earners, even when not replacing female workers, shall not be less than the wages paid to female workers when performing the same duties. The hours and working conditions shall also be the same for male and female workers" and the proportion of workers permitted at each of the established rates shall be applied separately to male and female workers. The Women's Minimum Wage Act, which was repealed by the Fair Wage Act, contained a section stipulating that no male worker should be employed at work which was ordinarily done by women at a lower salary than that fixed by the minimum wage order applying to such work.

These two orders of the Fair Wage Board are designed to maintain the position as to minimum wages for women until the Fair Wage Board has had opportunity to consider revision of the earlier minimum wage orders.

Order No. 3 of October 14 exempts from the minimum wage order applying to commercial establishments temporary employees especially engaged in addition to the regular staff for the Christmas trade. From November 1 to December 31 of each year, such employees in retail and wholesale stores on the Island of Montreal may be paid not less than 20 cents an hour and in other parts of the Province not less than 15 cents an hour. It is stipulated, however, that the temporary employees so engaged must be employed for not less than 30 hours in the Montreal district and for not less than 40 hours in the rest of the Province. Lists of the regular employees and of the temporary employees to whom this exemption applies must be furnished by employers to the Fair Wage Board.

INDUSTRIAL RELATIONS PLANS OF CANADIAN COMPANIES

Employees Welfare Programs of Noranda Mines Limited and Northern Electric Company Limited

INDUSTRIAL relations plans of Noranda Mines Limited and the Northern Electric Company Limited have been outlined in pamphlets recently issued by the respective companies.

Insurance, Savings and Pension Plan of Noranda Mines Limited

The Insurance, Savings and Pension Plan of Noranda Mines Limited was established early this year, the plan becoming effective as and from March 1, 1937, provided that at least seventy-five per cent of the employees then eligible, agreed to contribute before that date.

Eligibility.—According to the pamphlet issued by the Company outlining the plan, all present employees who had been continuously employed by the Company for at least six months prior to March 1, 1937, were eligible to become contributors from that date. All present employees who were not eligible on March 1, 1937, and all new employees will become eligible to contribute on the March 1 or September 1, which next follows the completion of six months' continuous service.

Contributions.—Each employee who becomes a contributor is required to contribute semi-monthly $1, $2 or $3 whichever amount he decides upon at the time that he becomes a contributor, the amount being deducted from each pay of the contributor.

Any contributor has the privilege of changing the amount of his semi-monthly contribution to either of the other two amounts, on March 1 of any year, provided he gives notice to the Company of his intention to do so at least one month prior to that date.

The Company also contributes each month an amount equal to the contribution made by each employee for that month.

The contributions of the employee and the Company for each month are to be paid monthly by the Company to an Assurance Company. The assurance company will add interest upon all contributions commencing on March 1, next, following their receipt by the assurance company, at a rate of interest to be declared from time to time, but in any event at a rate of not less than three per cent per annum up to March 1, 1947, and not less than two and one-half per cent per annum thereafter in respect of contributions made prior to March 1, 1947. The contributions so accumulated in respect of each contributor, plus whatever dividend, if any, is allotted by the Assurance Company in respect of such contributor is to be used by the Assurance Company to pay the pensions provided in the plan.

Pensions.—Pensions are payable to each contributor upon leaving the service of the Company provided he has completed five or more years of continuous service with the Company.

There are four methods in which the contributor may elect to receive his pension; (*a*) in monthly instalments guaranteed for a period of ten years and as long thereafter as he shall live; (*b*) a cash payment of one-half of the accumulated fund then at the contributor's credit, and in addition he may receive a pension by way of monthly payments which will be paid for ten years guaranteed and as long thereafter as he shall live; (*c*) on retirement the contributor may receive, with the consent of the Company, the accumulated fund then to his credit in sixty equal monthly payments guaranteed or one-half of it in cash and the other half in sixty equal monthly payments guaranteed; (*d*) or, he may, with the consent of the Company, select such other form of pension as the Assurance Company may be willing to pay, for example, a pension which continues a portion of the payments to a dependent upon the pensioner's death. It is provided that any contributor who, at the time of leaving the service of the Company, has attained the age of sixty years, and in respect of whom the total accumulations amount to $3,000 or more, can only receive a pension under section (*a*) of the above mentioned plan. The age of the employee at the time that a pension becomes payable and the total accumulated fund then at his credit arising from contributions made by and for him will also determine the amount of any payments payable under any of the pension plans.

Withdrawals.—It is provided that any contributor who leaves the service of the Company before he has completed five years of service, shall receive from the Assurance Company, either in a lump sum in cash, or in monthly payments, an amount equivalent to his own contributions with such interest as has been added thereto, the amount contributed by the Company with such interest as has been added thereto to be refunded to the Company.

Death Benefits.—In the event of the contributor dying while in the service of the Company, an amount equal to the total accumulated Fund at the contributor's credit with the Assurance Company will be paid in one hundred and twenty monthly payments to the person designated by the employee, or to his legal heirs if no designation is made.

Group Life Assurance.—The Company has made arrangements with the Assurance Company for that company to issue a group life assurance policy upon the employees in the service of this Company who participate in the Plan, and in respect of each contributor the Assurance Company will issue a certificate of group life assurance for $1,000 when the employee has paid his first contribution. Under the policy $1,000 will be paid by the Assurance Company in one initial payment of $280 cash and twelve subsequent monthly instalments of $60 each, upon the death of the employee while in the service of the Company and is a contributor to the Plan, to whatever beneficiary may be named by such employee or to his legal heirs as the case may be.

If the contributor leaves the service of the Company he may take out an individual policy of assurance upon his life for $1,000 upon payment of the standard premiums due in respect of such policy.

The cost of this group life assurance will be paid entirely by the Company and is in addition to the contributions made by it to the Savings and Pension Plan. In case the employee should cease to make his contributions to the Savings and Pension Plan by reason of illness, accident, or other similar causes, all of which must be established to the satisfaction of the Company, the Company may, but is not obliged, to keep such group life assurance in force in respect of that employee during the period of such cessation.

The assignment of benefits under the plan is not permitted.

Amounts of Pension.—In illustrating the amounts of pension payable to contributors a table indicates the amounts of monthly pension payable to a male employee for ten years guaranteed and as long thereafter as he shall live, based on the accumulation in the Savings and Pension Fund of $1,000. On this basis the table shows that if an employee

retired at 40 he would receive a pension of $4.28 a month; at 50 a pension of $5.01 and at 65 a pension of $6.82.

A further illustration of the possible amount of pension payable is also given in the outline of the plan as follows:

"For example, suppose a male employee becomes a contributor to the plan at age 30 and leaves the service at age 65 after having contributed at the rate of $6 a month during 420 months (35 years). The Company will also have contributed during this period $6 each month on the employee's behalf. At the time of leaving the service, the total accumulation in the Savings and Pension Fund standing to the employee's credit will be $8,706.54 at the assumed rate of interest of 3 per cent. If the whole of this amount is applied towards a pension payable in the manner above, the monthly amount of this pension will be $6.82, multiplied by 8,706·54 and divided by 1,000 or $59.38."

Employee Pensions, Disability, and Death Benefits Plan of the Northern Electric Company Limited

The Northern Electric Company issued recently an amended Employees' Pensions, Disability and Death Benefits Plan, a brief summary of which follows:

On April 1, 1920, the Northern Electric Company established a fund to be known as the "Employee Pension and Death Benefit Fund," the intention of the Company being "as far as possible to maintain this fund by periodic charges to operating expenses and payments to the fund with the object that when an employee becomes eligible under the plan to receive a certain pension there may be available in the pension fund an amount sufficient to provide for him a pension in the amount set out in the then existing regulations under the plan."

Under the amended plan, the Company further undertakes "to make provision out of the revenues of the Company for the payment of definite amounts to its employees when they are disabled by accident or sickness, or, in the event of death, to their beneficiaries."

Employee Benefit Committee.—A Committee of five persons appointed by the Board of Directors to be known as the "Employee Benefit Committee" is charged with the administration and carrying out of the object of the plan, and is empowered to authorize the payment of Employee Service Pensions and to arrange for the payment of Employee Disability Benefits and Death Benefits in accordance with regulations set forth in the plan. The expenses of this committee in administering the plan are borne by the Company.

Pensions.—All service pensions granted are to be paid from the Pension Fund, while all Disability Pensions are to be charged to the operating expense accounts of the Company.

There are four classes of pensions, three classes of service pension and a Disability Pension Class which are outlined as follows:

Class "A" Service Pension.—On and after April 1, 1920, all male employees who have reached the age of sixty (60) years and whose term of employment has been twenty (20) or more years, and all female employees who have reached the age of fifty-five (55) years and whose term of employment has been twenty (20) or more years, may, at their own request, or at the discretion of the Committee, be retired from active service and become eligible for pensions. These pensions are called Class "A" Service Pensions.

Class "B" Service Pension.—All male employees who have reached the age of fifty-five (55) years and whose term of employment has been twenty-five (25) or more years, and all female employees who have reached the age of fifty (50) years and whose term of employment has been twenty-five (25) or more years, may, at the discretion of the Committee and with the approval of the President or Vice-President, be retired from active service and granted a pension. These pensions are called Class "B" Service Pensions.

Class "C" Service Pension.—All male employees who are less than fifty-five (55) years of age and whose term of employment has been thirty (30) or more years, and all female employees who are less than fifty (50) years of age and whose term of employment has been thirty (30) or more years, may, at the discretion of the Committee, and with the approval of the President or Vice-President, be retired from active service and granted a pension. These pensions are called Class "C" Service Pensions.

Class "D" Disability Pension.—At the discretion of the Committee and with the approval of the President or Vice-President, any employee who becomes totally disabled as a result of sickness or injury, other than by accidental injury arising out of and in the course of employment by the Company, and whose term of employment has been fifteen (15) years or more, may be retired from active service and granted a pension. If a pension is granted, it shall be for such period as the Committee may determine and if at any time during such period the employee recovers sufficiently to resume active service or for any other good and sufficient reason, the pension may be discontinued by the Committee. If the employee re-enters the service of the Company at the time such pension is discontinued, he shall thereupon be eligible for benefits under these regulations, and the period of absence on pension shall be considered as a leave of absence without credit for time absent. These pensions are called Class "D" Disability Pensions.

Amount of Pension.—The plan provides that the amount of the annual pension in any of the above cases is one per centum (1%) of the average annual pay during the ten consecutive years of service during which the retired employee received the highest pay, multiplied by the number of years in the employee's term of employment. The mini-

mum pension for Classes "A," "B" and "C" Service Pensions is thirty dollars ($30) per month. A Class "D" Disability Pension, at the discretion of the Committee, may be less than thirty dollars ($30) per month (only when the employee's service is less than twenty (20) years), but not less than the computed allowance. The pension, in cases where the days or hours constituting the employee's normal service have not, in the opinion of the Committee, been adequate to constitute full time service during the number of years required to establish eligibility to pension in the class under which the employee is retired, may, at the discretion of the Committee, be less than thirty dollars ($30) per month, but not less than the computed allowance.

Term for which Pensions are Granted.—Service pensions granted to employees continue from date of retirement to death of pensioner but disability pensions continue for such period only as the committee may determine in each case from time to time. Further payments, if any, which may be made to a beneficiary of a deceased pensioner are provided in accordance with certain regulations.

Qualifications for Service and Disability Pensions.—According to the regulations set forth in the plan, the committee will furnish the president of the company on January 1 and July 1 of each year with a list of employees qualified to receive service pensions and also with a list showing those employees who will be qualified to receive pensions during the next twelve months.

All employees are qualified to receive payments on account of physical disability to work by reason of accidental injury arising out of and in the course of employment in the company.

Disability Benefits. The following are the rates of accident disability benefits as set forth in the plan:—

Total Disability.—Full pay for any period of total disability during the first thirteen (13) weeks of disability and half pay for any period of total disability after the first thirteen (13) weeks of disability, provided, however, that after the expiration of six (6) years of disability payments, the benefits shall not exceed twenty dollars ($20) a week.

Partial Disability.—For any period of partial disability, during the first thirteen (13) weeks of disability, one hundred per centum (100%) of the difference between full pay at time of injury and wages which, in the judgment of the committee, the employee is capable of earning; for any period of partial disability after the first thirteen (13) weeks of disability, fifty per centum (50%) of the difference between full pay at time of injury and wages which, in the judgment of the committee, employee is capable of earning, provided, however, that no payments for partial disability shall be made after the expiration of six (6) years of disability payments.

Provision is also made for the permanent loss of "a bodily member or its use"; and the changing of benefits due to a change in disability, i.e., if after a period of partial disability the disability becomes total, the amount of benefit will be changed accordingly.

Sickness Disability Benefits.—After a term of employment of two years all employees of the company are qualified to receive payments on account of physical disability to work by reason of sickness.

The amount of sickness benefits vary in accordance with the number of years of employment. For two but less than three years' employment the sickness benefit is computed at four weeks "full pay" and nine weeks "half pay" and for ten years of employment and over the sickness benefit would be thirteen weeks "full pay" and thirty-nine weeks "half pay."

All sickness disability benefits are charged to the operating expense accounts of the company when and as paid.

Death Benefits.—Under the plan certain provisions are made for the payment of death benefits to beneficiaries.

In the event of the death of any employee resulting from sickness and if the employee's term of employment has been two years or more, a sickness death benefit will be paid to certain beneficiary or beneficiaries as defined in the regulations. The minimum sickness death benefit is $250 and the maximum sickness death benefit is determined in accordance with the employee's number of years of employment. If an employee has worked two but less than three years the maximum is four months' wages, and for a period of employment of ten years and over the maximum sickness death benefit is twelve months' wages.

The plan also provides for death by accident, and other general provisions.

"The Nickel-Copper Mining, Smelting and Refining Industry in Canada, 1936," is the title of a bulletin published recently by the Dominion Bureau of Statistics. According to the report, employees in the industry in 1936 totalled 8,762 and salaries and wages paid amounted to $13,659,972 as compared with 7,009 employees and $11,275,650 and 3,291 employees and $4,853,978 in 1935 and 1926, respectively; the data for 1936 represents, an increase over 1926 of 166 per cent in number of employees and 181 per cent in salaries and wages.

Canadian exports of nickel in all forms in 1936 totalled 173,637,500 pounds valued at $44,594,296, as compared with 142,726,500 pounds worth $36,285,482 in 1935; of the 1936 exports, 50,273,800 pounds were consigned to the United Kingdom and 94,231,000 pounds to the United States.

FIFTY-SEVENTH ANNUAL CONVENTION OF THE AMERICAN FEDERATION OF LABOR

Proceedings Featured by Discussions on Trade Union Unity, and Relationship with C.I.O.

THE opening session of the 57th annual convention of the American Federation of Labor convened on October 4, 1937, at Denver, Colorado.

Following the invocation and addresses of welcome, President William Green delivered his opening address, outlining the procedure followed in previous conventions and expressing the belief that the 57th would measure up and maintain the high standards set by preceding conventions. President Green invited the public to be present at all its sessions to witness "an exhibition of democracy in action."

Referring to the conflict between the A. F. of L. and the Committee for Industrial Organization, the president stated that "the real issue which has divided the ranks of labour and which has attracted the attention of the people everywhere is one clearcut issue, that of democratic procedure and democratic control." This declaration was followed by a short synopsis of what had taken place at the Atlantic City convention in 1935, and the steps that had been taken to bring unity in the ranks of labour following the setting up of the C.I.O. A reference was made by the president to the increase in membership, which he stated would reach almost a million during the past year. Continuing, the speaker said "it is our purpose to avoid industrial conflicts, to promote understanding between employers and employees, to settle wage scales around the conference table through collective bargaining, and when those wage scales are settled, to sign them and pledge their execution on our sacred honour and our sacred word."

President Green reaffirmed the Federation's opposition to "isms," whether Fascism, Nazism or Communism. In opposing the participation of the United States in any European conflict whatsoever, he stated he was voicing the sentiments of the assembled delegates, and he considered it an advanced step when the A. F. of L. became an affiliate of the International Federation of Trades Unions, as it would afford an opportunity for the American Federation to make a contribution to the maintenance of world peace.

Referring to the conflict in the Far East and the killing of non-combatants, the president expressed the opinion that "the liberty-loving people of the world ought to inaugurate a boycott against any nation that persists in such destructive warfare."

Report of Executive Council

In the summarized report of the executive council an outline was given of the achievements of the Federation during the past year as well as some of the aims for the immediate future.

The report of the secretary-treasurer for the year ending August 31, 1937, showed a balance on hand of $586,567.41, of which $533,138.72 was in the defence fund for directly affiliated local unions, and the balance ($53,428.69) was in the general fund. During the fiscal year, $136,937.25 was expended as strike benefits to local trade and federal labour unions.

Total receipts for the year from all sources were $1,184,478.99, while total expenditures amounted to $1,167,317.57, leaving a balance of $17,161.42. At the close of the fiscal year the Federation had in affiliation 1,406 directly chartered local unions, 738 city central bodies, 49 state federations of labour, 4 departments representing 712 department councils, and 100 national and international unions. There were 831,671 new members reported during the twelve months ending August 31, 1937.

Under the heading "Vacation With Pay," the report showed that 746,893 union members already had secured vacations with pay.

According to the United States Department of Labor records, which were quoted in the report, the average hourly earnings in all recorded industries rose from 59 cents per hour in December, 1936, to 64 cents in June, 1937.

Under the caption "Discipline and Orderly Procedure" was recorded in detail the endeavours to heal the breach in the family of labour, and included the communications which had passed between the Federation and C.I.O. The findings of the special conference of national and international unions, which was held in Cincinnati, Ohio, in May, 1937, were also recorded. It was recommended, "in accordance with the law and constitution of the American Federation of Labor, that the convention confer upon your executive council authority and power to revoke the charters of the international unions holding membership in the C.I.O., which were suspended by the executive council on September 5, 1936."

The report recorded the acceptance by the executive council of the application for affiliation "of a large group of workers employed in the metal mines of the Tri-District of

Missouri, Oklahoma, and Kansas," also the acceptance of the application for a charter of the Progressive Miners of America. The formation was noted of two new international unions among cleaning and dye-house workers, and ladies' handbag, pocketbook and novelty workers.

Considerable space in the report was devoted to the injunction proceedings instituted by the International Union of Brewery, Flour, Cereal, and Soft Drink Workers of America against the International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers of America. It was claimed by the executive that the preliminary purpose of the injunction is the setting aside of a decision of the American Federation of Labor, reached in a regular convention of the Federation in 1933. (In the decision referred to, teamsters of brewery firms were placed under the jurisdiction of the International Brotherhood of Teamsters.)

A comprehensive report on the functioning of the National Labor Relations Board since its establishment was made by the executive and the Board was urged "to adhere to the functions for which was set up originally and not interfere in conflicts between rival union organizations."

Among other subjects referred to in the executive report were: Social Security; Labour Standards under Government Contracts; National Legislation; Child Labour; State Labour Legislation; Unemployment; Credit Unions; Education; Affiliation with the International Federation of Trades Unions, and Federation Departments.

Addresses of Fraternal Delegates

Following the presentation of the report of the Audit Committee, President Green introduced the fraternal delegates to the convention. On behalf of the British Trades Union Congress felicitations were extended by John C. Little, president of the Amalgamated Engineering Union, and William R. Townley, president of the National Union of Boot and Shoe Operators.

Representing the Trades and Labour Congress of Canada, Rod Plant, assistant secretary of the Congress, referred to "the long and creditable history of the American Federation of Labor," and to the great influence exercised on the life of Canada by the "traditionally sane and sound policies of the international trade union movement as represented by our Congress."

Mr. Plant mentioned some of the difficulties with which the international trade union movement in Canada is faced and the need for constant vigilance and efforts to offset the activities of such forces which would destroy its effectiveness and influence. The speaker expressed the opinion that "the friendly relationship which exists between the peoples of the United States of America and our Dominion is largely attributable to that spirit of fellowship which has developed throughout the years by the membership of the international trade union movement." Mr. Plant also referred to the sustained growth in membership of the Trades and Labour Congress of Canada during the last three years; the efforts of the Congress to secure legislation respecting the right to organize; the unemployment situation in Canada; and legislation passed by the Federal Parliament to stimulate building.

Reports of Committees

Committee on Organization.—To this committee was referred that part of the executive council's report dealing with the establishing of national councils. The action of the executive in forming a national organization of fabricated kitchen utensil and enamelware workers and an international organization of Bookkeepers, Stenographers, Typists and Assistants, as well as the calling of a conference for the purpose of forming an international union of Agricultural, Packing House and Cannery Workers, was approved by the committee, and the report adopted by the convention.

Committee on Legislation.—The report of this committee drew attention to that section of the executive report dealing with "National Legislation," and referred to "the first session of the 75th Congress as one of the most remarkable in history and at the same time disappointing in the failure to pass legislation of interest to the nation and to wage earners." The committee report called upon organized labour to support the efforts of the A. F. of L. in securing action during the second session of the 75th Congress. The convention was asked to "register emphatic support of legislation for the purpose of removing from society the blot of lynching."

Committee on Law.—This committee recommended the following additions to the Constitution:

(1) Making provision for the calling of special conventions of the American Federation of Labor.

(2) Levying of assessments when and as ordered by a majority vote of a convention.

(3) Empowering the president to discipline state federations, city central labour unions, and local and federal labour unions, including authority to suspend and/or expel any officer or member thereof, and/or to suspend and/or revoke their charter subject first to an appeal to the executive council and thereafter to the next regular convention immediately following.

(4) Changing the method of voting of delegates to central labour unions.

A resolution presented by delegates representing Amalgamated Association of Street, Railway and Motor Coach Employees of America, seeking an amendment to the constitution of the Federation to authorize the issuance of an industrial union charter to that organization was referred to the executive council.

The report of the committee was adopted.

Committee on Shorter Work Day.—In addition to concurring in a resolution for a shorter work week for Panama Canal and Panama railroad employees, the committee on the shorter work day presented the following recommendations which were approved by the convention:—

(1) That this convention strongly reaffirm its endorsement of the five-day week and the six-hour work day without any reduction in hourly, daily, or weekly pay.

(2) That this objective of the five-day, six-hour work week be declared the paramount objective of this convention, and that the officers of the American Federation of Labor be instructed to spare no effort to insure steady and certain progress toward the attainment of this great objective and of enlisting the support of all the people in its behalf.

(3) That the executive council, in seeking to further the more general adoption and observance of the shorter work week, through legislative enactments and otherwise, exercise the utmost diligence to protect and safeguard the accomplishments of established unions by maintaining intact the rights of collective bargaining.

Committee on Education.—Dealing with the subject of vocational education this committee emphasized, the necessity of all affiliates of the Federation, especially state federations and central bodies, becoming more actively interested in, and insistent upon the rights of labour and the general public in vocational education as well as all educational activities. Labour education committees were advised to watch carefully the conditions under which the public schools are administered. Affiliated bodies of the Federation were asked to use their best efforts to prevent the unjust dismissal of teachers and to co-operate in the reinstatement of teachers who have been unjustly dismissed for exercising their rights of academic freedom. The president and executive council were urged to further concentrate upon research, educational and publicity activities.

The report of the committee was adopted.

Committee on Credentials.—On October 12, or the seventh day of the convention the committee on credentials brought in a supplementary report dealing with the protest of the United Brotherhood of Carpenters and Joiners against the seating of Charles P. Howard, president of the International Typographical Union. In presenting its report the committee reviewed the case in detail and recommended that—(1) The right and the power of a duly constituted convention to discipline a delegate is absolute; (2) the right and the power of a duly constituted convention to deny a person a seat as a delegate to the convention is absolute, even though such person presents proper credentials from a duly accredited and affiliated organization.

Considering that the convention had the legal right to deal with this question, the committee sustained the protest of the Carpenters' organization and refused to seat Mr. Howard. After a lengthy discussion the report of the committee was adopted by a roll-call vote of 25,376 votes to 1,245.

Committee on Resolutions.—To this committee was referred that portion of the executive council's report dealing with the issuance of charters to the Progressive Miners and to the Zinc and Lead Miners of the Tri-District of Missouri, Oklahoma and Kansas. The committee's recommendation of approval of the action of the executive was adopted unanimously by the convention.

In considering that section of the executive council's report on "Discipline and Orderly Procedure" the committee included two resolutions dealing with the division in the American labour movement. One of these urged the calling of a unity conference for the purpose of developing plans to project a referendum on industrial union organizations of the mass production industries and the question of the unity of the A. F. of L. and the C.I.O. The other resolution favoured the calling of a national convention of all bona fide trade unions, including the A. F. of L., the C.I.O., the railroad brotherhoods and genuine independent unions, for the purpose of considering the problem of creating a united labour movement satisfactory to all parties concerned.

Besides approving the executive council's report on this important question, the committee made some observations and additional recommendations. Reference was made to the program adopted by the previous convention for the purpose of bringing about unity in the ranks of the organized labour movement. The committee stated that "while the approved recommendations of a year ago have been carried out as far as possible and in good faith, unity has not been restored." It was alleged that shortly after the last convention the C.I.O. began to raid the unions of the A. F. of L., confiscate their funds and intimidate the members. But according to

the committee the "most regrettable of all is the fact that the president of an international union having membership in the American Federation of Labor and who is and has been from the beginning the secretary of the C.I.O., made personal pledges as secretary of the C.I.O., that the membership of established unions would not be raided and that organization of the unorganized would continue as the sole objective of the C.I.O." It was further alleged "that not only have those promises been broken wholesale and on every hand," but that the same officer "has himself caused or allowed his personal signature to appear on charters issued to unions created out of membership raided from our established unions, or unions formed dual to our bone fide organizations." It was claimed by the committee that "the issue of industrial unionism, raised a year ago and two years ago as the banner of a holy crusade, has been shown to be nothing but a sham."

Special mention was made of the United Mine Workers of America, the Amalgamated Clothing Workers of America, the International Ladies' Garment Workers' Union and the United Textile Workers of America and the committee expressed its belief that the memberships of these unions could not condone the actions of their leaders and that their wish was to be within the fold of the Federation. Believing this to be so, the committee made the following recommendations:

(1) Continuation of the special committee for peaceful negotiations.

(2) That the executive council be given full power as provided in Sec. 12, Article 9, of the constitution to revoke the charters of any or all of the organizations which refuse to return to the ranks of the movement as represented by the Federation, so that this power may be used constitutionally and with discretion but without hesitation the moment its use becomes necessary.

(3) The enlargement and strengthening of our machinery of non-partisan political activities so that the political strength of the American Federation of Labor and its renewed determination to support its friends and defeat those in public office who would oppose its policies and programs will embrace all who would in any way favour, encourage or support the C.I.O.

If all efforts to bring about peace prove unavailing the committee in closing its report calls for "war against autocracy, rebellion, and an alliance of American greed and alien communism" and pledged the movement "to bring to a quick and decisive close, so far as lies within our power, this internecine warfare."

After many delegates had spoken for and against the report of the committee a roll-call vote was taken, the result being 25,616 votes for and 1,227 against.

In reporting on a resolution submitted by delegates from the Boot and Shoe Workers' Union, the Committee on Resolutions included that part of the executive council's report under the caption, "National Labour Relations Board." After recounting the efforts of the Federation to secure this legislation and reviewing the functions of the Board, the committee charged that "the National Labour Relations Board through its regional representatives, has attempted to destroy the validity of contracts entered into between legitimate labour organizations and their employers. These actions by the National Labour Relations Board and its regional representatives have been committed without warrant or authority, and in violation of the spirit and specific intent of the National Labour Relations Act, with damage to the A. F. of L. units and to the decided advantage of the C.I.O. affiliates." For these and other reasons the committee recommended:

(1) That this Fifty-Seventh Convention of the American Federation of Labor instruct its officers and the Executive Council to promptly assemble all of the facts and the evidence in proof of the mal-administration of the National Labour Relations Act, so that the rights of employees, together with the basic rights of trade unions may be protected, and so that Congress may be requested to amend this Act so as to prevent hereafter the usurped authority now being exercised by the Board and its agencies.

(2) That the President and the Executive Council be authorized and instructed to seek immediate correction of the deplorable, disruptive and destructive condition above referred to, by petitioning the President of the United States for prompt and adequate relief.

(3) That the amendment to the Act proposed by the Executive Council be approved by this convention and that portion of the Executive Council's report be concurred in.

The report of the committee was adopted.

Other Adopted Resolutions

The recommendations contained in some of the resolutions adopted were as follows:—

Protesting importation of foreign painted theatre scenery.

Granting to the Union Label Trades Department authority to review applications for approval of union labels, shop cards and buttons.

Seeking legislation that will give employees the right to organize and bargain collectively through representatives of their own choosing.

Endorsing the work of the United States federal committee on apprentice training and asking State Labour Departments to implement the Federal standards.

Favouring ratification of conventions of the International Labour Organization.

Supporting efforts to secure legislation prohibiting industrial homework—the sweatshop.

Favouring the observance of Labour Sunday (Sunday preceding Labour Day).

Calling for searching examination of legislation establishing boards or commissions having power to determine questions of minimum wage

and maximum hours or any other phase of the relationship of employer and employee.

Recommending a thorough study of credit unions.

Commending the principle and practice of consumer's co-operation to all wage earners.

Boycotting of Japanese products.

Protesting displacement of navy yard employees by relief workers.

Approving the establishment of a council of federal labour unions.

C.I.O. Requests a Conference with A.F. of L.

A message from the Committee for Industrial Organization, (then in session in Atlantic City, N.J.), extending an invitation for a committee of 100 from the A.F. of L. to meet a like number from the C.I.O. for the purpose of discussing a settlement of existing differences, was read by President Green.

In its reply the executive council intimated that the special committee appointed some time ago with full authority stood "ready and willing and anxious" to meet a similar committee representative of any or all of the organizations associated with the C.I.O. for the purpose of attaining peace and unity in the ranks of organized labour. It was further intimated that the committees could be somewhat enlarged but not to the extent of 100 from each side. (This conference is dealt with on page 1178 of this issue.)

Election of Officers

The officers elected were: President, William Green, Washington; first vice-president, Frank Duffy, Indianapolis; second vice-president, Thomas A. Rickert, New York; third vice-president, Matthew Woll, Washington; fourth vice-president, John Coefield, Washington; fifth vice-president, Arthur O. Wharton, Washington; sixth vice-president, Joseph N. Weber, New York; seventh vice-president, G. M. Bugniazet, Washington; eighth vice-president, George M. Harrison, Cincinnati; ninth vice-president, Daniel J. Tobin, Indianapolis; tenth vice-president, Harry C. Bates, Washington; eleventh vice-president, Edward J. Gainor, Washington; twelfth vice-president, William D. Mahon, Detroit; thirteenth vice-president, Felix H. Knight, Kansas City; fourteenth vice-president, George E. Browne, New York; fifteenth vice-president, Edward Flore, Buffalo; secretary-treasurer, Frank Morrison, Washington.

Fraternal delegates to the British Trades Union Congress, P. J. Morrin, president of the International Association of Bridge, Structural and Ornamental Iron Workers, St. Louis, Mo., and Daniel J. Tobin, president of the International Brotherhood of Teamsters, Indianapolis, Ind.

Fraternal delegate to the Trades and Labour Congress of Canada, Joseph J. Kehoe, Amalgamated Association of Street and Electric Employees of America.

Houston, Texas, was selected as convention city for 1938.

REVISED PROCEDURE FOR COUNTING UNEMPLOYED IN GREAT BRITAIN

The revised procedure for counting the unemployed in Great Britain is given in the October issue of *The Ministry of Labour Gazette*.

It points out that "as was announced by the Minister of Labour in reply to a question in the House of Commons on July 29, 1937, the method of taking the count of the unemployed has been revised, with the object of ensuring, with closer accuracy, that persons on the Employment Exchange registers, but not actually unemployed on the day of the count, are not included in the total.

Indicating the details of the new basis, *The Ministry of Labour Gazette* states:—

Until the revised method was introduced, a person had been counted as unemployed, for the purpose of the statistics of employment and unemployment, if, on the day of the count, his registration documents were included in the live files of an Employment Exchange. For many years it has not been practicable, or necessary, to require daily attendance at an exchange to furnish proof of unemployment or maintain registration, and attendance has generally been limited to two or three days in the week. At a large number of offices attendance has not been required on Monday—the day of the week on which the count is invariably taken. For convenience of internal working it was accordingly necessary to adopt some rule for determining at what point documents should be removed from the live files, and, in cases where there was no specific evidence that employment had been obtained, each individual was treated as being on the live register if he had attended at the exchange within the last three consecutive days (including the day of the count).

This meant, in a number of cases, that although there was no positive evidence of unemployment on the day of the count, some persons were counted as unemployed on that day if they had attended at the exchange on the preceding Friday, which is a common day of attendance, or on the preceding Saturday. The adoption of this kind of rule simplified considerably the work of the exchanges, but it had the effect of inflating the figures of unemployment by including some persons who were not in fact unemployed on the day of the count.

It has not been easy to find a remedy for this position without disproportionate expense and interference with the normal work of the exchanges, but what appears to be a satisfactory method of doing so at small cost has now been found. It consists essentially in marking spe-

cially the cases of uncertainty and ascertaining, in the week following the day of the count, as in the majority of cases it is possible to do, whether the day of the count was in fact a day of unemployment. The cases in which it was not a day of unemployment are then to be excluded from the figures. This procedure necessarily increases by one week the interval between the day of the count and the publication of the figures. As a rule the figures will in future relate to a Monday near the middle of each month.

In making this change the opportunity has been taken of introducing uniformity into the method of taking the count, and including certain cases in which persons on the register, and unemployed on the Monday, have not been included owing to the special manner in which their unemployment is recorded.

In order to ascertain as far as possible the effect of the change in procedure, counts were taken on September 13, 1937, by both methods. The total of 1,388,600 persons, aged 14 and over, on the register in Great Britain (including insured and uninsured persons) obtained under the original method was shown to be reduced by 49,396, or 3·6 per cent. The total of 1,315,069 insured persons aged 16-64 recorded as unemployed was reduced by 43,687, or 3·3 per cent.

The percentage rate of unemployment among insured persons in Great Britain was reduced from 10·1 to 9·7.

LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

International Standardization of Statistics of Wages and Hours of Work

An International Conference of Labour Statisticians, composed of representatives from twenty-eight countries in session at the I.L.O., concluded its work recently with the adoption of a proposed Draft Convention aimed at "standardizing" national statistics of wages and hours of work.

It is contended that such standardization is absolutely necessary in order to make an accurate comparison of information which, up to the present, varies in meaning and import from one country to another, and which, in certain countries, is even lacking.

By the proposed convention, the States undertake to compile at intervals, and in the manner indicated, statistics relating to wages and hours of work, to publish the data collected, and to communicate them to the I.L.O. as soon as possible.

These statistics will cover: for the mining and manufacturing industries, including building and construction, on the one hand average earnings of wage-earners, and hours actually worked; and on the other hand, time rates of wages and normal hours of work.

Special provisions are laid down for agricultural wages.

The provisions of the convention will be completed by recommendations intended to extend the scope of its application.

The texts thus drawn up by the Conference of Labour Statisticians may be used as the basis of discussions at the International Labour Conference if the governing body of the I.L.O. decides, as expected, to place the question of statistics of wages and hours of work on the conference agenda.

The United States and I.L.O. Conference Decisions

The Secretary of State of the United States of America recently informed the International Labour Office that the President had transmitted to the Senate on August 19, 1937, the Draft Conventions and Recommendations adopted by the Twenty-first and Twenty-second (1936) Sessions of the Conference.

These decisions were transmitted to the Senate with a request, subject to certain considerations set forth in reports from the interested agencies of the United States Government, which were also transmitted, for the advice and consent of the Senate to ratification of the Draft Conventions and for appropriate action by it, in conjunction with the House of Representatives, to give effect to the Recommendations.

The Secretary of State at the same time also informed the Secretary-General of the League of Nations of the action taken by the United States Government on these decisions.

Visit of I.L.O. Director to the Far East

Mr. Harold Butler, Director of the International Labour Office, Geneva, left on October 28th for a three-months' voyage to Ceylon, Malaya, the Netherlands East Indies, India and Egypt. His voyage, undertaken on the invitation of the British, Egyptian, Indian and Netherlands Governments, is to study social and economic conditions in the countries visited.

Japanese Trade Union Movement and Shorter Hours

The October 25 issue of *Industrial and Labour Information* published by the International Labour Office contains a review of the Japanese Trade Union Movement and the action taken towards the limitation of working hours. The review summarizes the situation as follows:—

At a meeting of the Central Committee of the Japanese Trade Union Federation on July 3, 1937, it was resolved to initiate a movement for the restriction of working hours. As a part of this movement the Committee drew up the request outlined below, which was submitted to the Government.

This document states that in view of the urgent necessity of restricting hours of work, the Federation asks the Government authorities concerned to give immediate effect to the following measures: that hours of work of all persons employed in factories, mines, transport, shops, hospitals, Government offices, etc., be limited to eight in the day, with a maximum of three hours' overtime a day to be worked under special permit in case of urgent necessity, and that there be one compulsory day of rest in the week; and that measures be taken to ensure that this limitation of hours shall not lead to any decrease in wages.

In the statement of reasons accompanying this request, the Federation recalls that in 1934, when the question of so-called "social dumping" was raised, the Government and the National Federation of Industrial Associations issued statements explaining that hours of work had been reduced on an average to about 9½ in the day and that they were unceasingly working for further reduction. Since then, however, following on the increased activity of the munitions industry, hours have been lengthened to more than 12 in the day in nearly all occupations except the textile industry, where the 8½-hour shift is still in operation. In the last two or three years in factories connected with munitions manufacture, working hours have reached 12 in the day with overtime, night work and work before regular working hours, while in extreme cases continuous employment extending over two days at a stretch is being enforced, the average hours thus mounting to 16 or 17 in the day.

Hours and Efficiency.

Side by side with this increase of hours has taken place a great increase of prices, with consequent loss of purchasing power of the workers' wages. As a result, the working masses are impoverished beyond reason, both morally and physically, and industrial accidents have shown a marked increase. It is pointed out that reduction of hours admittedly tends to raise the level of efficiency, as is shown by statistics and by such actual instances as the advance made by the cotton spinning industry since the elimination of night work.

Deficiency of Japanese Legislation.

The document declares that there is no country in the world in which hours legislation is so defective as in Japan. The only persons enjoying protection are women and young persons under 16, for whom the maximum working day is fixed at 11 hours; and even that is far too long. Moreover, the legislation does not cover most of the cases of cottage industry. In the case of adult male workers there is no restriction whatever, in spite of the fact that in other countries both male and female workers have a 48-hour week or an eight-hour day, and in some countries even a 40-hour week.

Conclusion.

After referring to the opportunities missed in the past, the Federation earnestly requests the Government to take such steps as will lead to the speedy enactment of legislation governing working hours, thus placing Japanese industry and labour on a firm foundation.

Immigration to Canada During the First Six Months of 1937

According to a statement issued by the Department of Mines and Natural Resources, immigration into Canada during the first six months of 1937 (ending September 30) totalled 9,272 compared with 7,005 immigrants in the corresponding period of 1936, or an increase of 32·4.

During the period of the year for which statistics are given, 3,115 Canadians returned from the United States, compared to 2,975 in the corresponding six months of 1936.

Of the immigration total, 1,896 were from the British Isles, 1,262 English, 220 Irish, 382 Scotch and 32 Welsh. This compared with 1,410 a year ago.

From the United States came 3,246 compared with 2,835 in the corresponding six months a year ago. Immigration from Europe showed the largest increase. Northern European races contributed 785 persons this half-year, a 54·5 increase, while other races contributed 3,345 persons, or an increase of 48·5 per cent.

Of the immigrant total, 2,261 were adult males, 3,671 adult females and 3,340 under 18 years.

Ontario was the destination of 3,799 of the total; Quebec, 1,555; Manitoba, 1,012; British Columbia, 999; Alberta, 752; Nova Scotia, 479; Saskatchewan, 459; New Brunswick, 173; Prince Edward Island, 33; Yukon Territory, 10; and Northwest Territories, one.

By occupation, the farming class accounted for 2,419; trading class, 723; female domestic servants, 489; mechanics, 483; labouring, 319; and mining, 48.

Canadian asbestos production totalled 301,287 short tons valued at $9,958,183, according to finally revised statistics issued by the Dominion Bureau of Statistics. The output of the mineral during the last calendar year represent an increase of 43·2 per cent in quantity and 41·1 per cent in value over the 210,467 short tons worth $7,054,614 as produced in 1935. The tonnage of shipments in 1936 was only surpassed, in the history of Canadian asbestos mining, by that of 1929 and the total value of sales for the year under review was the highest recorded during the past seven years.

General improvement in the asbestos mining industry in 1936 was strongly reflected in the statistics pertaining to employment. During the year, 2,647 persons were provided with work and $2,642,924 were distributed in salaries and wages; this represented increases over 1935 of 27·8 per cent and 38·8 per cent, respectively.

REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE PERIOD JULY TO SEPTEMBER, 1937

Employment conditions, as indicated by the business transacted by the offices of the Employment Service of Canada during the quarter, July to September, 1937, showed a gain over that of the corresponding quarter last year, as there was an increase of 34 per cent both in vacancies listed and in placements effected. This gain was largely accounted for in construction and maintenance, where relief projects sponsored by the Government had afforded additional opportunity for work. Logging and services also recorded noteworthy increases, while those shown in trade, transportation and mining were not so heavy. The only decline reported was in farming, but this was more than offset by the improved conditions noted in manufacturing.

Provincially, all except Saskatchewan, reported more vacancies and placements than in the corresponding quarter of 1936, the greatest expansion being recorded in Ontario, this due largely to gains in logging and farming. Quebec and British Columbia also showed heavy increases in the construction and maintenance group, where relief placements, chiefly in highway construction, were reported. Reduced employment in farming and construction and maintenance was mainly responsible for the decline shown in Saskatchewan.

From the chart on page 1236 which accompanies the article on the work of the Employment Offices for the month of September, it will be noticed that the curves of vacancies and placements in relation to applications rose slightly during the first half of July, declined somewhat during the latter half of the month, then showed a marked upward trend during August, when once more a downward course was recorded until the end of September, the levels of both curves at the close of the quarter under review being about 19 points higher than those shown at the end of the corresponding period a year ago. During the period July to September, 1937, there was an average of 66·2 vacancies and 62·0 placements for each 100 applications for employment, as compared with 54·3 vacancies and 50·8 placements for each 100 applications during the corresponding quarter a year ago.

The average number of positions effected daily during the present quarter was 1,597, of applications registered 2,413 and of placements effected 1,496, in contrast with a daily average of 1,194 vacancies, 2,198 applications and 1,116 placements in regular and casual employment during the corresponding quarter of 1936.

During the three months July to September, 1937, the offices reported that they had made 118,586 references of persons to positions and effected a total of 115,150 placements, of which 84,238 were in regular employment and 30,912 in casual work. Of the placements in regular employment, 70,017 were of men and 14,221 of women, while casual work was found for 18,584 men and 12,328 women. Records for the corresponding quarter of 1936 showed 85,918 placements, of which 58,111 were in regular employment and 27,807 in casual work. Applications for employment during the period under review were received from 143,003 men and 42,728 women, a total of 185,731, in contrast with a registration of 169,216 persons during the same period in 1936. Employers notified the Service during the quarter July to September, 1937, of 122,968 vacancies, of which 89,886 were for men and 33,082 for women, as compared with 91,897 opportunities for work during the corresponding period a year ago.

In another section of this issue will be found a report in detail of the transactions of the Employment Offices for the month of September, 1937.

EMPLOYMENT AND UNEMPLOYMENT IN CANADA IN SEPTEMBER, 1937

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reported on October 1 was 10,398, the employees on their payrolls numbering 1,197,647 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for September was 1,847, having an aggregate membership of 208,833 persons, 7·7 per cent of whom were without employment on October 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from the 64 offices of the Employment Service of Canada showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

(1) The Employment Situation at the Beginning of October, 1937, as Reported by Employers

Industrial employment at the beginning of October showed a substantial improvement, according to statements received by the Dominion Bureau of Statistics from 10,398 firms, whose staffs aggregated 1,197,647 persons, as compared with 1,174,296 in the preceding month. This increase of 23,351 workers is smaller than that noted at October 1, 1936, but greatly exceeds the average gain indicated between September 1 and October 1, in the sixteen preceding years for which statistics are available. The crude index of employment advanced from 123·2 at September 1, to 125·7 at the beginning of October; this was practically the same as at October 1, 1929, when employment had reached its previous maximum for that date. After correction for seasonal influences, the index increased from 118·1 in the preceding month to 119·8 at October 1, 1937, when it was higher than in any other month since the late summer of 1929.

The unadjusted index (based upon the average for the calendar year 1926 as 100) has been as follows at October 1 in the seventeen years for which information is on record: 1937, 125·7; 1936, 110·1; 1935, 106·1; 1934, 100·0; 1933, 90·4; 1932, 86·7; 1931, 103·9; 1930, 116·2; 1929, 125·6; 1928, 118·8; 1927, 110·3; 1926, 106·5; 1925, 99·5; 1924, 95·0; 1923, 100·7; 1922, 95·8, and 1921, 91·3.

The outstanding feature of the October 1 survey of employment was the unusually pronounced expansion in logging, in which the co-operating firms directly provided work for about 18,600 more men than at September 1; this was a greater gain than at October 1 in any other year for which data are available. Transportation, trade, mining and manufacturing also recorded heightened activity. General improvement in building and highway construction was more than offset by losses in railway construction and maintenance, while the trend was seasonally downward in services.

The records show that for October 1, 1936, 10,020 employers had reported payrolls aggregating 1,044,178 workers, or 28,529 more than at September 1; the most marked improvement had then been in manufacturing and logging, although the trend was also favourable in most of the main industrial groups.

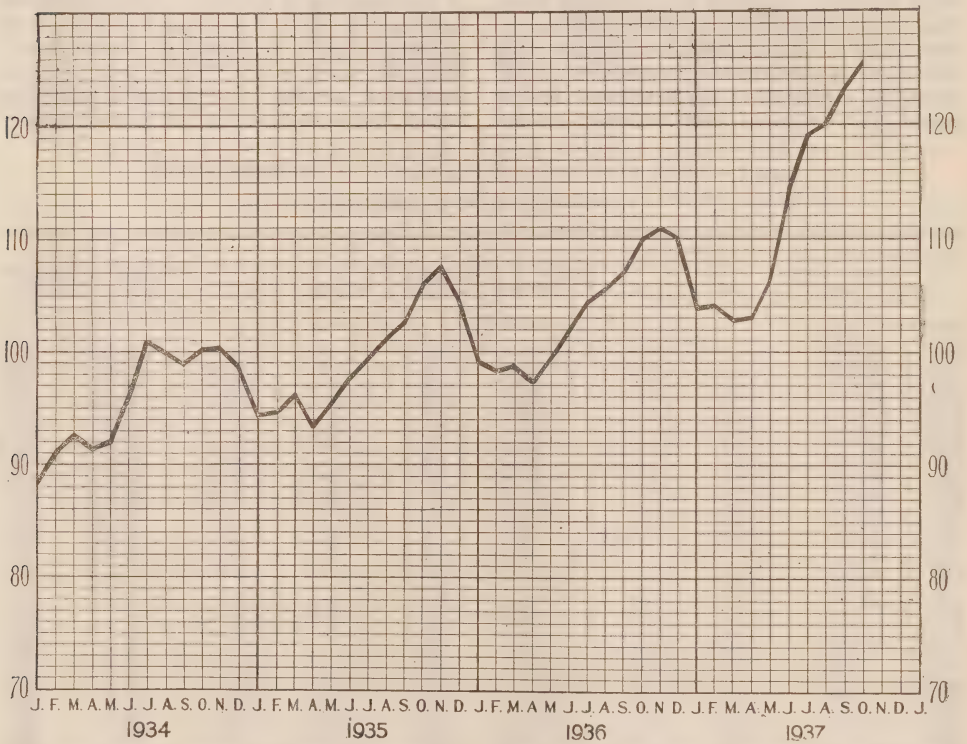
Employment by Economic Areas

Firms in Quebec and Ontario showed considerable improvement, and there were smaller gains in Prince Edward Island and Alberta, but elsewhere the tendency was downward. In the Maritime and Central Provinces, the employment afforded by industrial concerns was at a higher level than at the beginning of October in any other year for which statistics are available; in British Columbia the index for October 1, 1929, only, was higher than at the latest date, while in the Prairie Provinces employment was rather quieter than at the beginning of October of last year, though it was more active than at October 1 in 1932-1935.

Maritime Provinces.—A moderate decline was indicated in the Maritime Provinces, where the 719 co-operating employers reduced their payrolls from 97,762 persons at September 1, to

97,378 at the beginning of October. The general loss was smaller than the average decrease which has been reported at October 1 in the years since 1920. The index, at 134·9 at the latest date, was seventeen points higher than at October 1, 1936, when the trend had been favourable. Manufacturing as a whole showed a slight falling-off at the beginning of October, 1937, as compared with the preceding month, mainly in animal food, lumber and iron and steel plants, while vegetable food, chemical and some other lines were busier. Among the non-manufacturing groups, logging afforded greatly increased employment of a seasonal character, and there were smaller gains in mining and transportation. On the other hand, construction and hotels and restaurants showed curtailment.

The following shows indexes for each of the Maritime Provinces in the last five months:—



Provinces	Relative Weight	Oct. 1 1937	Sept. 1 1937	Aug. 1 1937	July 1 1937	June 1 1937
		Index Numbers (1926=100)				
Prince Edward Island	1·9	100·6	87·9	85·2	79·7	82·0
Nova Scotia	52·4	132·7	133·5	131·5	138·3	124·3
New Brunswick	45·7	139·5	140·5	140·8	136·1	121·4
Maritimes	100·0	134·9	135·4	134·3	135·8	122·0

The 697 firms furnishing data for October 1, 1936, had employed 84,721 persons, a number substantially higher than in the preceding month.

Quebec.—Activity again advanced in Quebec. The expansion took place chiefly in logging, with smaller gains in trade and transportation. On the other hand, manufacturing, services, mining and construction reported reduced activity, the losses in the last-named being considerable. Within the group of factory employment, there were increases in textile, food, rubber and non-ferrous metal works, but employment declined in lumber, leather, pulp and paper, electric light and power, iron and steel, and non-metallic mineral plants. Statistics were compiled from 2,484 firms in Quebec with 354,662 workers, compared with 346,936 at the beginning of September. A rather larger

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

Note.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

advance had been noted at October 1, 1936, but the improvement at the latest date was decidedly greater than average, according to the experience of the last sixteen years. The index rose from 124·5 at September 1, 1937, to 127·3 at the date under review, when it was over twenty-one points higher than at October 1, 1936. Returns were then tabulated from 2,368 establishments having 293,665 men and women in their employ, as compared with 285,522 in the preceding month.

Ontario.—The trend was again upward in Ontario, according to 4,601 employers of 508,066 persons, 21,055 more than at the beginning of September. A smaller gain over the preceding month had been reported at October 1, 1936, when the index, at 112·6, was decidedly lower than at the latest date, viz., 130·4. While the movement in employment has usually been favourable at the beginning of October in past years, the expansion at the date under review considerably exceeded that indicated, on the average, between September 1 and October 1, 1921-1936. Manufacturing, as a whole (particularly in textile and iron and steel factories), logging, mining, trade and construction and maintenance showed heightened activity at the date under review as compared with September 1, 1937; the increases recorded in the last-named were particularly large, providing work for some 10,600 men. Little general change occurred in transportation and communications, while there was a seasonal falling-off in services.

For October 1, 1936, 4,434 firms had reported 436,435 workers on their payrolls, as compared with 419,177 in the preceding month.

Prairie Provinces.—There was a decrease in employment in the Prairie Provinces as a unit at the beginning of October; improvement was indicated in Alberta, but this was more than offset by losses in Manitoba and Saskatchewan. Mine operators in the Prairie area reported heightened activity, and building was also brisker, but manufacturing was quieter, mainly

Relative Weight of Employment by Economic Areas as at Oct. 1, 1937	100·0	8·1	29·6	42·4	11·5	8·4

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated area, to the total number of all employees reported in Canada by the firms making returns at the date under review.

in iron and steel plants, and transportation, services and construction also released help. Within the last-named, there were considerable reductions in work on the highways, with smaller declines in railway construction and maintenance. Returns for the date under review were received from 1,489 firms with an aggregate working force of 137,302 employees, compared with 139,499 at September 1. The index at the latest date (107·6) was one point lower than at the beginning of October in 1936, when the 1,457 co-operating employers had reported 137,933 persons on their payrolls, compared with 136,353 in the preceding month.

The following shows index numbers for each of the Prairie Provinces in the last five months:—

Provinces	Relative Weight	Index Numbers (1926=100) Oct. 1 1937	Sept. 1 1937	Aug. 1 1937	July 1 1937	June 1 1937
Manitoba	44·2	99·2	100·2	99·0	100·3	97·4
Saskatchewan	23·2	120·4	128·3	118·8	110·2	103·9
Alberta	32·6	112·2	111·0	107·1	105·7	99·4
Prairies	100·0	107·6	109·4	105·6	104·0	99·3

British Columbia.—Employment in British Columbia showed curtailment, mainly in manufacturing (owing to the termination of the fish-canning season), and in transportation, construction and services. On the other hand, trade reported greater activity, and within the group of factory employment, there were substantial advances in fruit and vegetable canneries. Data were tabulated from 1,105 employers, whose payrolls declined from 103,088 persons at September 1, to 100,239 at the beginning of October. Losses on a smaller scale had been registered at October 1, 1936, but the index, at 108·1, was then much lower than at the date under review, when it stood at 117·9. An aggregate working force

Relative Weight of Employment by Cities as at Oct. 1, 1937	13·5	1·2	12·7	1·3	3·2	1·7	3·5	3·2

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated city, to the total number of all employees reported in Canada by the firms making returns at the date under review.

of 91,424 men and women was reported by the 1,064 firms furnishing statistics for October 1, 1936; this was a decline of nearly 1,000 from their September 1 staffs.

Table 1 gives indexes by economic areas.

Employment by Cities

The trend at the beginning of October was upward in Toronto, Ottawa and Windsor, while activity declined in Quebec, Montreal, Hamilton, Winnipeg and Vancouver. Employment in each of these centres was in greater volume than at October 1 in any of the last few years.

Montreal.—There was a small decrease in the number at work in Montreal, where the 1,419 co-operating establishments employed 161,536 persons, or 320 fewer than at September 1. Manufacturing, transportation and trade showed improvement; within the first-named group, vegetable food and textile plants indicated considerable gains, while iron and steel, non-metallic mineral products, leather and some other industries were rather slacker. A general advance had been noted at the beginning of October of last year, but the index of employment was then nearly twelve points lower. For October 1, 1936, data had been furnished by 1,358 firms having 143,407 employees, an increase of 1,881 over their staffs in the preceding month.

Quebec.—Employment in Quebec receded at the date under review, 374 workers having been laid off since September 1 by the 178 employers whose returns were compiled, and who had 14,312 on their paylists at October 1. There were seasonal losses in services, and construction and transportation were also quieter, while no general change occurred in manufacturing and trade. The index was nine points higher than at the beginning of October, 1936, when 173 establishments had employed 13,096 men and women.

Toronto.—Continued expansion was indicated in Toronto, according to 1,552 firms em-

Relative Weight of Employment by Industries as at Oct. 1, 1937	100·0	51·6	5·0	6·3	2·0	9·1	14·4	2·5	9·1

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated industry, to the total number of all employees reported in Canada by the firms making returns at the date under review.

ploying 140,209 persons, compared with 137,061 in their last report. Manufacturing was much busier, particularly in the textile, vegetable food, printing and paper goods, non-ferrous metal and iron and steel divisions; building and road construction and retail trade also absorbed more workers. On the other hand, hotels and restaurants and laundries and dry-cleaning establishments were somewhat quieter. Smaller additions to staffs, on the whole, had been reported at October 1 of a year ago, when employment was at a decidedly lower level; some 1,500 employers had then reported a combined working force of 130,803 persons, while the index had stood at 105·5, several points lower than that of 112·6 at the latest date.

Ottawa.—Trade and manufacturing were rather more active, while construction showed a decline. The forces of the 202 employers furnishing data aggregated 15,175 workers, or 98 more than at September 1. The index of employment was 3·5 points higher than at the same date in 1936, when an increase had been indicated by the 196 co-operating establishments whose payrolls had included 14,601 persons.

Hamilton.—Curtailment was noted in Hamilton, mainly in manufacturing, where there were losses in clay, glass and stone and iron and steel plants. Construction was also slacker; there was a minor increase in trade, while the changes in other groups were small. Statements were tabulated from 293 firms with 37,835 employees, compared with 38,530 in the preceding month. The index number at the beginning of October of last year was many points lower, although improvement had then been reported by the 286 employers whose statistics were included in the survey for October 1, 1936, and who had a staff of 31,553.

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES (AVERAGE 1926=100)

Industries	[1]Relative Weight	Oct. 1, 1937	Sept. 1, 1937	Oct. 1, 1936	Oct. 1, 1935	Oct. 1, 1934	Oct. 1, 1933	Oct. 1, 1932
Manufacturing—								
Animal products	51·6	121·7	121·2	109·0	103·3	94·4	86·7	84·1
Fur and products	2·3	143·7	152·6	129·0	124·6	113·9	109·2	109·7

Agricultural implements	1·2	134·6	134·5	109·0	94·9	81·9	65·8	68·9
Land vehicles	·5	72·5	72·6	45·3	53·0	34·6	25·3	21·4
Automobiles and parts	4·7	93·5	89·2	79·7	79·0	68·0	64·2	62·4
Steel shipbuilding and repairing	1·6	129·8	108·7	111·5	110·8	71·4	65·9	46·0
Heating appliances	·2	70·9	74·4	65·8	68·0	53·5	47·5	61·8
Iron and steel fabrication (n.e.s.)	·5	137·6	136·2	121·3	112·1	98·2	89·9	81·7
Foundry and machine shop products	·7	133·1	136·1	90·7	83·9	64·6	54·7	54·8
	·5	118·6	121·0	94·8	97·1	78·0	65·0	64·9
Other iron and steel products	1·8	113·5	111·3	94·1	86·4	82·8	68·1	67·4
Non-ferrous metal products	2·2	162·7	166·8	142·7	125·8	112·7	91·6	81·7
Non-metallic mineral products	1·3	153·6	156·6	145·9	142·7	136·3	128·2	121·4
Miscellaneous	·5	147·5	147·2	134·9	130·2	121·7	104·1	99·1

[1] The "Relative Weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by the firms making returns on the date under review.

Windsor.—There was a substantial increase in the number working in Windsor, chiefly in automobile and other iron and steel plants. One hundred and seventy-nine concerns employed 19,942 persons, as against 18,036 at September 1. An advance had also been indicated the beginning of October of last year by the 175 co-operating establishments which had reported 16,393 employees, or 1,836 more than in the preceding month. The index of 120·3, at October 1, 1936, was decidedly lower than at the date under review (viz., 146·2).

Winnipeg.—A falling-off was indicated in Winnipeg at October 1, when the 487 firms furnishing data employed 41,930 men and women, or 469 fewer than in the preceding month. Manufacturing and trade were not so active, while transportation and construction reported moderate improvement. A gain had been recorded at the beginning of October a year ago by the 484 employers whose statistics were received, and who had 40,756 workers on their payrolls; the index then was somewhat lower, standing at 95·3, as compared with 97·6 at October 1, 1937.

Vancouver.—Employment in Vancouver showed its first contraction since the beginning of March, according to information from 456 establishments with an aggregate staff of 38,182 persons, compared with 38,714 at September 1. Manufacturing and trade reported improvement, but there was a falling-off in transportation, construction and services. A smaller reduction on the whole had been recorded at October 1, 1936, when the index stood at 109·1, as compared with 117·9 at the beginning of October of the present year. Statements for October 1 of last year had been received from 441 firms whose employees numbered 35,098.

Index numbers by cities are given in Table 2.

Employment by Industries

Manufacturing.—There was a further advance in factory employment at October 1, when the 6,012 co-operating establishments reported 618,417 operatives, or 2,439 more than in the preceding month. Seasonal curtailment was noted in fish canneries and lumber mills, and there were also declines in leather, tobacco, glass, non-ferrous metal and non-metallic mineral product factories. On the other hand, iron and steel, vegetable food and textile plants showed large increases, those in iron and steel being of particular interest in that they were contrary to the usual seasonal trend at the beginning of October in the experience of the period, 1921-1936.

On the average, employment in manufacturing as a whole at the beginning of October in the last sixteen years has shown comparatively little change from September 1, the gains recorded in some of these autumns just about offsetting the decline indicated in the remainder. The unadjusted index of employment, at 121·7 was 11·7 per cent higher than at October 1, 1936, and also higher than in any other October for which data are available, including 1929, when the October 1 index was 120·2. After correction for seasonal influences, the index rose from 117·9 at September 1, 1937, to 118·5 at the date under review.

The unadjusted index numbers in manufacturing at the beginning of October in the seventeen years of the record are as follows: 1937, 121·7; 1936, 109·0; 1935, 103·3; 1934, 94·4; 1933, 86·7; 1932, 84·1; 1931, 91·8; 1930, 107·8; 1929, 120·2; 1928, 115·7; 1927, 106·4; 1926, 104·6; 1925, 98·8; 1924, 92·7; 1923, 99·4; 1922, 93·8 and 1921, 88·0. The 1926 average is the base used in computing these indexes.

The increase noted at October 1, 1937, continues the favourable movement that, with only one interruption, has characterized factory employment since the opening of the year. During the last nine months, the approximately 5,900 reporting firms have provided work for some 98,000 additional employees, while the index has advanced from 102·4 at January 1, to 121·7 at the beginning of October, or by 18·8 per cent. Although continuous expansion had been indicated in the same months of 1936, the number of workers then added to the payrolls was smaller, and activity was at a lower level, the October 1, 1936, index standing at 109·0, or nearly 13 points lower than at the latest date.

The manufacturers making returns for the beginning of October of last year, numbering 5,831, had employed 552,248 workers, compared with 536,651 in the preceding month. Marked gains had then been made in vegetable food, iron and steel and textile plants, but many other lines of factory employment had also shown considerable improvement.

Animal Products—Edible.—There were losses in dairies and fish-preserving establishments, those in the latter being pronounced following an unusually active season. Statistics were received from 310 manufacturers, employing 27,807 persons, as compared with 29,542 in the preceding month. This contraction, which was most marked in British Columbia, was on a rather larger scale than that registered at the corresponding date of last year, but the index was then nearly fifteen points lower.

Leather and Products.—A considerable decline occurred in the leather industry at October 1, mainly in footwear factories. The

300 employers making returns reported 23,898 workers, or 520 fewer than at September 1. Employment at the beginning of October a year ago had decreased moderately from the preceding month; the index number then stood at 112·4 compared with 117·0 at the date under review.

Lumber and Products.—Seasonal contractions in personnel were indicated in the lumber group, in which employment was at a much higher level than at October 1, 1936. The decrease at the date under review took place very largely in rough and dressed lumber mills, but container plants were also slacker; on the other hand, furniture and vehicle factories showed inprovement. A combined working force of 51,473 persons was reported by the 895 co-operating manufacturers, as compared with 52,847 at the beginning of September. The tendency was downward in most provinces, particularly in Quebec and Ontario.

Musical Instruments.—A reduction was registered in musical instrument plants, in which employment was at practically the same level as during last autumn. Thirty-five establishments reported 1,583 employees, as compared with 1,682 in the preceding month.

Plant Products, Edible.—All branches of the vegetable food division showed improvement on the whole; the largest gains occurred in canneries, while those in bakery, confectionery and sugar and syrup factories were also considerable. The staffs of the 494 reporting firms aggregated 47,284 persons, or 2,486 more than in their last return. Employment was brisker in most of the provinces, firms in British Columbia showing especially pronounced advances. The general increase was much smaller than that registered at the corresponding date in 1936, when the index was fractionally higher.

Pulp and Paper Products.—Little general change was reported by 615 employers in this group; they had 70,288 workers on their payrolls, as compared with 70,357 at the beginning of September. Moderate improvement took place in paper product factories and in printing and publishing, while there was a falling-off in employment in pulp and paper mills. A large advance had been indicated at the beginning of October a year ago, but the index number then was several points lower.

Rubber Products.—Employment in rubber goods showed further expansion at October 1, 1937; data were compiled from 55 firms with 14,519 employees, as against 14,128 in their last report. A gain had also been recorded at the same date in 1936, when the index of employment was decidedly lower.

Textile Products.—Hosiery and knitting and garment and other textile factories reported heightened activity; 1,108 manufacturers enlarged their payrolls from 109,973 workers at the beginning of September, to 112,240 at the date under review. Quebec and Ontario recorded the bulk of this expansion. Larger increases had been noted at the beginning of October last year, but the index then was lower by nearly eight points than at October 1, 1937.

Tobacco, Distilled and Malt Liquors.—A reduction in employment occurred in these industries at the beginning of October, according to the 186 establishments furnishings statistics, which employed 16,987 workers; the distilled and malt liquor and tobacco divisions were slacker. Employment was in greater volume than at October 1, 1936, although the loss then indicated had involved a smaller proportion of the payroll.

Chemicals and Allied Products.—Continued gains were made in chemical factories, 205 of which had a staff of 13,163, as compared with 12,959 in the preceding month. Most of the increase was in New Brunswick and Quebec. A higher level of employment was indicated at the first of October than at the same date of last year.

Clay, Glass and Stone Products.—Glass factories showed reduced activity, while the other branches of this group reported little general change. Statements were received from 209 manufacturers employing 11,075 persons at October 1, compared with 11,419 at the beginning of September. The index was decidedly higher than at the corresponding date in 1936; the general tendency then had also been unfavourable.

Electric Light and Power.—A decline took place in electric current plants at October 1, when 96 establishments employed 16,365 workers, compared with 16,547 in the preceding month. A smaller decrease had been noted at the same date of last year; however, the index number then stood at 123·2, compared with 129·5 at the beginning of October in 1937.

Electrical Appliances.—In the electrical apparatus division, 125 works reported 21,588 employees, or 25 fewer than in their last report. Improvement had been indicated at October 1, 1936, but the index was then many points lower.

Iron and Steel Products.—The largest increases in the iron and steel industry at the

beginning of October were in the automobile, crude, rolled and forged, wire and tool divisions, while moderate curtailment was noted in the railway car and locomotive, shipbuilding, structural iron and steel, foundry and machine shop and sheet metal divisions. Statements were received from 877 manufacturers, whose payrolls aggregated 139,452 persons, as compared with 136,712 in the preceding month. Employment advanced in Ontario but the tendency in the other economic areas was downward. More pronounced expansion had been shown at the first of October of last year, but employment was then at a decidedly lower level, the index then standing at 87·2, compared with 107·0 at the latest date.

Non-ferrous Metal Products.—A combined working force of 25,974 persons was reported by the 176 co-operating employers, who had 26,602 at the beginning of September. There was improvement in the precious and the base metal divisions, but smelters and refineries were slacker. The index was twenty points higher than in the autumn of 1936.

Non-metallic Mineral Products.—The personnel of the 146 firms furnishing data in these industries aggregated 15,463, or 304 fewer than in the preceding month. An increase had been noted at October 1, 1936, but employment was then not so active.

Logging

Statements were tabulated from 332 logging companies, whose staffs were enlarged by 18,641 workers to 59,683 at the date under review. This expansion was on a much greater scale than in the early autumn of 1936, or of any other year of the record. The index, at 208·5 at October 1, 1937, was higher than at that date in any of the last sixteen years. Camps in Quebec absorbed a large proportion of the men added to payrolls at October 1 of the present year, but there were also considerable increases in Ontario and New Brunswick.

Coal Mining.—There was an important seasonal advance in coal-mines, in which the index of employment was higher by 3·4 points than at October 1, 1936, when the improvement over the September 1 payrolls had been on a rather larger scale. Returns were received from 102 operators employing 26,012 persons at October 1, 1937, as compared with 24,304 in their last report. The gains took place mainly in the Albertan coalfields.

Metallic Ores.—Employment in this group showed continued improvement, 226 employers reporting 39,503 workers, or 462 more than at the beginning of September. Ontario registered most of the advance. Greater expansion had been noted at the corresponding date last year, but the index number was then many points lower.

Non-Metallic Minerals, other than Coal.—Little general change was reported in this group, in which statistics were received from 94 firms employing 10,219 persons, compared with 10,162 in the preceding month. The index was decidedly higher than at October 1, 1936, although a substantial increase had then been recorded.

Communications

Communications showed a slight reduction from the last report, the companies and branches furnishing data indicating a staff of 24,174 employees, as compared with 24,267 at September 1. The index was practically six points higher than at the same date in 1936, when employment had declined more sharply.

Transportation

Street and Electric Railways and Cartage.—An increase was indicated in local transportation, 295 persons being added to the forces of the 244 co-operating firms, who had 27,270 on their payrolls. Employment in this industry was in rather smaller volume than at October 1 of last year, a larger advance having then been shown.

Steam Railways.—Statistics were tabulated from 99 employers in the steam railway operation group, whose pay-rolls decreased from 62,962 at September 1 to 62,646 at the beginning of October. Most of the falling-off took place in Manitoba and British Columbia. Greater curtailment in personnel had been indicated at the same date of last year, when the index, at 77·9, was slightly lower than at the latest date, viz., 78·8.

Shipping and Stevedoring.—Considerable improvement was registered in the water transportation group, in which 111 companies employed 18,785 workers; this was an increase of 835 as compared with their pay-rolls in the preceding month. A decline had been noted at October 1 of last year, when the index stood at 91·6, as compared with 103·5 at the beginning of October of the present year.

Construction and Maintenance

Building.—There was a further substantial increase in employment in building, 1,936 persons being added to the forces of the 801

co-operating contractors. They had 35,437 employees; this number was much larger than that reported at the beginning of October of a year ago, smaller gains having then been indicated. Except in British Columbia, the trend was generally favourable at the date under review.

Highway.—Employment in this group declined in all provinces except Ontario and Manitoba; the additions to staffs in the former were especially large. Statements were tabulated from 408 employers throughout the Dominion, whose pay-rolls, standing at 106,382, were larger by 870 workers than at September 1. The number employed in the group greatly exceeded that reported at October 1, 1936, when a reduction had been noted.

Railway.—A pronounced falling-off in employment took place on railway construction work. The forces of the 39 companies and divisional superintendents furnishing returns declined from 32,995 at the beginning of September, to 29,940 at the date under review. A larger loss had been registered at October 1, 1936, but the general level of employment in this industry was then much higher.

Services

The closing of summer hotels caused a considerable contraction in employment, while laundries and dry-cleaning establishments were also slacker. The staffs of the 483 service firms whose returns were received, numbered 29,775 at October 1, as against 32,253 in the preceding month. The seasonal declines indicated at the same date last year had been on a corresponding scale, but employment in the service division was then not so active as at the date under review.

Trade

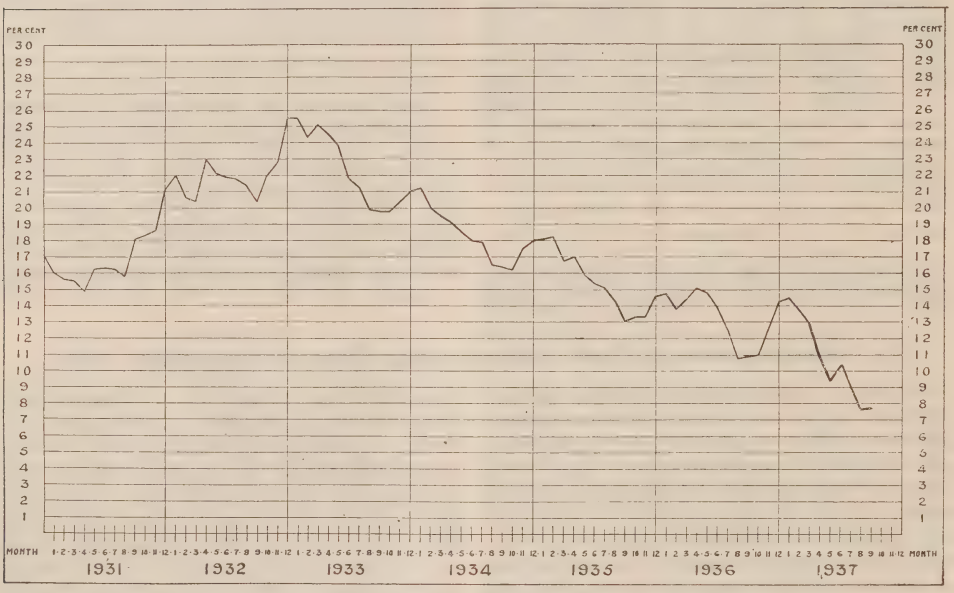
Retail and wholesale trading establishments increased their personnel; 1,364 firms reported 109,404 employees, compared with 107,354 in the preceding month. This advance was smaller than that recorded at October 1, 1936, but considerably exceeded the average gain noted at the beginning of October in the years, 1921-1936. The index at the date under review stood at 133·4, compared with 129·6 at October 1, 1936.

Tables

Index numbers of employment by economic areas, leading cities and industries are given in the accompanying tables. The columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area, or industry, is of the total number of employees reported in Canada by the firm making returns at the date under review.

(2) Unemployment in Trade Unions at the Close of September, 1937

The term unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are engaged at work other than their own trades or who are idle due to illness are not considered as unemployed, while unions which are involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.



Unemployment among local trade unions at the close of September was maintained in almost the same volume as in the preceding month according to the rteurns tabulated from 1,847 labour organizations combining a membership of 208,833 persons. Of these, 16,129 were reported out of work, a percentage of 7·7 contrasted with 7·6 of idleness in August. A higher level of activity was apparent from September of last year when 10·9 per cent of unemployed members was recorded. The changes in the various provinces were not particularly outstanding, Nova Scotia, Alberta, Saskatchewan and Ontario unions showing a favourable tendency from August which was just more than counteracted by the slight recessions indicated by British Columbia, New Brunswick, Quebec and Manitoba locals. When compared with the returns for September, 1936, Quebec and Ontario members were afforded a considerably greater volume of work during the month reviewed, while in Nova Scotia more moderate gains occurred and the trend in New Brunswick, Manitoba and British Columbia was slightly upward. In Saskatchewan and Alberta, however, fractional curtailment in employment was evident.

Each month the records of unemployment among local trade unions in the largest city in each province, with the exception of Prince Edward Island, are tabulated separately. In Edmonton there was a falling off in employment during September of nearly 5 per cent from the preceding month, and in Montreal, Vancouver, Saint John and Winnipeg lesser

declines, were shown. The situation in Halifax and Toronto, however, tended more favourably than in August, though the variations were slight. In Regina the unemployment level remained identical with that of August. Contrasted with the returns for September, 1936, Halifax and Saint John members were considerably busier during the month reviewed and noteworthy gains in activity were recorded by Toronto members. Advancement of more moderate proportions was evident among Montreal unions. Minor contractions in available work, however, were noted by Regina, Edmonton and Vancouver members. Employment in Winnipeg was maintained at exactly the same volume as in September a year ago.

Of these 6,078, or 7·9 per cent, were idle on the last day of the month, contrasted with 8·2 per cent of unemployment in August. Improvement in somewhat greater measure was shown from September of last year when 10·9 per cent of the members reported were without employment. Hat, cap and glove workers, whose membership was not particularly large, showed a marked percentage gain in employment from August, and among paper makers rather noteworthy employment expansion occurred. The trend of activity for cigar and tobacco, iron and steel, glass and leather workers, and meat cutters and butchers was also more favourable than in August, though the changes were slight. General labourers, however, reported a con-

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

The chart which accompanies this article illustrates the unemployment trend by months from January, 1931, to date. During September the curve remained on practically the same level as in August, reflecting an almost stationary unemployment volume. Conditions as reflected by the chart were, however, more favourable than in Setpember of last year when the curve reached a level somewhat above that of the month reviewed.

Workers in the manufacturing group of industries showed a slight tendency toward increased activity during September over the previous month as manifest by the reports compiled from 527 unions with 76,675 members.

siderable drop in activity from August and lesser declines were apparent among metal polishers, jewellery, garment, brewery and wood workers, bakers and confectioners, and printing tradesmen. Among textile and carpet, and fur workers the same percentage of idleness was recorded in both months compared. When contrasted with the returns for September of last year glass and leather workers were substantially better engaged during the month surveyed and noteworthy advances were evident among jewellery, textile and carpet, garment and wood workers. More moderate gains were reflected by iron and steel, cigar and tobacco, and brewery

workers, and printing tradesmen. Conditions for bakers and confectioners and general labourers were but nominally better than in September a year ago. On the contrary, marked percentage losses in activity were shown by meat cutters and butchers, which however affected few workers as their membership was small, while paper makers, hat, cap and glove, and fur workers, and metal polishers suffered recessions in employment of considerably lesser degree.

Employment conditions in the coal mines were improved during September from the previous month, the 53 reporting unions with 17,962 members indicating an unemployment percentage of 7·1 contrasted with 11·1 per cent of inactivity in August. Gains on a smaller scale, were noted from September of last year, the percentage of idleness for that month standing at 8·8. The Alberta and Nova Scotia coal fields combined in effecting the favourable situation in the industry as a whole from August, while in British Columbia there was a slight tendency toward retarded activity. Compared with the returns for September a year ago, British Columbia miners were afforded a much better volume of work during the month under review, and in Nova Scotia a slight rise in employment was shown. This improvement was in part off-set by the recession indicated among Alberta members.

The building and construction trades showed some increase in unemployment during September over the previous month, though conditions were much better than in September of last year. This was evident from the reports furnished by 207 organizations of these tradesmen embracing a membership of 22,747 persons, 4,359, or 19·2 per cent, of whom were idle on the last day of the month, contrasted with percentages of 15·6 in August and 32·3 in September a year ago. That the situation for building and construction tradesmen was less favourable during September than in August, was largely due to the slowing up in activity, apparent among carpenters and joiners, bricklayers, masons and plasterers and painters, decorators and paper hangers. Bridge and structural iron workers showed marked employment curtailment viewed from a percentage basis, which owing to their small membership did little to affect the situation in the building trades as a whole. Among tile layers, lathers and roofers and steamshovel men also, activity was somewhat retarded. Hod carriers and building labourers, on the contrary, were much busier than in August and granite and stone cutters reflected gains of considerably smaller proportions, though noteworthy. Conditions for electrical workers, and plumbers and steamfitters were but nominally better than in August. All groups of tradesmen participated in the employment recovery noted in building and construction, as a whole, from September last year, bridge and structural iron workers, bricklayers, masons, plasterers, granite and stone cutters, plumbers and steamfitters and hod carriers and building labourers all showing a decidedly improved situation. Pronounced expansion

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada

was evident also, among carpenters and joiners, electrical workers and steam shovelmen. Among tile layers, lathers and roofers, and painters, decorators and paper hangers the advances recorded were of more moderate proportions.

The transportation industries during September showed only slight variation in the employment volume afforded from August, the tendency however being adverse. This was noted from the returns forwarded by 811 associations covering a total of 63,619 members, 2,938 of whom were without work on the last day of the month, a percentage of 4·6 contrasted with 4·4 per cent in August. A slight rise in activity however, was apparent from September, 1936, when 5·8 per cent of the members reported were unemployed. Steam railway employees, whose returns constituted almost 78 per cent of the entire group membership reported, street and electric railway employees and navigation workers, all showed very slight variation in conditions from August, though the trend was toward lessened activity, and among teamsters and chauffeurs the unemployment percentage remained unchanged from the preceding month. Navigation workers, steam railway employees, and teamsters and chauffeurs all showed a slightly improved situation during September over the corresponding month of last year, while among street and electric railway employees the recessions in activity recorded were less than one per cent.

Unions of retail shop clerks reported adequate work for all their members during September as in August, contrasted with 5·3 per cent of unemployment in September last year. Reporting for September were 3 associations of these workers covering a membership of 1,030 persons.

Reports were tabulated during September from 76 associations of civic employees with an aggregate of 9,587 members, 90 or 0·9 per cent of whom were idle at the close of the month compared with 0·6 per cent in August and a percentage of 2·2 in September a year ago.

Activity in the miscellaneous group of trades declined slightly during September from the preceding month according to the reports received from 134 unions with 8,675 members. Of these, 630 were without employment on the last day of the month, a percentage of 7·3 contrasted with 6·2 per cent in August. Employment, however, tended nominally upward from September of last year when 8·0 per cent of idleness was recorded. Hotel and restaurant employees registered moderate curtailment in work afforded from August and among theatre and stage employees, barbers, and stationary engineers and firemen the recessions noted were but fractional. The trend for unclassified workers, however, was slightly more favourable than in August. In making a comparison with the returns for September of last year stationary engineers and firemen showed noteworthy advances in employment during the month under review, and lesser gains were indicated by hotel and restaurant employees. Unclassified workers on the other hand registered a considerable drop in work available and theatre and stage employees and barbers very slight employed cessation.

Fishermen reported much the same situation during September as in the month preceding, 16·2 per cent of inactivity being recorded as compared with a percentage of 16·3 in August. Increased slackness on a substantial scale was apparent from September of last year when unemployment stood at 6·3 per cent. The percentage for the month under survey was based on the reports compiled from 3 associations with a membership numbering 624 persons.

The tendency for lumber workers and loggers was in a slightly less favourable direction during September from both the previous month and September a year ago, the 2 unions making returns with 782 members showing an unemployment percentage of 2·2 contrasted with percentages of 1·4 in August and 1·9 in September, 1936.

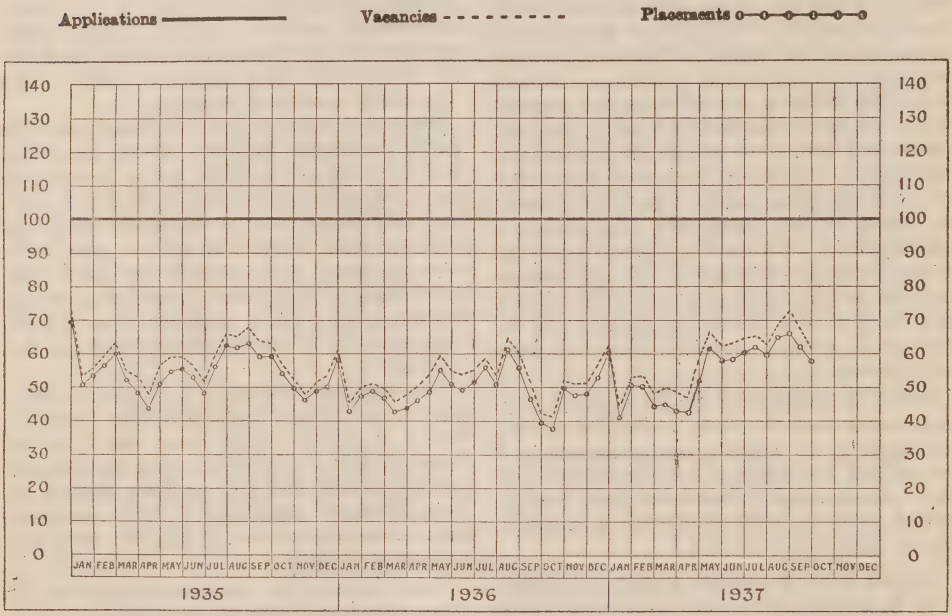

Table 1 shows by provinces the percentage of members who were on an average unemployed each year from 1919 to 1936 inclusive, and also the percentage of unemployment by provinces for September of each year from 1919 to 1934 inclusive and for each month from September, 1935, to date. Table 11 summarizes the returns in the various groups of industries for the same months as in Table 1.

(3) Employment Office Reports for September, 1937

The volume of business transacted by the offices of the Employment Service of Canada during the month of September, 1937, showed a gain of more than 4 per cent in the average daily placements over that of the preceding month and one of almost 44 per cent over the average for the corresponding period a year ago. Substantial increases in placements over August, 1936, were recorded in logging and services, but this expansion was more than offset by heavy declines in construction and maintenance and farming. The additions recorded in manufacturing, trade and transportation, however, more than exceeded the loss in mining. In comparison with September a year ago, mining, alone, reported a minor decrease, all other groups recording gains, those in construction and maintenance and logging being particularly heavy; that, also, in services was noteworthy, though not so large, while appreciable increases were likewise recorded in manufacturing and farming, with others of lesser magnitude shown in transportation and trade.

The accompanying chart shows the trend of employment since January, 1935, as represented by the ratio of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, compilation being made semi-monthly. It will be seen from the graph that the curve, both of vacancies and placements, in relation to applications declined steadily throughout the month, the level of vacancies dropping over 11 points and applications over 8 points. At the close of the period, however, both levels were about 19 points above those reached at the end of the corresponding month a year ago. The ratio of vacancies to each 100 applications was 67·0 during the first half and 61·5 during the second half of September, 1937, in contrast with the ratios of 51·3 and 42·1 during the corresponding periods of 1936. The ratios of placements to each 100 applications during the periods under review were 62·1 and 57·9, as compared with 46·4 and 39·4 during the corresponding month of 1936.

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during September, 1937, was 1,662, in contrast with that of 1,612 during the preceding month and with 1,173 in September a year ago.

The average number of applications for employment received daily by the offices during

the month under review was 2,591, in comparison with 2,270 in August, 1937, and with 2,540 during September last year.

The average number of placements made daily by the offices of the Service during September, 1937, was 1,553, of which 1,100 were in regular employment and 453 in work of one week's duration or less, as compared with a total daily average of 1,487 during the preceding month. Placements in September a year ago averaged 1,080 daily, consisting of 701 placements in regular and 379 in casual employment.

During the month of September, 1937, the offices of the Service referred 40,260 persons to vacancies and effected a total of 38,816 placements. Of these, the placements in regular employment were 27,490, of which 22,300 were of men and 5,190 of women, while placements in casual work totalled 11,326. The number of vacancies reported by employers was 29,446 for men and 12,094 for women, a total of 41,540, while applications for work totalled 64,763, of which 49,008 were from men and 15,755 from women. Reports for August, 1937, showed 41,896 positions available, 59,005 applications made and 38,659 placements effected, while in September, 1936, there were recorded 29,325 vacancies, 63,484 applications for work and 26,996 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment Service, each year, from January, 1927, to date:—

Year	Placements		
	Regular	Casual	Totals
1927	302,723	112,046	414,769
1928	334,604	135,724	470,328
1929	260,747	137,620	398,367
1930	187,872	180,807	368,679
1931	175,632	295,876	471,508
1932	153,771	198,443	352,214
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937 (9 months)	202,164	81,549	283,713

Nova Scotia

During September, employment offices in Nova Scotia received orders for over 7 per cent less workers than in the preceding month, but there was an increase of over 72 per cent in the number required when compared with September, 1936. There was a decrease of over 6 per cent in placements when compared with the preceding month, but an increase of over 78 per cent in comparison with the corresponding month of last year. The increase in placements over September, 1936, was largely due to substantial gains in services and construction and maintenance, although placements were also higher in farming and trade. There was a nominal loss in logging and a corresponding gain in manufacturing. Placements by industrial divisions included logging 73; farming 100; construction and maintenance 545; trade 64, and services 463, of which 349 were of household workers. During the month 637 men and 126 women were placed in regular employment.

New Brunswick

The demand for workers, as indicated by orders received at employment offices in New Brunswick during September, was nearly 25 per cent less than in the preceding month, but over 1 per cent above the corresponding month of last year. There was a decrease of nearly 21 per cent in placements when compared with August, but an increase of over 5 per cent in comparison with September, 1936. All industrial divisions, except construction and maintenance, showed gains in placements over September of last year, but as none of these increases were important, they were largely offset by the loss in construction and maintenance. Industrial divisions in which most of the placements were effected during the month were manufacturing 42; logging 40; transportation 29; construction and maintenance 44; trade 61, and services 573, of which 430 were of household workers. Placements in regular employment numbered 94 of men and 118 of women.

Quebec

There was an increase of nearly 12 per cent in the number of positions offered through employment offices in the Province of Quebec when compared with the preceding month and of nearly 62 per cent in comparison with the corresponding month of last year. Placements also were considerably higher, there being nearly 21 per cent more than in August and 77 per cent more than during September, 1936. Industrial divisions showing the most important gains in placements over September of last year were construction and maintenance and logging, followed by services and manufacturing. Improvement, however, was general in all groups. Placements by industries included manufacturing 228; logging 1,966; farming 116; construction and maintenance 1,547; trade 106, and services 3,080, of which 2,810 were of household workers. There were 4,000 men and 1,874 women placed in regular employment during the month.

ONTARIO

Orders received at employment offices in Ontario during September called for over 9 per cent more workers than in the preceding month and nearly 38 per cent more than during the corresponding month last year. Placements also showed an increase, there being over 10 per cent more than in August and nearly 38 per cent more than during September, 1936. All industrial divisions participated in the increase in placements over September of last year, the most important gains being in logging, construction and maintenance, services, farming and manufacturing. Placements by industrial divisions included manufacturing 1,148; logging 3,322; farming 2,158; transportation 248; construction and maintenance 5,875; trade 358, and services 4,312, of which 2,736 were of household workers. During the month 11,304 men and 1,746 women were placed in regular employment.

MANITOBA

There was a decline of over 48 per cent in the number of positions offered through employment offices in Manitoba during September when compared with the preceding month, but a gain of nearly 33 per cent when compared with the corresponding month of last year. Placements were nearly 44 per cent less than in August, but nearly 42 per cent above September, 1936. The increase in placements over September of last year was largely due to gains in logging, construction and maintenance, and farming. There were in addition, small gains in services and trade, and a small loss in manufacturing. Industrial divisions in which most of the placements were effected during the month were logging 420; farming 625; construction and maintenance 1,030, and services 676, of which 540 were of household workers. During the month 2,109 men and 285 women were placed in regular employment.

SASKATCHEWAN

Positions offered through employment offices in Saskatchewan during September were over 20 per cent less than in the preceding month, but nearly 17 per cent above the corresponding month of last year. Slightly higher percentages of change were reported in placements under both comparisons. Except for a substantial increase under construction and maintenance and a small gain in logging, all industrial divisions showed reductions in placements when compared with September, 1936, the most important being in farming. These declines, however, did not offset the gain in construction and maintenance, which was quite substantial. Placements by industrial divisions included manufacturing 67; farming 410; construction and maintenance 1,326, and services 622, of which 471 were of household workers. There were 1,539 men and 352 women placed in regular employment during the month.

ALBERTA

Opportunities for employment, as indicated by orders received at employment offices in Alberta during September, were over 18 per cent better than in the preceding month and nearly 16 per cent above the corresponding month of last year. There was an increase also in placements of nearly 15 per cent when compared with August and of nearly 13 per cent in comparison with September, 1936. Farm placements were considerably higher than during September a year ago and there were also increases in construction and maintenance and logging. Decreases were reported in services and mining and small changes, only, in all other groups. Placements by industrial divisions included logging 105; farming 1,488; construction and maintenance 432, and services 507, of which 376 were of household workers. Placements in regular employment numbered 1,914 of men and 304 of women.

BRITISH COLUMBIA

Employment opportunities, as indicated by orders received at employment offices in British Columbia during September, were nearly 5 per cent better than in the preceding month and nearly 86 per cent above the corresponding month of last year. Slightly lower percentages of gain were reported in placements under both comparisons. Except for a substantial increase in construction and maintenance and a more moderate gain in services, the number of placements made in each industrial group varied very little when compared with September, 1936. The increases in farming and transportation were slightly larger than the losses in trade and mining and other groups showed nominal changes only. Placements by industrial divisions included manufacturing 79; logging 99; farming 239; construction and maintenance 2,389, and services 1,196, of which 634 were of household workers. Regular placements numbered 703 of men and 385 of women.

Movement of Labour

During the month of September, 1937, the offices of the Employment Service of Canada effected 27,490 placements in regular employment 16,661 of which were of persons for whom the employment found was outside the immediate locality of the offices at which they

were registered. Of the latter 1,711 were granted the Employment Service reduced transportation rate, 1,240 proceeding to centres within the same province as the despatching office, and 471 to other provinces. The reduced transportation rate which is 2·5 cents per mile with a minimum fare of $4, is granted by the Railway Companies to bona fide applicants at the offices of the Employment Service who may desire to travel to distant employment for which no workers are available locally.

Persons benefiting by the Employment Service reduced rate in Quebec during September were 231 in number, all bushmen bound for employment outside the province. From Hull 123 were transported to Sudbury and 101 to Pembroke, while the Rouyn office was instrumental in despatching 7 to Timmins. Offices in Ontario issued 1,173 reduced rate certificates during September to provincial points. Of these 600 were granted at the Port Arthur office to 529 bushmen, 29 Hydro construction workers, 30 highway construction workers, 6 mine workers, 4 carpenters, one plasterer and one waitress, going at various sections of the Port Arthur zone. For employment within their respective zones also, the Fort William office transferred 242 bushmen and one waitress, the Sudbury office 85 bushmen and the Belleville office 13 bushmen. Travelling from North Bay 75 bushmen were conveyed to Sault Ste. Marie, 16 bushmen and one carpenter to Timmins, and 2 labourers and one cook within the North Bay zone. The Toronto office was responsible for the transfer of 12 bushmen to Sault Ste. Marie, 11 bushmen to Sudbury and one plumber to North Bay. The Sudbury zone was also the destination of 100 bushmen journeying from Ottawa. The Toronto zone received 10 bushmen from Kenora, the Timmins zone 2 bricklayers from Pembroke and the Sault Ste. Marie zone one sheet metal worker from Hamilton. In Manitoba 247 certificates for reduced transportation were granted during September, 8 of which were provincial and 239 interprovincial. The former were issued at the Winnipeg office to 6 bushmen, one hotel cook, and one clerk, going to employment within its own zone. The movement outside the province was also from Winnipeg, from which centre 203 bushmen, 9 mine workers, 6 farm hands, one farm housekeeper, 2 aircraft mechanics, 2 hotel generals, one sawmill labourer, one restaurant worker, and one cook, proceeded to Port Arthur, 11 construction workers and one mine worker to Timmins, and one stone cutter to Toronto. By Saskatchewan offices during September 12 transfers at the reduced rate were effected, 11 of which were to provincial centres. From Regina 10 bushmen and from Prince Albert one labourer were conveyed to employment within their respective zones. The one worker travelling outside the province was a hotel cook, destined to a situation in the Winnipeg zone and despatched from Saskatoon. The labour movement in Alberta during September was entirely provincial and comprised the transfer of 24 persons. All of these secured their certificates at the Edmonton office for transportation within the same zone, among whom were 5 building construction workers, 5 mine workers, 3 bushmen, 3 cooks, 2 harvesters, 2 oil refinery workers, 2 housekeepers, one hotel janitor and one labourer. British Columbia offices during September granted 24 reduced rate certificates to provincial centres. From Vancouver 11 cannery workers were transported to Kamloops, one cook to Penticton, and 4 bushmen, one farm hand, one cook general, and one cafe worker to employment within the Vancouver zone. The Penticton zone also received 2 fruit packers from New Westminster, and one farm hand from Nelson. The Prince Rupert office assisted in the despatch of one painter to Prince George and one diesel engineer to a point within its own zone.

Of the 1,711 workers who took advantage of the Employment Service reduced transportation rate during September, 503 travelled by the Canadian National Railways, 1,183 by the Canadian Pacific Railway, 17 by the Temiskaming and Northern Ontario Railway, 6 by the Pacific Great Eastern Railway and 2 by the Northern Alberta Railway.

(4) Building Permits issued in Canada during September, 1937

The value of the building authorized in 58 cities during September stood at $5,078,882; this was an increase of $862,572 or 20·5 per cent over the total of $4,216,310 reported in August, 1937, and of $1,421,611 or 38·9 per cent as compared with September of last year, when the permits granted represented building valued at $3,657,271.

The value of the building authorized in the first nine months of the present year was $42,750,366; this greatly exceeded the aggregate of $30,683,412 recorded in the period January-September, 1936, and was decidedly higher than in the first nine months in any other year since 1931. The cumulative total for the same period in each of the last six years has been very much lower than in any other year for which data are available; while wholesale prices of building materials have recently advanced, the index for the first nine months of 1937 was below the average for the years since 1919.

Some 50 cities furnished detailed statistics for September, showing that they had issued about 350 permits for dwellings estimated to cost approximately $1,270,000 and more than 1,800 permits for other buildings valued at about $2,560,000. In addition, one city authorized engineering projects valued at $58,915. During August, permits were granted for the erection of about 440 dwellings and 2,300 other buildings, estimated to cost approximately $1,280,000 and $2,600,000, respectively.

Nova Scotia, New Brunswick, Quebec, Ontario, Manitoba and Alberta reported increases in the estimated value of the building authorized as compared with August, 1937, that of $413,280 or 53·4 per cent in Quebec being largest. Moderate declines in this comparison were indicated in Prince Edward Island, Saskatchewan and British Columbia.

As compared with September, 1936, there was improvement in Nova Scotia, New Brunswick, Quebec, Ontario, Manitoba, Alberta and British Columbia. The greatest gain of $686,570 or 36·8 per cent was reported in Ontario.

Of the larger cities, Montreal and Toronto showed higher totals of authorized building than in August, and the value in each case was also higher than in September, 1936; in Winnipeg and Vancouver there was a decline in the first comparison, but an increase over September of last year. Of the other centres, Halifax, Moncton, Saint John, Sherbrooke, Three Rivers, Brantford, Hamilton, Kingston, Kitchener, Oshawa, St. Thomas, York and East York Townships, Welland, Windsor, Riverside, St. Boniface, Moose Jaw, Regina, Edmonton, Lethbridge, Medicine Hat, Kamloops, New Westminster, Prince Rupert and North Vancouver recorded increases as compared with both August, 1937, and September, 1936.

The following table gives the value of the building authorized by 58 cities during September, and in the first nine months of each year since 1920, as well as index numbers for the latter, based upon the total for the corresponding period of 1926 as 100. The average index numbers of wholesale prices of building materials in the period January-September of the years since 1920 are also given (average 1926=100).

Year	Value of permits issued in September	Value of permits issued in first nine months	Indexes of value of permits issued first nine months (1926=100)	Average indexes of wholesale prices of building materials, first nine months, (Average 1926=100)

1929.....	17,117,017	186,011,017	154·8	99·2
1928.....	20,374,149	165,621,634	137·8	96·7
1927.....	14,462,243	141,152,535	117·5	96·3
1926.....	11,047,503	120,163,936	100·0	100·7
1925.....	10,140,853	98,364,181	81·9	103·1
1924.....	15,055,250	96,817,333	80·6	108·2
1923.....	10,768,898	108,319,972	90·1	111·8
1922.....	11,597,034	116,778,450	97·2	108·5
1921.....	10,907,828	88,573,442	73·7	126·8
1920.....	9,842,677	96,146,278	80·0	144·2

The aggregate for the first nine months of this year was higher by 39·3 per cent than in 1936, and was also substantially higher than in any of the preceding four years. The average index number of wholesale prices of building materials, though higher than in any of the years, 1930-1936, was lower than in other years since 1920.

The following table gives the value of the building permits issued by 58 cities during August and September, 1937, and September, 1936. The 35 cities for which data are available since 1910 are marked thus "*."

EMPLOYMENT CONDITIONS IN CANADA AT THE END OF OCTOBER, 1937

Reports of Superintendents of the Employment Service

THE employment situation at the end of October was reported by the superintendents of the Employment Service to be as follows:—

Farmers in the Maritimes were busy with fall ploughing. Threshing was about completed and a fair crop was reported, considering the dry summer. Fishing was only fair, as stormy weather had handicapped the industry. Logging continued very active in the district about Halifax and many orders for experienced pulp wood choppers were filled, but elsewhere smaller crews were operating. Prospects, however, looked bright for the coming winter. Sawmills were busy. Coal mines in the New Glasgow area worked 6 days per week, while those in Cape Breton and vicinity operated 5 and 6 days. Manufacturing showed practically no change, with business very good and staffs working full time and no idleness reported from the iron and steel industry. All construction under way was progressing favourably, but little new work was being undertaken. Highway construction also had slackened, as various contracts had been completed. Transportation, both passenger and freight, by rail and water, was heavy. Trade was fair. A number of requests had been received in the women's division for housemaids and charworkers and placements had been made accordingly.

Except at Sherbrooke, where the demand for farm help exceeded the supply, agricultural employment in the Province of Quebec was dull. Noted improvement, however, was recorded in logging, as many requests were received for bushmen, particularly at Matane and Chicoutimi, where it was impossible to fill all orders. Mining was quiet. Manufacturing centres reported as follows: Montreal—clothing and textiles, boots and shoes fairly active; metal, rubber and tobacco factories not so busy; Hull—factories working at full capacity, with a new bakery just opening; Quebec City—leather slack, but fur and clothing concerns steady; Sherbrooke—textile factories working overtime, with metal, cotton and woollen industries exceeding last year's production of

corresponding date; Matane—sawmills busy; Chicoutimi—paper and aluminum plants operating steadily, and at Port Alfred, production in paper mills somewhat less, but without reduction of personnel. Building and highway construction was substantially greater. This consisted mostly of plant enlargements, erection of warehouses, etc., as well as much municipal employment in connection with streets, sewers and roads. In Montreal, alone, almost 3,000 men were working on relief projects. Transportation and trade both were favourable. Calls for domestic help in the women's division were numerous and in some localities a shortage of experienced workers was quite evident.

Although the farming season was practically over, there was a steady demand in Ontario for fully experienced men and difficulty was noticed in securing applicants. Bush operations were becoming more active; sawmills, however, were closing down after completing the season's cut. Mining was very quiet. Little change was recorded in industrial conditions. Nearly all firms, except those seasonally slack, were working steadily and staff levels were well maintained. Manufacturers, whose output was increased by the Christmas trade, in lines such as fancy boxes, food, candy and luxury smallwares were particularly busy. Building construction remained active, with more skilled tradesmen employed than there have been for some years, but the demand for men for highway construction was greatly reduced, owing to much of the work having been completed and preparations made to halt activities during the winter months. Transportation on the Great Lakes was fairly active and trade, both wholesale and retail, very favourable. The call for household workers in the women's division was good and the supply of applicants showed improvement. Many employers had expressed approval of the fact that a training school for household help was receiving serious attention. Orders for clerical workers were few, but some applicants found temporary employment in factories needing additional staffs for Christmas trade.

Requests for farm help in the Prairie Provinces, while dropping off considerably, were still above the average for the time of year. Orders under the Farm Relief Plan were coming in rapidly, but there was difficulty in securing sufficient eligible men. Manitoba bush operators were still in need of experienced cord and pulp wood cutters and the demand at Yorkton and Edmonton likewise was good. A greater number of placements also in logging had been made within the province of Manitoba and transfers out to Ontario employers were distinctly less. A scarcity of suitable applicants and unseasonably mild weather held up coal production, nevertheless conditions in this group had improved. Manufacturing showed slight change, although a few industries at Medicine Hat were a little steadier and some of the former employees had been recalled for a short time. Building permits in Winnipeg were somewhat above those of the corresponding period a year ago, but this increase was largely accounted for by one permit of $300,000 for an addition to a cold storage plant; elsewhere little construction was under way, other than that on highways, the men for this labour generally being recruited in the areas in which the work was proceeding. A number of applicants had also registered for the Dominion-Provincial Youth Training Program. Trade was slightly improved. The call for domestics and housekeepers was steady in the women's division, but applicants for country positions were very scarce, although city orders were easily filled.

Farming in British Columbia was quiet, although some orders had been received under the Farm Bonus scheme, but few applicants, as yet, were ready for these positions. Apple picking was about completed; packing houses were still busy, some working overtime. Logging and sawmills, except at Victoria, had slackened considerably, partly due to lack of export orders. There was also little movement in mining. Fishing at Naniamo was not so active. Construction was fairly good, with a number of building tradesmen working steadily and highway construction continued. Dry docks and shipyards were busy at Prince Rupert and Victoria; longshoring, however, was quiet at Vancouver, although loaders were well employed at Victoria and New Westminster. Trade was moderate. Female applicants, many of whom had come from the Prairies, were applying for city positions in household service and as they were unwilling to go to the country, farm vacancies were difficult to fill.

According to a press report of the debate on the Speech from the Throne opening the present session of the British Columbia Legislature, the Hon. G. M. Weir, Provincial Secretary and Minister of Education, stated that "negotiations are still continuing with the medical men of the province to find a suitable basis for the operations of the Act."

Adding that there are a number of studies the Health Insurance Commission is conducting, the Minister stated that these include the question of cash benefits for employees; studies of families of varying economic levels and the impact upon their budgets of health costs; feasibility of providing dental services, which are not included in the present Act.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

THE British *Ministry of Labour Gazette*, October, 1937, summarized the employment situation as follows:—

Employment as September 13 showed little change as compared with August 23. There was, an improvement in employment in coal mining, in the motor vehicle and pottery industries, and in dressmaking. On the other hand, employment declined in the building industry, hotel, boarding house, etc. service, the distributive trades, stove and grate manufacture, ship building and repairing, the cotton, wool and tailoring industries, fishing, and certain food manufacturing industries.

It is estimated that at September 13, 1937, the number of insured persons, aged 16-64, in employment in Great Britain, exclusive of persons within the agricultural scheme, was approximately 11,599,000. On a comparable basis there was a decrease of about 7,000 as compared with August 23, 1937, but an increase of about 473,000 as compared with September 21, 1936.

Among insured workpeople, aged 16-64 (excluding those within the agricultural scheme), the percentage unemployed in Great Britain and Northern Ireland at September 13, 1937 (including those temporarily stopped) was 10·0. On a comparable basis there was an increase of 0·1 in the percentage as compared with August 23, 1937, but a decrease of 1·8 as compared with September 21, 1936. In Great Britain the percentage at September 13, 1937, was 9·7. On a comparable basis there was an increase of 0·2 as compared with August 23, 1937, but a decrease of 1·8 as compared with September 21, 1936.

At September 13, 1937, the numbers of persons on the registers of Employment Exchanges in Great Britain were 1,090,967 wholly unemployed, 191,737 temporarily stopped, and 56,500 normally in casual employment, making a total of 1,339,204. On a comparable basis there was an increase of 29,979 as compared with August 23, 1937, but a decrease of 235,739 as compared with September 21, 1936. The total was made up of 1,034,809 men, 39,793 boys, 222,905 women, and 41,697 girls.

The total of 1,339,204 persons on the registers at September 13, 1937, included 592,038 persons with claims admitted for insurance benefit (of whom 2,543 had applications authorized for payment of unemployment allowances in supplementation of benefit), 47,809 claimants whose position under the conditions relating to contributions paid and benefit received had not been determined, and 4,707 persons disqualified for short periods from receiving benefit (of whom 1,705 had applications authorized for payment of unemployment allowances). There were also 544,496 persons (not included in any of the foregoing classes) with applications authorized for unemployment allowances, 791 persons with applications for unemployment allowances under consideration, and 149,363 other persons, of whom 37,624 were juveniles under 16 years of age.

In Great Britain and Northern Ireland the total number of persons on the registers of Employment Exchanges at September 13, 1937, was 1,403,506. On a comparable basis there was an increase of 29,839 as compared with August 23, but a decrease of 235,709 as compared with September 21, 1936.

United States

Employment in the combined manufacturing and non-manufacturing industries surveyed each month by the United States Bureau of Labor Statistics showed a gain in September and was higher than in any month of this year, according to a statement issued by the United States Secretary of Labor Frances Perkins. Weekly pay rolls, however, showed a decrease over the month interval. The following paragraphs from the official press release indicate the situation to be as follows:—

More than 190,000 additional workers found employment in these combined industries between August and September, primarily because of seasonal increases in wholesale and retail trade. Aggregate weekly pay rolls were approximately $6,300,000 less than in the preceding month due primarily to the decrease in factory pay rolls, which were reduced to some extent by shut-downs for Labor Day.

Comparisons of employment and pay rolls in September, 1937, with September, 1936, show a gain of more than 930,000 workers in these combined industries over the year interval, and an increase of approximately $55,000,000 in weekly pay rolls.

Employment in manufacturing industries decreased 0·2 per cent over the month interval indicating a decline of approximately 19,000 factory wage earners. Increases in factory employment between August and September have been shown in 16 of the preceding 18 years for which data are available. In half of these years the increase has amounted to 2·0 per cent or more.

While the September index of employment (102·1) is slightly lower than the levels recorded in May and August of this year, it exceeds the levels of all other months since November, 1929, except April, 1937, and shows an increase of 6·9 per cent over the September, 1936, level. Since January, 1936, factory employment has increased 17·6 per cent, the rise having been particularly pronounced during the first 16 months of this period.

Factory pay rolls decreased 3·6 per cent, or approximately $7,500,000, the holiday observances mentioned above depressing the September pay-roll totals. The September pay-roll index (100·1), is somewhat below the levels recorded between March and August of 1937, but with these exceptions remained above any preceding levels since December, 1929.

Gains in employment between August and September were reported in 52 of the 89 manufacturing industries surveyed. Employment in the group of non-durable goods industries rose 0·4 per cent over the month interval, this gain raising the September index to 107·3, which is 1·3 per cent above the level of September, 1936, and above the level of any preceding month since October, 1929. Seasonal activity in the canning, confectionery, fertilizer, cottonseed oil-cake-meal, millinery, and women's clothing industries was a factor contributing to the rise in the non-durable goods group. In the durable goods group, employment decreased 0·8 per cent due largely to the declines in the automobile, electric and steam-railroad car building, steam-railroad repair shops, sawmills, and millwork industries. The September durable goods group employment index (97·3) is 13·5 per cent above the level of September, 1936, and, with the exception of the 5 immediately preceding months, is above the level of any month since November, 1929. The employment index for the durable goods group indicates that for every thousand workers employed during the index-base period (1923-1925=100), 973 workers were employed in September, 1937, while a similar comparison of the non-durable goods group indexes indicates that 1,073 workers were employed in September, 1937, for every thousand employed during the years 1923-1925.

Among the 10 non-manufacturing industries in which employment gains were shown over the month interval, the expansion in a number of these industries was of a seasonal nature. Approximately 175,000 additional workers found employment in the retail trade establishments of the country between August and September, the gain of 5·2 per cent reflecting a seasonal expansion to handle increased volume of fall purchasing. The September, 1937, employment index for retail trade (90·7) stands above the September level of any year since 1930. In addition to a gain of 10·7 per cent in employment in the retail general merchandising group, which is composed of department, variety, general merchandising stores and mail-order houses, retail apparel stores reported a seasonal gain of 20·5 per cent, and substantial increases were reported by retail furniture, jewellery, and wood, coal and ice firms. Wholesale trade establishments also expanded their working forces in September, the seasonal increase of 1·5 per cent in employment indicating the re-employment of approximately 21,000 workers. Employment in this industry in September reached the highest level registered since October, 1930. Among the more important lines of wholesale trade in which gains were reported over the month interval were dry goods and apparel, chemicals, drugs and allied products, furniture and housefurnishings, groceries, machinery equipment and supplies, metals and minerals, and paper and paper products.

With the approach of colder weather, anthracite and bituminous coal took on additional workers in September, anthracite mines reporting a gain of 17·1 per cent, or approximately 10,000 workers between August and September, and bituminous coal mines a gain of 1·9 per cent, or 6,800 workers. Metal mines also continued to absorb additional employees, the gain of 0·6 per cent continuing the rise which has been evidenced each month since July, 1935, with but two exceptions. Employment in this industry in September has reached a level which is 193 per cent above the low point recorded in August, 1932. Dyeing and cleaning plants reported a seasonal gain of 2·5 per cent, or 1,300 workers, and year-round hotels also reported a seasonal rise, 1·1 per cent, or 2,600 employees. Among the non-manufacturing industries in which declines in employment were reported, the largest decreases were 1·8 per cent each in crude petroleum producing and brokerage. Employment in the private building construction industry declined 0·8 per cent and laundries and quarries and non-metallic mines reported seasonal losses of 0·6 per cent and 0·4 per cent, respectively. Insurance companies reported a slight decrease (0·1 per cent), in number of workers over the month interval.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor the full text of which appeared in the LABOUR GAZETTE for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the Provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of Federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages scales of the respective provinces.

As respects contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight Hour Day Act, 1930." This Act, however, has now in turn been superseded by The Fair Wages and Hours of Labour Act, 1935, which came into force on May 1, 1936. The clause relating to wages and hours in the last-named statute is in the terms following:—

"All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages;

"The working hours of persons while so employed shall not exceed eight hours per day or forty hours per week except in such special cases as the Governor in Council may otherwise provide, or except in case of emergency as may be approved by the Minister."

The new Act like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by federal grant in the form of contribution, subsidy, loan, advance or guarantee.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules known as fair wages schedules, are thereupon included by the Department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment, the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract

for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed, claim therefor may be filed with the Minister of the Department with which the contract has been made and payments of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the Minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Orders in Council, it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts have recently been executed by the Government of Canada.

DEPARTMENT OF AGRICULTURE

Contract in Group "A" (Construction, Remodelling, Repair, Etc.)

Construction of a horse barn at the Animal Diseases Institute, Hull, P.Q. Name of contractor, Mr. Albert Amyot, Hull, P.Q. Date of contract, October 25, 1937. Amount of contract, $5,439.16. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Brick and hollow tile layers	$0 90	8	44
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45	8	44
Carpenters	0 65	8	44
Cement and concrete mixer operator—gas. or electric	0 50	8	44
Electricians	0 70	8	44
Labourers	0 40	8	44
Lathers, metal	0 65	8	44
Lathers, wood	0 60	8	44
Painters and glaziers	0 65	8	44
Plasterers	0 70	8	44
Plasterers' helpers (mixing and tempering material)	0 45	8	44
Plumbers and steamfitters	0 85	8	44
Plumbers' and steamfitters' helpers (all men assigned to help tradesmen)	0 45	8	44
Roofers, asphalt shingle	0 65	8	44
Motor truck driver	0 45	8	44
M.T. driver and truck—1 to 2 tons.	1 45	8	44
M.T. driver and truck—3 tons	1 95	8	44
Watchman	0 35	8	44

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

DEPARTMENT OF FISHERIES

Contract Group "A" (Construction, Remodelling, Repair, Etc.)

Construction of a small wooden launch, equipping it and installing the engine. Name of contractors, Messrs. George E. Richardson & Sons, Richardson, Deer Island, N.B. Date of contract, October 28, 1937. Amount of contract, $1,750. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Minimum rates of wages	Maximum hours per day or shift
	per hour	hours
Blacksmiths	$0 45	8
Caulkers—wood	0 50	8
Joiners	0 50	8
Machinists	0 50	8
Pipefitters	0 50	8
Electricians	0 50	8
Painters	0 45	8
Shipwright	0 50	8
Labourers	0 30	8

N.B.—Where, by agreement or current practice, the working hours of any class of workers are less than 48 per week, such lesser hours shall not be exceeded on this work.

NATIONAL HARBOURS BOARD

Contracts in Group "A" (Construction, Repair, Etc.)

Maintenance dredging in the harbour at Saint John, N.B. Name of contractors, St. John Dry Dock & Shipbuilding Co., Ltd., Saint John, N.B. Date of contract, September 20, 1937. Amount of contract, approximately $30,000. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Electricians	$0 65	8	44
Labourers	0 40	8	44
Motor truck driver	0 45	8	44
Motor truck driver and truck—			
1 to 2 tons	1 45	8	44
3 tons	1 95	8	44
4 tons	2 45	8	44
5 tons	2 95	8	44
Machinists	0 65	8	44
Pipe fitters (surface—temporary work)	0 55	8	44
Plumbers and steamfitters	0 70	8	44
Plumbers' and steamfitters' helpers (all men assigned to help tradesmen)	0 45	8	44
Welders and burners (acetylene or elec.)	0 65	8	44
Watchmen	0 35	8	44
	Per month with board and lodging		
Dredge crew—			
Engineer master	$175 00		
Mate	100 00		
Chief engineer	150 00		
Ladder man	75 00		
Second engineer	125 00		
Oiler	65 00		
Fireman	65 00		
Deckhands	50 00		
Cook—first	75 00		
Cook—second	50 00		
Tug crew—			
Captain	150 00		
Mate	100 00		
Engineer	125 00		
Fireman	65 00		
Deckhands	50 00		
Cook	70 00		
Navigable barge or scow—			
Captain	150 00		
Mate	100 00		
Engineer	125 00		
Fireman	65 00		
Deckhands	50 00		
Cook	70 00		
Scowman	50 00		
Derrick scow—			
Operating engineer	115 00		
Fireman	65 00		
Deckhands	50 00		
Motor boat operator	0 45		
	per hour (current hours)		

Current hours for all above mentioned crews.

NOTE.—$10.00 per month to be allowed for sleeping accommodation ashore if sleeping accommodation is not provided on floating equipment.

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

Construction of a longshoremen's building and offices at Saint John, N.B. Name of contractor, The Mooney Construction Co., Ltd., Saint John, N.B. Date of contract, October 4, 1937. Amount of contract, $18,090. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Blacksmiths	$0 60	8	44
Brick and hollow tile layers	0 90	8	44
Brick and hollow tile layers' helpers (mining and tempering mortar)	0 45	8	44
Carpenters and joiners	0 60	8	44
Cement finishers	0 60	8	44
Cement and concrete mixer operators—			
Steam	0 65	8	44
Gas. or electric	0 50	8	44
Compressor operators (gas. or electric)	0 50	8	44
Crane operators (gas. or electric)	0 55	8	44
Driver, horse and cart	0 55	8	44
Driver, team and wagon	0 75	8	44
Drivers	0 40	8	44
Electricians (inside wiremen)	0 65	8	44
Engineers, operating, steam (single or double drums)	0 65	8	44
Engineers on steel erection	0 75	8	44
Firemen, stationary	0 45	8	44
Hoist operators (gas. or elec.)	0 50	8	44
Labourers	0 40	8	44
Lathers—metal	0 60	8	44
Lathers—wood	0 55	8	44
Machinists	0 65	8	44
Mastic floor spreaders and layers	0 70	8	44
Mastic floor rubbers and finishers	0 55	8	44
Mastic floor kettlemen	0 55	8	44
Mastic floor labourers	0 45	8	44
Mastic floor labourers	0 45	8	44
Millwrights	0 60	8	44

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Motor truck drivers	0 45	8	44
Motor truck driver and truck—			
1 to 2 tons	1 45	8	44
3 tons	1 95	8	44
4 tons	2 45	8	44
5 tons	2 95	8	44
Painters (spray)	0 65	8	44
Painters and glaziers	0 55	8	44
Pipe fitters (surface—temporary work)	0 55	8	44
Pipe layers, caulkers and solderers	0 50	8	44
Plasterers	0 90	8	44
Plasterers' helpers (mixing and tempering material)	0 45	8	44
Plumbers and steamfitters	0 70	8	44
Roofers—composition	0 50	8	44
Roofers—felt and gravel: patent	0 45	8	44
Rodmen—reinforced steel	0 50	8	44
Structural steel workers	0 75	8	44
Watchmen	0 35	8	44
Welders and burners on steel erection—acetylene or electric	0 75	8	44

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

Department of National Defence

Contracts in Group "A" (Construction, Remodelling, Repair, Etc.)

Construction of alterations to the heating plant at "A" Block, Wolseley Barracks, London, Ont. Name of contractor, Mr. Wm. T. Allen, London, Ont. Date of contract, October 12, 1937. Amount of contract, approximately $7,863. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Asbestos insulation workers	$0 70	8	44
Blacksmiths	0 60	8	44
Blacksmiths' helpers	0 45	8	44
Carpenters and joiners	0 70	8	44
Compressor operators—gas. or elec.	0 50	8	44
Cement finishers	0 60	8	44
Cement and concrete mixer operator—			
Steam	0 65	8	44
Gas. or elec	0 50	8	44
Driver, horse and cart	0 55	8	44
Driver, team and wagon	0 75	8	44
Drivers	0 40	8	44
Labourers	0 40	8	44
Motor truck drivers	0 45	8	44
Motor truck drivers and truck—			
1 to 2 tons	1 45	8	44
3 tons	1 95	8	44

Plasterers' helpers (tempering and mixing material)	0 45	8	44
Plumbers and steamfitters	0 80	8	44
Rodmen—reinforced steel	0 50	8	44
Roofers, felt and gravel—patent	0 45	8	44
Sheet metal workers	0 70	8	44
Shovel operators—gas	0 90	8	44
Steam shovel cranemen	0 70	8	44
Steam shovel engineers	0 90	8	44
Steam shovel firemen	0 55	8	44
Stonecutters	0 95	8	44
Structural steel workers	0 80	8	44
Tile setters (ornamental)	0 95	8	44
Tile setters' helpers (all men assigned to help tradesmen)	0 45	8	44
Watchman	0 35	8	44

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

Supply and installation of mechanical equipment in the Royal Canadian Corps of Signals Training Station, Barriefield, Ont. Name of contractors, W. G. Edge Ltd., Ottawa, Ont. Date of contract, October 27, 1937. Amount of contract, $50,120. The preceding fair wages schedule was also inserted in this contract.

Reconstruction of markers' shelter and stop butt at the Rifle Range, Fredericton, N.B. Name of contractors, Messrs. George A. Christie and Ashley Estabrooks, Fredericton, N.B. Date of contract, October 6, 1937. Amount of contract, $5,050.88. A fair wages

schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than	
	per hour	per day	per week
Blacksmiths	$0 55	8	44
Blacksmiths' helpers	0 40	8	44
Carpenters	0 55	8	44
Cement and concrete mixer operator—			
Steam	0 60	8	44
gas. or electric	0 45	8	44

Machinist	0 65		
Machinist's helper	0 40		
Machine operators	0 50		
Sandblasters	0 55		
Labourers	0 35		
Airframe construction and Assembly—			
Fitter (A.F.)	0 60		
Fitter's helper (A.F.)	0 40		
Machinist	0 65		
Machinist's helper	0 40		
Machine operator	0 50		
Woodworker (joiner)	0 60		
Woodworker's helper	0 40		
Welder	0 60		
Welder's helper	0 40		
Electrician	0 65		
Electrician's helper	0 40		
Painter and doper	0 55		
Painter and doper's helper	0 40		
Fabric worker—female	0 40		
Fabric worker's helper	0 30		
Upholsterer	0 55		
Upholsterer's helper	0 40		
Sandblaster	0 55		
Labourer	0 35		
Erector	0 60		
Erector's helper	0 40		
Sheet metal worker	0 60		
Sheet metal worker's helper	0 40		
Riveters	0 50		
Riveter's helpers	0 40		
Apprentices to fitters, machinists, and sheet metal workers only— (16 to 21 years of age)—			
1st year	0 20		
2nd year	0 25		
3rd year	0 35

A contract for the construction of one mine sweeper was awarded recently to each of the following firms: Collingwood Shipyards, Ltd., Collingwood, Ontario; the Morton Engineering & Dry Dock Co., Ltd., Quebec, P.Q.; Burrard Dry Dock Co., Ltd., Vancouver, B.C.; and Yarrows Limited, Victoria, B.C. The following fair wages schedule was inserted in the first two contracts, for the east:—

Trade or class of labour	Minimum rates of wages	Maximum hours per day
	per hour	hours
Angle-smith	$0 58	8
Angle-smith's helper	0 45	8
Blacksmith	0 58	8
Blacksmith's helper	0 40	8
Boilermaker	0 58	8
Boilermaker's helper	0 45	8
Chipper and caulker	0 58	8
Coppersmith	0 58	8
Coppersmith's helper	0 40	8
Electrician	0 58	8
Electrician's helper	0 40	8
Flanger	0 58	8
Loftsman	0 58	8
Machinist and machine fitter	0 58	8
Machinist's helper	0 40	8
Moulder	0 58	8
Patternmaker	0 58	8
Plater	0 58	8
Riveter	0 58	8
Shipwright and joiner	0 58	8
Steamfitter and pipefitter	0 58	8
Steamfitter's and pipefitter's helper	0 40	8
Template maker	0 58	8
Welder	0 58	8
Driller	0 45	8
Punch and shear operators	0 45	8
Reamer	0 45	8
Countersinker	0 45	8
Heater	0 40	8
Bolter-up	0 40	8
Holder-on	0 45	8
Rigger	0 48	8
Crane operator	0 48	8
Painter	0 48	8
Labourer	0 35	8

N.B.—Where by agreement or current practice the working hours of any class of workers are less than 48 per week, such lesser hours shall not be exceeded on this work.

The following fair wages schedule was inserted in the two western contracts referred to:—

Trade or class of labour	Minimum rates of wages	Maximum hours per day
	per hour	hours
Angle-smith	$0 83	8
Angle-smith's helper	0 62	8
Blacksmith	0 75	8
Blacksmith's helper	0 50	8
Boilermaker	0 83	8
Boilermaker's helper	0 62	8
Chipper and caulker	0 83	8
Coppersmith	0 83	8
Coppersmith's helper	0 50	5
Electrician	0 81	8
Electrician's helper	0 50	8
Flanger	0 83	8
Loftsman	0 83	8
Machinist and machinist fitter	0 75	8
Machinist's helper	0 50	8
Moulder	0 75	8
Patternmaker	0 81	8
Plater	0 83	8
Riveter	0 83	8
Shipwright and joiner	0 78¾	8
Steamfitter and pipefitter	0 75	8
Steamfitter and pipefitter's helper	0 50	8
Template-maker	9 83	8
Welder	0 83	8
Driller	0 70	8
Punch and shear operator	0 70	8
Reamer	0 65	8
Countersinker	0 65	8
Heater	0 63	8
Bolter-up	0 63	8
Holder-on	0 70	8
Rigger	0 65½	8
Crane operator	0 72	8
Painter	0 73½	8
Labourer	0 50	8

N.B.—Where, by agreement or current practice, the working hours of any class of workers are less than 48 per week, such lesser hours shall not be exceeded on this work.

Watchman	0 35	8	44

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

According to a Canadian press report concerning a recent session of the Ontario Labour and Industry Board, minimum wages for 30,000 textile workers in Ontario will be established by the Board when enquiries now being conducted throughout the province are completed.

The Public Health Service of the United States Treasury Department has issued Bulletin No. 236 entitled *Evaluation of the Industrial Hygiene Problems of a State* (Maryland). The bulletin points out that a large proportion of the gainfully employed workers in the United States are employed in industrial concerns and that if "industrial hygiene" means the protection of the health of the worker it is apparent that it is a major problem in public health.

The survey carried out by the Public Health Service concerned itself with recording the number of persons by occupation exposed to various materials which may be a hazard to health, and certain other information on the welfare facilities afforded these workers in the industrial environment. The report deals with the results of the survey, which will form a basis for a future permanent program of industrial hygiene in Maryland.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received in the department. Such agreements are summarized each month in the Labour Gazette. In the majority of cases the agreements are signed by both the employers and the employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In each agreement or schedule, the rates of wages for the principal classes of labour are given, with other information of general interest.

Manufacturing: Textiles and Clothing

Montmagny, Quebec.—A Certain Silk Manufacturing Company and their Employees.

Agreement reached in termination of the strike reported in the Labour Gazette, September, page 968. Agreement to be in effect from August 19, 1937.

The company recognizes the right of the workers to organize and recognizes the independent union of textile workers of Montmagny.

Wages: weavers on the night shifts to be given a bonus of $3 per week until the recording machines are installed; after these are installed, a minimum wage of $15 per week of 44 hours for four trades, providing the efficiency is up to a certain standard; an increase of 3 cents per hour is granted to boys in certain departments and to spinners. Weavers of the jacquard department to be paid 30 cents per hour, 10 hours per day; weavers beginning in this department 21 cents. Warpers are divided into three classes: for day work the wage rates are 25, 27 and 29 cents per hour; for night work, 26, 28 and 30 cents per hour.

Preference to be given to men in periods of reduced activity.

The Company agrees to divide the work as equally as possible among the warpers.

Toronto, Ontario.—Associated Clothing Manufacturers and The Amalgamated Clothing Workers of America (Men's and Boys' Clothing).

Agreement to be in effect from May 1, 1937, to April 30, 1940, but 90 days' notice may be given before July 1 of 1938 or 1939 or before May 1, 1940, of a desire to amend the agreement.

The employers agree to operate preferential union shops. Application for additional workers to be made to the union, but if no satisfactory workers available from the union, others may be employed. Work to be given to shops employing members of this union.

Hours: 44 per week. At a date to be determined but within the duration of the agreement, the parties will confer together with the Manufacturers' Associations of Montreal and Hamilton on the question of reducing the week to 40 hours.

Overtime to be worked only when necessary and be paid at time and one-half. Work on legal federal holidays, time and one-half.

Wages: when proper scales of production or piece work rates cannot be adjusted for any one shop or section thereof, the employer may appeal to the board of arbitration for the installation of such scales.

Equal division of work to be observed as far as possible in slack seasons.

A special joint committee to be formed to study and regulate the limitation of waiting time in the shops.

An arbitration board to be formed, consisting of two representatives of the manufacturers, two representatives of the union and a fifth to be selected by both parties. The decision of this board or a majority thereof to be final and binding. This board to deal with complaints, cases of alleged unjust discharge, etc. No strikes or lockouts to occur.

The union will co-operate with the Association and the contractors to form an agreement covering the relationship between the manufacturers of the association, the contractors and the union, and this agreement shall be governed by the recognized form of arbitration machinery prevailing between the Association and the Union.

In order to maintain and enforce the Industrial Standards Act, if the government does not supply the necessary funds for proper enforcement, both parties pledge themselves to contribute an amount not exceeding one-half of one per cent each of the weekly pay-rolls, for that purpose, with the proviso that the legislation provides that such contribution shall be effective in all the industry in Ontario.

Welland, Ontario.—A Certain Manufacturer of Men's Work Clothing and The United Garment Workers of America (Local 274).

Agreement to be in effect from April 1, 1937, to April 1, 1938.

Only union members to be employed.

Hours: 8 per day, 4 on Saturdays, a 44-hour week.

Overtime: time and one-half (price and one-half for piece workers); double time (double price for piece workers) for work on Sundays and legal holidays.

During the slack season, the work will be so divided that each employee will receive approximately an equal amount of work.

The use of the union label is granted to the employer while this agreement is being observed. Any dispute arising which cannot be settled between the two parties to the agreement will be referred to the general office of the international union for adjustment. If a settlement is not reached it shall be submitted to an umpire to be mutually selected, for final decision.

Winnipeg, Manitoba.—Winnipeg Ladies' Garment Manufacturers' Association and The International Ladies' Garment Workers Union (Cloak and Suit Makers).

Agreement to be in effect from July 19, 1937, to June 15, 1939, and for a further year if no notice of change given. In case the cost of living is substantially increased the union may request a revision of wage schedules at the commencement of the second year.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, November, 1935, page 1061 and September, 1936, page 829, with the following exceptions:—

Hours: 8 per day, five days per week, a 40-hour week. (In the previous agreement 42 hours permitted.)

Overtime: not permitted until all unemployed union members are employed. Overtime may not exceed 10 hours a week to be divided equally into the first four days of the week. Overtime to be paid at straight time for the first hour of any day and time and one-quarter thereafter.

All work to be done on a time or weekly basis. Wages to be paid to employees now employed to be raised as follows: cutters, assistant cutters and trimmers $1.50 per week; operators $1.50; operator's helpers $2; pressers, under-pressers, piece pressers and machine pressers $1.50; finishers and finishers' helpers $1.50; skirt makers, lining makers, button sewers, special machine hands and general help $1 per week. Wages of employees employed after this agreement came into effect, to be agreed upon between the union and the employer.

All garments necessary for the manufacturer's business and dealt with by him shall be made in his inside premises.

No new apprentices to be employed until all unemployed union members are employed, and then only with the consent of the union.

The parties agree that it is in the interests of the industry that an agreement be reached on scales and classifications of the various employees "and it is therefore desirous that during the life of the . . . . agreement, such scales and classifications shall be prepared by a joint committee of an equal number of representatives of the union and the manufacturers and be incorporated in the next agreement . . . ."

Manufacturing: Printing and Publishing

MONTREAL, OTTAWA, TORONTO, HAMILTON AND LONDON.—CANADIAN LITHOGRAPHERS ASSOCIATION AND THE AMALGAMATED LITHOGRAPHERS OF AMERICA, LOCALS NOS. 27 (MONTREAL), 40 (OTTAWA), 12 (TORONTO), 42 (HAMILTON) AND 47 (LONDON).

Agreement to be in effect from December 1, 1936, to December 1, 1937, and thereafter from year to year, subject to notice.

Hours: 45 per week for day work. The employer may choose for the day shift either 9 hours per day from Monday to Friday with no work on Saturday, or part of the 45 hours may be worked on Saturday morning. The night shift also to be 45 hours per week to be worked in five nights.

Overtime: all time either before or after the regularly established hours to be paid at overtime rates. Overtime on first five days of the week to be paid at time and one-half for first three hours; all other overtime and work on Sundays and holidays, double time.

Wages: "The rates of pay for the regular day shift shall be for 46¼ hours at the same hourly rate as now being paid for 48 hours; and for night shifts, shall be for 46½ hours at the same hourly rate as now being paid for 48 hours, plus fifteen per cent," artists to be paid for 45 hours on the basis of 46½ hours at their present rate.

TORONTO, ONTARIO—TORONTO DAILY NEWSPAPERS AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL NO. 91.

Agreement to be in effect from April 1, 1937, to March 31, 1938.

Only union members to be employed, if available; if none available, others may be employed but must join the union.

Hours: for day work 8 per day, 5 days per week, a 40-hour week; for night work and shifts partly in day and partly in night hours, 7½ hours, 5 shifts per week, a 37½ hour week.

Overtime: time and one-half; work on Sundays and eight specified holidays, double time, with the exception of work on morning newspapers. Day men on morning newspapers to work on these holidays for four hours to be completed by noon, for which they are to be paid a regular day's pay; for work over four hours on holidays or work on Sundays, double time.

Minimum wage rates for assistant foremen, compositors, make-ups, operators, proofreaders, copycutters, bank men, type casters and linotype machine tenders: $42.50 for day work, $44 for night work, $47 for shifts partly in day hours and partly in night hours (lobster shift). (The previous rates were $47.50 for a 46½-hour week for day workers and a 42-hour week for night workers.) Learners on machines who must be journeymen or sixth year apprentices to be paid three-quarters of regular scale for the six months' period of learning.

Apprentices: one apprentice allowed for each ten men regularly employed or majority fraction thereof, but in no case may more than five apprentices be employed in any one office on the same day. Apprentices to serve six years and must complete the course in printing of the international union.

Wages per week for apprentices: second year $10.50, first half of third year $14.25, second half $16.50, first half of fourth year $18.75, second half $21.50, first half of fifth year $25, second half $28.50, sixth year $31.

A joint standing committee to be formed for the settlement of all questions arising out of this agreement. If this committee cannot settle any dispute, it will be referred to arbitration in accordance with the arbitration agreement most recently in force between the American Newspaper Publishers' Association and the International Typographical Union.

TORONTO, ONTARIO.—PUBLISHERS OF TWO DAILY NEWSPAPERS AND THE INTERNATIONAL TYPOGRAPHICAL UNION NO. 5 (MAILERS).

Agreement to be in effect from June 1, 1937, to May 31, 1938.

Hours: 8 per day for day work, a 48-hour week; 7 per night for night work, a 42-hour week.

Overtime: time and one-half. For work on evening papers, double time for work on Sundays and eight specified holidays; for work on morning newspapers, all time in excess of the regular daily shift, to be paid at double time.

Wages for both day and night work: $42 per week. (This is an increase of $1 per week over last year's rate.)

Apprentices: one apprentice allowed to each nine journeymen with no more than three to any one office with a spacing of two years between each apprentice.

Wages for apprentices from $13 per week for second year to $31 during sixth year.

A joint standing committee to be formed for settlement of disputes. If they cannot reach a settlement, they shall select a neutral chairman. If negoiations between the parties are unsuccessful in reaching a new agreement, the terms of such agreement will be fixed by this committee.

Windsor, Ontario.—A Daily Newspaper Publisher and the International Typographical Union, Local No. 553.

Agreement to be in effect from April 1, 1937, to March 31, 1940, and thereafter from year to year subject to notice. The scale of wages may be reopened for consideration by either party giving 60 days' notice prior to April 1, 1938 or 1939.

Only union members to be employed, if available; if none available, others employed must join the union.

Hours: 8 per day, a 48 hour week. No attempt to be made to enforce the 5 day week except with the permission of the employer.

Overtime: time and one-half. If called back without previous notice, $1 for such call back in addition to overtime pay. Work on Sundays and five specified holidays, with the exception of work on editions published regularly, to be paid at double time.

Wages per hour: for day work 85 cents (an increase of 5 cents), for night work 90 cents (an increase of 5 cents), for "lobster shift" (shifts beginning after 11 p.m. and before 6 a.m.) $1 per week above night schedule. In addition a bonus of $50 to be paid between April 1 and April 15, 1937, and a bonus of $25 between December 1 and December 15, 1937, to be paid all those on the payroll December 1, 1936. It is agreed that 89·1 cents be recognized as basic scale for re-opening the wage clause in 1938.

Vacation: a vacation of four days with pay granted to all regulars, apprentices and subs on the payroll on December 1, 1936.

Apprentices: one apprentice allowed to every eight journeymen regularly employed. Apprentices to serve five years and to be paid on a certain proportion of journeymen's scale with increases each six months.

A joint standing committee to be formed for the settlement of disputes.

Winnipeg, Manitoba.—Two Daily Newspaper Publishers and the Winnipeg Newspaper Printers' Association.

Agreement to be in effect from March 1, 1937, to February 28, 1942, and until a new agreement is reached providing such time does not exceed 30 days after the expiration date. In any year during the term of the agreement the wage scale may be reconsidered providing either party gives notice 60 days before March 1 of that year.

This agreement is similar to the one previously in effect and summarized in the Labour Gazette, June, 1935, page 584, with certain changes:

The provisions in the previous agreement that workers who are not union members might be given a permit to work in the composing rooms is eliminated.

Certain changes are made in the arrangement of hours for men on a combination shift.

Wages and weekly hours are unchanged: for day work 87 cents per hour with a 46 hour week; for night work 96·6 cents per hour with a 43½ hour week.

Regina, Sask.—Certain Job Printing Offices and the International Printing Pressmen and Assistants' Union, Local No. 75.

Agreement to be in effect from May 1, 1937, to April 30, 1938.

This agreement is similar to the one previously in effect and summarized in the Labour Gazette, October, 1933, page 1034, December, 1934, page 1149 and September, 1935, page 865, with these exceptions:

Hours for the night shift are reduced from 44 to 42 per week. Hours for day shift remain at 44 per week.

Minimum wages: journeyman cylinder pressman $35.20, cylinder assistant $25.95, cylinder assistant part time on cylinder and platens $20.95, platen pressmen $33.10, platen feeders $9 during first six months and $12 during second six months. (These are increases of from 50 to 81 cents per week over the previous rates.)

Regina, Sask.—Two Newspaper Publishers and the International Typographical Union, Local No. 657.

Agreement to be in effect from May 1, 1937, to April 30, 1938.

This agreement shows no change from the one previously in effect and summarized in the Labour Gazette, September, 1935, page 865.

Wages and hours for compositors remain at 78 cents per hour with a 48 hour week, for day work; for night work, $3 per week of 45 hours over the day scale.

Regina, Sask.—Certain Job Printing Firms and the International Typographical Union, Local No. 657.

Agreement to be in effect from May 1, 1937, to April 30, 1938.

This agreement is similar to the one previously in effect and summarized in the Labour Gazette, September, 1935, page 865, with this exception:

The wage rate for compositors for the day shift is increased from 78 to 80 cents per hour, with a continuance of the 44 hour week. As before, the night shift is paid $3 extra per week and is a 42 hour week.

Edmonton, Alberta.—A Certain Newspaper Publisher and the International Typographical Union, Local No. 604.

Agreement to be in effect from May 16, 1937, to May 15, 1938.

This agreement renews the one previously in effect and summarized in the Labour Gazette, December, 1935, page 1154, with this exception:

The wage rate for compositors is 90 cents per hour for day work (an increase of 5 cents per hour); night shift 96 cents (an increase of 5⅔ cents per hour), lobster shift $1 per hour (an increase of 6 cents per hour). The hours are unchanged at 45 per week for all shifts.

Manufacturing: Miscellaneous Wood Products

Preston, Ontario.—A Certain Wood Products Manufacturing Firm and Their Employees.

Agreement reached following strike reported on page 1185 of this issue, and conciliation by the Ontario Department of Labour. Agreement to be in effect from October 12, 1937, until a new agreement arranged.

The Company agrees to recognize a union of its own employees and a shop committee.

No discrimination against any employees because of union membership.

Hours: 9 per day, 4 on Saturdays, a 49 hour week.

Overtime: time and one quarter.

Wages: an immediate general increase of 8 per cent and a further increase of 2 per cent November 12, 1937, to all employees except those commencing work under 21 years and not having four years' employment. New employees over 21 years to start at 27 cents per hour. Boys commencing work under 21 years of age to be paid a minimum of 18 cents per hour during first year, 21 cents during second year, 24 cents during third year and 27 cents during fourth year.

Seniority to be considered in employment during slack periods.

VANCOUVER, B.C.—TWO SASH AND DOOR MANUFACTURERS AND COMMITTEES OF THEIR EMPLOYEES.

Agreements made following the strike reported in the September issue of the LABOUR GAZETTE, to be in effect from August 14, 1937, to May 1, 1938. "Either party to this agreement must give not less than thirty (30) days' notice before the expiring date."

The employers recognize the employees' committees for the purpose of settlement of disputes between the parties.

Hours: in one factory 44 per week, in the other 48 per week.

Overtime: time and one-half.

Wages: in one factory, an increase of 7 per cent in wages granted, with a meeting arranged to take place in October to consider whether conditions justify a further increase of 5 per cent; in the other factory, an increase of 3 cents per hour on the rates of 40, 45, 50 and 60 cents per hour, with the exception of engineers and kiln loaders and a further increase of 2 cents per hour September 16, 1937.

Manufacturing: Non Metallic Mineral Products

BLUBBER BAY, B.C.—A CERTAIN LIME COMPANY AND THEIR EMPLOYEES

Agreement reached following strike reported in the LABOUR GAZETTE, October, page 1075.

Agreement to be in effect from September 8, 1937, subject to 30 days' notice.

The Company agrees to bargain collectively with its own employees through a committee duly selected by the employees.

Hours: 8 per day, 6 days per week, a 48-hour week.

Overtime: time and one-half; work on Sundays and holidays also time and one-half. This overtime rate does not apply to maintenance work.

Wages: an increase of 3½ cents per hour over the previous rates is given; coopers 6 cents per barrel; boat loading 50 cents per hour from 8 a.m. to 5 p.m., 75 cents between 5 p.m. and 8 a.m.

Manufacturing: Miscellaneous Products

GRAVENHURST, ONTARIO.—A CERTAIN BRUSH FACTORY AND THEIR EMPLOYEES

The terms of this agreement reached in settlement of the strike of these workers are noted with the report of the strike on page 1184.

Construction: Building and Structures

REGINA, SASK.—REGINA BUILDERS' EXCHANGE AND THE BRICKLAYERS, MASONS AND PLASTERERS INTERNATIONAL UNION, LOCAL NO. 1 SASKATCHEWAN (BRICKLAYERS AND STONEMASONS).

Agreement to be in effect from March 1, 1937, to March 1, 1938.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, July, 1935, page 693, with the following exceptions:

The agreement applies to the city and to country work under the jurisdiction of this local union. Transportation to and from country jobs to be provided by the employer.

Wages per hour for journeymen bricklayers and stonemasons: $1.10 (an increase of 10 cents per hour over the previous rate).

Transportation and Public Utilities: Water Transportation

MONTREAL, QUEBEC.—VARIOUS STEAMSHIP COMPANIES AND STEVEDORING COMPANIES AND THE INDEPENDENT ASSOCIATION OF CARPENTERS AND SHIPLINERS OF THE PORT OF MONTREAL (Shipliners).

This agreement, which came into effect April 1, 1936, to run to December 31, 1936, and thereafter from year to year until notice, continued to be in effect in 1937.

The agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, August, 1933, page 853, April, 1934, page 373, and June, 1935, page 586, with these exceptions:

The starting time for day work to be between 7 a.m. and 7.30 a.m., at 9 a.m. and between 1 p.m. and 1.30 p.m.

Wage rates were increased 3 cents per hour over the 1935 rates, making them 65 cents for day work, 75 cents for evening work and 85 cents for night work, with 10 cents per hour extra for work in holds of steamers in which bulk sulphur or bulk fertilizer has been stowed and where the old wood is being used in whole or in part.

Transportation and Public Utilities: Local Transportation

VANCOUVER, B.C.—A CERTAIN BUS AND TRUCK COMPANY AND THE AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY AND MOTOR COACH EMPLOYEES OF AMERICA, LOCAL NO. 101 (B.C. MOTOR TRANSPORTATION GARAGE EMPLOYEES SECTION)

Agreement to be in effect from September 1, 1937, to August 31, 1940, and thereafter subject to notice.

The company recognizes the union and will not discriminate against any employee on account of his membership in it. All employees affected by the agreement must become members of the union within three months of their employment.

Hours: 8 per day.

Overtime: time and one-half. Any man called to work on his day off to be paid time and one-half for all work on that day.

Wages per hour from September 1, 1937, to August 31, 1939: Mechanics—leading hand 76½ cents; first class 74 cents; second class 63 cents during first year of employment, 68¼ during second year; apprentices 25 cents

during first year, 30 cents second year, 39 cents third year, 49 cents fourth year. Bodymen—first class 68¼, second class 56½ during first year of employment, 59 cents during second year; apprentices same rates as apprentice mechanics. Machinists and electricians—same rates as for first and second class mechanics and apprentice mechanics. Servicemen (greasers, gas attendants and washers) 56 cents for first class and 52 cents for second class. Tiremen—75 cents for first class, 63 cents for second class, apprentices same as apprentice mechanics. Helpers 47 cents. Wage rates from September 1, 1939, are increased one cent per hour for all the above classes.

Apprentices: one allowed for the shop and one for each additional four skilled employees.

The Company will employ at least 40 per cent of the total number of skilled employees in each of the above divisions as first class men and pay them the first class rate.

Vacation: employees in the service of the Company for more than one year and who have clear records will be given one week's vacation with pay during the first year of the period of the agreement, eight days during the second year and 10 days during the third year. Those who have worked only part of the year will be given proportionate vacations. When vacations are withheld as a disciplinary measure, this may only be done after the facts have been submitted to the men's committee.

Seniority to be considered in making appointments or promotions and when laying off or re-employing staff.

Vancouver, B.C.—A Certain Trucking Company and the International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers, Local No. 31 (Truck Operators and Swampers Section).

Agreement to be in effect from October 1, 1937, to September 30, 1940, and thereafter subject to notice. In case an increase in the prevailing wage rates for truck drivers in Vancouver which would bring these rates higher than those of this agreement, the wage rates may be reconsidered at any time, after 30 days' notice given.

The Company recognizes the union and will not discriminate against any employee on account of his membership in this union. All employees must become union members within three months of their employment. Preference in employment to be given union members. Employees to receive and sign for a copy of the agreement and so authorize the Company to deduct and pay to the union secretary, union dues, fines and assessments.

Hours: 54 per week to be worked in 5½ days. If necessary, owing to emergencies or the nature of the work, for time to be worked in any one day in excess of 10 hours, such excess time worked will be allowed off as sooon as possible thereafter.

Wages: regular operators $4.60 per day, spare operators 50 cents per hour, swampers 45 cents, swampers (casual) 40 cents.

Vacation: regular operators who have clear records for the year will be given 6 days' vacation with pay. Spare operators and swampers who have clear records for the year will also be granted 6 days' vacation with pay, provided they have been continuously in the service of the Company for at least two years and have worked at least nine months of the previous year. Vacations may be withheld as a disciplinary measure but only after the facts have been submitted to the men's committee.

Trade

Winnipeg, Manitoba.—Schedule of Wages and Hours Adopted by a Certain Scrap Metal Trading Firm.

Schedule reached following strike reported on page 1184, and conciliation by Manitoba Department of Labour, to be in effect from October 21, 1937 to September 30, 1938 and till 30 days notice.

Hours: 8 per day, 4 on Saturday, a 44 hour week

Overtime: time and one-half

Wages per hour: two senior men at 35 cents; all employees with over 9 months' service 32½ cents; those with a 6 to 9 months' service 30 cents; those with 3 to 6 months' service 27½ cents; first three months 25 cents.

Any disputes which cannot be settled between the company and the grievance committee to be referred to the Department of Labour and the company agrees to co-operate for settlement.

Service: Hotel and Restaurant

Lethbridge, Alberta.—Hotels of Lethbridge and the Hotel and Restaurant Employees' International Alliance, Local No. 54 (Beverage Dispensers).

This agreement which came into effect April, 1936, continues to April 1938, and thereafter from year to year subject to notice.

All beer parlour employees must be union members. A shop steward to be appointed by the union in each hotel to collect dues.

Hours: 8 per day, 6 days per week, a 48 hour week

Minimum wages: combination men $25. per week, floor men $24, extra or casual men 50 cents per hour.

Any disputes are to be referred to a joint committee. If they are unable to agree, an extra member to be jointly selected and the decision of such board to be final and binding.

Workmen's Wages Act, Quebec

The following agreements and amendments to agreements have recently been made obligatory by Orders in Council and are noted in the next article:

Aluminum Workers, Arvida
Aluminum Workers, Shawinigan Falls
Printing Trades, Montreal (amendment)

Industrial Standards Act of Ontario

The following schedules have recently been made binding by Orders in Council and are noted on page 1274 of this issue:

Soft Furniture Industry, Province of Ontario
Carpenters, Cornwall
Carpenters, Pembroke
Plasterers, Toronto
Carpenters, Sault Ste. Marie

Barbers, Oshawa
Barbers, Hamilton
Barbers, Brantford
Barbers, Galt
Barbers, Kitchener
Barbers, London
Barbers, Chatham
Barbers, Essex County
Barbers, Sault Ste. Marie

Industrial Standards Act of Saskatchewan

The following schedules have recently been made binding by Orders in Council and are noted on page 1276 of this issue:

Plumbers, Saskatoon
Shoe Repairers, Regina
Barbers, Weyburn
Beauty Culture, Weyburn
Beauty Culture, Moose Jaw

WORKMEN'S WAGES ACT, QUEBEC

Agreements Recently Made Obligatory and Other Proceedings

AN Act respecting Workmen's Wages which was summarized in the July issue of the LABOUR GAZETTE, page 745, replaces the Collective Labour Agreements Extension Act but stipulates that the agreements and regulations made under the former Act continue in effect for the period for which they were made. Under the Workmen's Wages Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant Governor in Council through the provincial Minister of Labour to have those terms of such agreement which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant Governor in Council may deem in conformity with the spirit of the Act, made obligatory on all employers and employees in the trade, industry, commerce or occupation within the district determined in the agreement. Notice of such application is published, and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable, with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date of publication of the Order in Council in the *Quebec Official Gazette*. The agreement may be amended through the same procedure. A joint committee must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and published in the *Quebec Official Gazette*, the committee is constituted a corporation. A joint committee may require certificates of competency from workers within the scope of the agreement in towns of 5,000 or more, and such by-law must be approved by Order in Council and published in the *Quebec Official Gazette*. Proceeding under the Collective Labour Agreements Extension Act were summarized in the LABOUR GAZETTE from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act are noted in the issues beginning July 1937.

Recent proceedings under this Act include the extension by Orders in Council of agreements affecting employees of an aluminum manufacturing company at Arvida and Shawinigan Falls and an amendment to the agreement affecting printing trades at Montreal, all as summarized below. Requests for the extension of agreements affecting the manufacture of men's and boys' clothing throughout the Province and taxi drivers in Montreal were published in the *Quebec Official Gazette*, October 9, and that affecting plumbers at Shawinigan Falls in the issue of October 23. A correction to the request for the extension of the agreement in the paint manufacturing industry throughout the Province was published in the issue of October 30. Notices of the approval of the constitution and by-laws of certain joint committees and notice that the certificate of competency has been declared compulsory in certain trades are also noted below.

Manufacturing: Non-ferrous Metals

ARVIDA, QUEBEC.—THE ALUMINIUM COMPANY OF CANADA, LIMITED AND LE SYNDICAT NATIONAL CATHOLIQUE DE L'INDUSTRIE DE L'ALUMINIUM D'ARVIDA (THE NATIONAL CATHOLIC UNION OF THE ALUMINIUM INDUSTRY OF ARVIDA).

This agreement, made obligatory by Order in Council and published in the *Quebec Official Gazette*, October 30, is in effect from October 30, 1937, to December 31, 1938, and thereafter from year to year, subject to notice. The employer has the right to employ, dismiss or otherwise deal with the employees, but agrees to do so with due regard for character, ability, family status, length of service, place of residence and without discrimination against

any employee because of race, nationality, creed or affiliation with any lawful organization. Neither the employer nor the union shall coerce or force, directly or indirectly, any of the employer's employees to join or not to join any lawful association or organization.

Hours: except in cases of necessity or urgency, employees paid by the hour not to work more than 8 hours per working day, averaged through the regular working days of each calendar month.

Overtime: the employer may require any hourly paid employee to continue work, at his regular rate, for not longer than one hour after his regular hours. The employee may also, if authorized by the employer, work longer, at the same regular rate. If called back to work thirty minutes or more after quitting work, at least two hours pay at regular rate to be given any hourly paid employee. Except for persons employed in continuous operations and in cases of necessity or urgency, no work on Sundays and nine specified holidays.

Vacation: after one year's continuous service, each employee paid by the week or month to be entitled to a vacation of two weeks per year with pay, and beginning January 1, 1938, each employee paid by the hour to be entitled to a vacation each calendar year, with pay at his then prevailing base rate, of one day for each year of continuous service with the employer.

Minimum hourly wage rates for certain classes of work: routine analysts 35 cents first year, 40 cents second year, 45 cents third year; apprentices from 25 cents during first year to 45 cents fourth year; toolroom attendant 50 cents; armature winder 70 cents; blacksmith 55 cents, blacksmith assistant 45 cents, boiler operators—55 cents with fourth class certificate, 62 cents with third class certificate and 70 cents with second class certificate; bricklayer 75 cents, carbon changer 51 cents, carpenter 55 cents, clerk 55 cents, junior clerk 45 cents, craneman 47 cents; craneman—potroom 49 cents; crane repairman 55 cents; electrician 60 cents, electrician's assistant 50 cents, hoist enginemen 50 to 60 cents, fireman 50 cents; machinist 65 cents; mechanics—general maintenance 60 cents, millwright 60 cents, moulder 60 cents, moulder assistant 45 cents, calciner operator 47 cents, electrical department operator 55 cents, painter 55 cents, patternmaker 80 cents, pipefitter 55 cents, plate worker 60 cents, plate worker assistant 45 cents, pot connector 49 cents, potman 49 cents, rigger 60 cents, tinsmith 60 cents, watchman 51 cents, weigher 49 cents, welder 65 cents; labourers—general 45 cents; labourers—construction 40 cents; boys 25 cents if under 18 years, 30 cents from 18 to 21 years.

A joint committee to be formed for the supervision and carrying out of the agreement.

Shawinigan Falls, Quebec.—The Aluminum Company of Canada, Limited and Le Syndicat Catholique National des Employés de la Aluminium Company of Canada Ltd. (The National Catholic Union of the Employees of the Aluminum Company of Canada, Limited).

The agreement, made obligatory by Order in Council and published in the *Quebec Official Gazette*, October 30, is in effect from October 30, 1937, to December 31, 1938, and thereafter from year to year subject to notice.

This agreement is similar to that summarized above for employees of the same Company at Arvida, with the exception of the wage schedule:—

Minimum hourly wage rates for certain classes of work: analyst 32 cents, analyst assistant 26 cents, annealer 42 cents, apprentice 26 cents, blacksmith 46 cents, cabler 46 cents, carbon changer 48 cents, carter 40 cents, catcher 46 cents, chemist assistant 40 cents, clerk 42 cents, craneman 48 cents, electrician 46 cents, electrician assistant 40 cents, fireman —remelt 54 cents, handyman 42 cents, head potman 60 cents, head potman helper 54 cents, potman 48 cents, machinist 56 cents, millwright 46 cents, painter 46 cents, pourer—remelt 46 cents, power house operator 44 cents, power house helper 34 cents, reelmaker 42 cents, reelman 40 cents, rigger 50 cents, stenciller 40 cents, sweeper 40 cents, tapper 52 cents, tester 38 cents, timekeeper 40 cents, trucker 46 cents, watchman 40 cents, weigher 40 cents, welder 46 cents, wire drawer 42 cents, for first six months and 48 cents thereafter, labourer 40 cents.

Manufacturing: Printing and Publishing

Printing Trades, Montreal and District.—An Order in Council dated October 22 and published in the *Quebec Official Gazette*, October 30, amends the previous Order in Council for these trades (Labour Gazette, June, 1936, page 546, and December, page 1181) by extending the date of termination from November 1, 1937, to January 3, 1938.

Joint Committees

The constitution and by-laws of the joint committees set up under the following agreements were approved by Orders in Council and published in the *Quebec Official Gazette* in the following issues:—

Shoe Repairers, Montreal (October 23 and 30).

Barbers and Hairdressers, Three Rivers (October 30).

Cloak and Suit Manufacturers, Province of Quebec (October 30).

Shoe Manufacturing, Province of Quebec (October 30).

Building Trades, Sorel (October 30).

Competency Cards

An Order in Council as noted in the *Quebec Official Gazette*, October 30, makes the competency card obligatory in the following trades:—

Building Trades, Drummondville.

The quantity of salt produced in Canada during 1936 totalled 391,316 short tons valued at $1,773,144 as compared with 360,343 short tons worth $1,880,978 in 1935, according to finally revised statistics issued by the Dominion Bureau of Statistics. The tonnage produced in 1936 was the greatest ever recorded for the Canadian salt industry.

The number of firms active in the production of salt in 1936 was eight; capital employed by these totalled $3,856,187 and $640,644 was disbursed as salaries and wages to 506 employees; of the wage-earners 347 were recorded as male and 37 as female. The industry expended $181,502 for fuel and electricity, $31,195 for process supplies, and $527,647 for packages or containers.

INDUSTRIAL STANDARDS ACT OF ONTARIO

Schedules of Wages and Hours Recently Approved by Orders in Council

THE Industrial Standards Act of Ontario, the text of which was printed in the LABOUR GAZETTE, June, 1935, page 534, with amendments in the issue of May, 1936, page 410, and May, 1937, page 505, provides that the Minister of Labour for Ontario may, upon petition of representatives of employees or employers in any industry, convene a conference or series of conferences of employees and employers in the industry, in any zone or zones to investigate the conditions of labour and practices in such industry and to negotiate standard rates of wages and hours of labour. The employees and employers in attendance may formulate and agree upon a schedule of wages and hours of labour for all or any class of employees in such industry or district. If, in the opinion of the Minister a schedule of wages and hours for any industry is agreed upon in writing by a proper and sufficient representation of employees and of employers, he may approve of it, and upon his recommendation, the Lieutenant-Governor in Council, may declare such schedule to be in force "during pleasure" or for a period not exceeding twelve months stipulated in the schedule and thereupon such schedule shall be binding upon every employee and employer in such industry in the whole or any part of the province designated by the Minister, such schedule not coming into effect until ten days after publication of the Order in Council in *The Ontario Gazette*. The Minimum Wage Board has authority to enforce the provisions of the Act and of the regulations and schedules. Beginning with the July, 1935, issue of the LABOUR GAZETTE, summaries are given in this article of the schedules which have thus been approved.

Manufacturing: Wood Products

TORONTO, ONTARIO.—SCHEDULE OF WAGES AND HOURS FOR THE SOFT FURNITURE INDUSTRY.

An Order in Council, dated September 29, and published in *The Ontario Gazette*, October 9, makes binding in a zone which includes the city of Toronto and the townships of York, East York, North York, Scarboro and Etobicoke, this schedule governing the entire or partial manufacture or rebuilding or recovering of all forms of upholstered of soft furniture, excluding the making of frames.

The schedule to be in effect from October 19, 1937 to October 15, 1938, unless it is sooner replaced by a schedule for this industry applying throughout the Province.

Hours: 8 per day, 4 on Saturdays, a 44 hour week, with the exception of labourers who may work an additional hour per day for sweeping and cleaning up, at regular rates of wages.

Overtime: no work outside the regular working periods except with a permit from the advisory committee, Such permit may be issued in the production of custom-made soft furniture from March 1 to May 31 inclusive and from September 1 to December 31 inclusive, but in no case for more than one hour a day or four hours per week. No work on Saturday afternoons, Sundays or on eight specified holidays.

Minimum wages per hour: upholsterers 65 cents; cutters, springers operators, cushion-fillers, finishers, trimmers, 55 cents; labourers 40 cents. The advisory committee is authorized to fix a special minimum rate of wages for any person who is handicapped by lack of skill or experience.

Construction: Buildings and Structures

CORNWALL.—SCHEDULE OF WAGES AND HOURS FOR THE CARPENTRY INDUSTRY.

An Order in Council dated September 29 and published in *The Ontario Gazette*, October 9, makes this schedule binding in a zone which includes the town of Cornwall and adjacent municipalities in the carpentry industry.

The schedule is in effect from October 19, 1937 to April 1, 1938.

Hours: 8 per day, 4 on Saturdays, a 44 hour week. Carpenters working on night shifts to be paid 8 hours' pay for 7 hours' work. If necessary for the pouring of concrete, work may be done after noon on Saturday at the regular rate.

Overtime: time and one-half for first three hours; thereafter and work on Sundays and eight specified holidays, double time.

Minimum wage rate: 65 cents per hour. The advisory committee may fix a special minimum rate of wages for any employee who is handicapped.

The schedule does not govern employees of manufacturing plants while engaged in manufacturing processes nor employees of manufacturing plants or industrial establishments regularly engaged in repair, servicing and upkeep of the plant or equipment including new installations or alterations of a minor nature.

PEMBROKE.—SCHEDULE OF WAGES AND HOURS FOR THE CARPENTRY INDUSTRY.

An Order in Council dated September 29 and published in *The Ontario Gazette*, October 9, makes binding in a zone which includes the town of Pembroke and the suburban area consisting of that part of the County of Renfrew within two miles of the town, a schedule governing the carpentry industry.

The schedule is in effect from October 19, 1937 to May 1, 1938.

Hours: 10 per day, 5 on Saturdays, a 55 hour week. If necessary for the pouring of concrete, work may be done Saturday afternoon at the regular rate.

Overtime and all work necessary and permitted by the advisory committee on Saturday afternoons, Sunday, and eight specified holidays, time and one-half.

Minimum wage rate: 45 cents per hour. The advisory committee may fix a special minimum rate for any handicapped employee.

The schedule does not govern employees of manufacturing plants engaged in manufacturing processes or in the repair, servicing or upkeep of the plant or equipment including new installations or alterations of a minor nature.

TORONTO.—SCHEDULE OF WAGES AND HOURS IN THE PLASTERING INDUSTRY.

An Order in Council, dated September 29, and published in *The Ontario Gazette* October 9, makes binding in a zone which includes the city of Toronto and five neighboring townships, a schedule governing the plastering industry.

The schedule is in effect from October 19, 1937, "during pleasure".

Hours: for plasterers, 8 per day from Monday to Friday inclusive, a 40 hour week; for plasterers' labourers, 9 per day, 5 on Saturdays, a 45 hour week, provided however that a plasterer's labourer will be considered to be working overtime whenever he is attending a plasterer who is working overtime. In case of shift work, those on night shift to be paid one and one seventh of the regular rate.

Overtime: time and one-half. Work which is necessary and permitted by the advisory committee, on Sundays and eight specified holidays, double time.

Minimum wage rates: plasterers 90 cents, plasterers' labourers 60 cents. The advisory committee is authorized to fix a special minimum rate for any employee who is handicapped.

This schedule does not govern employees of manufacturing plants or industrial establishments regularly engaged in the repair, service and upkeep of the establishment, including new installation or alterations of a minor nature.

SAULT STE. MARIE.—SCHEDULE OF WAGES AND HOURS IN THE CARPENTRY INDUSTRY.

An Order in Council dated September 29 and published in *The Ontario Gazette*, October 9, makes binding in the city of Sault Ste. Marie and within five miles of it, this schedule in the carpentry industry.

The schedule is in effect from October 19, 1937 to May 1, 1938.

The schedule is similar to the one summarized above for carpenters at Cornwall, with these exceptions;

Regular hours are 8 per day, 6 days per week, a 48 hour week.

Minimum wage rates: 75 cents per hour.

Service: Personal

OSHAWA.—SCHEDULE OF WAGES AND HOURS IN THE BARBERING INDUSTRY.

An Order in Council, dated September 29, and published in *The Ontario Gazette*, October 9, makes this schedule binding in the city of Oshawa.

The schedule is in effect from October 19, 1937 "during pleasure".

Hours for all employers and employees to be those during which barber shops are permitted to be open by municipal by-law. Work may be done on any day except Wednesday afternoons, Sundays and eight specified holidays.

Minimum wages: full time employment on a salary basis $25 per week; full time employment on a commission basis, $15 per week plus 50 per cent of proceeds in excess of $22 from the work of the employee; those employed part time for less than four days or 40 hours per week, 65 per cent of the proceeds from the work of the employee.

No deduction to be made from wages for materials supplied, laundry service or operating expenses.

A schedule of minimum charges for each operation in the trade is included.

HAMILTON.—SCHEDULE OF WAGES AND HOURS IN THE BARBERING INDUSTRY.

An Order in Council, dated September 29 and published in *The Ontario Gazette*, October 9, makes this schedule binding in the barbering industry in a zone which covers the city of Hamilton.

The schedule is in effect from October 19, 1937, "during pleasure."

This agreement is similar to the one summarized above for Oshawa, with these exceptions:

Minimum wages for those employed full time on a commission basis to be $15 plus 60 per cent of the proceeds in excess of $21 from the work of the employee. Minimum wages for those employed part time: those working nights and Saturdays, that is working four hours per day or less from Monday to Friday inclusive and all day or less on Saturday, $10 per week plus 60 per cent of the proceeds in excess of $15; those working on Saturdays or the day before a holiday and on the previous evening only, $7 per week plus 60 per cent of the proceeds over $10; those working Saturday or the day before a holiday, $5 per day or part thereof plus 60 per cent of proceeds in excess of $7; those working on days other than Saturday or the day before a holiday, $2.50 per day or part hereof plus 60 per cent of the proceeds in excess of $4.

BRANTFORD.—SCHEDULE OF WAGES AND HOURS IN THE BARBERING INDUSTRY.

An Order in Council dated September 29 and published in *The Ontario Gazette*, October 9, makes binding in the city of Brantford a schedule governing the barbering industry.

The schedule is in effect from October 19, 1937, "during pleasure."

The schedule is similar to the one summarized above for Oshawa, with these exceptions:

Minimum wage rates: for those employed full time on a straight salary, $20 per week; those employed full time on a commission basis, $15 per week plus 50 per cent of the proceeds in excess of $20 or 65 per cent of the proceeds; those employed part time, 65 per cent of proceeds.

GALT, HESPELER AND PRESTON.—SCHEDULE OF WAGES AND HOURS IN THE BARBERING INDUSTRY.

An Order in Council, dated October 28, and published in *The Ontario Gazette*, October 30, makes this schedule binding in the city of Galt and the towns of Hespeler and Preston and the suburban area within one mile of each of them.

The schedule is in effect from November 9, 1937, "during pleasure".

This schedule is similar to that summarized above for Oshawa, with these exceptions:

Minimum wages: for those employed full time on a straight salary, $21 per week; for those employed full time on a commission basis, $20 per week plus 50 per cent of proceeds in excess of $28. Minimum wages for those employed part time: those working four hours or less from Monday to Friday inclusive and all day or less on Saturday, $10 per week, plus 50 per cent of the proceeds in excess of $15; those working on Saturdays or the day before a holiday and on the previous evening only, $7 per week plus 50 per cent of the proceeds in excess of $10; those employed only for Saturday or the day before a holiday, $5 plus 50 per cent of the proceeds in excess of $7; those employed on days other than Saturdays or the day before a holiday, $2.50 per day or part thereof, plus 50 per cent of the proceeds in excess of $4.

KITCHENER AND WATERLOO.—SCHEDULE OF WAGES AND HOURS IN THE BARBERING INDUSTRY.

An Order in Council, dated September 29, and published in *The Ontario Gazette*, October 9, makes binding this schedule in the city of Kitchener and the town of Waterloo.

The schedule is in effect from October 19, 1937, "during pleasure".

This schedule is similar to the one summarized above for Hamilton with this exception:

Minimum wages for those employed full time on a commission basis: $16 per week plus 60 per cent of proceeds over $23.

LONDON.—SCHEDULE OF WAGES AND HOURS IN THE BARBERING INDUSTRY.

An Order in Council, dated September 29, and published in *The Ontario Gazette*, October 9, makes this schedule binding in the city of London and the adjacent suburban area.

The schedule is in effect from October 19, 1937, "during pleasure".

This schedule is similar to the one summarized above for Hamilton, with these exceptions:

Minimum wages for those employed full time on a commission basis: $15 per week plus 70 per cent of the proceeds in excess of $21.50. In all cases where 60 per cent of proceeds over a certain amount is mentioned in the Hamilton schedule, 70 per cent of these proceeds is in the London agreement.

CHATHAM.—SCHEDULE OF WAGES AND HOURS IN THE BARBERING INDUSTRY.

An Order in Council, dated September 29, and published in *The Ontario Gazette*, October 9, makes this schedule binding in the city of Chatham and the suburban area within one mile of it.

The schedule is in effect from October 19, 1937, "during pleasure".

This schedule is similar to the one summarized above for Hamilton, with this exception:

Minimum wages per week for those employed full time on a commission basis: $15 per week plus 60 per cent of proceeds in excess of $22.

ESSEX COUNTY.—SCHEDULE OF WAGES AND HOURS IN THE BARBERING INDUSTRY.

An Order in Council, dated September 29, and published in *The Ontario Gazette*, October 9, makes this schedule binding in the County of Essex and that part of Wheatley which lies in the County of Kent, except the city of Windsor.

The schedule is in effect from October 19, 1937, "during pleasure".

This schedule is similar to that summarized above for Oshawa, with the following exceptions:

Wednesday afternoon is not named as a holiday.

Minimum wages for those employed full time: $18 per week if employed on a straight salary basis; $13 per week plus 50 per cent of the proceeds in excess of $19, plus an extra 10 per cent of the proceeds over $30, for those employed full time on a commission basis. Minimum wages for those employed part time: those working for four hours or less Mondays to Fridays inclusive and all day or less on Saturdays, $7.50 per week plus 50 per cent of the proceeds in excess of $12.50; those working Saturdays or the day before a holiday and the previous evening only, $5 plus 50 per cent of the proceeds in excess of $7.50; those employed only on Saturday or the day before a holiday, $4 per day or part thereof, plus 50 per cent of the proceeds in excess of $6; those working on days other than Saturdays or the day before a holiday, $2.50 per day or part thereof, plus 50 per cent of the proceeds in excess of $4.

SAULT STE. MARIE.—SCHEDULE OF WAGES AND HOURS IN THE BARBERING INDUSTRY.

An Order in Council, dated September 29, and published in *The Ontario Gazette*, October 9, makes this schedule binding in the barbering industry in the city of Sault Ste. Marie.

The schedule is in effect from October 19, 1937, "during pleasure".

This schedule is similar to the one summarized above for Hamilton, with these exceptions:

Minimum wages for those employed full time on a commission basis, $15 per week plus 50 per cent of the proceeds over $22, plus an additional 10 per cent of the proceeds in excess of $30. For those employed part time, wherever 60 per cent of proceeds appears in the Hamilton schedule, 50 per cent is stipulated in the Sault Ste. Marie schedule.

INDUSTRIAL STANDARDS ACT OF SASKATCHEWAN

Schedules of Wages and Hours Recently Approved by Orders in Council

THE Industrial Standards Act of Saskatchewan was summarized in the June issue of the LABOUR GAZETTE, page 635. It is similar to the Industrial Standards Act of Ontario. The Act provides that the Minister of Municipal Affairs may, upon petition of employers or employees in any industry (except coal mining and agriculture) authorize an industrial standards officer to call a conference of employers and employees in such industry to investigate conditions and negotiate an agreement concerning hours, minimum rates of wages and overtime rates. If, in the opinion of the Minister, a schedule is agreed upon by a proper or sufficient representation of employers and employees, he may approve it and, upon his recommendation, the Lieutenant Governor in Council may declare it to be binding upon all employers and employees in the industry in the designated zone or zones, during pleasure or for the period not exceeding twelve months stipulated in it. The schedule does not come into effect until ten days after the publication in *The Saskatchewan Gazette*. The Act is to be administered by the Minister of Municipal Affairs and authority to enforce it and the regulations made under it is given to the Commissioner of Labour who is to be assisted by one or more industrial standards officers.

Construction: Buildings and Structures

Plumbers, Saskatoon.—An Order in Council, approved September 29 and published in *The Saskatchewan Gazette,* October 15, makes binding in the city of Saskatoon and the town of Sutherland an agreement between the Master Plumbers and Steamfitters and the Journeymen Plumbers.

The schedule is in effect from November 1, 1937, to November 1, 1938.

Hours: 8 per day, Mondays to Fridays inclusive, a 40-hour week. If required for the protection of life or property or the setting of sleeves and inserts, work may be done Saturday morning at regular rates.

Overtime: time and one-half to midnight: all other overtime and work on Sundays and eight specified holidays, double time.

Minimum wage rate: $1 per hour.

Service: Personal

Shoemakers and Repairers, Regina.—An Order in Council approved September 28, and published in *The Saskatchewan Gazette,* October 15, makes binding the terms of an agreement between the employers and the employees in the shoemaking and repairing industry in the city of Regina.

The schedule is in effect from October 30, 1937, to October 30, 1938.

Hours: 9 per day Mondays, Tuesdays, Thursdays and Fridays, 4 hours of Wednesdays and 12 hours on Saturdays, a 52-hour week.

Overtime: time and one-half. No regular work on Sundays or eight specified holidays.

Minimum wages for a journeyman (one with two years' experience): $16 per week or the total amount earned by him during any week on a production basis at a piece work rate of one-third of certain minimum prices, whichever is greater. (The scale of minimum prices for each piece of work is included in the schedule.) Minimum wages for apprentices: $8 per week during first six months, $10 during second six months, $13.50 during second year. A special minimum rate of wages may be established by the advisory board for any handicapped person.

Not more than one apprentice for each journeyman employed by a firm.

Barbers, Weyburn.—An Order in Council, approved September 28, and published in *The Saskatchewan Gazette,* October 15, makes binding the terms of an agreement between the employers and the employees in the barbering industry in the city of Weyburn.

The schedule is in effect from November 1, 1937, to November 1, 1938.

Hours: 52 per week.

Overtime: No work on Wednesday afternoon except in week in which a holiday occurs, nor on eight specified holidays.

Wages for those regularly employed and for master barbers, whichever is greater: either $16 per week or such percentage of the earnings of the barber or chair operated by him as will assure to the barber a minimum wage equivalent to what he would have received for the same work if he had been employed according to an arrangement where he would receive 65 per cent of the amount taken in at certain shop prices, a scale of which is included in the agreement. Wages for those not regularly employed, $3 per day, except if employed only on Saturday or the day preceding a holiday, for which days they will be paid $5.

Apprentices to be governed by the regulations under the Minimum Wage Act of Saskatchewan.

Beauty Culture Industry, Weyburn.—An Order in Council, approved September 29, and published in *The Saskatchewan Gazette,* October 15, makes binding the terms of an agreement between The Proprietors of the Weyburn Beauty Culture Industry and the Employed Beauticians in the city of Weyburn.

The schedule is in effect from November 1, 1937, to November 1, 1938.

Hours: 48 per week.

Overtime: no work on Wednesday afternoon except in week in which a holiday occurs. Overtime to be paid at the regular rate.

Minimum wages for those regularly employed or master beauticians $13 per week or 50 per cent of the amount taken in at a given list of shop prices, whichever is greater; for those not regularly employed $2.70 per day except if employed on Saturdays or the day preceding a holiday in which case $3.50 for the day be paid. If employed on an hourly basis, the rate to be 35 cents per hour.

Apprentices to be paid $7 per week in first six months, $9 in second six months and $12 in third six months, or 25 cents per hour. The number of apprentices in any shop to be not more than allowed under the Minimum Wage Act of Saskatchewan.

Beauty Culture, Moose Jaw.—An Order in Council, approved September 29 and published in *The Saskatchewan Gazette,* October 15, makes binding the terms of an agreement between the proprietor of the Moose Jaw beauty culture industry and the employed beauticians.

The schedule is in effect from November 1, 1937, to November 1, 1938.

This agreement is similar to the one summarized above for Weyburn, with this exception:—

Hours: 45 per week.

The Dominion Bureau of Statistics has issued a report entitled the *Primary Iron and Steel Industry in Canada, 1936.* According to the report factory sales of pig iron, steel and ferro-alloys and rolled products were nearly 20 per cent higher in 1936 than in 1935, the values being $46,636,892 and $38,700,961, respectively. The 25 works in Ontario reported sales at $30,019,258 or 64 per cent of the total for Canada; 6 divisions in Nova Scotia accounted for $10,108,447 or 21 per cent, and 15 works in Quebec had total sales worth $5,074,845 or almost 11 per cent of the total. There were also 4 operating plants in Manitoba, 1 in Alberta and 5 in British Columbia.

Employees in this industry numbered 11,138 in 1936 as against 9,523 in the previous year. About 782 persons worked in the blast furnace departments, 391 in ferro-alloy plants, 3,852 in the steel furnace divisions and 6,113 in the rolling mills. About 60 per cent of the total, or 6,686, were employed in Ontario, 2,015 in Quebec, 1,996 in Nova Scotia, 327 in Manitoba and 114 in Alberta and British Columbia.

Payments in salaries and wages amounted to $13,830,377, an increase of 13 per cent over the total of $12,279,390 in 1935

PRICES, RETAIL AND WHOLESALE, IN CANADA, OCTOBER, 1937

Cost of Living, Prices of Staple Articles and Index Numbers

In retail prices the cost per week of a family budget of staple foods, fuel and lighting, and rent, was slightly higher due to the somewhat increased cost of foods and to an advance in rent, while the Dominion Bureau of Statistics weekly index number of wholesale prices declined gradually throughout the month due mainly to lower prices for non-ferrous metals and certain farm products.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of retail prices in sixty-nine cities was $8.75 at the beginning of October as compared with $8.72 for September. The principal changes during the month were increases in the cost of eggs, butter, evaporated apples and bacon and decreases in beef, mutton, beans and potatoes. Comparative figures for earlier dates are $8.24 for October, 1936; $7.93 for October, 1935; $6.67 for March, 1933 (the low point in recent years); and $11.68 for October, 1929. Including the cost of fuel and rent with that of foods the total budget cost $17.51 at the beginning of October as compared with $17.41 for September; $16.87 for October, 1936; $16.42 for October, 1935; $15.41 for June, 1933 (the low point in recent years); $21.96 for October, 1929; $20.87 for October, 1922; $26.92 for July, 1920 (the post war peak); and $14.48 for October, 1914. Rent averaged somewhat higher advances being reported from several cities while fuel was practically unchanged.

In wholesale prices the Dominion Bureau of Statistics weekly index number was 84·4 for the week ended October 29 having declined gradually during the month from 85·2 for the week ended October 1. The latest figures available on a monthly basis are for September when the index was 85·0 as compared with 77·1 for October, 1936; 73·1 for October, 1935; 63·5 for February, 1933 (the low point in recent years); 96·8 for October, 1929; 94·8 for October, 1922; 164·3 for May, 1920 (the post war peak); and 66·8 for October, 1914. All of the main groups in the classification according to chief component materials with the exception of the chemicals and allied products group were lower, the largest decline being in the non-ferrous metals group. Raw cotton was substantially lower in price, a factor in this movement being the unusually large crop in the United States. The index for livestock declined fifteen per cent during the month. It was, however, still considerably higher than in October, 1936. Other commodities to show important decrease in price were raw rubber, hides, raw silk and raw wool.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of October of seventy-two staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The price of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the LABOUR GAZETTE for February 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tend to

(Continued on page 1286)

COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL AND LIGHTING, AND RENT IN TERMS OF THE AVERAGE PRICES IN SIXTY-NINE CITIES IN CANADA

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost or the quantities of different foods required for an average family

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended October 30, 1937; monthly figures not yet available.

*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the numberis 567.

(Continued from page 1278)

be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the budget serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number of rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and cost of the various items from 1913 to 1926 weighted according to the importance of each item in workingmen's family expenditure

and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

Retail Prices

The movement in the prices of fresh meats was again downward in October. Sirloin steak averaged 26.7 cents per pound as compared with 27.9 in the previous month and 23.1 cents in October, 1936, while rib roast was down from 20.3 cents per pound in September to 19.7 cents in October. Mutton declined from 23.1 cents per pound in September to 22.2 cents in October. The price of breakfast bacon continued upward averaging 36 cents per pound in October as compared with 35.3 cents in September. The price of this commodity was considerably higher in the western provinces than in other localities. Fresh eggs again were generally higher the Dominion average being 39.2 cents per dozen in October as compared with 34·5 cents in September. Prices in cities in the prairie provinces were lower than in other cities. Higher quotations for milk were reported from several cities and the Dominion average price rose from 10.7 cents per quart to 10.9 Dried beans were one half cent per pound lower at 7 cents per pound. Onions also averaged lower at 4·1 cents per pound. Potatoes were again lower averaging $1.01 for 90 pounds in October, $1.11 in September and $1.58 in October, 1936. Higher prices for United States anthracite coal were reported from several cities and the Dominion average price rose from $14.07 per ton to $14.21.

Following are the prices reported for Welsh coal, "cobbles" and "French nut": Halifax $15.50; Charlottetown $12.90; Moncton $16; Saint John $13; Quebec $13.50; Three Rivers $15 and $14; Sherbrooke $14.75; St. Hyacinthe $14.50; Montreal $14.25 to $14.75; Ottawa $15.75; Kingston $14.50; Belleville $15.25; Peterboro $16; Oshawa $14.75; Toronto $14 and $13.50; St. Catharines $15; Hamilton $14 and $13.50; Brantford $16.25; Galt $16; St. Thomas $16; Sudbury $16.75; Cobalt $18; Timmins $18.50; Port Arthur $17.25; Fort William $17.25; Winnipeg $20.

* The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent 18½%; Clothing, 18½%; Sundries, 20%.

In 1936 the silver-cobalt mining industry in Canada provided employment for 363 persons and distributed $458,546 in salaries and wages, according to a report issued recently by the Dominion Bureau of Statistics. Fuel and purchased electricity consumed totalled $104,372 and the value of explosives, drill steel, etc., consumed amounted to $77,220. The net value of all products was estimated at $915,376 as compared with $2,070,716 in 1935, a decrease in value which strongly reflected the fall in silver prices experienced in 1936.

The decline in the mining of silver-cobalt ores in Canada is particularly reflected in the employment figures recorded during the past fifteen years. In 1921 wage-earners and salaried employees reported by the industry totalled 1,224 and salaries and wages disbursed amounted to $1,739,706 whereas the corresponding totals for 1936 were 363 employees and $458,546 for salaries and wages, a percentage decrease of 70·3 and 73·7, respectively.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

The following notes afford information as to recent changes in prices in Great Britain and certain other countries. Tables giving official and certain other index numbers of cost of living, retail and wholesale prices in Great Britain and certain of the principal commercial and industrial countries appeared in the October issue of the LABOUR GAZETTE.

Great Britain

WHOLESALE PRICES.—The Board of Trade index number, on the base 1930=100, was 111·2 for September as compared with 111·4 for August. Compared with that for the same month last year, the September index showed an increase of 15·7 per cent. During September the combined food group showed an increase of 0·9 per cent, while the combined industrial materials and manufactures groups showed a decline of 0·6 per cent. The non-ferrous metal group declined 4·4 per cent, while cotton and wool declined 3·7 per cent and 3·3 per cent respectively.

The Statist index number, on the base 1867-1877=100, was 103·0 at the end of September, a decrease of 1·1 per cent for the month. The decline was concentrated in the "materials" and "animal food" sections which declined 1·8 per cent and 2·1 per cent respectively. The "all foodstuffs" section was practically unchanged, the decrease in "animal foods" being offset by an increase of 2·3 per cent in "vegetable foods." The greatest decrease in any one group was in textiles which declined 4·3 per cent, due mainly to decreases in the price of wool.

COST OF LIVING.—The Ministry of Labour's index number on the base July, 1914=100, was 158 at the first of October as compared with 155 at the first of September. The index for the food group stood at 143 as compared with 140 the previous month, the upward movement being due chiefly to increases in the prices of eggs, milk, butter and bacon, but was partly offset by a reduction in the average price of potatoes.

France

WHOLESALE PRICES.—The General Statistical Office index number on the base 1914=100, was 618 for September as compared with 591 for August, an increase of 4·6 per cent for the month. The combined food groups increased 7·1 per cent, while the combined industrial materials groups increased 2·5 per cent. The index based on gold currency, 1914=100, was 65 for September as compared with 68 for August, a decline of 4·4 per cent.

Germany

WHOLESALE PRICES.—The index number of the Federal Statistical Office on the base 1913=100 was 106·2 for September, a decrease of 0·5 per cent for the month. Non-ferrous metals declined 5·1 per cent and textiles declined 4·2 per cent. In the other groups changes were of a minor nature.

COST OF LIVING.—The official index number, on the base 1913-1914=100, was 125·1 for September as compared with 126·0 for August, showing a decrease of 0·7 per cent for the month. The food group declined 1·6 per cent, rent was unchanged, while the heat and light, clothing, and sundries groups showed increases of 0·8 per cent, 0·6 per cent and 0·1 per cent respectively.

India

WHOLESALE PRICES.—The index number of the Labour Office, Government of Bombay, on the base July, 1914=100, was 106 in August, which was the same figure as that for the previous two months.

COST OF LIVING.—The official index number of the working class cost of living at Bombay, on the base July, 1933, to June, 1934=100, was 108 in September, showing no change from the August figure.

United States

WHOLESALE PRICES.—The Bureau of Labour Statistics index number on the base 1926=100 was 87·5 for August, a decrease of 0·5 per cent for the month. This index is 7·2 per cent above the index for August, 1936. The farm products group declined 3·2 per cent, due largely to a decline of 12·5 per cent in grain prices. Other important declines occurred in the miscellaneous group which declined 2·2 per cent and in the chemical and drugs group which declined 2·0 per cent. The index for house furnishing goods increased 1·6 per cent, reaching the highest point since late in 1930. The leather group which increased 1·3 per cent also reached its highest level in nearly eight years.

Dun and Bradstreet's index number (in continuation of Bradstreet's index number) which is based on the sum total of prices per pound of 96 articles of common use was $10·9579 at September 1, a decrease of 2·9 per cent for the month. By groups, the greatest changes were in the miscellaneous, textiles and breadstuffs groups, which declined 6·4 per cent, 6·2 per cent and 5·1 per cent respectively.

Dun's index number, based on the cost per capita of a year's supply of commodities, was $192·778 at September 1, a decrease of 0·6 per cent for the month. An increase of 4·9 per

cent in the meat group was offset by a decrease of 4·5 per cent in the breadstuffs group and by smaller decreases in all the other groups except the metals group, which was practically unchanged.

Cost of Living.—The index number of the National Industrial Conference Board, on the base 1923=100, was 89·4 for September, an increase of 0·4 per cent over the index for August, which was 89·0. All groups showed increases as follows: housing and clothing 0·9 per cent each, fuel and light 0·7 per cent, food 0·3 per cent, and sundries 0·1 per cent.

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE THIRD QUARTER OF 1937

THE number of fatal industrial accidents (including fatalities from industrial diseases reported with fatal accidents by workmen's compensation boards, etc., as well as fatalities to persons incidental to the pursuit of their occupations) which were recorded in the Department as occurring during the third quarter of 1937 was 364, there being 155 in July, 98 in August, and 111 in September.

The report for the second quarter of 1937, showing 284 fatalities was given in the Labour Gazette, August, 1937, page 936. In the third quarter of 1936, 288 fatal accidents were recorded (Labour Gazette, November, 1936, page 1094). The supplementary lists of accidents, not reported in time for inclusion in the reports covering the periods in which they occurred, contain 13 fatalities for the first half of 1937, and 2 fatalities for 1936.

In this series of reports it is the custom to record industrial accidents under the dates of their occurrence and fatal industrial diseases under the dates on which they prove fatal.

Reports were received from the Provincial Workmen's Compensation Boards, from the Board of Railway Commissioners of Canada, from certain other official sources and from the correspondents of the Labour Gazette. Information as to accidents is also secured from newspapers.

Classified by groups of industries the fatalities occurring during the third quarter of 1937 were as follows: agriculture, 59; logging, 37; fishing and trapping, 7; mining, non-ferrous smelting and quarrying, 63; manufacturing, 36; construction, 63; electric light and power, 9; transportation and public utilities, 57; trade, 16; finance, 1; service, 16.

Of the mining accidents, 41 were in "metalliferous mining," 13 in "coal mining," 8 in "non-metallic mineral mining and quarrying, n. e. s.," and 1 in "structural materials."

Of the accidents in manufacturing, 2 were in "vegetable foods, drink and tobacco," 2 in "textiles and clothing," 19 in "saw and planing mill products," 2 in "pulp, paper and paper products," 7 in "iron, steel and products," 1 in "non-ferrous metal products," and 3 in "non-metallic mineral products."

In construction there were 28 fatalities in "buildings and structures," 1 in "railway," 1 in "shipbuilding," 27 in "highway and bridge," and 6 in "miscellaneous construction."

In transportation and public utilities there were 20 fatalities in "steam railways," 1 in "street and electric railways," 22 in "water transportation," 1 in "air transportation," 12 in "local and highway transportation," and 1 in "telegraphs and telephones."

In trade there were 7 fatalities in "wholesale," and 9 in "retail."

Of the fatalities in service, 11 were in "public administration," 2 in "personal, domestic and business," and 3 in "professional establishments."

The most serious accident during the period under review occurred in Nipigon Straits, Lake Superior, Ontario, on September 24, when a steamer was swamped in a storm, and the captain and four members of the crew were drowned and a sixth man died from exposure on the following day.

Other accidents involving the loss of two or more lives were as follows: On August 14, near Saint John, New Brunswick, four well drillers were electrocuted while moving a well drilling machine, when a swaying boom of the machine came in contact with an overhead high tension wire.

Following a collision with an auto, a truck crashed into some workmen engaged in highway construction, killing four of them, near Toronto, Ontario, on July 8.

Three fire fighters were drowned from a canoe in Martinet Lake, Ontario, while on their way to forest fires, on July 2.

Two farmers were struck by lightning near Listowel, Ontario, on July 5.

Two loggers were drowned near Hexham, New Brunswick, on July 6; and when a log slipped out of a choker two loggers were crushed to death near Port Renfrew, British Columbia, on July 12.

Two fishermen were drowned when a boat capsized, near Liverpool, Nova Scotia, on July 13.

On July 28, two miners were killed by a fall of rock, at Noranda, Quebec. Two miners were gassed in a mine near Spillimachene, British Columbia, on August 14.

A saw mill owner and his son were killed in a boiler explosion on August 11, near Lambton, Quebec.

As a result of burns received in an explosion in the engine room of a boat on July 31, at La Havre, Nova Scotia, two seamen died on August 3.

It may be mentioned that during this quarter one fatality occurred in Canadian waters which is not included in this report, owing to the fact that the man killed was employed on a ship registered in another country, being a sailor on the Norwegian Steamer, Hada County, who fell overboard and was drowned in Quebec harbour on September 11.

Supplementary Lists of Accidents

A supplementary list of accidents occurring during the first half of 1937 has been compiled which contains 13 fatalities, of which 1 was in agriculture, 1 in fishing and trapping, 2 in mining, non-ferrous smelting and quarrying, 3 in manufacturing, 2 in construction, 3 in transportation and public utilities, and 1 in service. One of these accidents occurred in January, 1 in April, 1 in May and 10 in June.

A further supplementary list of accidents occurring in 1936 has been made. This includes 2 fatalities, of which 1 was in construction, and 1 in service. One of these accidents occurred in September and 1 in December.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Appeals Against Damages and Injunction in Winnipeg Picketing Cases Dismissed

In The Labour Gazette for October, 1936, a summary was given of the judgment of Mr. Justice Donovan of the Manitoba Court of King's Bench awarding damages to the sum of $300 in one case, and to the sum of $900 in the other and a perpetual injunction restraining the defendants from watching or besetting the plaintiffs' places of business in the manner complained of, and from displaying or distributing posters, pamphlets, etc., as referred to in the statement of claim. The judgments were appealed.

The actions were against the officers and members of the Winnipeg local of the Canadian Theatrical Federation, made up of the local unions of the International Alliance of Theatrical Stage Employees and Motion Picture Machine Operators, and against the Winnipeg Musicians' Union affiliated with the American Federation of Musicians. In both cases, the action arose from picketing in July and August, 1935. The plaintiffs were Allied Amusements Ltd. and Kershaw Theatres Ltd. In the Kershaw case, the chief purpose of the union was to induce the employer to resume his former policy of employing two projectionists in his motion picture theatres. In the other case, picketing was for the purpose of inducing Allied Amusements Ltd. to engage members of the international unions in its five motion picture theatres or to cause those employed to join those unions, to raise wages, particularly of the musicians and to employ two projectionists. The projectionists were, at the time, members of a local of the All-Canadian Congress of Labour.

On September 30, 1937, the Manitoba Court of Appeal dismissed the appeals. All five members of the Court were agreed that the appeals should be dismissed but in their statement of the law concerning picketing there was some difference of opinion.

Mr. Justice Trueman, with whom Chief Justice Prendergast agreed, reviewed the English cases of *Lyons v. Wilkins, Ward, Lock and Co. v. Operative Printers' Assistants' Society,* both of which had to do with picketing, as well as other cases bearing on trade unions and arrived at the following conclusion:

> I take it be clear that picketing, or "watching and besetting," which is the legislative equivalent, conducted, peaceably, that is, without violence and intimidation or other wrongful or illegal means, though for the purpose of compelling or inducing employers to employ none but union labour, is legal at common law, and that nothing in sec. 501 of the Code qualifies or overrides it.... Picketing being lawful so long as it is conducted peaceably I cannot think that the mere statement, on placards, posters, or sandwich boards, that an employer is unfair to the trade union or does not pay union wages, is unlawful *per se* or a proper subject for injunction or damages. The Musicians' Association, for instance, had in their view a legitimate as well as serious grievance, having regard to the complaint registered by them in their letter to the Allied management. This grievance they were fully entitled to bring to the attention of the public as well as to that of the Allied orchestra. Had the association advertised the facts in the public press, with the stricture that the Allied management was unfair to the association and that the wages the management paid were not only not union wages, but were cut-rate wages destructive of the livelihood of the musicians' guild, there would be no cause of action, there being in what they said no intimidation, coercion or defamation. .... A strike, lock-out or other overt form of labour dispute in itself commands public attention and makes known to the public that there is warfare between the employer and employees over wages, hours or other conditions of labour. The announcement by placards carried by pickets that the employer is unfair to union labour or does not pay union wages, therefore, conveys the same information to the public that the strike or like overt act makes known, and which must be made known if other workmen are to be induced not to break the strike. The employer says the placards injure his business and have that intention. The trade union's answer is that they may cause injury to your business and that they do not mind that they do, but that their purpose is to advance and protect their trade union interests, which cannot be done if the strike is veiled in silence and secrecy.

He held, however:

> These views, it is plain, are not available to the defendants. In the wilful lengths to which they went in their reflections upon the manager of the Kershaw theatres they leave no other conclusion possible than that the picketing placards were part of a studied conspiracy to injure the plaintiffs' business and by the coercion thus produced enforce their demands.

For this reason he was of the opinion that the appeals should be dismissed with costs.

Mr. Justice Robson with whom Mr. Justice Dennistoun and Mr. Justice Richards agreed, stated that the question before the court was—

> did the defendants in fact do anything beyond what they might lawfully have done in pursuit of their object, that is to say, the imposing on plaintiffs of defendants' own ideas as to how plaintiffs' theatres ought to be manned and at what expense?

He adopted the view of Chief Justice Macdonald of British Columbia in *Schuberg v.*

Local International Alliance expressed as follows:

Even assuming that they conducted themselves in a peaceful manner, the question is, had they the right to bring about what was virtually a boycott of the plaintiff? The defendants' object in distributing the handbills and in parading with banners, was unquestionably to prevent persons from patronizing the theatre. No matter how peaceably this may have been done, and even admitting the absence of actual malice, yet I think it was an actionable wrong done by these defendants, in combination, with the object of compelling the plaintiff by inflicting loss upon him to do something from which he had a legal right to abstain from doing.

Mr. Justice Robson held—

the attempt here to reduce the patronage of plaintiffs' theatres was not lawful and in particular exceeded the latitude allowed according to the judgments in the *Ward, Lock* case.

Thus the conclusion depends on the question of fact which the learned Judge found against defendants. In my view there was evidence on which he could make that finding.

In view of that finding I think that the accusation that the plaintiffs were unfair to union labour was not true and being injurious that it was therefore wrongful.

There is no reason to question the finding of the learned trial Judge that the watching and besetting were not merely for the purpose of giving information. Defendants were clearly seeking by the watching and besetting wrongfully to compel the plaintiffs to do something they were not compelled to do or to abstain from doing something which they had a right to do.

For these reasons which applied, in his opinion, to both cases, he considered that the appeal should be dismissed with costs. *Allied Amusements Ltd. v. Reaney et al., Kershaw Theatres Ltd. v. Reaney et al.* (1937) 3 W.W.R. 193.

Injunction Continued against Obstructive Picketing in Quebec

Arising from a strike for a closed shop agreement with the Acton Vale Silk Mills, Ltd., and for higher wages and the re-instatement of workers dismissed since March 12 when a union was organized, an action was brought at St. Hyacinthe, Quebec, by the company for an interim order restraining the eight defendants from disturbing the peace in picketing the plant. This was granted on September 13 and the injunction was continued by Mr. Justice Forest of the Superior Court on September 25.

It was pointed out by the Court that the evidence showed that there was violence and intimidation used to prevent workers entering the mill and that the entrances to the mill were blocked by barbed wire. There was no evidence that the defendants were not armed and that shots had not been fired as alleged by the plaintiff. Some of the defendants and other persons had been fined for assault, and others had been remanded to the next Criminal Assizes.

The Court reviewed further evidence showing that on March 12 the National Catholic Textile Syndicate of Bagot had been formed and its incorporation authorized by order in council under the Professional Syndicates Act on April 24, but it had not been incorporated or registered under the law. One of the by-laws of the union stipulated that no strike could be declared unless approved by two-thirds of the members present at the meeting. According to the minutes of the union, there was no mention of a strike resolution, and since the union was not a separate entity, it could not act as one or declare a strike.

The interlocutory injunction was continued until a contrary order should be made and the defendants, or their agents or sympathizers, are restrained from occupying shelters or tents near the plaintiff's mill, from obstructing in any manner or threatening or in any way seeking to prevent employees from entering the mill freely.

On October 8, the eight defendants in this case contested the injunction but Mr. Justice Forest maintained the plaintiff company's motion for dismissal holding that the contestation was tardy and irregular and only a means of trying to evade the law. *Acton Vale Silk Mills Ltd. v. Levèille et al,* Superior Court, District of St. Hyacinthe, September 25, 1937.

Conviction of British Columbia Mine Operator Upheld

For failure to comply with an order given by the chief inspector of mines of British Columbia to remedy certain dangerous conditions in accordance with the Metaliferous Mines Regulation Act, the manager of a mine near Atlin, British Columbia, was convicted on January 7, 1937, and fined. On appeal, the Supreme Court of British Columbia upheld the conviction but made some changes in the sentence.

The Act provides that an owner or manager is liable to a penalty of not less than $100 or more than $1,000 for an offence under the Act and to a further penalty of not more than $100 for every day on which the offence is continued after the inspector has given notice to the employer.

On September 10, 1936, the manager of the Colpe Mining Co., Ltd., was notified that he was violating the safety regulation in question. On January 7, 1937, he was convicted on a charge alleged in the information to have been committed on January 5, and

sentenced to pay $300 and a further $5 for every day between September 11 and January 7, except for Sundays and holidays, and, also, to pay to the magistrate $4.25 for costs.

The sentence was appealed on several grounds including the alleged lack of territorial jurisdiction on the part of the magistrate, the trial of the accused for two offences instead of one, and the excessive fine.

The Court held that the conviction was only for one offence and that the question of jurisdiction was not affected by any of the matters raised in the notice of motion for appeal. It was decided, however, that the magistrate could not impose the further penalty of $5 a day as if the accused had been convicted on the charge of a continuing offence beginning prior to January 5 even assuming that there was proof that notice of an offence had been given to the manager on September 10, 1936. It was also held the awarding of costs payable to the convicting magistrate could not be sustained. Finally, the conviction should be upheld under the section of the Summary Convictions Act which provides that no conviction made by any justice shall be held invalid if the court, before whom the question is raised, upon perusual of the evidence, is satisfied that an offence of the nature described in the conviction has been committed and that the magistrate has jurisdiction in such cases. It is stipulated that even where the punishment imposed is in excess of what may be lawfully imposed, the court has power to deal with the matter.

The conviction was therefore affirmed but the further penalty of $5 per day and the provision for costs were struck out. *R. v. Colpe* (1937) 3 Western Weekly Reports 341.

Claim for Seamen's Wages Dismissed

An action brought by nineteen seamen, members of the crew of SS. *Canadian Planter,* claiming one month's wages due them by reason of the wreck of the ship was dismissed in the Exchequer Court, Quebec Admiralty District, on December 30, 1936.

It was shown that the defendant company had been ready to pay the plaintiffs from day to day, while they were unemployed, the amount of the wages they would have earned during the two months following the wreck as required by the Canada Shipping Act. The plaintiffs, however, had asked for a lump sum payment in settlement of the claim. The question of their right to anticipate payment in this way was referred by agreement between the parties to the shipping master at Montreal and in accordance with his decision, one month's wages was paid to each of the plaintiffs. The evidence showed that all but nine of the plaintiffs had obtained employment before the end of one month.

It was held by the Court that the decision of the shipping master was not binding since the reference to this official did not arise from a dispute and was not of the kind covered by the Act but that the seamen had themselves limited their rights under the Act by agreeing to abandon them.

As regards the legality of this limitation of their rights, the Court concluded that under section 179 of the Canada Shipping Act as interpreted in certain cases an agreement limiting the seamen's right to wages was invalid if it was not equitable. Section 179 of the Act provides that "every stipulation by which any seaman consents to abandon his right to wages in the case of the loss of the ship ... shall be wholly inoperative." It was held, however, that the agreement in this case was favourable to the seamen and the action was therefore dismissed with costs. *Brown et al. v. Canadian National Steamships Co. Ltd.* (1937) 3 D.L.R. 750.

Quebec Workmen's Compensation Commission Has Final Authority to Decide Claims

In an action before the Superior Court of the District of Montreal for damages for the freezing of a foot while at work, Mr. Justice Chase-Casgrain ruled on January 12, 1937, that the claim was one for the Workmen's Compensation Commission of Quebec and the Court had no jurisdiction in the matter. It was pointed out that the Court of Appeal had decided in an earlier case that such an injury comes within the definition of an accident in the Act and that although the claim had been refused by the Workmen's Compensation Commission, the Commission has power to reconsider cases and revoke its decisions. Under the Quebec Workmen's Compensation Act the Commission has final authority to determine claims for compensation for accidents occurring in the course of employment to such workers as those employed by a railway company.

Bisson v. Canadian Pacific Railway (1937) 75 Rapports Judiciaires de Québec, Cour Supérieure, 290.

THE LABOUR GAZETTE

PREPARED AND EDITED BY

THE DEPARTMENT OF LABOUR OTTAWA, CANADA

VOLUME 37] DECEMBER, 1937 [NUMBER 12

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

THERE was a slight slackening in industrial activity at the beginning of November, according to returns furnished to the Dominion Bureau of Statistics by 10,463 firms with 1,194,137 employees, as compared with 1,198,058 at October 1. Each of these firms ordinarily employs a minimum of 15 workers. Reflecting this seasonal reduction, the index (based on the average for the calendar year 1926, as 100), declined slightly from 125·7 in the preceding month to 125·2 at the date under review, as compared with 111·0 at November 1, 1936. At that date in the preceding fifteen years, the index was as follows: 1935, 107·7; 1934, 100·2; 1933, 91·3; 1932, 84·7; 1931, 103·0; 1930, 112·9; 1929, 124·6; 1928, 118·9; 1927, 108·8; 1926, 104·0; 1925, 98·3; 1924, 94·1; 1923, 100·0; 1922, 97·0, and 1921, 91·3.

Unemployment in Trade Unions.—At the beginning of November, 1937, the percentage of unemployment reported to the Department of Labour by local trade unions throughout Canada stood at 8·9 as compared with 7·7 per cent at the beginning of October, 1937, and 11·0 per cent at the beginning of November, 1936. The November percentages was based on the reports compiled from 1,897 labour organizations involving a total of 214,858 members.

Employment Office Reports.—Reports received from the offices of the Employment Service of Canada during October, 1937, indicated a decline of 3 per cent in the average daily placements effected when the figures were compared with those recorded during the previous month, but a gain of over 21 per cent in comparison with October, 1936, the loss in the first instance being chiefly in construction and maintenance and the gains in the second in logging and services. Vacancies in October, 1937, numbered 40,347, applications 65,551 and placements in regular and casual employment 37,605.

Prices.—In retail prices the cost per week of a family budget of staple foods, fuel and lighting and rent was $17.58 at the beginning of November as compared with $17.51 for October; $16.96 for November, 1936; $16.54 for November, 1935; $15.41 for June, 1933 (the low point in recent years); and $22.03 for November, 1929. In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics and based upon prices in 1926 as 100 declined gradually during the month being 82·6 for the week ended November 26 as compared with 84·4 for that ended October 29. The decline was due in large part to lower prices for non-ferrous metals, grains, live stock, hides and raw textiles. On a monthly basis the index was 84·7 for October, 1937; 77·2 for November, 1936; 72·7 for November, 1935; 63·5 for February, 1933 (the low point in recent years); and 95·7 for November, 1929.

Business Statistics.—The most recent statistics available reflecting industrial conditions in Canada are given in the table on page 1296. The index of the physical volume of business in October more than recovered the loss of the two preceding months being at the high point for the year and about five per cent above October, 1936. Of the principal groups of factors used in the construction of the index, manufacturing was substantially higher in the month under review than in the previous month while mineral production was substantially lower. Smaller changes in other groups were, advances in trade employment and in imports while construction, electric power output, car loadings, and exports were lower. All of the above factors were higher in October of this year than in October, 1936, except car loadings and exports both of which recorded decline in this comparison also. Information available for November shows wholesale prices, employment, the number of cars of revenue freight loaded and contracts awarded lower than in the previous month but higher than in November, 1936. Sugar manufactured showed improvement in both these comparisons.

Strikes and Lockouts.—The number of strikes and lockouts recorded during November was 26, involving 6,344 workers and causing time

*Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

†For the week ended November 26, 1937.

(1) Calculated from yields of Ontario bonds. (2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations. (4) Figures for end of previous month.

(5) Figures for four weeks ending November 27, 1937, and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending November 6, October 9, and September 11, 1937; October 31, October 3, and September 5 1936. (7) MacLean's Building Review. (8) Index numbers are adjusted when necessary for seasonal variation. (9) Subject to revision.

loss of 41,832 man working days, as compared with 30 disputes during October which involved 7,521 workers and caused time loss of 55,692 days. The most important dispute in both October and November was the strike of over 1,000 coal miners at Minto, N.B., but a strike of rubber factory workers at Kitchener, Ont., which commenced in October, extended into November for a few days. Strikes of meat packers at Montreal, and brief strikes of coal miners in Nova Scotia and Alberta also caused considerable time loss in November. In November, 1936, the only important disputes involved coal miners at Cadomin, Alta., and fur factory workers at Winnipeg. Of the twenty-six disputes recorded for November, twenty were recorded as terminated during the month, three resulting in favour of the employers concerned, seven in favour of the workers involved, while compromise settlements were reached in nine cases and the result of one dispute was reported as indefinite. Six disputes involving 1,500 workers were recorded as unterminated at the end of the month. These figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or definitely declared terminated by the unions involved.

Industrial Disputes Investigation Act

Early in December the Board of Conciliation and Investigation established to deal with disputes involving the City of Winnipeg and various classes of its employees submitted four reports to the Minister of Labour: (1) a unanimous report respecting conditions generally, (2) and (3) majority and minority findings regarding wages, and (4) a unanimous report respecting the Police Force.

The Commissioner appointed to inquire into an industrial dispute involving the Quebec Central Railway and its train service employees presented his report to the Minister of Labour at the close of November.

During November Board procedure was obviated in the case of two disputes, agreements having been reached in each case between the parties concerned.

Conference on formulation of model building code

A conference called by the National Research Council was held in Ottawa on December 10 which had as its object the formation of an organization to prepare a model building code for Canada. Associated with the National Research Council in the effort were the Dominion Housing Administration and the Dominion Fire Commissioner.

The key-note address was given by the Hon. C. A. Dunning, Minister of Finance, who was introduced by Gen. A. G. L. McNaughton, President of the National Research Council. The conference was called in recognition of representations that had been made by many national organizations in Canada over a period of years that the condition of municipal building codes throughout the country was in general chaotic, and that there was urgent need for leadership by a central authority in providing municipalities with authoritative information that they could use in revising or reconstructing existing codes.

Hon. Mr. Dunning declared that, as the Minister in charge of the operation of the Dominion Housing Act, he was being "constantly reminded of the chaotic and unscientific conditions existing in connection with the present building codes in this country." He considered that they failed to give adequate protection in some cases to owners of homes, or they involved them in undue and unnecessary costs. The result was annual losses, or expenditures of millions of dollars.

Hon. Mr. Dunning suggested three main requirements in a model building code: Structural soundness, adequate fire protection, and adequate sanitation, including light and air requirements. He said the sooner the practical results of the deliberations of the conference were available "the better will I be satisfied."

Following the address by Mr. Dunning, statements were made by representatives of a number of national organizations and the meeting proceeded with the consideration of ways and means of bringing about its object. Committees were named to study various phases of the project and to prepare recommendations for submission to the National Research Council for approval at an early meeting.

Organizations represented at this conference included the following: the Royal Architectural Institute of Canada; Canadian Construction Association; Canadian Engineering Standards Association; Association of Canadian Fire Marshals; Canadian Manufacturers' Association; Department of Mines and Resources of Canada; Department of Pensions and National Health of Canada; Canadian Housing and Planning Association; Engineering Institute of Canada; Dominion Board of Insurance Underwriters.

The organization contemplated for actually carrying out the work of preparing the model building code will include representatives of a large number of associations, government bodies, and municipal authorities in Canada.

Industrial arbitration legislation in B.C.

Legislation providing for conciliation and arbitration of industrial disputes was introduced in the British Columbia Legislature on December 8 by the Hon. G. S. Pearson, Minister of Labour.

The Act, cited as the Industrial Conciliation and Arbitration Act, provides, in brief, for the following:

The right of both employees and employers to organize.

Collective bargaining by employees with their employers.

Machinery for the arbitration of disputes in industry.

The prohibition of strikes or lockouts until arbitration proceedings are completed.

A penalty of $500 for persons who seek by threats or intimidation, to compel others to join or refrain from joining, any organization.

A dispute is defined as "any dispute or difference between an employer and a majority of his employees as to matters or things affecting or relating to work done or to be done by him or them, or as to the privileges, rights and duties of employers or employees, and, without limiting the general nature of the above definition, included all matters relating to:

(*a*) the wages, allowance, or other remuneration of employees or the price paid or to be paid in respect of employment.

(*b*) The hours of employment, sex, age, qualifications or status of employees and the mode, terms, and conditions of employment.

(*c*) The employment of children or any person or persons or class of persons, or the dismissal or refusal to employ any particular person or persons or class of person.

(*d*) Claims on the part of an employer or an employee as to whether and, if so, under what circumstances, preference of employment should or should not be given to one class over another class or persons being or not being members of labour or other organizations, British subjects, or aliens.

(*e*) Materials and supplies alleged to be bad, unfit, or unsuitable or damage alleged to have been done to work.

(*f*) Any established custom or usage, either generally or in the particular district affected.

(*g*) The interpretation of an agreement or a clause thereof.

Canadian Co-operative Congress endorses collective bargaining

In the October issue of the LABOUR GAZETTE (pages 1098-9) reference was made to the annual report for 1936 of the National Executive of the Co-operative Union of Canada in which the financial position of retail societies, dairy and wholesale societies, the activities of provincial sections of the co-operative union, etc., were reviewed in detail.

The October issue of *The Canadian Co-operator* contains an account of the annual meeting of the Canadian Co-operative Congress held in Montreal in September. One of the most important decisions of the Congress was to give authority for the establishment of a provincial section of the Union in Nova Scotia.

Among the resolutions adopted was the action taken for the first time by the Congress, in going on record as being "in favour of collective bargaining by farmers and workingmen, in the one case through co-operative marketing associations, and in the other, trade unions; and advising affiliates to extend support and to give encouragement thereto."

Death of Mr. Fred Bancroft

The death occurred on November 22, at his home in Oakville, of Mr. Fred Bancroft, member of the Ontario Labour and Industry Board, and who had been prominently identified with organized labour in this country throughout an active lifetime.

Mr. Bancroft was a native of Lancashire and came to Canada as a youth of eighteen. He was 58 years of age at the time of his death. Early in life, after a period as a patternmaker and draftsman, he turned to labour journalism where he rapidly earned recognition in that sphere of newspaper endeavour. There he gained an intimate knowledge of the labour movement on this continent, and became one of its leading figures. For four years (1911-1914) he served as vice-president of the Trades and Labour Congress of Canada.

This long association with labour and its problems equipped him for the special service he was able to render later on Royal Commissions and also on Boards of Conciliation and Investigation appointed under the Industrial Disputes Investigation Act. On these latter he was on numerous occasions the appointee of the workers.

At the time of his death he was the representative of the employees on the Board established to inquire into the dispute between the city of Winnipeg and its hydro-electric employees.

Vocational Guidance and Juvenile Employment in New South Wales

The annual report of the Vocational Guidance and Juvenile Employment Section of the New South Wales Department of Labour and Industry indicates that in this sphere the section has performed an outstanding service. (Youth training and employment in Australia was summarized briefly in the October issue of the LABOUR GAZETTE at page 1058). The activities of this section during the year ending June 30, 1937, are reviewed in the *New South Wales Industrial Gazette* of September 30, recently received. It notes that there has been "an unprecedented demand for the services of the section both from juveniles seeking employment and employers seeking juveniles for their staffs."

The aim of the section is the placement of juveniles in employment of a kind for which they are most suited by native capacity, and in which they are most likely to remain in more or less permanently. The activities by which it furthers this aim are threefold, covering (*a*) vocational guidance, (*b*) vocational training, and (*c*) placement. During the past twelve months emphasis has been placed upon the first and third of these activities. There have been two reasons for this emphasis: firstly, the improved employment conditions for juveniles and the preference of youths for a "job" to "training for a better job"; secondly, the section is only indirectly concerned with vocational training, its activities being confined to the selection of suitable trainees and the arranging for the issue of free passes for travelling.

Vocational Guidance.—The vocational guidance which is administered by the section is based on a psychological examination of the juvenile. This examination includes a series of psychological tests, and an interview with the parents of the child.

The majority of those given vocational guidance are boys. The proportion of boys to girls is about four to one. Applicants come from two distinct sources—(i) those who are seeking employment or who wish to know what sort of employment to seek, and (ii) those who are referred for advice by the Child Welfare Department. This second group includes juvenile delinquents and State wards, and a special section of the report is devoted to these.

During the year 1936-37 a total of 4,008 cases were given vocational guidance. This number was made up of 1,019 cases referred by the Child Welfare Department, 2,604 males and 385 females registering for and seeking employment. The total figure (4,008) by far exceeds the total figure for any previous year.

This increase, it is stated, is probably due to the increased confidence and appreciation of employees in the work of the section, due to the directness and clarity of the recommendations made and the methods used to show the capacities of the youth, and also to the co-ordination of the work of the employment subsection with that of the young citizens. Parents, too, have developed a confidence in the work of guidance, and headmasters of schools have shown a friendly and hearty co-operation in recommending the section's possibilities. Another factor operating in the increase in numbers has been the possibility of almost immediate test appointments.

During the last few months very few boys and girls under 14 years applying for vocational guidance have been given appointments because of the increased numbers of an employable age who have been applying. Most of the younger applicants have been put off till they are older, and only those nearly approaching the employable age have been given appointments. Many parents seek guidance for children who are still at school, but, because of the pressure of work with other cases, these applications have had, in the main, to be refused.

Regarding the standard of the applicants, it is reported that during the months immediately following the end of the school year the cases are well distributed over the normal range of the various abilities; the majority are of average ability, with a practically equivalent number of brighter and duller youths. For the rest of the year, however, the number of brighter ones decreases, and the lower end of the distribution is heavily weighted. These latter cases are those who do not find employment readily while brighter juveniles are still available for employers.

Child Welfare Department Cases.—As already stated, the cases referred for guidance by the Child Welfare Department are either State wards or juvenile delinquents.

Concerning this type, the report observes: "Both the State wards and the juvenile delinquents have been found to be preponderately of inferior intelligence. There are some few who are of superior intelligence, and a fairly large number of average intelligence, but the majority are dull, with a very large number, as compared with the general population, who are feeble-minded or cases of border-line feeble-mindedness.

Juvenile Placement.—During the twelve months under review, the report notes that there has been an unprecedented increase in the numbers of juveniles placed in employment. This is attributable primarily to the improved employment conditions for juveniles,

and, secondarily, to the close co-operation of this section with the Young Citizens' Associations.

Co-operation with the Young Citizens' Association.—Since July, 1936, the local organizers of the Young Citizens' Associations have been acting as agents of this section. Their duties in that capacity have involved the registration of unemployed juveniles and placing them in local positions where possible.

Emergency Day Training Scheme.—During the twelve months, day classes for unemployed boys were operating in seven centres under the Emergency Training Scheme. The courses of training given in most centres are: carpentry, fitting and machining, and electrical trades; motor mechanics and plumbing are also given in several centres. Commercial training is given in both Sydney and Newcastle. Other courses are confined to one centre.

Industrial Situation in New Zealand

The 46th annual report of the New Zealand Department of Labour indicates a continued improvement in employment as reflected by statistics of administration of the Factories Act during the year ending March 31, 1937.

Several sections of this report furnish evidence of vastly improved conditions in industry. Greater employment is indicated by the tables relating to the number of factory workers, certificates of fitness for young persons to be employed in factories, and the number of apprentices in the various skilled trades.

The number of factories registered in 1936-37 was 17,126 (an increase of 692) while the number of factory workers totalled 111,766 (an increase of 8,766). The report observed that this improvement has been fairly general, but the most marked increases have been in coach and motor-body building, clothing, and white working, motor and cycle engineering, sawmilling, and other trades associated with the building industry and the furniture trade. Boot and shoe manufacturing did not maintain the improvement shown in previous years.

It was also pointed out that the improvement in factory employment has been reflected in the increased number of certificates of fitness issued to boys and girls under sixteen years of age to work in factories, the number issued last year reaching the record figure of 4,462, an increase of 1,472 over the previous year.

Reference is also made to two important enactments which came into force during the period under review. These were the Factories Amendment Act, 1936, and the Shops and Offices Amendment Act, 1936. Both of these enactments provided for reduction of working hours in conjunction with certain sections of the Industrial Conciliation and Arbitration Amendment Act, 1936 (LABOUR GAZETTE, May, 1937, page 529, and June, 1936, page 479).

The Factories Amendment Act restricts hours of work in factories to forty per week and eight per day. Women and boys under sixteen are not to be employed on any Sunday, holiday, or half holiday, or between the hours of 6 p.m. and 8 a.m. (The Court of Arbitration is empowered to establish longer hours in cases where it is deemed impracticable to carry on factory operations efficiently under the 40-hour week, but any extension granted must not exceed 44 hours.) Wages are not to be reduced nor is any person to be dismissed by reason of any reduction of working hours under this Act.

The Shops and Offices Amendment Act provides that a shop assistant shall not be employed for more than 44 hours a week, 8 hours a day (except on one day when the employment may be for 11 hours) nor more than four hours and a quarter continuously without an interval of at least one hour for a meal, nor after 12 noon on a half holiday. Exemptions are provided in certain occupations (as in hotel and restaurant work) and in certain offices and industries where it is necessary to deal with the public in the evenings (shipping, railways, telegraph agencies, etc.)

Grievance Procedure in labour union contracts

The National Industrial Conference Board (U.S.A.) in its Service Letter of October 30, gives an analysis of grievance procedure in labour union contracts. In its approach to this matter, the Board states that "It is inevitable that where people work together day after day subject to the authority of an employer or the management of a company, frictions of one kind or another will develop. Some of these may be deep-seated resentment against what is considered the injustice or unfairness of the employer. Some may be minor irritations caused by poor administrative methods or by the tactlessness of supervisors. Many are based on nothing more than misunderstanding or imagination. Whatever the cause, however, it is to the mutual advantage of employer and employees that these grievances be brought out into the open and adjusted in a spirit of fairness to all concerned."

Through the courtesy of companies that have furnished the Conference Board copies of their union agreements it has been possible to make an analysis of prevailing arrangements for dealing with grievances as indicated by 143 contracts. Of the agreements analysed,

eighty-five are with C.I.O. unions and fifty-eight with unions affiliated with the A.F. of L.

A standard procedure for the settlement of grievances is indicated in 101 of the 143 agreements analysed. This procedure includes provision for the arbitration of matters not settled during the specified preliminary stages of adjustment. Special provisions for dealing with cases of alleged unfair discharge are found in seventy-five agreements. Stated periods for the presentation of grievances are provided for under sixty-five agreements, although fifty-seven of these agreements permit complaints of unfair discharge to be submitted at any time.

Apprenticeship in the United States

In an article entitled "a National program for Apprenticeship Standards" by Mr. W. F. Patterson, executive secretary of the Federal Committee on Apprenticeship Training, which appears in the October issue of the *Labour Information Bulletin* (United States Department of Labor), an impending shortage of skilled labour in the United States is emphasized. Commenting on this shortage the writer states:—

"Improved business conditions and increased employment since 1934 made it clear that some industries would soon be confronted with a shortage of certain types of highly skilled labor. The 1930 census reported approximately 90,000 apprentices as against 6,000,000 skilled workers. During the depression apprentice training was practically suspended, and by 1937 it was estimated that there were only 37,000 apprentices in the United States. This number falls far short of meeting the annual losses in the ranks of skilled workers caused by old age, injury, death, transfer to different employment, and other causes."

At its last session, the Congress of the United States enacted a bill to promote the welfare of apprentices. As a result of this law, the Federal Committee on Apprentice Training was made a permanent agency within the United States Department of Labor. It was first organized in 1934 to safeguard the interests of apprentices under the N.R.A. codes. Later it became a part of the National Youth Administration and co-operated with the United States Department of Labor, the United States Office of Education, and employer and labour organizations throughout the country in attacking the problem of making apprenticeship serve the needs of some of the thousands of young people who were unable to find employment.

The present objectives of the Federal Committee on Apprentice Training under the provisions of the law are twofold: To guarantee a thorough trade preparation for apprentices, and to help provide a sufficient number of highly skilled workers to supply the country's growing needs.

Extension of family allowances in Italy

From time to time the LABOUR GAZETTE has contained reviews of the systems of family allowances operating in various countries, viz.—New Zealand, Belgium, France and Italy.

In Canada, the subject of family allowances formed part of the survey of the Quebec Social Insurance Commission in 1930, and in its report the Commission after an exhaustive study abandoned the idea of recommending the institution of family allowances in Quebec (LABOUR GAZETTE, August 1932, page 861).

Recently the program of compulsory family allowances in Italy has been extended for the second time within a year to include all industrial workers and agricultural workers.

The system of compulsory family allowances was introduced in Italy in 1934, becoming effective on January 15, 1935 (LABOUR GAZETTE, December, 1935, page 1088). Its purpose was to supplement the wages of heads of families in industrial employment who would suffer a reduction in earnings on account of the curtailing of the working week. In October, 1936, it was extended to all industrial workers irrespective of the number of hours worked, and now—by a Royal-Decree Law of June, 1937—it has been applied to agricultural workers and most other classes of employed persons in Italy.

As pointed out in a report of the extended Decree appearing in the *Ministry of Labour Gazette* (Great Britain), the principal groups remaining outside the scope of the new provisions are, in addition to State and communal employees for whom schemes of family allowances are already in existence, non-manual workers whose salaries exceed 2,000 lire (the lire is quoted at 5·28 cents in Canadian money) a month, domestic servants, home workers, small holders and tenant farmers, and other persons working on their own account. Workers in commercial, banking and insurance undertakings, for whom systems of family allowances have recently been established by collective agreement, are brought within the general provisions of the Decree-Law; but the conditions under which they receive the allowances will continue to be regulated in detail by collective agreement. Detailed regulations are also to be drawn up by collective agreement in the case of persons employed in professional or artistic occupations.

The rates of the allowances are graded according to the size of family, separate rates

being established (*a*) for families with one dependent child, (*b*) for families with two or three dependent children, and (*c*) for families with four or more dependent children. The respective weekly rates of allowances to be granted, for each child eligible for an allowance, to heads of families in the three groups, are, for manual workers in industry, 3.60, 4.80 and 6.00 lire; for manual workers in agriculture, 2.40, 3.60 and 4.80 lire; and, for non-manual workers in industry and agriculture, 4.80, 6.00 and 7.20 lire. For persons employed in commercial, banking and insurance undertakings or in profesisonal or artistic occupations, the rates of allowances, and of contributions, are to be determined by collective agreement.

40-hour week for certain classes of labour in Italy

By a Royal Decree Law of May 29, 1937, published in the *Gazette Officiale* of October 26, 1937, a 40-hour work week and a maximum eight-hour day has been established for certain classes of labour in Italy. (The Eight Hour Day Convention of International Labour Conference was ratified, conditionally by Italy.) In the case of industries working continuously 24 hours a day (to be determined by the Minister of Corporations) the hours of work cannot exceed an average of 42 hours a week with a maximum of 8 hours a day.

Provision is also made for extending the hours limitation in the previous paragraph to other classes of workmen and activities "after due consideration has been given to the possibility of hiring available workmen and to the exigencies of production."

Special regulations will be enacted for the personnel of the State, Provinces, and Municipalities, with the exception of municipalized administrations.

The decree does not apply to persons engaged in work "inherent to the internal life of the family and of its cohabitants, also to the wife, the relations, up to the third degree, of the employer who live with him and are his dependents." Other persons exempt are personnel on board ships and lighters and men employed in the fishing industry; persons engaged in industries operating intermittently so long as such industries cannot do otherwise; watchmen; persons engaged in work of an industrial nature carried on by firms and necessary for the cultivation of the land, and the exploitation of forests; persons employed by public services, including those under private management, "where particular legislative dispositions will be enacted."

There are also conditions stipulated in the decree, under which the number of hours worked per day, or week, may be prolonged. In the case of seasonal industries the working time may reach a maximum of 10 hours a day, the industries and periods to be established by Decree of the Minister of Corporations.

By Article 9 of the Decree, the employer may order extra hours of work in addition to the prescribed limits, only when he cannot perform his work with the help of additional employees. In such instances the number of extra hours cannot exceed two hours per day or 12 hours per week, except in particular and urgent cases when they may be extended to 14 hours per week "on the condition that he does not exceed the average of 12 hours per week for a period of nine weeks."

In case of overtime when the extra hours do not exceed 48 in the week or 8 per day the employer is obliged to pay to the Special Unemployment Fund an amount equal to 10 per cent of the compensation owing to the employee for the extra work done, unless the collective labour agreements specify that the employee be paid at an increased rate for these extra hours of work.

On the other hand when, with the overtime, the total working time exceeds 48 hours per week or 8 hours per day, the number of extra hours over those limits will be paid at an increased rate as established by collective agreements.

It is also provided that the employer must affix in a conspicuous place a chart showing the duration of work per day, the hour of beginning work and leaving work of the employees, also the hour and duration of the recess during the period of work.

According to a report published recently by the Dominion Bureau of Statistics, the average number of employees in the paper box and bag industry in 1936 was 5,902 or 340 more than the number reported in 1935. The total sum paid to these employees in salaries and wages was $5,761,998 as compared with $5,432,060 in 1935. The 1,021 salaried employees were paid $2,005,832 and the 4,881 wage-earners received $3,756,166 during the year.

At the annual meeting of the United Farmers' Co-operative Company Limited held recently in connection with the annual convention of the United Farmers of Ontario, it was announced that the co-operative marketing of lubricating oils would be undertaken. It was stated that the oil would be handled on a strictly co-operative basis at a fair market price and that at the end of the year a patronage refund would be distributed if the enterprise was successful.

RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

A VACANCY occurred during November in the membership of the Board of Conciliation and Investigation established to deal with a dispute between the Corporation of the City of Winnipeg and certain of its employees being members of the Winnipeg, Pointe du Bois and Slave Falls Units of the Union of Hydro Electrical Workers through the death of Mr. Fred Bancroft, the Board member nominated by the employees. On November 25 the vacancy was filled by the appointment of Mr. E. Ingles, of London, Ontario, on the recommendation of the employees concerned. The other Board members are the Honourable E A. McPherson, who was recently appointed Chief Justice of the Manitoba Court of King's Bench, chairman, and Mr. Travers Sweatman, K.C., the city's nominee.

Settlements Effected

An agreement respecting wages was reached on November 9 between the Winnipeg Electric Company and certain of its employees being members of Locals Nos. 1037 and 435, International Brotherhood of Electrical Workers. This agreement disposed of the dispute concerning which an application for a Board of Conciliation and Investigation had been received in the Department of Labour in May last (LABOUR GAZETTE, May, 1937, page 483). The employees had requested cancellation of the 9 per cent by which their wages were still lower than in 1929. The new agreement restored to the employees one-third of this 9 per cent for the period May 1, 1937, to April 30, 1938.

At the close of November a settlement was also reached in the case of the dispute involving the Winnipeg Electric Company and its motormen, conductors and busmen, Mechanical and Track Department employees, operators, mechanics, meter repairers, maintenance and construction employees, telephones and signal repairers, patrolmen and appliance repair employees being members of the Street Railway Employees' Unit and Winnipeg Electric Substation and Hydro Plant Unit of the One Big Union. The text of the findings of the Board of Conciliation and Investigation which dealt with this dispute appeared in the October, 1937, issue of the LABOUR GAZETTE, page 1062. The chairman of the Board, Mr. Arnold Smith, and the Board member nominated by the employees, Mr. R. B. Russell, recommended that the company restore to the men on May 1, 1937. one-third of the amount (13 per cent) by which their wages had been reduced; on May 1, 1938, a further third, and on May 1, 1939, the remaining third, making restoration in full as from May 1, 1939. Mr. W. C. Hamilton, the company's nominee on the Board, dissented from this recommendation. The Board's proposals were rejected by the company. The president indicated, however, that the management was prepared to discuss with the employees the matter of restoration of a portion of the 1929 wage scale. Negotiations which followed resulted in a deadlock, and at meetings of the employees held on November 21 and 22 a resolution was approved calling for a strike should the company refuse to put into effect the majority award of the Board of Conciliation and Investigation. It has been reported, however, that during further negotiations, the company offered to put into effect the Board's recommendation for the current year, i.e., to cancel one-third of the reduction in wages of 13 per cent, and that the men voted to accept this proposal.

The Department was also advised towards the close of November that an agreement had been signed by the Hillcrest Collieries, Limited, of Hillcrest, Alberta, and their coal miners being members of Local Union No. 1058, United Mine Workers of America, which obviates the necessity of setting up a Board of Conciliation and Investigation as had been requested by the employees in September last (LABOUR GAZETTE, October, 1937, page 1062). The dispute related to the men's request for union recognition and an agreement covering wages and working conditions. This matter was taken up with the officials of the company and it was arranged that a ballot would be taken at the pit head to ascertain if the majority of the employes of the company desired to have the U. M. W. A. represent them. The results of the referendum vote was as follows: 171 in favour of joining the U. M. W. A., and 92 against, with 9 spoiled ballots. Eight employees did not vote. An agreement was subsequently negotiated between the company and the officials of the union.

Report of Board in Dispute Between the Corporation of the City of Winnipeg and Various Classes of Its Employees

The Board of Conciliation and Investigation established in July last to deal with several disputes involving the Corporation of the City of Winnipeg and various classes of its employees, reported to the Minister of Labour on December 4. The employees covered by

the inquiry included members of the following unions:—

Water Works' Operators Union; Water Works' (Diggers) Civic Employees Unit, One Big Union; Linemen and Underground Mechanical (Civic) Employees' Unit, One Big Union; Electrical and Mechanical Workers' Unit of the Federation of Civic Employees; Clerical Branch of the Federation of Civic Employees. Also various classes of civic employees not coming within the direct scope of the Industrial Disputes Investigation Act; employees of the Parks Board, and the Police Force of the City of Winnipeg.

The disputes involving the three last mentioned groups were referred to this Board at the request of the employees concerned and with the consent of the civic authorities.

The Board was composed of the Honourable Mr. Justice A. K. Dysart, of Winnipeg, chairman, appointed by the Minister on the joint recommendation of the other Board members; Mr. Travers Sweatman, K.C., nominated by the city, and Mr. Marcus Hyman, nominated by the employees. Four reports were presented by the Board, (1) a unanimous report respecting conditions generally, (2) a majority report, signed by the chairman and Mr Hyman, relating to the matter of wages of the various groups, with the exception of the Police Force, (3) a minority report by Mr. Travers Sweatman re wages, and (4) a unanimous report respecting the Police Force. The texts of these four reports follow.

Unanimous Report *Re* Conditions

Winnipeg, Man.,
Law Courts,

December 4, 1937.

Re the Industrial Disputes Investigation Act, and re the City of Winnipeg and certain of its employees, and dispute re wages and working conditions.

The Hon. Norman McLeod Rogers,
Minister of Labour, Ottawa.

Sir,—We, the Board of Conciliation and Investigation established by you on June 30, 1937, consisting of, in the order of our appointment,

Marcus Hyman, K.C., member,
Travers Sweatman, K.C., member, and
Hon. Mr. Justice Dysart, chairman,

having completed the work assigned to us beg now to submit our Report.

The employees upon whose application the Board was constituted, consist of five groups as follows:—

1. Water Works' Operators Union.
2. Water Works' (Diggers) Civic Employees Unit, One Big Union.
3. The Linemen and Underground Mechanical (Civic) Employees' Unit, One Big Union.
4. The Electrical and Mechanical Workers' Unit of the Federation of Civic Employees.
5. The Clerical Branch of the Federation of Civic Employees.

In addition to the said five original groups, other groups were added, namely:—

6. The Union of Hydro Electrical Workers (Winnipeg, Point du Bois and Slave Falls Units).
7. Various classes of Civic Employees not coming within the direct scope of the Industrial Disputes Investigation Act (this group overlaps with No. 5, above referred to).
8. Parks Board Employees, being members of one or more of the said five groups but being employed by a Corporation distinct from, though controlled by, the City.
9. The Police Force of the City of Winnipeg.

Some explanatory remarks should be made respecting the last four groups:—

Re Group "6".—The Board promptly took up your suggestion respecting this group and had interviews with representatives of that organization, urging that their claim for wages and working conditions be submitted along with the case of the other groups for general disposition. The Union representatives, however, declined to acquiesce in the suggestion and insisted upon their right to have an independent Board. Thereupon this Board made an Interim Report to you on the result of the efforts and offered certain suggestions respecting methods of overcoming the difficulties. The Board has had nothing further to do with this group.

Re Group "7".—Certain classes of Civic Employees not coming within the direct scope of the Industrial Disputes Investigation Act. Our recommendations respecting their claims are included in the general disposition affecting the first five groups.

Re Group "8".—Parks Board Employees. When the City objected to this group presenting a case before this Board as originally empowered by you, the employees so affected made application to you and as a consequence the powers of this Board were enlarged to

include the case of this group of employees. When their case was presented the Parks Board was not represented, but the City of Winnipeg answered their claims. The disposition of the claims of this group of employees is included along with our recommendations respecting the first five groups.

Re Group "9".—Police Force. This group came in at a late stage, having been prompted thereto by certain statements made by the City of Winnipeg in replying to the case of the employees in general. Because the Board regards the Police as a distinctly separate class, a separate report in respect of this group is submitted.

Turning now to the general problem, meetings were held during the months of August, September, October and November. Various adjournments and delays ensued by arrangement with the interested parties in order to meet the convenience of all concerned.

Throughout all the sittings, the employees were represented by men of their own choice. The Police were represented only at the last few meetings; throughout the City of Winnipeg was represented.

Every facility was accorded all parties to place before the Board their evidence in the way of statistics, facts, arguments, suggestions, replies and rejoinders in support and explanation of their respective claims and contentions. Full and free discussion was encouraged and indulged in with such completeness as the parties could command. The Board appreciates the painstaking efforts exhibited by both sides, and the fine feeling of reasonableness and harmony which prevailed throughout.

Leaving aside for a moment the main question in dispute, namely, rates of pay, each of the said groups presented a list of minor complaints dealing with working conditions, hours of labour, and other matters of this sort. After discussion all questions and complaints, except that of wages, were by agreement withdrawn from further consideration. That agreement provides for the setting up by the City of Winnipeg of a permanent committee to be known as the Civic Employees Adjustment Committee to deal with all complaints between the City and its employees respecting not only minor matters but all substantive issues including working conditions and even wages. The creation of this committee is so important that the agreement respecting it is set out in full herewith:—

> "The parties agree that there shall be set up by the Council of the City of Winnipeg a Special Committee to be known as the Civic Employees' Adjustment Committee, the duties of which committee will be to hear complaints concerning, and to make adjustments with respect to, salaries, wages and working conditions of and affecting all civic employees.
>
> "It shall be the duty of such committee to hear and investigate (and to prosecute such hearing and investigation with expedition) all complaints and questions made and raised by employees or groups of employees; the committee shall within a limited time, not to exceed fourteen days from the date of the complaint or the raising of the question, commence every such hearing and investigation and report promptly to Council its findings and recommendations in respect of such complaints or questions. All complaints shall be handed in on the first of each month; provided that any complaints handed in after the first of any month may be treated as handed in on the first of the then next month.
>
> "Employees who are members of labour or employees organizations or associations shall make their complaints or raise their questions through such organizations or associations and employees who do not belong to any such organization or association shall complain or raise the question first to, and present their complaints or raise the question through, the heads of their departments."

The agreement above quoted is embodied in minutes of the Council of the City of Winnipeg at a meeting held on October 18, 1937, a certified copy of which is set forth as Exhibit No. 30. Ratification of the terms of this agreement by the employees is contained in Exhibit No. 30A, under date of October 26, wherein the employees representative states,

> "In compliance with the understanding arrived at, during yesterday's sitting of the Board, to the effect that both parties give signed statements of their acceptance of the formula presented by the City, which reads as follows, is acceptable to all of the Employees' organizations appearing before this Board."

Quoting the text of the agreement he continues:—

> "I have been further instructed to inform the Board that in view of the City's representatives having agreed that all other matters in dispute, except wages, between the employees and the City will be taken up and dealt with by the above mentioned Civic Employees' Adjustment Committee, we herewith withdraw all other matters referred to this Board, except the question of wage increases."

We wish to concur in the hopes expressed by the representatives of employees and of the City that the Civic Employees' Adjustment

Committee, so set up, will prove a great source of satisfaction to both employer and employees, and will in the future obviate much of the discontent which occasionally arose in the past from delays on the part of the City in dealing with complaints of its employees.

In view of the foregoing the Board makes no further recommendations in respect of the complaints submitted to it except that of wages.

The main question under investigation was the application of the employees for increased rates of pay. The employees relied strongly upon a resolution passed by the Council of the City of Winnipeg expressing approval of the employees' claims for increased pay but excusing the City from complying therewith on the ground of the City's inability to take on any increase in its financial burdens. The position of the employees was that the City had virtually admitted the justice of the men's claims for increase in pay, and therefore had assumed the onus of showing its inability to meet these claims. The employees contended that the City has not discharged that onus. They also suggest that the inability is not conclusively shown that additional revenue might not be obtained by the City by levying additional taxes in some new field of taxation or by increasing taxes or revenue from fields already explored.

The City's position, strongly taken and not seriously contested by the men, was that so far as the present source of income was concerned, city homes and real property have borne more than their fair share and ought not to be further taxed; that other sources of taxation which the City might wish to explore are denied the City under its charter restrictions; and that the great burden of relief costs for unemployment, and social services, render it increasingly difficult for the City to meet its obligations. The City's position in respect of taxes and difficulties in tax collections, bank borrowings, deficits and obligations were set forth and supported by various financial statements on the part of the City. The City further pointed out or contended that in any case, having regard to the rates of pay prevailing in comparable fields of employment in Winnipeg and elsewhere, the present rates of pay of Civic employees are fair and reasonable and ought not to be increased.

The Board recognizes that the City's financial position at the present time is undoubtedly a difficult one, and that unless new sources of revenue are obtained the position is not likely to improve in the near future. The members of the Board, however, are unable to come to a unanimous conclusion in respect of whether or not the present rates of pay ought to be increased, and for this reason they are submitting a majority report and a minority report, poth appended hereto. Attention is drawn to the unanimous Report respecting the Winnipeg Police Force which is likewise submitted herewith.

All of which is respectfully submitted.

(Sgd.) A. K. DYSART,
Chairman.

(Sgd.) MARCUS HYMAN,
Member.

(Sgd.) TRAVERS SWEATMAN,
Member.

Majority Report *Re* Wages

Winnipeg, Man.,
Law Courts,
December 4, 1937.

Re The Industrial Disputes Investigation Act, and Re The City of Winnipeg and certain of its Employees, and Dispute re wages and working conditions.

The Honourable Norman McLeod Rogers,
Minister of Labour,
Ottawa.

Sir,

We, the undersigned members of the Board of Conciliation and Investigation established by you on June 30th, 1937, beg to submit herewith our Report on the question of the wage dispute.

The wage dispute resolves itself into two branches,

1. Is the claim for increase of wages a just and fair one?
2. Assuming that it is, is the City financially able to pay an increase?

On the first branch: the employees point out that the level of wages in 1931 was fixed after a lengthy and somewhat scientific study made for the City and was adopted or acquiesced in by all concerned; that because of the general depression certain deductions were made from the 1931 level of wages to the present level of 84% thereof; that there is evidence of some general improvement and recovery, and that many partial or entire restorations of reductions in wages have recently been made; and that their claim for increase could be justified by comparison with scales of wages paid to employees in comparable fields of service.

The employees also strongly relied upon the approval given by the City of the justness of their claim for an increase as appears in the answer filed by the City to these claims, from which we quote:—

"The Council of the said City has gone on record as being in sympathy with the

request of the employees for a partial restoration of wage reductions and is desirous of making some further restoration as soon as the City is able to do so."

This admission on the part of the City seems quite conclusive to us as to the fairness of the men's claim for an increase. After all, the fixing of wages is a matter of agreement between employer and employee, and when the two parties have freely and openly come to an agreement on rates of pay, there is little left for discussion.

On the second branch of the case, namely, the City's ability or inability to pay increased rates, the City's position is, quoting again from the City's answer:—

"The City's financial position at the present renders it impossible to give the increase as requested."

We are by no means convinced that the City has discharged the onus which is upon it to show its inability.

For instance, in answer to a suggestion that Light and Power rates might justly be increased, it was contended on behalf of the Hydro that its policy has always been "Distribution of power and light at cost." This formula does not appear to tally with the practice of the Hydro, in view of the fact that in spite of several reductions in wages to its employees the Hydro has in the course of a number of years accumulated a deficit of about $800,000. Other possible sources of revenue were suggested before this Board, such as Departmental Stores and Chain Stores, upon which some special tax might equitably be imposed. Such other sources of revenue as gasoline tax, motor vehicle tax, liquor control revenue, amusement tax, were all suggested as being capable of a fairer redistribution between the Province and the City.

In our opinion at least some of these suggested fields ought to be explored.

Having regard to the fact that these employees have been affected by changes in their rates of pay, namely:—

In 1931 a reduction to 90 per cent.
In 1932 a further reduction to 81 per cent, and
In 1934 a restoration to 84 per cent

of the wage scale levels prevailing in 1931, we recommend for all classes of employees before us, except the Police Force (see separate report), that their present rates of wages be increased by 5 per cent thereon, to take effect January 1, 1938.

Bearing in mind the financial difficulties of the City of Winnipeg, we content ourselves with making the above recommendation.

All of which is respectfully submitted,

(Sgd.) A. K. DYSART,
Chairman.

(Sgd.) MARCUS HYMAN,
Member.

Minority Report *Re* Wages

WINNIPEG, MANITOBA,
December 4, 1937.

Minority Report of Travers Sweatman, K.C.

After most careful consideration, I regret that I am compelled, for the reasons herein set forth, to dissent from the majority opinion of this Board concerning a general increase in wages for all classes of employees included in this reference. This does not apply to the Winnipeg Police Force because, for the special reasons set forth in the report, the Board is unanimous in granting them an increase.

Before discussing my reasons in detail for coming to this conclusion, and to avoid any misunderstanding, I would like to express my opinion on two fundamentals. They underlie the difficult matters of municipal finance involved in this reference.

First, I am of the opinion that in private business employees should receive, in wages, a just proportion of the profits of business. There should be a reasonable division of profits between capital and labour. I am a believer in high wages. But a high level of wages is possible only when private business is prosperous. This principle applies equally to the remuneration paid to Government employees. Governments of themselves have no money. They are merely collecting agencies and naturally their revenues cannot be large unless there is a large national income on which they can levy taxes. You cannot take blood out of a stone. Therefore, a high level of wages for our municipal employees depends in the last analysis, upon the prosperity of private business.

Now for the second fundamental. I do not favour the elimination of social services now carried on by the City. I am not in favour of depriving our children of the educational facilities now afforded them. I think these social services could be made more effective. I believe our present educational system is far from perfect but I realize that the community as a whole is in favour of the continuation of the present social services and approves the present educational system.

The City urges two main defences to the application of the employees for restoration of reductions—first, that the rates now in force are as high and in some cases higher than the rates paid for similar services by private firms and corporations now in business in the City of Winnipeg, including those paid by the

Manitoba Government Telephones and the Winnipeg Electric Railway Company; second, that the condition of the City's finances is such that the City is now unable to increase the rates of pay.

It is true that the City Council passed a resolution stating that they were in general sympathy with a partial restoration of the reductions which had been made; but the City up to the present time has been unable to do so. This resolution, in my opinion, is nothing more than a kindly wish. Personally I would like very much to recommend an increase in pay and I do not regard the resolution as meaning any more than this. It is a resolution expressing goodwill and nothing more.

In regard to the first defence above mentioned, if you take into consideration certain benefits, such as the pension fund; thirty days' sickness with pay; two weeks' holidays with pay; and, generally speaking, the security of permanency of employment afforded the employees on the permanent staff of the City (including the staff of the Winnipeg Hydro), in my opinion the City employees are in a better position, and have more security, than similar classes of employees in the employ of private business in this City.

Looking over the rates of pay for the various departments of the City and Hydro, I have no hesitation in saying that they are at least as high, and in many cases higher than the rates paid by private business. While it is true that to-day the salary deductions now stand at 16⅔ per cent and these deductions have been in force since March 1, 1931, and April 15, 1932, evidence was adduced by the City which shows that between the commencement of the depression in 1929 and up to 1936, the general costs of living, according to statistics issued by the Dominion Government, declined about 27 per cent. It is true that the general costs of living rose during the early part of this year, but during the latter part of the year commodity prices all over the world have fallen and the general costs of living are again on the decrease. There have been no lay-offs during these depression years in the permanent staff of the City. The result is that in the main the employees of the City have not suffered a loss of anything like the 16⅔ per cent which has been deducted from their wages.

In regard to the second defence of the City, namely, that its finances were in such shape that it was impossible to give any increase at the present time, I am of the opinion that an analysis of the City's Financial Statements, which were filed, more than supports this contention.

These accounts disclose some very interesting facts. Leaving aside for a moment the amount paid on Unemployment Relief, which I will deal with later, the City's Budget is about nine and a half million dollars. Of this sum nearly seven million dollars is raised by a tax on homes and properties. In addition to this over three-quarters of a million is raised by what is commonly called "the business tax." This tax is practically nothing more than an additional tax on real estate situated in the downtown or business portion of the City, because the greater part of this tax is now absorbed by the landlord, or owner of real estate, in reduced rentals. In fact (taking into account additional revenues on real estate for Water District purposes, Local Improvements, etc.) over 90 per cent of the City's revenue is derived from real estate. The total value of assessable property in the City has declined from over 237 million dollars in 1931 to approximately 198 million dollars in 1936, and a further decline of nearly five millions in 1937. This reduction has been brought about by a number of tax appeals on the part of property owners, which appeals have been contested in our courts. The result of these decisions has shown that the assessment values were very much above the actual market values of real estate in this City. Some of the cases covered what might be called "key properties" in the City and when these were reduced, the City was compelled to revise its whole assessment.

Generally speaking, the net result has shown that it is impossible for the owners of real estate to earn a reasonable revenue on real estate in the City at the values at which they were being assessed.

The Financial Statements also reveal the fact that the City is acquiring more and more property through tax sale. Evidence was adduced before us that there were about 98,000 subdivided lots within the area of the City limits and that the City has now acquired title to about 33,000 lots, or about 33 per cent of the total. It is true that a large number of these lots are in the outlying districts, but lately the City has commenced to acquire a great deal of inside property. For example, the City has now acquired by tax sale proceedings many of the valuable inside properties in the very centre of the City—Robinson's Departmental Store, a stone's throw from the corner of Main Street and Portage Avenue, the Walker Theatre, the Playhouse Theatre, the Forum Block, and many warehouses. I would like to point out also the significant fact that many of the large residences have been torn down. For example, the homes of the late Sir Augustus Nanton, the late Sir William Whyte, the late Sir Daniel McMillan, and the late Hon. Robert Rogers, situate in the very best residential districts. We have the demolition of the Bon Accord Block on Main Street

down to a one-storey building and we have seen the old Hudson's Bay store demolished. These are all danger signals warning us of the unsound structure of our taxation.

As of January 1, 1936, the total arrears for taxes amounted to over 12 million dollars.

These facts convince me that it is impracticable to raise the tax rate on homes and properties in the City of Winnipeg. It would only force more property back into the City's hands, thus again narrowing the base of taxation, with the result that it might seriously threaten the solidity of the whole structure. The law of diminishing returns is inexorable. A complete restoration of all the salary reductions, including the School Board employees, amounts to $985,000 a year. This would mean an increase of about 5 mills on the dollar in our rate of taxation. It is the considered opinion of those who have made a study of this situation that it is quite probable a higher rate of taxation on real estate would yield less revenue because of the number who would abandon their properties. In my opinion it is utterly impracticable. Of course, this total increase includes all the teaching staff under the Winnipeg School Board, because I do not see how we can give a general increase to the City staff without treating the teaching staff in a similar manner. The policy adopted by both the City Council and the Winnipeg School Board in regard to the reductions which have taken place in both the City and School staffs and the partial restoration which has been made, makes it essential that any restoration to the City staff applies also to the teaching staff. We must remember that the City Council has no control over the expenditures of the School Board. The matter has been handled so far under a "gentleman's agreement." There would be nothing to prevent the School Board from giving similar increases to the teaching staff and presenting the bill to the City Council. This is a situation which should be changed. The City Council, as the body responsible for the raising of all funds, should have control over all expenditures, including the expenditures of the School Board.

But if one considers the situation in regard to Unemployment Relief, the question of increases at the present time becomes all the more impossible. The Financial Statements of the City reveal that the City's share of direct Unemployment Relief since 1931 amounts to nearly nine and a half million dollars up to the end of 1937. This represents a debt of $300 for every home and property owner in this City. This sum of nine and a half millions has been borrowed by the City of Winnipeg. It is not included in the ordinary budget. The City is now compelled to include in its current budget about $400,000 a year to pay the interest on this loan. In other words, the City has added this sum to its capital debt, for which it has nothing tangible to show. Today the City's share of Unemployment Relief amounts to about a million and a half a year. There are now about 4,600 families on direct relief in the City. A Royal Commission is now investigating the economic relations between the Federal Government and the Provincial Governments. This includes the investigation of the present financial condition of the municipalities.

There is a popular idea that the Dominion will assume as a national problem the burden of Unemployment Relief. If this comes to pass, the finances of the City will assume a very different complexion; but this cannot possibly take place before the expiration of at least two years. The Commission must sit and hear evidence throughout Canada. It must draw and adopt its report. That report must be placed between the Federal and Provincial authorities. A conference must take place between the Federal and Provincial authorities and an agreement reached which would result in the amending of our Constitution.

All this, in my opinion, will take at least two years. In the interim I think the City is in a very serious condition in regard to the Unemployment Relief problem. The present banking facilities of the City terminate on December 31, 1937. The City now owes the Bank of Montreal six million eight hundred thousand dollars, nearly four million of which is for relief. In addition it still owes the School Board five hundred and fifty-four thousand dollars on account of 1936 and has been short in supplying funds for the School Board's 1937 expenditures by one million four hundred and five thousand dollars. The School Board owes its Bank at the present time over two million dollars. By the end of the present year it is estimated that the City and School Board will have bank overdrafts totalling ten million dollars. After that, unless new arrangements are made, the City can borrow no more money for Unemployment Relief. The Provincial Government has now formally notified the City that the present arrangement in regard to Unemployment Relief will terminate on the 31st of December next and the Legislature has been called for the purpose of passing any legislation which the City may require. It is rumoured that a raid is to be made on the City Sinking Fund. I sincerely hope it is only a rumour, because in my opinion, if it is permitted, it is a misuse of the savings of the home and property owners of this city—of money set aside by them to care for future obligations. Notwithstanding these facts, the situation is being treated as a temporary matter.

It is quite evident to me that Unemployment Relief is here to stay indefinitely. Furthermore, I do not see how the City can escape paying a proportion of Unemployment Relief, even if it were taken over as a national problem. The City will sooner or later be compelled to include in its current budget a substantial sum as its share of Unemployment Relief. We are apt to think of the Dominion as an outside third party, to which we owe no responsibility. I think it is well to remember that the credit of the Dominion is nothing more than the combined credit of all the people living in Canada, which, of course, includes the citizens of Winnipeg. The credit of the Dominion, like the credit of any other corporation, has its definite limits.

Relief is now administered by a special committee of the City Council. Without casting any reflection on this committee I think that in principle this form of administration is not sound. Direct public relief should be administered by an independent commission—a commission free, as far as possible, from any political influence, but subject to the financial control of the City Council. There is also a substantial amount of aid administered under the Social Welfare Department. It seems to me that these two departments should be combined and all social welfare, including relief, should be administered under the one independent commission. Generally speaking, the principle should be adopted that those receiving relief should, as far as possible, be asked to pay back to the City the assistance received, in the form of work. I am sure we are all agreed that to do anything else is to destroy the moral fibre of those receiving assistance. At the present time everyone who has lived in the City for one year and a day is entitled to relief. This time should be extended to two years. There are 1,000 families now on relief who have come to this City since 1930. This means that this City is being imposed upon in that it is carrying the burdens of relief that properly belong to outside municipalities.

To sum the matter up, I am strongly of the opinion that the City cannot continue to borrow on account of capital account for Unemployment Relief. That it must immediately include, in its current budget, a substantial contribution towards the sum annually expended. That we are only fooling ourselves when we carry it in a separate part of the budget; and that, this being the case, it is financially quite impossible for the City to give, at this time, general increases to its employees, including the School Board employees.

To carry direct relief on a permanent basis, provision must be made for it in the City budget and this necessitates new revenue. The Province of Manitoba now takes for its own purposes all available sources of taxation. The provincial income tax is now as high, and in some cases higher than the rates imposed by the Dominion. Then there is the Gasoline Tax, the Motor Tax, the profits on the sale of liquor, the Amusement Tax and the Corporation Tax. The greater part of the revenue derived from all these taxes collected by the Province is paid by citizens of Winnipeg. The result is that the Province must either give up a share of this revenue or afford to the City some new source of taxation for the City cannot raise any more money by increasing the taxes on real estate.

I would like to take this opportunity of looking for a moment behind the facts as revealed in the City's Financial Statements. The most striking fact is the lack of building in this City. The Unemployment Relief statistics show that over 50 per cent of those now on relief were formerly engaged in the building trades, or are included in the class known as "Common Labor." In a City with an assessment on buildings of about two hundred millions, depreciation and obsolescence would amount to about 5 per cent per annum. Obviously, then, in order to maintain our Assessment Roll at a normal level there ought to be a new building program of at least ten million dollars a year. Added to this there should be some allowance for a normal growth, at the very least 1 per cent per year, so that we ought to have an annual building program of about twelve million dollars. Yet the building permits in this City during the last few years have not amounted to a fraction of this sum. In the five pre-war years from 1910 to 1914, these permits totalled 84 million dollars, or 17 million dollars per year. In the five war years from 1915 to 1919 they totalled 11 million dollars, or a little over 2 millions per year. In the five post-war years, 1925 to 1929, they amounted to 43 million dollars, or 8½ millions per year, and in the last five years of the depression, from 1932 to 1936, they totalled only seven million dollars, or about 1½ millions per year. Furthermore, we must remember that included in this last amount there were such public buildings as the Federal Building and the Post Office. The practical result is that the building industry has to all intents and purposes vanished in the City of Winnipeg.

The building industry is what might be called the "heavy" industry of Winnipeg. The majority of the people living in Winnipeg are, at the present time, engaged in what economists call "consumers' industries"—food, clothing, allied businesses and services. Founded on these industries alone there can be no permanent prosperity or growth. There is nothing which would stimulate the prosperity of the citizens of Winnipeg like a revival of the build-

ing trades. The lumber industry; the steel industry; plumbing; hardware; all merchants engaged in furnishing building supplies; all are vitally interested. Every carpenter, plumber, plasterer, steel worker, railroad employee and labourer in general would be directly and favourably affected by a revival of this industry.

But it would go much further than this, because business in general of every kind and sort in the City would be revitalized. Every citizen, from the humblest worker to the highest executive, is vitally interested in the revival of the building trades. There is nothing which would generally increase wages in the City more quickly than a revival of building to its former normal proportions. It would increase the velocity in the circulation of money and stir up the deadly general stagnation now existent in business throughout the City.

This brings us to a consideration of the reason why there is now practically no building in the City. I believe there are two reasons. *Firstly* (and I think this is the principal reason), the burden of taxation on real estate is such that it is no longer a profitable investment. In owning real estate it is necessary to introduce the profit incentive. At the present time there is no advantage in owning your own home except that of permanency. If it were not for the inconvenience of moving from house to house, it would be far easier to rent, and let the landlord worry about taxes and repairs. *Secondly,* the financial policies adopted by our Provincial Government have not been conducive to the investment of capital in this City and Province. Nearly twenty years after the Great War, we still have Moratoriums and we still have a Debt Adjustment Board. It is true that these Statutes are now of very limited application, but the outside investor views with caution the mere fact that we still have this class of legislation on the Statute Books. To repeal this legislation would be the most powerful thing we could do to restore the confidence of the outside investor interested in this Province.

It seems to me that if we are ever to appeal to investors with outside capital, we must do away with all these restrictions upon the right of private contract. The tax policies of the Province in regard to capital are not favourable. The Provincial Income Tax Act taxes the rent of non-residents. The Succession Duty Act charges exorbitant rates on the estates of non-residents. The result of these two policies is that outside capital does not invest in this City and Province in the way it would if we adopted a more friendly policy. These policies, too, increase the rate of interest prevailing in this City and Province because money is a commodity, and like any other commodity, when it is scarce it is expensive. When lenders are numerous, rates fall, and when lenders are few, rates go up.

It is true that these policies are under the jurisdiction of the Provincial Government, but there is nothing to prevent the City Council bringing pressure to bear upon the Provincial Legislature by passing resolutions asking for the abolition of Moratoriums, the removal of the Debt Adjustment Board and the reduction of taxes, both in respect to income tax and succession duty, upon the property of non-residents.

It has always been a mystery to me that, during the last five years of the depression, we have never seen business men engaged in the building trades, lumber merchants, plumbing firms and steel workers attending at the Legislature during its session and asking to have these impediments upon business removed. We have never seen carpenters, plasterers, plumbers, and all the other workers vitally affected by these matters, attending upon the Legislature when it is in session, and asking to have these fundamentals put right.

These are the prerequisites of permanent prosperity for this City. The City Council could at least go on record by resolving that all these things are prejudicial to the prosperity of the citizens of Winnipeg.

For all of these reasons I am of the opinion that it is utterly impossible for the City at the present time to grant any restorations to the City staff. It was suggested that, because employees of the Water Works and employees of the Hydro are in departments which are producing a profit to the City, they are entitled to an increase. This is a very dangerous fallacy. They are all in the employ of the City. It would be most unfair to grant increases to those in whose departments the City Ledger shows a credit, and at the same time deny a similar increase to those employees who are engaged in departments which, from their very nature, would never show a credit, or which at the present time are showing a debit.

Since this application was launched we have witnessed a partial crop failure in the Province of Alberta and a complete crop failure in the Province of Saskatchewan. Over 15 per cent of the industrial and distributive business of the City of Winnipeg is derived from the Province of Alberta and over 30 per cent from the Province of Saskatchewan. Moreover, since this application has been launched the bottom has fallen out of the stock markets of the world. A very serious trade depression now confronts the United States and is spread-

ing into Canada. These conditions, in addition to the tragedy of Saskatchewan and Alberta, are bound to react upon business in Winnipeg. True it is that Manitoba has a good crop which will, to some extent, offset the losses to our business in this City arising from the conditions in Saskatchewan and Alberta. But surveying the whole business situation now confronting Winnipeg I can foresee a difficult year for business, and with it a lessened ability to pay taxes on the scale at present in force.

I think it is unfortunate that this application was made under conditions which are so well known to everyone, on the very eve of the sitting of the Royal Commission to investigate all our economic difficulties. I am strongly of the opinion that this application should be deferred at least until we have obtained the benefit which will no doubt flow from the report of this Commission on these matters. But this, as I have said before, is going to take some time—probably two years.

What are we going to do in the interval? Are we going to sit idly by and do nothing to help ourselves? In these days of five-year plans and programs generally, I venture to suggest a program for Winnipeg, a program which, in my opinion, would increase the prosperity of everyone living in it, from the humblest to the highest.

1. Reduce the taxes on real estate about 25 per cent, or about two million dollars.

2. Raise this money by asking the Provincial Legislature to give us a new source of taxation. The question is, what is it to be? Let us approach the problem by elimination. We now have two income taxes, Dominion and Provincial, whose scale of taxation rises to very high figures in the higher brackets. I do not think a third income tax is practicable. Then we already have substantial taxes on amusements; gasoline; motor cars and corporations. In fact the whole field of taxation is already occupied by the Province.

There are only two taxes of which I can think that will give a wide base of taxation and produce a substantial sum of money. One is a Turnover Tax. The burden of such a tax could be adjusted by reasonable exemptions in respect of smaller businesses. The collection of this tax would be comparatively simple and would produce a large sum of money.

The other possible tax is a 2 per cent Sales Tax. This tax has lately been placed on the Statute Books in the Province of Saskatchewan. It has been adopted in 25 out of the 48 States of the Union to the south of us. In these 25 States for the fiscal years of 1935-1936, this tax raised nearly 350 million dollars, over 90 millions of which was used to meet the demands of Unemployment Relief. Over 100 million dollars was used for education and over 100 million dollars was used to meet the general demands of government. On looking over the Statutes of the various States I find that in some States the bare necessities of life, such as bread and milk and certain food stuffs, are exempt. In some States the tax is 2 per cent and in others it is 3 per cent. In practically all the States the merchant is not allowed to absorb the tax. He must add it to the sale price and pass it on as a tax.

Whichever of these taxes is selected should be a Provincial tax. It should be for the benefit of all of the municipalities of this Province. The moneys collected in each municipality under this tax should be used in a general reduction of all taxes on real estate in that municipality and there should be a statutory limit placed on the tax rate on real estate so that the money yielded from the new selected tax would, in fact, reduce taxation on real estate. This would enable the five suburban municipalities included in Greater Winnipeg now in default on their bonds and being managed by supervisors, to make settlements with their bondholders and enable them to place themselves in a sound financial condition.

3. Increase the Hydro rates in the City of Winnipeg. Our rates are the lowest on the Continent and a small increase could be made which would raise a large sum of money without hurting the operations of our City Hydro. At the present time the policy of the City Hydro is "Service at Cost." There is an accumulated deficit of eight hundred thousand dollars which the Executives of the Hydro state will disappear over a term of years. I cannot see why the City should not alleviate the burden on real estate by a slight increase in the very low rates now charged by the Hydro. A very low increase would yield a substantial sum of money. This increase could be brought about either by a tax on all light and power bills, which would include the light and power sold by the Winnipeg Electric Company, or the rates themselves for light and power could be increased slightly which would give the Winnipeg Electric Company an additional revenue for the purposes set forth in the next succeeding paragraph. I am well aware that there is a section in the community which is very much opposed to any assistance being given to the Winnipeg Electric Company. This is a prejudice of over twenty-five years standing. I cannot see any object in continuing such an ancient grudge.

4. Improve the transportation service in the City of Winnipeg by giving it an up-to-date bus service and improving the electrical service. Every up-to-date, modern city needs fast and adequate transportation. This can be brought about only by either taking over the Winnipeg Electric Railway (which I think would be a great mistake) or by giving the Winnipeg Electric Railway a new charter. Before the City raised the Winnipeg Hydro rates, a new charter could be negotiated with the Winnipeg Electric Railway, ensuring a modern and up-to-date transportation service, and upon which the Winnipeg Electric Railway would be able to obtain the necessary capital to provide such a service.

5. Adopt an aggressive policy in regard to all real estate acquired by the City. This real estate should be classified and sold at attractive figures, upon the one condition that the purchaser would immediately erect permanent improvements, in the form of suitable buildings, on the property purchased. The result of such a policy would be to stimulate building, and the City would find itself in the favourable position of having a rising Assessment Roll and a widening base of taxation.

In conclusion, I realize that the suggestion of such a program may be considered rather far afield from the subject-matter of this reference. I have ventured to suggest it because, in merely finding that the City is unable at the present time, for financial reasons, to make any restoration in the wages of employees, I have arrived at nothing but a negative result.

In times like these we read and hear far too much destructive criticism. We seem to have adopted a philosophy of despair; and so I have ventured to suggest a solution for our difficulties, a solution which we have in our own hands.

The program is only a skeleton one, and no doubt could be enlarged upon and vastly improved. I am confident that if the fundamental impediments to the return of our prosperity, to which I have referred, are removed, it will be possible not only to restore the wages of all the City employees, including the teaching staff, but the stimulation to business throughout the whole City, which will result from such a policy, will have the effect of raising the general level of all wages in private business throughout the City. Until this happens, this City, with all the advantages and opportunities which lie at its door, will, in my opinion, never make the progress it should make.

There will be objections no doubt to such a program, on the ground that it might increase the taxes of the masses. One of the curses of the present age is the popular idea that our Government can furnish services at the expense of the rich. Nearly all the "catch penny" schemes which are placed before the public for the raising of money involve the exemption, or rather the apparent exemption, of the large mass of our wage earners from taxation. It is quite easy to prove that there are not enough rich people in this City to carry the great burden of taxation imposed upon us by the present standard of social services. If you will look at the last Financial Statement of the Provincial Government you will see that the Provincial Income Tax, whose scales are in some cases higher than that of the Dominion Income Tax, produced a little over $700,000, whereas the 2 per cent Wage Tax, towards which everyone has to contribute, produced a million and a half. This means that if there was a large amount of taxable income in the higher scales the Provincial Income Tax would have produced more than the 2 per cent Wage Tax. It is thus obvious that everyone must contribute towards the cost of government according to his ability to pay—the small wage earner a modest sum and the highly paid executive in proportion to his high earning power. If we are to carry these social services successfully, we must apply the principles of hard-headed business experience to the conduct of our governmental services.

It is hard to bring home to everyone that taxes are paid indirectly by everyone. The rent which you pay for your house is affected and raised, not only by municipal taxes, but by Dominion and Provincial taxes as well. Also, the price of meat is unfavourably influenced, from the buyer's point of view, by the gasoline tax; the business tax; the real estate tax; the income tax; the corporation tax and all the other taxes that the butcher must pay either directly or indirectly. They are all added to his overhead, and passed on to the buyer—the ultimate consumer and the ultimate goat—wrapped up in that leaky parcel under your arm. It is astonishing to find how hard it is to impress upon men and women whose names are never written on an Income Tax Return, that they pay these taxes indirectly. Men and women, even in reduced circumstances, cannot avoid taxes. They enter into everything they buy—food, clothing, rent, medicine and all the other items they cannot avoid. The storekeeper, the landlord, the manufacturer, the farmer and the worker all pay taxes. So it comes about that everybody has helped to pay the taxes of everybody else in the cost of living.

All of which is respectfully submitted.

(Signed) TRAVERS SWEATMAN.

Unanimous Report *Re* Police Force

Re Industrial Disputes Investigation Act and re City of Winnipeg and its Police Force Wage Dispute.

The Honourable Norman McLeod Rogers,
Minister of Labour,
Ottawa.

DEAR SIR,—

The undersigned, constituting the Board of Conciliation and Arbitration set up by you on June 30, 1937, to deal with wage and other disputes between the City of Winnipeg and certain of its employees, have had our original field of investigation enlarged by your telegram of October 15, 1937, permitting the Police of the City of Winnipeg to present their case for an increase in rates of pay. We deem it advisable, for reasons that will appear, to make a separate report on this branch of our work.

Before proceeding further we feel impelled to state that, so far as has been disclosed, this is the first case in the history of Canada in which a police force has come before a Board of Conciliation and Arbitration to press for increase of pay. This fact was noted by the police themselves, and the necessity for their coming was greatly deplored. In that regret the Board concurs. We are, however, pleased to record that the whole presentation of their case, and the discussion which it evoked, were conducted in a manner entirely cordial and harmonious.

The first meeting dealing with the claims of the police was held on October 20, and subsequent meetings were held on November 1, 2 and 26. At these meetings the police were represented and submitted their case. The City of Winnipeg made reply opposing any increase. The Board of Police Commissioners, although invited, did not attend or send representatives. The Board in a letter to us dated October 23, 1937 (exhibit 25), stated: "there is no dispute between the Board of Police Commissioners and its employees," and, "the Board's position is set out in the resolution of May 6, 1937, which appears on page 13 of the memorial presented to the Board by the representatives of the police force." That memorial is exhibit 24, and the resolution referred to is prefaced by a long preamble which includes the following recitals:—

"WHEREAS serious dissatisfaction is prevalent in the ranks of the Police Force of Winnipeg owing to their low rate of pay;

"AND WHEREAS the Police Force is a semi-military body organized and maintained for the enforcement of law and order, and the protection of the property and the lives of the citizens;

. . . . . .

"AND WHEREAS the members of the Force are compelled to work on all holidays and half holidays and thus work over a month longer than do civic employees;

"AND WHEREAS the foregoing considerations render the whole police body a distinctive service, dissimilar to all other civic services and not subject to comparison and not to be confounded with any other civic department in administration, scope of service or remuneration;

"AND WHEREAS the pay of a First Class Constable in Winnipeg is lower than the average of similar pay in ten or more of the principal cities of Canada;

"AND WHEREAS the Board of Police Commissioners is denied the requisite moneys for the proper remuneration of the members of the police force by reason of the inability of the City Council to make adequate provision therefor and the attitude of the said Council that any proper provision for this essential purpose would entail a general increase in the pay of all branches of the civic service";

The resolution itself following that preamble is not in point in this report—it calls for money for additional police protection and urges immediate attention of the City to the Police situation.

The helplessness of the present Board of Police Commissioners to deal with the police force rates of pay prompts us to make suggestions in respect of re-organizing the police control of the City of Winnipeg. In doing so we put into more definite form proposals contained by implication in the preamble in part above quoted from the Board of Police Commissioners

Having regard to their functions the Police should be governed by an independent Commission, removed from all direct control of other bodies, and should be assured of wages and working conditions that would retain their undivided loyalty and support. They should be independent of party or local control because they are the arm of authority, and the efective machinery for the maintenance of law and order in the daily routine of life.

The set-up in the City of Winnipeg is, we venture to suggest, unsatisfactory. The Board of Police Commissioners as now constituted has five members—the Senior County Court Judge of Winnipeg, the Police Magistrate of Winnipeg, and three members of the City Council appointed by the Council. The Board is therefore controlled by the City Council, and its actions are liable to be drawn into the vortex of civic politics. It is in evidence before us that the representatives of the City Council on the Board supported resolutions of the Board which they later as aldermen opposed. This dual capacity on the part

of these Commissioners is fatal to effectiveness. The Police Magistrate also acts in a dual capacity. As a member of the Board he is under duty to deal with the police staff, make appointments, advancements, retirements, and settle policies of prosecutions, while, as Police Magistrate, he has to exercise judicial functions on these very prosecutions. The Senior County Court Judge hears appeals from the Police Magistrate involving those same prosecutions, and is to some extent under the same disqualification as to judicial independence as is the Police Magistrate himself.

We believe that the Board of Police Commissioners should be re-organized and suggest that when re-organized it consist of seven members—three appointed by the Attorney General of the Province and three (not to be members of the City Council) by the City of Winnipeg, and the mayor of the city, who should be Chairman. The appointed members should hold office for three years, one of each group of appointees to retire each year in succession. This system of rotation would insure continuity, and the whole set-up would guarantee wholesome independence. Financial control within reasonable limits might be safeguarded to the city

The work which the Police Department of the City of Winnipeg performs consists to a very large extent of matters that are quite extraneous to the immediate interests of the City of Winnipeg, and are attributable chiefly to the Province of Manitoba. The Province ought therefore to contribute substantially towards the maintenance of the city police force.

In submitting the foregoing recommendations and suggestions we realize that we are not confining ourselves strictly to the letter of our Commission, but we feel that the recommendations necessarily arise from the very nature of this wage dispute between the police and governing authorities. We believe that even the remotest possibility of any violent dispute or strike involving the severance of the police loyalty from that of constituted authority should be forestalled.

Dealing now with the specific claim, we have had information laid before us showing the enormous increase in police work in the eighteen years from 1918 to 1936. The criminal offences for those two years may be summarized thus:

Offences of breaking into and stealing from houses, shops, offices, garages, schools, warehouses and outhouses increased from 139 in 1918 to 1,684 in 1936.

Offences of fraud, theft, robbery and wilful damage increased from 525 in 1918 to 6,004 in 1936.

Commenting on these figures the Police, in their memorial Ex. 24 page 8 say in part:

> "In the above (figures) only the more serious offences are given, and it must be noted that in the figures for 1918 those offences committed by juveniles are included. The figures for 1936 do not include offences committed by juveniles. The total number of criminal offences for 1918, including both juvenile and adult, was 1,195, while those for adult in 1936 totalled 8,040 and for juveniles 1,350. It can readily be seen by these figures that the offences committed by juveniles in 1936 more than exceeded those for all ages in 1918.
>
> "In 1918, the total number of cases brought before the Winnipeg City Police Court by the City Police Department was 7,174. In 1936 the total number of cases was 20,190. In the first eight months of this year the cases are well over 18,000, and this indicates that the total for 1937 will be approximately 27,000."

This shows that the work of the staff in 1936 had increased more than tenfold over that of 1918, whereas the number of the Police had increased not at all, and their wages but very little. It is safe to say that no other department of the city service can show anything approaching this record of increase of service and duties. And when we bear in mind the greatly increased hazard involved in their work by reason of the increased use of automobiles, good roads, offensive weapons, all intensified by years of depression and unemployment, the picture shows a situation which demands immediate attention.

The City of Winnipeg some little time ago passed a resolution by which it linked the scale of wages of the police to that of the firemen of the city, putting them on the same level. That resolution—it was only a resolution—ought to be revoked. There is no comparison between firemen and policemen in the nature of the service they render the State, and the police force should not be linked up with the firemen, or any other class of employees, but should stand towards their employer independent of all such ties.

Having regard to the nature of their work and their increased duties and dangers, we think the police of this city are underpaid. They have been affected by the same changes in rates of pay as all other classes of city employees, namely:—

In 1931 a reduction to 90 per cent;

In 1932 a reduction to 81 per cent;

In 1934 a restoration to 84 per cent.

We recommend that their present rate of wages be increased by ten per cent thereof—to take effect January 1, 1938.

Bearing in mind the financial difficulties of the City of Winnipeg, we content ourselves with making the above recommendation.

All of which is respectfully submitted.

Dated at the City of Winnipeg this 4th day of December, 1937.

Report of Commission Regarding an Industrial Dispute Involving the Quebec Central Railway Company and Its Train Service Employees

His Honour Judge Albert Constantineau submitted to the Minister of Labour on December 1 his report as Commissioner to inquire into an industrial dispute involving the management of the Quebec Central Railway Company and its train service employees being members of the Order of Railway Conductors and the Brotherhood of Railroad Trainmen. Judge Constantineau's appointment was made under the provisions of Part I of the Inquiries Act, Chapter 99, R.S.C., 1927, on the recommendation of the Minister of Labour, in accordance with Section 65 of the Industrial Disputes Investigation Act, Chapter 112, R.S.C., 1937 (LABOUR GAZETTE, September, 1937, page 953). The circumstances in connection with this dispute are set forth in the report, the text of which follows.

Text of Report of Commission

In the matter of the Industrial Disputes Investigation Act, R.S.C. 1927, Chap. 112, and Part I of the Inquiries Act, R.S.C. 1927, Chap. 99, and in the matter of an industrial dispute involving the Quebec Central Railway and its train service employees, being members of the Order of Railway Conductors and the Brotherhood of Railroad Trainmen.

To the Hon. Norman McLeod Rogers,
a Member of His Majesty's Privy Council for Canada, and Minister of Labour.

The report of the Commissioner appointed for the investigation of the said dispute under the Inquiries Act by His Excellency the Governor in Council on the 8th day of September, 1937, respectfully sets forth as follows:—

The dispute referred to the undersigned for investigation originated, and is connected, with a proposed renewal of an agreement between the Brotherhood of Railroad Trainmen and the Quebec Central Railway. For over thirty years the Brotherhood of Railroad Trainmen included among its members, not only trainmen, but also conductors, and a joint agreement with the railway regulated the terms of employment and the rates of pay of both classes of employees. In the latter part of 1935 the Brotherhood applied to the railway for a renewal and revision of a previous agreement. The company would have willingly negotiated with the Brotherhood as it had done in previous years but before the subject of the new agreement could be taken up and discussed it was served with a request dated April 16, 1936, which reads as follows:

"This is to certify that the names appearing below are employed and holding seniority as conductors on the Quebec Central Railway, and we hereby request to withdraw from the present contract now held by the Brotherhood of Railroad Trainmen, which contract includes the conductors on that railway, and that the right to representation contained in that contract for the Conductors mentioned be transferred to and vested in the regularly constituted committee of the Order of Railway Conductors."

The petition or request was signed by nineteen employees of the Quebec Central Railway, who professed to be conductors, but at the hearing before the undersigned there was much controversy as to the manner the signatures were obtained and the standing of some of the signatories, but in view of the conclusion reached in this report, this feature of the case has very little relevant bearing.

The matters in dispute which are the subject of this investigation were, for a considerable time, as appeared by the Order in Council appointing the undersigned a commissioner, before the Labour Department, whose officers endeavoured for many months to settle the same, but without success.

On the 8th of September, 1937, the Honourable Minister of Labour, realizing that the dispute between the conductors and the trainmen "had become definitely acute to the detriment of the public interest and the good operation of the service, and arising out of which serious friction had developed between the parties concerned," and, being of opinion that the matters involved were of such a nature as could not best be dealt with by a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act, recommended to His Excellency the Governor in Council the appointment of the undersigned as Commissioner under the provisions of the Inquiries Act to inquire into the said dispute.

In compliance with the instructions contained in the Order in Council appointing him, namely, that the undersigned should "take any steps which in his judgment may effect a settlement of the existing dispute" he, the undersigned, proceeded to Sherbrooke on the 20th of October, 1937, to interview the interested parties. His first conversation was with Mr. G. D. Wadsworth, General Manager of the Quebec Central Railway, who thoroughly explained to him the situation and informed him that the company was not directly interested in the controversy between the conductors and the trainmen, and was willing to contract with whatever organization or organizations the rival parties agreed upon. The next person seen was Mr. Lucien Legendre, Chairman of the newly constituted committee of Conductors, who are striving to secede from the Brotherhood of Railroad Trainmen and secure from the company a separate agreement of their own. His attitude was that the conductors had not been fairly treated in the past by the Brotherhood and that they were clearly entitled to deal separately with the company, if they chose to do so. The last person interviewed was Mr. J. C. Morin, General Chairman of the Brotherhood of Railroad Trainmen, who emphatically denied that the conductors had any ground for complaint and that the railway company had no right to refuse to negotiate with his organization as it had done since the inception of its operations.

From the tone of the above conversations the undersigned could come to no other conclusion but that an amicable settlement or compromise was impossible. On the way home the undersigned called at Montreal on Mr. George Hodge, Manager of the Department of Personnel of the Canadian Pacific Railway Company, the Quebec Central Railway being a subsidiary of that company. Mr. Hodge took the same position as Mr. Wadsworth had taken, namely, that this company was not directly interested in the dispute but was nevertheless anxious that there should be no friction among the employees of the Quebec Central Railway Company.

In view of the circumstances above described there was nothing left for the undersigned to do but to hear the parties interested at a meeting at some appointed time and place. The hearing was commenced at Montreal on the 3rd day of November, 1937, in one of the conference rooms of the Canadian Pacific Railway, which was provided through the courtesy of Mr. Hodge. Mr. Wadsworth was present at the request of the undersigned on behalf of the Quebec Central Railway Company. Mr. Todd, Vice-President of the Order of Railway Conductors, Mr. Legendre and Mr. Duval represented the Railway Conductors; and Mr. W. J. Babe, Vice-President of the Brotherhood of Railroad Trainmen, and Mr. J. C. Morin attended on behalf of the Brotherhood of Railroad Trainmen.

Mr. Todd presented most of the arguments in favour of the conductors and relied chiefly on the principle that every class of labour or craft should be allowed to contract for its own members. He stated that on nearly all the railway lines of America this principle had been acknowledged and acted upon and in support of his contention he produced documents showing what decisions had been given by Courts and Labour Boards in Canada and in the United States which had dealt with subjects of a similar character. Mr. Legendre and Mr. Dorval charged that the conductors on the Quebec Central Railway had not always been treated fairly by the Brotherhood of Trainmen and that they were at their mercy inasmuch as they constituted only a minority of the members of the Brotherhood. Reference was specifically made to the mileage of conductors, which on the Quebec Central Railway had been reduced substantially below that which prevailed on other railway lines, the effect being not only to diminish the wages of conductors but also their pension whenever they retired from service. At this juncture Mr. Morin interjected that if only a question of mileage was at issue the Brotherhood would be willing to restore it to what it was prior to the reduction. This suggestion, however, was rejected, and it was again asserted that the conductors should be free to contract with the railway company as they pleased, since there were many other questions which affected them personally besides mileage.

After Mr. Babe had made some preliminary remarks Mr. Morin replied to the arguments propounded by the Railway Conductors by a lengthy plea on behalf of the Brotherhood of Railroad Trainmen. One of his contentions was that conditions which might be suitable to an extensive railway system should not prevail on a small railway line like the Quebec Central Railway, where the total number of conductors and trainmen was very limited. He denied that the conductors had ever received unjust treatment at the hands of the Brotherhood and he defended the action of the latter in reducing their mileage, alleging that it was unfair that certain employees on the seniority list should receive high salaries while others lower down on the list should be out of employment or receiving a very meagre remuneration. He was strongly of the opinion that all questions affecting the interest of the employees on the railway, whether conductors or trainmen, should be determined and adjusted by a vote of the members of the Brotherhood of Railroad Trainmen as presently constituted, being convinced that such a procedure was more likely to promote and maintain harmony and friendly relations among all the employees than any other scheme or arrangement. He was amazed at the thought that an agreement which had lasted for such a long period and had worked so satisfactorily (according to him) should be changed or altered because of the discontent of a few conductors. He accused the Order of Railway Conductors of being at the root of the agitation, which resulted in the signing of the petition that was forwarded to the Quebec Central Railway. He declared that they had even canvassed trainmen to induce them to join their Order.

His main argument, however, and the one he seemingly regarded as a fundamental ground to support his case, was that the Brotherhood of Railroad Trainmen had a vested right to continue to negotiate agreements both for the conductors and the trainmen because of the length of time the Brotherhood had done so and that the railway had no right to take any notice of the protest that had been made by some of the conductors.

The above is a concise summary, though by no means exhaustive, of the facts and arguments that were presented at the hearing. Shorn of all minor details and considerations of a controversial character the bare question to be ruled upon by the undersigned is whether, in view of their objection and remonstrance, the conductors should, under the circumstances disclosed, be compelled to remain with the Brotherhood of Railroad Trainmen and be denied the privilege of negotiating a separate schedule independently of any other organization. In the main Mr. Morin did not altogether challenge the right of the conductors to contract separately, but he strenuously contended they were not unanimous on the subject and that before any departure from the existing agreement be made a proper vote should be taken. The discussion upon this point disclosed that the parties were not at one regarding the manner of conducting the voting. Apart from ascertaining by a vote the feeling of the members of the Brotherhood of Railroad Trainmen as presently constituted, which the conductors could not accept, there was divergence of opinion as to the standing of those who should be entitled to vote. Mr. Morin urged that not only the regular conductors, but also the trainmen who had acted as conductors part of their time, should be consulted. On the other hand, Mr. Todd forcibly contended that the part-time conductors should not vote unless they had been employed as conductors a substantial portion of their time, say at least fifty per cent. He substantiated his argument by quoting precedents in similar cases.

At the close of the hearing the undersigned enquired from those present whether it would not be possible to compromise the differences between the conductors and the trainmen. Thereupon Mr. Wadsworth suggested that the joint agreement might be continued with two separate committees, one representing the conductors and the other the trainmen, but Mr. Morin at once flatly rejected the proposal.

On the whole, after weighing carefully the facts and arguments that were submitted by the Order of Railway Conductors and the Brotherhood of Railroad Trainmen, and the admission expressly or impliedly made on behalf of the latter that the conductors might be entitled to a separate schedule, were a vote properly taken, and upon perusing the opinions and rulings of Courts and Labour Boards in similar cases, the undersigned has come to the conclusion that the conductors on the Quebec Central Railway have the right to negotiate for a separate schedule regulating the rates of pay and other terms of their employment with the company, separate and apart from the Brotherhood of Railroad Trainmen, provided that the majority of them desire such separate schedule.

It seems to the undersigned that no other conclusion could be arrived at in a case of this kind, in the absence of special circumstances of an extraordinary character. There were no

such circumstances established in evidence in the instant case because even if all the allegations made by the Brotherhood of Railroad Trainmen were well founded this would not be fatal to their cause, provided always they confined their activities to the enforcement of their legitimate rights. The gist, or real substance of the line of argument of the Brotherhood of Railroad Trainmen, might be said to have been summed up and crystallized in one terse sentence by Mr. Babe, who said "We have the contract, and what we have we hold."

To compel the conductors on the Quebec Central Railway, against their protest, to submit to the decision of the Brotherhood of Railroad Trainmen regarding questions affecting their personal interests would in many instances be sanctioning a violation of a most elementary principle of law and justice, namely, that no man should be a judge in his own cause. They being in the minority, whenever their interests should clash with those of the trainmen (the mileage, for instance) the latter would adjudicate in matters in which they were vitally interested.

In ascertaining the will of the conductors, the undersigned is of opinion that only those who are entitled to regular employment as conductors, and those others who have worked as conductors at least fifty per cent of their time during the twelve months next preceding the taking of the vote, should be entitled to vote.

The recommendation of the undersigned, therefore, is that whenever the conductors on the Quebec Central Railway satisfy the company that a majority of their number desire to have a separate schedule, separate and apart from the Brotherhood of Railroad Trainmen, or any other organization, they should be allowed to negotiate for the same whenever the railway finds it proper and expedient to grant their request.

Dated at Ottawa, this 30th day of November, 1937.

Respectfully submitted,
(Sgd.) A. CONSTANTINEAU.

Statistics of Electric Railways in Canada

According to a preliminary report for 1936 on electric railways of Canada 614,890,897 passengers were carried during 1936 which was an increase of 14,162,584 passengers, or 2·4 per cent, over the 1935 traffic and was the third increase since the low point reached in 1933. Revenues increased from $40,442,320 in 1935 to $41,391,927 and net income available for dividends and reserves increased from $6,932,715 to $7,480,451.

There were thirty-seven electric railways in Canada carrying passengers and nine of them in the larger cities carried 88 per cent of the traffic. The Montreal system carried 32·3 per cent of the total and the Toronto system carried 25·1 per cent. All of these large systems showed increases in passengers carried over 1935 traffic, ranging from 1·1 per cent for the Calgary railway to 6·6 per cent for the Hamilton railway.

The mileage of track, exclusive of sidings, turnouts, shops, etc., was reduced from 1,826 miles in 1935 to 1,800 miles and the number of passenger cars was reduced from 3,707 to 3,605. During the year 7 trackless trolley cars were put into operation in Montreal and the number of motor buses was increased from 552 to 605. The number of employees was reduced from 14,381 to 14,280, but the payroll was increased from $18,649,517 to $18,958,832.

For the third year in the past thirty-six no passengers were killed (the other years with clean records were 1933 and 1927) and only 1,503 passengers were injured, as compared with 1,517 in 1935 and 2,808 in 1929. There were 2 employees and 41 other persons killed and 280 employees and 651 other persons injured during the year.

There were 6,351 accidental deaths in Canada during 1936, of which 2,760 occurred in the home, 2,590 in public places and 980 in industry, according to figures released by the Dominion Bureau of Statistics. The number of males meeting an accidental death was 4,406 and females 1,945. The largest number of deaths occurred in the age-group 70 years and over, the number being 1,674. The age-group 30-49 years was second with 1,253 deaths; 50-69 years was third with 1,250 and 15-29 years, 1,054 deaths. The deaths between ages of 5 and 14 numbered 519, between 1 and 4 years, 443, and under one year, 158.

"Food Chains in Canada, 1936," is the title of a report issued recently by the Internal Trade Branch of the Dominion Bureau of Statistics. The report shows that during 1936, employment was furnished to 13,328 persons in food store chains. Of this number, 11,507 were male and 1,821 were females, to whom $8,441,900 was paid in salaries and wages. It is pointed out that these figures relate to all store employees, part-time and full-time, but warehouse and other overhead staff are not included. The payroll for 1936 was 4·3 per cent greater than the $8,094,500 paid out in 1935. Sales during the same interval increased by 5·6 per cent.

STRIKES AND LOCKOUTS IN CANADA DURING NOVEMBER, 1937

The following table shows the number of disputes, workers involved and time loss for November, 1937, as compared with the previous month and the same month a year ago:—

Date	Number of disputes	Number of employees involved	Time loss in man working days
*November, 1937.....	26	6,344	41,832
*October, 1937.....	30	7,521	55,692
November, 1936.....	17	1,768	13,344

*Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes".

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

The number of strikes and lockouts in November was lower than in October with an appreciable reduction in numbers of workers involved and in time loss. The strike of coal miners at Minto, N.B., caused a large percentage of the time loss in both months. Considerable time loss in November was also caused by a strike of abattoir and meat packing employees in Montreal, by strikes of coal miners in Nova Scotia and Alberta, and a strike of rubber factory workers at Kitchener, Ont., carried over from October. In November, 1936, strikes of coal miners at Cadomin, Alta., and fur workers at Winnipeg caused over half of the time loss.

Six disputes involving 1,665 workers were carried over from October. Twenty disputes commenced during November. Of these twenty-six disputes, twenty were terminated during the month, three resulting in favour of the employers concerned, seven in favour of the workers involved, while compromise settlements were reached in nine cases and the result of one dispute was reported as indefinite. At the end of November, therefore, there were six disputes recorded as strikes or lockouts, namely: coal miners, Minto, N.B.; children's dress factory workers, Toronto, Ont.; dairy employees, Toronto, Ont.; shoe factory workers, Brampton, Ont.; dress factory workers, Montreal, P.Q.; textile factory workers, Coaticook, P.Q.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to five such disputes: motion picture projectionists, Toronto, Ont., July 11, 1932, two employers; coastwise longshoremen, Vancouver, B.C., November 23, 1936, several employers; meat packing employees, Vancouver, B.C., December 29, 1936, one employer; beverage dispensers, Toronto, Ont., March 4, 1937, one employer; custom tailors, Toronto, Ont., May 20, 1937, one employer.

Disputes involving men on unemployment relief work who are not paid wages but receive subsistence or allowances for which work is performed or may be required are not included in the record, no relation of employer and employee being involved.

A minor dispute involved five seamen on a steamship at Port Colborne, Ont., on October 21. The men left the ship, when a watchman was dismissed for incompetence, and interfered with the operation of the ship, assaulting the captain. For this charges were laid. The men were replaced and the ship proceeded after six hours.

A minor dispute involved certain building trades on October 27 and November 1 at Vancouver, B.C., *re* the employment of members of international unions and the Amalgamated Building Workers of Canada on one job. It appears that the employer was engaging members of the international unions only and when picketed by the national union offered to divide the employment. The international union workers then left and were replaced by others.

A strike of five heating engineers in four theatres in Vancouver, B.C., from October 25 to October 31, was reported too late for inclusion in the November issue of the LABOUR GAZETTE. The workers demanded an agreement with the International Union of Operating Engineers and increases in wages, being partial restoration of rates reduced since 1931. An increase of $1.50 per week for the regular men was secured and a union agreement.

A minor dispute involved a number of employees in a fruit cannery at Grimsby, Ont., on November 2, when some of the piece-workers refused to work, claiming that their earnings were insufficient. It was found that the fruit was not ripe enough for efficient handling and work was suspended for two days. A brief stoppage arising out of a misunderstanding as to piece rates had occurred on September 28.

A dispute involving employees in one restaurant in Toronto on November 17 has been reported. It appears that the Hotel and Restaurant Employees' International Alliance demanded a union agreement and picketed the establishment, calling out the employees. The number responding was reported by the union as four and by the proprietor as two, and these were replaced.

The strike from November 25 to November 30 of drivers on several bus lines in the United States is reported in the press to have involved one line in Canada operating out of Windsor, Ont., where four drivers ceased work. Particulars as to the extent of the dispute in Canada have not yet been secured. The dispute in the United States is outlined elsewhere in this issue.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

Disputes in Progress Prior to November

COAL MINERS, MINTO, N.B.—The proposal of the provincial government in October that the miners resume work while the provincial Fair Wage Board would investigate and set a wage scale for the industry was discussed with the Prime Minister and members of the provincial government by officials of the United Mine Workers of America on November 23 and 24. The union representatives desired that the question of union recognition should also be dealt with by the Board, but this was considered not to be within the jurisdiction of the Board under the Fair Wage Act. The Premier stated that the Board had full power to deal with the conditions in the mining area. On November 25 the strikers voted on the proposal and rejected it by 762 to 15. Toward the end of the month the union representatives stated that application would be made to the Federal Minister of Labour for a Board of Conciliation under the Industrial Disputes Investigation Act. It was reported that about 250 men were working in the mines in the Minto area, these including one mine with eighty employees, where a settlement had been made with the union. The stripping or open mines near the Minto area and small mines doing a local business were not involved in the strike.

RUBBER WORKERS, KITCHENER, ONT.—As stated in the LABOUR GAZETTE for November work was resumed on November 4 as a result of conciliation by the Ontario Minister of Labour, it having been arranged that the Ontario Industry and Labour Board would establish a wage scale for the industry, strikers to be taken back in order of seniority. Court proceedings against pickets who interfered with the movement of a railway car and with police on October 14 were adjourned from November 2 and on November 24 the Crown Attorney proposed that the charges be withdrawn. The magistrate took this under consideration.

BAKERY WORKERS, TORONTO, ONT.—This dispute was terminated on November 13 as a result of conciliation by an officer of the Ontario Department of Labour, the discharged union workers being reinstated. Union recognition was not conceded. Wages and working conditions under the expired agreement were not changed.

Disputes Commencing During November

LOGGERS, FORT FRANCES, ONT.—Employees in one camp ceased work on November 2 when the camp steward, head of the grievance committee, was dismissed. The employer claimed that the man's work was unsatisfactory. Employees in another camp of the same operator also ceased work but resumed in a short time. The strikers were discharged but remained in the camp for a time. On November 6, union officials negotiated a settlement. The strikers were to be reinstated but the discharged man was to be replaced. The employer, however, closed the camp on November 10 before work was resumed, as the timber there was not required, and stated the men would be given work in other camps as required.

LOGGERS, PENINSULA, ONT.—Employees in one camp ceased work on November 8 against deduction from the wages of men paid by the month for board on Sundays and holidays. The Industrial Standards officer of the Ontario Department of Labour ruled that this was contrary to the agreement in force under the Industrial Standards Act and, the employer accepting this, work was resumed on November 11.

COAL MINERS, DRUMHELLER, ALTA.—Employees of four operating companies ceased work on November 2 and the next two days as a result of disputes as to payment for certain timber setting, shovelling extra distances and for inferior coal. As a result of conciliation by the western representatives of the Federal Department of Labour it was agreed to refer the dispute to an impartial arbitrator as provided in the agreement between the operators and the United Mine Workers of America. Work was resumed on November 8.

COAL MINERS, CANMORE, ALTA.—Employees of one company ceased work on November 3 when the management refused a demand for the re-measurement of working places and for the engagement of additional men as muckers, etc. The western representative of

the Federal Department of Labour discussed the matter with the manager and district officer of the United Mine Workers of America and as a result of negotiations it was decided to re-measure all places in dispute, to assign certain employees as muckers and to consider the engagement of extra employees. Work was resumed November 5.

COAL MINERS, FLORENCE, N.S.—Employees in one colliery ceased work on November 10 against a reduction in the number of pan miners when a working face was reduced. The officials of the Amalgamated Mine Workers of Nova Scotia declared it an unauthorized strike and the union voted to resume work on the understanding that more men would be employed if found to be necessary. Work was resumed November 12.

COAL MINERS, SPRINGHILL, N.S.—Employees in one mine ceased work on November 12 and 13, two shifts, and for half of a day on November 15, one shift, in protest against court proceedings against one worker for violation of mining regulations, bail being refused at first, and also for the dismissal of the official who laid the charges. It appears there was a misunderstanding as the manager dealt with the offence. The charges were dropped but the official was not dismissed.

COAL MINERS, EAST COULEE, ALTA.—Employees in two collieries ceased work for November 12 and 13 as a result of a dispute as to payment for "brushing" after a coal cutting machine. The dispute was referred to an impartial chairman as provided in the agreement between the operators and the United Mine Workers of America, and work was resumed on November 15. The decision of the arbitrator was that the men were entitled to extra compensation but he suggested a change in the operation of the cutting machine.

COAL MINERS, BIENFAIT, SASK.—A number of employees in one mine ceased work on November 10, demanding the reinstatement of one worker discharged for leaving his working place without sufficient props so that the roof collapsed. The worker claimed that he was ill. The strikers stayed in the mine for thirty-two hours, keeping out the other employees, ten in number. It was arranged that the discharged miner would be reinstated and all of the strikers except one taken back.

COAL MINERS, LETHBRIDGE, ALTA.—Employees in one mine ceased work on November 15 when the management refused to negotiate an agreement for an increase in wages. The miners had become members of the United Mine Workers of America and the management offered to recognize the union but not to sign an agreement for the union scale in the district at the present time. On November 30 work was resumed with some increases in wages.

WINERY EMPLOYEES, TORONTO, ONT.—Most of the employees in one establishment manufacturing wine ceased work on November 3 demanding an increase in the minimum rate of wages for male employees from 25 cents per hour to 35 cents, with a reduction in hours from 49 per week to eight per day and 44 per week. As a result of conciliation by the Ontario Department of Labour it was agreed that this would be conceded, with 52½ cents per hour for overtime, and recognition of a shop committee. This agreement is to be in effect for one year, negotiations for any changes to be commenced 30 days before its expiration. Work was resumed on November 8.

MEAT PACKING WORKERS, MONTREAL, P.Q.—Numbers of employees in three abattoirs and meat packing establishments ceased work on November 8 and 9 when their demand for agreements with Federal Labour Union No. 121, Butcher and Meat Cutters' Union, with increases in wages, eight-hour day and payment for overtime, were refused. It was reported that union officials negotiated with several other meat packing firms and that the demands were taken into consideration by some. On November 22 work was resumed, the employers having agreed to reinstate the strikers as needed, many of them having been replaced during the dispute.

SHOE FACTORY WORKERS, BRAMPTON, ONT.—A number of employees (47 out of more than 200) ceased work on November 24, the demand of the Canadian Shoe Workers' Union and Allied Crafts for the reinstatement of four dismissed union workers having been refused. The establishment was picketed but employees were not prevented from going to work when the chief of police explained that this was illegal. At the end of the month the dispute was still in progress.

COTTON FACTORY WORKERS, CORNWALL, ONT.—A number of employees in one department ceased work on November 23 in protest against alleged disregard for seniority in making a promotion. As the work of this department affected most of the establishment the mills were closed, indirectly involving about 1,600 employees. As a result of conciliation by an official of the Ontario Department of Labour, work was resumed on November 29 in some departments and in others on the following day, the demands of the strikers not being conceded. The employees also protested against the length of time required for the investigation by the Ontario Industry and Labour Board into the cotton industry in the

province, following the strike in Cornwall mills in August.

DRESS FACTORY WORKERS (COTTON), MONTREAL, P.Q.—A number of employees in one factory ceased work on November 25 demanding the reinstatement of several union workers, members of the International Ladies Garment Workers' union, alleged to have been dismissed for union activity. The union was organizing the cotton dress industry with a view to securing an agreement as to wages and working conditions with the employers. On November 27, four pickets were reported to have been arrested on charges of disturbing the peace, etc. At the end of the month a settlement had not been reported.

TEXTILE FACTORY WORKERS, COATICOOK, P.Q.—A number of employees ceased work on November 24 demanding the dismissal of a foreman. The employer offered to meet a committee of employees but not representatives of the National Catholic Syndicate to which the strikers belonged. At the end of the month a settlement had not been effected.

SPOOL AND BOBBIN WORKERS, WALKERTON, ONT.—A number of the employees ceased work on November 19 when the management refused to negotiate an agreement with the millmen's local of the United Brotherhood of Carpenters and Joiners of America, with increases in wages. The employer was not satisfied that the union represented all the employees. As a result of conciliation by an officer of the Ontario Department of Labour an agreement was signed with a shop committee providing for wage increases averaging five per cent but the union was not recognized. Work was resumed on November 29.

PLUMBERS, WINDSOR, ONT.—Employees of various firms ceased work on November 15 to secure the renewal of the agreement between the master plumbers' association and the international union which had expired on October 31. The union had proposed an increase in wages from $1 per hour to $1.15 until March 1st and $1.25 thereafter; also that further increases should be made proportionate to increases for electricians. On November 22, three employers

(Continued on page 1325)

STRIKES AND LOCKOUTS IN CANADA DURING NOVEMBER, 1937*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(a) Strikes and Lockouts in progress prior to November, 1937				
MINING—				
Coal miners, Minto, N.B..	8	900	20,000	Commenced Oct. 13, 1937; for recognition of union; unterminated.
MANUFACTURING—				
Vegetable Foods—				
Bakery workers, Toronto, Ont.....	1	20	240	Commenced Oct. 9, 1937; against discharge of union workers and for increased wages; with reduced hours in new agreement, terminated Nov. 13, 1937; conciliation (provincial); compromise.
Rubber Products—				
Rubber factory workers, Kitchener, Ont.....	1	700	2,800	Commenced Sept. 23, 1937; for increased wages, overtime rates after ten hours, etc.; terminated Nov. 4, 1937; conciliation (provincial); compromise.
Textiles, Clothing, etc.—				
Dress factory workers (children's) Toronto, Ont.....	1	5	130	Commenced Aug. 2, 1937; alleged lockout of union workers; unterminated.
TRADE—				
Dairy employees, Toronto, Ont.....	1	30	800	Commenced Sept. 17, 1937; for closed union shop agreement; unterminated.
SERVICE—				
Business—				
Cleaners and dyers, Toronto, Ont.....	1	10	60	Commenced Oct. 18, 1937; for continuation of expired union agreement; terminated Nov. 6, 1937; conciliation (provincial); in favour of workers.

(Continued from page 1323)

reached a tentative agreement with the union and work was resumed on their contracts. Negotiations resulted in an agreement between the union and the master plumbers' association which provided for an increase in wages to $1.15 on March 1, 1938. Work was resumed on November 29. The proposed clauses as to electricians' wages were not included.

TRUCK DRIVERS, PORT ARTHUR, ONT.—Employees on construction on the Dawson Road ceased work on November 10 when the contractor refused the demand of the Truckers' Federal Labour Union No. 77 for payment by the hour instead of piece rates. It was claimed that the drivers had been engaged by the hour. Work was resumed on November 11 when the contractor agreed to pay $1.50 per hour and lower the speed rate, trucks to be operated at 20 miles per hour loaded and 25 miles when empty.

DECKHANDS AND FIREMEN, FORT WILLIAM, ONT.—Deckhands and firemen on one steamship ceased work on November 7 on the refusal of their demand for an increase in wages from $35 per month to $45. An increase was made on most of the lake boats in September (LABOUR GAZETTE, October, 1937, p. 1069). The captain, on being authorized by the head office, negotiated with the crew and conceded the increase. Work was resumed next day.

WAITRESSES (RESTAURANT), NEW WESTMINSTER, B.C.—Most of the waitresses in one establishment ceased work on November 5 demanding the reinstatement of a discharged waitress. It was reported that the employer had dismissed several union employees in recent weeks. It was reported that the strikers remained on the premises until ordered to leave by the police. The establishment was picketed by members of the various unions until the proprietor agreed to reinstate the dismissed waitress and all the strikers on November 10.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

The latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the March issue, in the review of Strikes and Lockouts in Canada and Other Countries, 1936. The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the several countries for which such figures were available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the figures are not for relatively recent dates. Statistics given in the annual review and in this monthly article are taken as far as possible from the government publications of the various countries concerned, while information as to particular disputes is obtained for the most part from newspaper reports.

Great Britain

The number of disputes beginning in October was 126 and 24 were still in progress from the previous month, making a total of 150 in progress during the period, involving 65,300 workers, with a resultant time loss of 285,000 man-working days.

Of the 126 disputes beginning in October, 36 arose out of demands for increases in wages, and 23 were over other wage questions; 2 were over questions of working hours, 22 over questions respecting the employment of particular classes or persons, 24 over other questions affecting working arrangements, and 16 over questions of trade union principle. One stoppage was sympathetic action in support of workers involved in another dispute, and two disputes arose out of demands for the withdrawal of summonses against certain work people for breach of contract.

During October, final settlements were reached in 107 disputes. Of these 24 were settled in favour of the workers, 50 in favour of the employers and 33 resulted in compromises. In the case of 16 other disputes work was resumed pending negotiations.

United States

Preliminary estimates of strikes in September, which, as the Bureau of Labour Statistics points out, are based on "scattered information from newspapers and other sources, and are subject to revision as more definite reports are received," show 345 strikes as beginning during the month, which with 270 unterminated at the end of August made a total of 615 in progress during the period. The number of workers involved in these disputes was 185,000 with a resultant time loss of 1,400,000 man working days. These estimates, as compared with those for August, indicate reductions of 17 per cent in the number of strikes, 30 per cent in the number of workers involved and 38 per cent in time loss.

As compared with the same month a year ago, the September figures show increases of 47 per cent in the number of strikes, 59 per cent in the number of workers involved, and 32 per cent in time loss.

During the month of November there were several strikes in the automobile manufacturing industry in Michigan. Eleven thousand employees of the Hudson Motor Car Company, Detroit, members of the United Automobile Workers of America, ceased work for one day, November 10, claiming violation of their agreement in regard to lay-offs, retiming of certain operations, etc. They returned to work the next day pending negotiations.

In accordance with a provision in the agreement between the United Automobile Workers of America and the General Motors Corporation, which was entered into at the conclusion of strikes early in the year, the union gave notice at the end of June that they wished to negotiate as to certain changes. While these negotiations were proceeding, the company claimed that a large number of stoppages not authorized by the union took place and the union agreed to deal with this problem. When the results of the negotiations were submitted to the union membership at large they were not ratified and further negotiations were entered into. These were halted by the company when an unauthorized strike of 2,500 workers took place at Pontiac on November 15. By November 18 it was reported in the press that about 15,000 employees of the company at various points were either on strike or out of work as a result of these strikes. On November 22, the international president brought about a resumption of work in a Pontiac plant where a sit-down strike had occurred, negotiations to be continued in accordance with the agreement. By the end of the month employment conditions were apparently normal while negotiations were being continued.

When an assembly plant of the Ford Motor Company at St. Louis, Missouri, opened after a seasonal shut down, members of the United Automobile Workers of America claimed they had been discriminated against. On November 24, members of this union and sympathizers from other organizations affiliated with the Committee for Industrial Organization picketed the plant in an attempt to prevent non-union workers from entering. At the end of the month the employers stated that employment was normal while the union claimed that only

about one-quarter of the normal staff was at work.

On November 25, 1,300 members of the Brotherhood of Railroad Trainmen employed as bus drivers by eight allied bus companies centred in northwestern and midwestern states ceased work, demanding an increase in mileage rates and a "closed shop" union agreement. Using non-strikers the company maintained a somewhat curtailed service. A mediator from the United States Department of Labour arranged meetings between representatives of the union and the employing companies at which a settlement was reached providing for wage increases effective July 1, 1938. The demand for the "closed shop" union agreement was not conceded. Work was resumed December 1.

Mothers' Allowances in British Columbia

The annual report of the Superintendent of Welfare on the administration of the British Columbia Mothers' Pensions Act, during the year ending March 31, 1937, indicates a "considerable and progressive increase in expenditure on allowances since the low point of the depression period." Those sections of the report which analyse the course and cause of such increase are as follows:—

"It will be remembered that in May, 1933, the Government found it necessary to make a reduction in the scale of allowances and to narrow the application of the Act somewhat. The lowest point in gross expenditure resulting from this action was not reached, however, until November, 1934. The expenditure for that month amounted to $49,010. For the remaining four mouths of that financial year the expenditure increased at the rate of approximately $125 per month, so that the expenditure for March, 1935, was $49,517.08. During the twelve months of the financial year 1935-36 there was a steady increase averaging approximately $325 a month, so that the expenditure for March, 1936, was $53,412.46. In the financial year 1936-37 covered by this report the steady increase continued. The rate of increase was approximately $460 per month. The gross expenditure for March, 1937, therefore, amounted to $58,964.49. As a result of these increases the appropriation for the year was over expended to the amount of $7,588.15 net. The estimated expenditure was $675,000 and the actual expenditure was $682,588.15.

"The main reason for the increase in expenditure is to be found in an increasing case load. When gross expenditure was at its low point in November, 1934, there were 1,397 allowances in force. At the close of the financial year 1936-37, however, there were 1,567 allowances in force. In other words, during this period of two years and four months there was an increase of 170 in case load. In March, 1936, there were 1,485 mothers receiving allowances; in March, 1937, there were 1.567. Thus there was an increase of 82 during the financial year under review.

"It is difficult to account fully for the extent of the increase in case load. A study of population statistics shows that there has been a fairly steady increase in population in British Columbia over a period of years. Obviously, therefore, growth in population has been an important reason for the increase in case load. It is true, however, that the case load has risen slightly more rapidly than the population . . . and is due largely to the fact that the application of the Act was broadened by amendments that were made at the 1936 spring session of the Legislature. It might have been expected that improving economic conditions would have been reflected more in the Mothers' Pensions case load than was the case. Reflection of these improving conditions has been perceptible but the effect has been offset by other factors. . . .

Among these factors, the report referred to the increase in broken homes as result of the depression and to the action of the Legislature during the fall session of 1936 "in removing from the municipalities all responsibility for mothers' pensions." While this did not take effect until the financial year 1936-37, it caused the municipalities "to remove their restraining hand upon applicants." . . . "There is good reason to believe that when the municipalities were responsible for 50 per cent of the cost of allowances some of them at least discouraged certain persons from applying. Many of these persons were kept on relief instead. This resulted in a saving in expenditure for both the province and municipalities. It had the bad effect, however, of preventing a considerable number of deserving and eligible mothers from obtaining allowances to which they were entitled."

Still another contributing factor was the "policy adopted in 1935 of progressively increasing the amount of allowances paid in respect of children . . . to meet the increasing cost of living."

In this respect the report observes:—

"The raising of rents and the increase in the prices of flour, meats and sugar in particular made it difficult for many pensioners to manage on their old allowances. Hence at the end of the year there was a higher percentage than formerly of mothers in receipt of the maximum allowance permitted by the rates in force."

SUBSTANTIAL REDUCTION IN PUBLIC AID RECIPIENTS

Preliminary Statistics for October, 1937, and Registration Figures for September, 1937

A decrease of 44 per cent from the October, 1936, total, in the number of fully employable persons receiving material aid, is indicated by early approximations from the National Employment Commission's registration figures for October, 1937, it was announced by the Honourable Norman McL. Rogers, Minister of Labour, on December 9.

The Minister stated that in October of this year the number of fully employable persons receiving material aid was approximately 119,000. He explained that this total is made up of all classes of fully employable persons—family heads, individuals, and employable dependents—but excludes farmers (resident farm operators) receiving agricultural material aid.

The total of fully employable persons on aid in October of this year indicates an increase of 3·8 per cent by comparison with September, the previous month.

A drop of approximately 36·35 per cent from October, 1936, in the total number of persons on non-agricultural aid was indicated by figures for October, 1937, the Minister stated. The total number of persons, fully unemployable, partially employable, and fully employable, on non-agricultural aid, together with all dependents of those who are family heads, was approximated to be 464,000. While this was a decrease from October, 1936, it was an increase of 5·6 per cent from September, 1937. The percentage increase from September to October, 1937, appears to have been about the same as the seasonal increase in the same period a year ago, namely, 5·6 per cent.

Dealing with agricultural material aid, the Minister stated that early figures from the registration showed 73,500 farmers (resident farm operators) as receiving this form of assistance for subsistence. These, together with their dependents, accounted for a farm population of 331,000. Of this latter total 296,000 or 89·4 per cent were located in Saskatchewan. The numbers of all classes dependent upon agricultural aid in Saskatchewan (reflecting the heavy increase in the drought districts) showed an increase of 126·9 per cent over October, 1936.

Report on Registration for September, 1937

In addition to the Minister's announcement of preliminary figures for the month of October, 1937, the National Employment Commission released recently its report on registration of relief recipients for the month of September, 1937.

Employables.—Section A of this report—relating only to fully employable persons of both sexes sixteen years of age or over in receipt of material aid and exclusive of unemployables and farm resident operators and their dependants—indicates that the Dominion total of this group on relief in September, 1937, was *115,246, as compared with 143,745 in August, 1937, and with 206,423 in September, 1936.

By provinces, these figures for September, 1937, and September, 1936, respectively, were: Prince Edward Island—89 and 136; Nova Scotia—2,024 and 4,071; New Brunswick—no registration; Quebec——39,103 and 83,156; Ontario—34,734 and 68,650; Manitoba—11,217 and 15,236; Saskatchewan—10,669 and 7,548; Alberta—7,851 and 10,485; British Columbia—9,559 and 17,141.

Unemployables.—Section B related to persons other than those fully employable, comprising those of (*a*) partially employable and of doubtful employability; (*b*) fully unemployable; (*c*) non-worker type dependants—wives, children under sixteen, young people at school; unemployable dependent adults, etc. Excluded, also, are farm resident operators and their dependants.

The statistics for the Section B group indicated a Dominion total for September, 1937, of 334,198. By adding Section A and Section B, the Dominion total of all persons in receipt of material aid (excluding those receiving agricultural aid) was 449,444 in September, 1937, as compared with 514,848 in August, 1937, and with 707,293 in September, 1936. By provinces, the totals for the Section B group during September, 1937, are as follows: Prince Edward Island—663; Nova Scotia—4,866; New Brunswick—no registration; Quebec—101,130; Ontario—115,036; Manitoba—26,951; Saskatchewan—35,734; Alberta—21,449; British Columbia—28,369.

Agricultural Aid.—Section C relates to farm resident operators and their dependants in receipt of agricultural aid. It does not include persons who habitually work at wages for operating farmers or persons who previously operated farms and have abandoned that occupation. Such persons are covered in Section A if reported employable, and in Section B if

*Figures for the province of New Brunswick are not included throughout as that province reported having substituted since April 1, for payment of material aid, works projects to which the Dominion contributed.

reported only partially employable or fully unemployable.

The Dominion total of persons in the Section C group (Agricultural aid) for September, 1937, was 303,270, as compared with 233,720 for August, 1937, and with 248,327 for September, 1936. (The sharp rise indicated in the September, 1937, total can be almost entirely attributed to the heavy increase in the drought areas of Saskatchewan.)

By provinces, the total number of persons in receipt of agricultural aid in September, 1937, was as follows: Prince Edward Island—126; Nova Scotia—none; New Brunswick—no registration; Quebec—3,408; Ontario—5,717; Manitoba—633; Saskatchewan—269,601; Alberta—18,241; British Columbia—5,544.

Totals of All Groups.—A recapitulation of all persons and their dependants (in all three groups) in receipt of material aid on agricultural aid (to which the Dominion contributed) shows a Dominion total of 752,714 for September, 1937, as compared with 748,568 in August, 1937, and with 955,620 in September, 1936. By provinces, these grand totals for September, 1937 and September, 1936, respectively, are as follows: Prince Edward Island—878 and 948; Nova Scotia—6,890 and 13,285; New Brunswick—no registration; Quebec—143,641 and 329,789; Ontario—155,487 and 272,056; Manitoba—38,801 and 52,329; Saskatchewan—316,004 (drought increase) and 165,059; Alberta—47,541 and 57,622; British Columbia—43,472 and 64,532.

RECENT REGULATIONS UNDER PROVINCIAL LEGISLATION

BELOW are summarized regulations recently made under the authority of various provincial statutes. These regulations affect work-people either directly or indirectly, and include orders relating to minimum wages (Alberta and British Columbia), hours of work, licensing, etc.

Alberta Male Minimum Wage Act

Two orders, effective October 15, 1937, have been made by the Alberta Board of Industrial Relations and approved by Order in Council under the Male Minimum Wage Act, 1936. Another Order, No. 4, took effect on November 30, 1937. All three Orders relate to persons employed in saw-mills, box factories, woodworking plants, and in the logging and railway tie industry in rural districts more than ten miles from any city or in towns or villages of less than 500 population.

Order No. 1 which was noted in The LABOUR GAZETTE of October, 1937, fixed minimum rates of wages for all male employees in Alberta except farm workers and domestic servants, workers in industries where wages are fixed under the Industrial Standards Act, casual and seasonal workers hired by other than employers in some industry or trade and, finally, such employees as may be exempted by special order of the Board of Industrial Relations administering the Act. The highest minimum rate fixed in the first Order for persons employed by the week or longer period was 33⅓ cents an hour for workers over 21 with one year's experience or those under 21 with at least two years' experience. Lower rates were established according to both age and experience, and other rates for workers employed otherwise than by the week.

The first of the new orders, Order No. 2, declares exempt from Order No. 1 persons employed in the establishments specified above and all persons engaged in fighting forest and prairie fires.

Order No. 3 fixes minimum rates of wages for the employees in such establishments to whom Order No. 1 is thus declared not to apply. No distinction is made on the ground of age but the rates vary with experience. A minimum of 28 cents an hour must be paid to any employee who has had experience in a similar employment amounting in the aggregate to twelve months. For any other employees, the minimum rate is 25 cents an hour but the number of those paid at this rate in any month in any establishment covered by the Order must not exceed forty per cent of the average number of all the employees employed in the plant.

Part-time workers employed for not more than four consecutive hours must be paid a minimum rate of 30 cents an hour and such employees must be paid for four hours.

Order No. 4 fixes maximum charges that may be made by employers for board and lodging furnished to their employees in these industries. The Order states that the Board of Industrial Relations after investigation, was of the opinion that the charges made for accommodation were excessive and unduly affected the workers' wages. Accordingly, the Board fixed the maximum amount that may be charged to any employee in such employment at 75 cents a day for board and lodging and 25 cents a meal for board only.

Alberta Department of Trade and Industry Act

The Retailers' Code which was put in force under the above Act in April, 1936 (LABOUR GAZETTE, May, 1936) has been amended to prohibit, as an unfair trade practice under the Act, the sale at retail of any merchandise at less than 5 per cent above the recognized wholesale price in the locality.

Alberta Licensing of Trades and Businesses Act

A ministerial Order under this statute requires operators of saw-mills to obtain a licence before December 31, 1937.

An Order in Council of November 2, 1937, declares exempt from the Act the business or profession of an accountant who is a member of the Institute of Chartered Accountants of Alberta.

British Columbia Hours of Work Act

Regulations recently issued provide for temporary exceptions to limits imposed by the Hours of Work Act and the regulations for persons employed in the mercantile industry in order to enable merchants to cope with Christmas business. By regulation, the 8-hours a day limit may be exceeded by three hours on Saturdays during any part of the year in parts of the province outside Vancouver, Victoria and Esquimalt and their environs but the weekly hours may not exceed 48. The special regulations for Christmas permit two additional hours in all parts of the province on December 18, the Saturday before Christmas, but maintain the weekly limit. Two additional hours may also be worked on December 23 and 24. These exceptions apply to all persons employed in the mercantile industry except workers in the mail-order, shipping and delivery departments of retail establishments who may, during the period from December 1 to 31, work such hours as are necessary to cope with seasonal exigencies but no longer. In no case may the weekly hours exceed 48 or the daily hours exceed 10.

British Columbia Minimum Wage Acts

Special orders applying to the Christmas trade in the mercantile industry have also been issued under the Male Minimum Wage Act and the Female Minimum Wage Act. The order applying to women and girls working in shops stipulates that temporary employees hired for the month of December who work 40 hours or more a week must be paid not less than $12.75 a week. Those who work fewer than 40 hours a week may not be paid less than 35 cents an hour.

The order applying to male workers in retail and wholesale stores from December 1 to 31 requires that those over 21 years of age employed for 37½ hours or more in a week shall be paid not less than $15 a week, that any such workers whose week consists of less than 37½ hours shall be paid an hourly rate of 40 cents, provided that in the latter case no employee shall receive for one day less than $1.60. For male employees under 21 years of age working 37½ hours a week, the minimum rate varies with age from $6 a week under 17 years of age to $13 a week at 20 years of age. The hourly rate for persons under 21 working less than 37½ hours varies from 16 cents for a boy under 17 to 35 cents for a male worker 20 years old. No part-time worker in this group under 17 years of age may be paid less than 65 cents for a day's work and none over 20 years of age may be paid less than $1.40.

In effect from November 22, 1937, an order under the Male Minimum Wage Act relates to the "household furniture manufacturing industry." This term is defined to include the manufacture of furniture for kitchens, dining-rooms, living-rooms, bedrooms, halls and of any other articles of household furniture customarily made in a furniture factory.

A minimum rate of 40 cents an hour is fixed for employees over 21 years of age; for those under 21 the hourly rate varies with age; 20 cents for persons under 17, 25 cents for any person 17 years old; 27½ cents for one 18; 30 cents for one 19 years of age and 35 cents for any person 20 years of age and under 21.

The number of male persons receiving less than 40 cents an hour in any establishment within the scope of the Order is limited to 40 per cent of the total number of male workers in the plant.

The Order does not apply to apprentices indentured under the Apprenticeship Act or to persons covered by any other Order of the Board.

Census of Unemployed in U.S.A.

In a radio broadcast on November 14, President F. D. Roosevelt announced to the United States details of the nation-wide census of the unemployed and partly unemployed which commenced on November 16. Outlining the method adopted in taking this voluntary census, the President stated that commencing November 16, the Post Office Department would undertake to deliver to every abode in the United States an Unemployment Report card containing 14 single questions. This card, addressed especially to "those who are unemployed or partly employed, and who are able to work and are seeking work" was to be filled in and returned by midnight November 20 so that "the nation will have real facts upon which to base a sound re-employment program."

LABOUR LEGISLATION IN NEW BRUNSWICK AND ALBERTA (THIRD SESSION)

The New Brunswick Legislature, which was in session from February 11 to April 2, 1937, enacted new laws dealing with the regulation of factories and the inspection of steam boilers, and amended statutes relating to fair wages and forest operations.

Factories

The Factories Act, which will come into force on proclamation, repeals the Factories Act, 1920. The new statute defines a "child" as any person under 15 years of age and prohibits the employment of children in factories. The Act of 1920 did not forbid child labour. The Minister of Health and Labour is given power to prohibit the employment of boys and girls under 18 years of age in occupations deemed dangerous or unwholesome. In the former Act, a similar power was given to the Workmen's Compensation Board with respect to boys under 14 and girls under 18.

As in the 1920 Act, where an accident causes injury or death to a person unlawfully employed by reason of being under age, the employer is liable to the same extent and in the same manner as the Workmen's Compensation Board would be if such person were lawfully employed.

The maximum hours of labour permitted to women and young persons are reduced by the new Act from 60 to 50 a week, the daily limit of 10 remaining the same. This restriction on hours applies now to boys under 18 as well as to girls and women. Further, the maximum hours to which work by young persons and women may be continued in cases of accident or emergency, when the Minister of Health and Labour may grant permission for overtime work, on not more than 36 days in any 12 months may not exceed 12 per day and 68 per week and may not be earlier than 7 a.m. or later than 9 p.m. The former Act limited the working hours of women and young girls in such cases to 13½ a day and 81 a week and prohibited work before 6 a.m. and after 10.30 p.m.

As regards time for meals, there is also a change made in the law. Under the old Act one hour was to be allowed for a noonday meal and an additional hour for an evening meal was to be given between 5 p.m. and 8 p.m. when work was carried on after 7 p.m. The 1937 Act stipulates that no employer may work an employee for more than six hours without allowing a full hour for food and rest except in cases where a factory is being operated by shifts of eight hours or less when an employee may be obliged to work for a full shift without intermission.

The new Act, like the former one, requires the keeping of overtime records and, in addition, requires employers to post in a conspicuous place in the factory a notice signed by the employer and the inspector stating the conditions of the overtime permit.

Sections of the former Act relating to safety, sanitation, posting of notices and inspection are incorporated in the new law without material change but the section of the 1920 Act which forbade women and girls working between the fixed and traversing part of any self-acting machine while the machine was in motion, now applies also to boys under 18.

Under the old Act the penalty for obstructing an inspector in the discharge of his duties or for concealing or attempting to conceal, a child, young girl or woman or prevent their appearance before an inspector, was a fine of $30 and if the offence was committed at night a fine of $100. Under the new statute any person obstructing an inspector or concealing any person or preventing such person's appearance before, or examination by, an inspector is liable to a fine of $25 to $100 and in default of payment to a term of imprisonment not exceeding three months.

Sections of the former law providing for inspection of steam boilers and licensing of stationary engineers have been omitted from the new statute owing to the enactment of a special statute dealing with this subject.

Steam Boilers and Pressure Vessels

An Act respecting Stationary Engineers, Steam Boilers and Pressure Vessels and Inspection thereof will come into force on Proclamation. It provides for the appointment of a board of three competent and independent members, having not less than ten years' experience as stationary steam engineers, to examine candidates for certificates to operate and inspect steam plants, Diesel engines, refrigeration plants or pressure vessels, or to inspect steam boilers.

The Minister of Health and Labour is to administer the Act. The Lieutenant-Governor in Council is authorized to appoint inspectors and to fix their remuneration, but no person may be appointed who is interested in the manufacture or sale of any plant or part thereof. No person who has not a certificate of competency issued under the Act and regulations may operate a steam plant or steam boiler under penalty of $5 to $10 for every day of such operation. Where the owner of a plant or boiler is unable to obtain a certificated operator, however, the Minister may issue a permit for a period not exceeding

fifteen days to a person having sufficient knowledge and experience to operate the plant with safety. Certificates may be granted to holders of certificates from any other province, state or country which accepts certificates issued under the Act, if so authorized by the Lieutenant-Governor in Council. Any person holding a certificate as first or second-class marine engineer may also obtain a certificate under the Act without examination.

The terms "boiler" and "engine" are to be defined by the regulations but the Act does not apply to boilers or engines upon locomotives operated by a railway company or those used for agricultural purposes or in private residences, or to boilers in apartment houses, schools, churches, or other public buildings for hot water heating only or when used for steam heating, carrying a pressure of not more than fifteen pounds.

Fair Wages

The Fair Wage Act, 1936, was amended by the repeal of the section authorizing the Board of Public Utilities Commissioners to fix wages and the substitution of a section providing for a Fair Wage Board. The Board, which is to be appointed by the Lieutenant-Governor in Council, is to consist of five members, including two representatives each of employers and workers with a disinterested chairman. Members are to hold office during pleasure and to serve without remuneration but may be paid a per diem allowance while on official business, in addition to necessary travelling and living expenses. The chairman and one representative each of employers and workers is to constitute a quorum. Expenses of the Board are to be paid out of moneys appropriated by the Legislature for the purpose. The Board was appointed in August, 1937.

Forest Operations

The New Brunswick Forest Operations Commission Act, 1934, was the subject of a number of amendments. The Commission is empowered to establish not only a minimum wage scale for the lumbering industry as formerly, but also an average or minimum and average scale or scales. When an average monthly scale is established it is to be for each month of employment. Such scales are to be established not later than March 15 and are to be effective for one year from April 1. Formerly, wage scales were established before July 1, and in force for a year from the date of establishment. All wage scales heretofore fixed by the Commission are ratified and confirmed but the scale fixed March 12, 1937, is to terminate April 1, 1938, and that fixed July 10, 1936, on May 1, 1937. The Commission is authorized to fix a new scale previous to that date to take effect May 1, 1937, and terminate April 1, 1938.

The sections dealing with investigation of disputes, as to wages, living conditions, or the charges made by an employer for board, or merchandise were amended to provide that the final report and recommendations of the Commission and any minority report upon being filed with the Registrar are to be considered by the Minister, who is to signify in writing to what extent the recommendations are approved by him. The Registrar is to forward to each of the parties to the dispute a copy of the report and recommendations of the Commission, so far as they have been approved by the Minister, together with a notice to any party required under the recommendations to do anything, directing such party to do such thing or things by a certain date fixed by the Minister and to file with the Registrar within five days from that date a full report as to how such things have been done. Failure to carry out the recommendations, as approved, or to file the report is an offence against the Act. Any person committing such offence is liable upon summary conviction to a penalty of $50 to $100 and in addition is to be ordered to pay to his employees the difference found by the Justice or Magistrate between the wages actually paid them and the amount due under the wage scale.

If a minimum wage scale has been fixed and has been violated, each employee is to receive the difference between the amount paid him and what he should have received. If an average scale has been fixed, each employee is to receive a fraction of what he had been paid by the employer, the said fraction having for its numerator the whole amount by which the employer was found in default and for its denominator the whole amount of wages actually paid by such employer. If "a minimum and average scale" has been fixed and if the employer has paid the average wage but has failed to pay any employee the minimum wage, such employee is to be paid the difference between the amount paid and what he should have received at the minimum scale. If the employer has failed to pay the average wage any employee who has received less than such average is to be paid the difference between what he has received and the said average.

An employer contravening the Act is also liable in addition to any other penalty to pay to the province double stumpage on any or all licences held by him and to have his licence or licences cancelled by the Lieutenant-Governor in Council.

The section of the Act was repealed which permitted the employment of inexperienced or physically handicapped employees at a wage below the scale established by the Commission on a written agreement between employer and

employees in form prescribed by the Commission.

The amending Act further provides that, by order of the Lieutenant-Governor in Council, any member of the Executive Council other than the Minister of Lands and Mines may be appointed to administer the Act, that a board other than the Board under the Act may be appointed to carry out its provisions and that a person other than the Deputy Minister of Lands and Mines may be made Registrar.

Alberta

During the third session of the year held by the Alberta Legislature, which opened on September 28th and closed on October 5th, the law relating to the licensing of trades and businesses was revised and amendments were made in the statutes dealing with minimum wages for men and the regulation of coal mines.

The Licensing of Trades and Businesses Act, 1937, repeals an Act of similar title passed in 1936, but continues in force until replaced all orders and regulations issued under its authority. The new statute applies to all trades, businesses, industries, employments, and occupations in the Province to which the powers of the Legislative Assembly extend. The following are excepted: businesses licensed under the Fuel Oil Tax Act, the Government Liquor Control Act, the Theatres Act or the Billiard Room Act; certain professions or callings governed by special Acts; any business subject to the control of the Board of Public Utility Commissioners; farmers; farm labourers; ranchers; unskilled labourers; domestic servants; and any business exempted for the time being by the Lieutenant-Governor in Council.

The Minister of Trade and Industry, who is charged with the administration of the Act, is given authority to designate any business or any class of business as a business to which the Act applies; to provide for the registration and licensing of all persons engaged or employed in a designated business and to prohibit the carrying on of such businesses by an unregistered or unlicensed person. The Minister may cancel or suspend any licence issued under the Act or under the former Licensing of Trades and Businesses Act if he is satisfied that the holder has, on more than one occasion, contravened the provisions of the Licensing of Trades and Businesses Act, 1937, the Department of Trade and Industry Act, the Minimum Wage Act, the Male Minimum Wage Act, the Industrial Standards Act, the Tradesmen's Qualification Act, the Hours of Work Act or the provisions of any code, regulation or order issued under any of them. No licence may be issued by a city, town, village or municipality for the carrying on of a designated business unless the applicant is licensed under the Act.

Minimum Wages for Men

The Male Minimum Wage Act was amended to enable the Board of Industrial Relations to fix different minimum wages for employees in different employments and in different classes or descriptions of employment and to exempt from the operation of the Act or of any order, any group, class or description of employees in any industry, trade, business or occupation. The amending Act is retroactive to November 2, 1936.

Coal Mines

A clause added to the Coal Mines Regulation Act provides that any person employed in or about a coal mine may, by written order, request the owner, agent or manager to deduct from his wages any amount payable by him for sick and accident fund, hospital or union dues. Such order is to be effective only for the amounts specified therein.

Industrial Health in Great Britain

The seventeenth annual report of the Industrial Health Research Board, Medical Research Council (Great Britain) recently received, reviews the scope and nature of its investigations during the period ended June 30, 1937. The investigations were conducted in four main divisions as follows:

(*a*) Environmental conditions—(1) Lighting and vision; (2) noise and deafness; (3) dust; (4) toxic solvents; (5) heating and ventilation.

(*b*) Physiology and Psychology of work.

(*c*) Accidents and Occupational Fitness.

(*d*) Occupational Sickness—(1) Sickness rates of transportation workers; (2) dust and pulmonary disease; (3) sickness absence and labour wastage; (4) hours of work; (5) juvenile employment and ill health.

This report may be obtained from His Majesty's Stationery Office, Adastral House, Kingsway, London, W.C. 2. The price is 9d. net.

REPORT OF ONTARIO DEPARTMENT OF PUBLIC WELFARE

The report of the Department of Public Welfare for Ontario covering the year April 1, 1935, to March 31, 1936, has recently been received. It reviews the activities of the department, included among which are the administration of Old Age Pensions, Mothers' Allowances, Children's Aid, Veterans' Welfare, Industrial Schools, Training Schools, Houses of Refuge and Orphanages.

Old Age Pensions.—According to the report made by the Old Age Pensions Commission, $11,345,331.99 was distributed to old age pensioners during the period reviewed. At March 31, 1936, there were 54,040 pensioners compared with 50,771 at the end of the previous fiscal year. During the year 9,582 new applications were considered by the Commission, 1,071 being refused and 3,540 appeals for increase or reinstatement were dealt with (more recent figures for the province were given in the November issue of the LABOUR GAZETTE, page 1194).

The report states that there is nothing in the number of applications coming before the Commission to indicate that a peak load of pensioners has been reached. It is also pointed out that cancellations due to death or other causes are still approximately twenty-five hundred less than the additions to the pension list. "Because of the numbers out of employment during the last few years," the report states, "we are bound to have those who will have no opportunity to make provision for old age and who of necessity must be assisted by the Old Age Pension."

Mothers' Allowances.—In reporting on the administration of mothers' allowances during the year reviewed it is stated that the outstanding development for the year in the administration of that branch of the department's work was the amendment of the Mothers' Allowance Act making the mother with one child the unit of eligibility.

Commenting on this new development the report states:

"In the original framing of the Act the mother with one child was excluded. She often had a little insurance or found a home for herself and child with her parents, or managed to get along somehow. Observation of the results attendant upon the mother and two children unit disclosed that the work of establishing the family was never completed. After the other members of the family had been provided for there was always the one child left handicapped by inadequate training. The amendment making the protection for the mother with one child removed that element of unfairness. As a result, 2,688 new families were added to the list and 1,417 families whose allowances would have lapsed were retained."

It is pointed out in the report that the Act has been in operation for sixteen years and a "peak load" has not yet been reached there being a fairly regular annual increase.

The total amount paid out by way of allowances from June 1, 1935, to March 31, 1936, amounted to $507,552.64. The cost of administration of the Act was reported as 2·5 per cent of the amount expended in the way of allowances.

Child Welfare.—The results of the first full year's operation of the Children's Aid Societies under the provisions of regulations passed in 1934 are recorded in the report. Thirty-one societies improved their grade standing during the year.

During the year reviewed societies dealt with 23,393 children in their protective work it only being necessary to make 490 permanent wards, 608 temporary wards and 438 extensions of wardship, emphasizing the value of and the increase in the preventive services the Societies are offering. Of the 12,187 children directly under care of the Children's Aid Societies (not in their own homes) 7,982 were wards. For these wards a total of 9,739 visits were reported, or an increase of 4,785 over the previous year. When it is noted that little more than 50 per cent of the wards had been visited once in the year 1933-34, the above figures represent an interesting improvement.

According to the financial report of the Children's Aid Branch for the period, collections for the support of wards have increased from $68,248.04 for the year ending October 31, 1934, to $76,783.13 for the year ending March 31, 1936.

The report also reviews the activities of various industrial and training schools throughout the Province and the Soldiers' Aid Commission.

Accidents reported to the Ontario Workmen's Compensation Board in November, 1937, totalled 6,629 as compared with 5,567 in November, 1936. Fatalities numbered 31 in November, 1937, as compared with 53 in the corresponding month a year previous. Total awards for compensation and medical aid amounted to $542,833.33 for November, 1937, while in November, 1936, the total was $478,118.47.

FOURTH ANNUAL LABOUR CONFERENCE CALLED BY UNITED STATES SECRETARY OF LABOUR

Recommendations Concerning Wages and Hours, Child Labour, and Industrial Home Work

Attended by the Governors of thirty-eight states, the fourth annual Labor Conference, held recently under the auspices of the United States Secretary of Labor, Miss Frances Perkins, unanimously recommended the enactment of federal legislation on wages and hours and asked Congress to include in such a measure, if possible, provisions eliminating the products of child labour and industrial home work from interstate commerce.

The conference, in closing a three-day session, also asked the Secretary of Labor to study the problem of discrimination against older workers, to appoint a national advisory committee and to draft a program of practicable measures designed to break down existing age barriers.

The conference adopted other resolutions urging the states to enact legislation putting supervision of labor standards of apprenticeship in the State Labor Departments; advocating the passage of state laws to eliminate industrial work; favouring ratification of the child labour amendment; co-ordinating all labor laws in the states and in the Federal Government in single departments and setting up a section in the Division of Labor Standards of the United States Department of Labor to assemble and adapt the materials of the Department to meet the needs of workers.

Resolution on Wages and Hours

In the preamble to its resolution on wages and hours legislation, the conference considered that the method of state enactment also had proved inadequate, and that a federal enactment, establishing basic standards in industries where interstate competition is a factor would encourage adoption of supplementary measures by the states.

The conference then declared itself in favour of the enactment of legislation by Congress, having for its purpose the fixing of minimum standards of wages and maximum hours of work of employees in industries whose products enter interstate commerce, including in such measure provisions which would eliminate the products of child labour and industrial home work.

Resolution on Apprenticeship

After pointing out that age is becoming an increasing factor in receiving and retaining employment, and that "the age at which discrimination begins is becoming unreasonably low, thereby creating a serious national, social and economic problem," the conference recommended that the appointment of a national advisory committee to study and "draft a program of practical measures designed to break down existing age barriers."

Resolution on Industrial Home Work

The conference by resolution declared "industrial home work exploits the workers engaged in the practice, undermines the employment standards in competing factories, jeopardizes the health of the workers and the public, and is a means of evading wage, hour, and child labour regulations."

It was indicated a number of states have already enacted legislation which makes possible the prohibition of industrial home work. But it was also pointed out "that already large quantities of home-work materials are being shipped across state lines and one result of this prohibitory type of state legislation may be the further spread of industrial home work into states not yet faced with the problem."

The conference, therefore, went on record "in favour of the elimination of industrial home work, and recommended the rapid enactment of home-work legislation of the prohibitory type by states not already having such laws." Congress was also urged "to enact legislation controlling industrial home work in interstate commerce in the United States, its territories and possessions, which clearly looks toward the ultimate elimination of the practice."

Recommendations on Child Labour

In dealing with the subject of child labour, the conference considered that because of the temporary progress made in 1933-35 in reducing child labour under the N.R.A. codes, "there is grave danger that the public may not realize the seriousness of the child labour problem today and the importance of measures dealing with it." Accordingly, it was emphasized that: (1) child labour has shown an alarming increase in the past 2 years; (2) only ten states have 16-year minimum age laws.

To remedy the weaknesses in many State laws, notably in the protection of children from industrial accidents and in safeguarding

ages, hours and types of work, three steps were regarded by the conference as essential:—

(1) Improvement in State child labor laws.

(2) Sound Federal child-labour legislation.

(3) Ratification of the Child Labor Amendment.

Federal Legislation.—After re-emphasizing its stand of last year regarding the raising of all State child labour laws to approved standards, the conference analysed the situation with respect to federal legislation. The following extracts from the official press release conveys the attitude of the conference toward the problem:—

The Conference urges that Federal legislation contain the following vitally important provisions modelled on the 1916 Federal child labor law; (*a*) a co-operative working arrangement between State and Federal authorities in enforcement; (*b*) a sound work certificate system which serves as the test of legal employment and prevents illegal employment; and (*c*) the prohibition of the shipment of goods from factories in which child labour has been employed within 30 days prior thereto, which makes enforcement possible without proving that a particular child work on a particular article.

These three provisions are in the Black-Connery Bill as reported by the House Committee on Labor and should be retained. The last two were not in the Bill as passed by the Senate. All three are needed for effective enforcement.

The Conference deplores that exemptions from the Black-Connery Bill in its present form would permit children to work in turpentine camps and, if parents rather than children receive the pay, to engage in industrial home work, mining operations, and any other occupations in which the children are not hired directly, and urges their elimination. Another exemption which should be eliminated as contrary to sound policy permits the Children's Bureau to exempt a child of any age if his employment is not deemed to interfere with education, health, or welfare. This is an unprecedently broad grant of power to exempt from child-labour standards. It might be subject to abuse and would add great difficulties to the administration of the act. . . .

The Conference goes on record as strongly opposing the inclusion in a Federal child labour law of provisions based on the prison-made goods method of regulation, forbidding the shipment of child made goods into a State which has forbidden the sale of such goods.

Ratification of the Child Labor Amendment.—The Conference recognizes that any proposed Federal legislation before Congress could eliminate only an estimated 25 per cent of the non-agricultural child labor that exists to-day, and that an amendment to the Constitution is essential to complete the abolition of this evil. The pending child labour amendment requires only eight more ratifications to afford the necessary relief and reliable polls show that the country demands it. The Conference urges that its ratification be carried to completion.

Noting that other amendments to the Constitution dealing with child labour have been proposed in Congress and elsewhere and have obtained some degree of public support, the conference pointed out "the serious weaknesses from which some of these amendments suffer."

LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

Action Taken by the Governing Body of the I.L.O. on Question of Reduction of Hours of Work

At its Eighty-First Session, which was held at Prague, Czechoslovakia, from October 6 to 9, the Governing Body of the International Labour Office decided to place on the agenda of the 1938 Session of the International Labour Conference the question of the generalization of the reduction of hours of work.

In this connection it may be stated that in 1935 the International Labour Conference adopted a general Draft Convention by which the States Members declared themselves in favour of the principle of the 40-hour week, without reduction in the standard of living, and undertook to apply this principle, by separate Conventions, to each industry. The principle was applied in 1935 to the glass bottle industry. In 1936 the Conference adopted a Draft Convention applying it to public works; and in June, 1937, a Draft Convention applying the 40-hour week to the textile industry was adopted. The International Labour Conference at its last session felt that this procedure of application, industry by industry, would require too many years to give satisfactory results to the workers, and accordingly adopted a resolution asking the Governing Body to consider placing on the agenda of the next session of the Conference the question of the generalization of the reduction of hours of work in all economic activities not covered by the Conventions already adopted.

Decided:

"1. That the question of the generalization of the reduction of hours of work shall be placed on the agenda of the 1938 Session;

2. That the question shall be considered as coming up for first discussion, namely that it shall be followed by a consultation of the Governments the results of which will be submitted to the 1939 Session with a view to the preparation of a Draft Convention;

3. That the Director of the International Labour Office shall draw up a grey report which will enable the International Labour

Conference to take a decision as regards all the classes of workers to be included in the consultation of the Governments.

It is understood (1) that the question of the reduction of hours of work in agriculture will be examined by the Governing Body when the report of the Permanent Agricultural Committee, to which the matter has already been referred and which is to meet in February, 1938, is submitted to it; (2) that the question of the reduction of hours of work in the mercantile marine remains a matter for the Joint Maritime Commission."

The Governing Body adopted this resolution by 20 votes to 6, the minority consisting of six employers. The employers' representatives of France and the United States voted with the majority.

After preliminary examination at the sittings of the International Labour Conference which is to be held in June, 1938, the question will come up for final determination at the ensuing annual session of 1939.

Chairman of Governing Body

Mr. F. W. Leggett, of the British Ministry of Labour, has been elected to the chairmanship of the Governing Body of the International Labour Office. In Great Britain, Mr. Leggett is chiefly known for his work as a conciliator in industrial disputes. Since 1920 he has been in charge of the Industrial Relations Department of the Ministry of Labour, which has to do with conciliation and arbitration in industrial disputes, and the set up of joint machinery between employers' organizations and the trade unions. He has been in control since 1930 of the department concerned with voluntary and compulsory machinery for the regulation of wages and working conditions and of statistics. Since 1929, he has been in attendance at the meetings of the Governing Body of the International Labour Office and of the International Labour Conference as one of the British representatives and has taken an active part in the work of this Organization.

Advance Recorded in Canadian Industry

The Dominion Bureau of Statistics in its Bulletin of December 10, 1937, reported that during the first 10 months of the present year, a marked advance took place in business operations, the standing in October being more favourable than at any time since August 1930. The marked betterment of the last three years was due mainly to recovery in the industries which participated so fully in the prosperous period from 1922 to 1929. Those include mining, newsprint, electric power and the automobile and allied industries.

The index of mineral production averaged 15·7 per cent higher in the last ten months than in the same period of one year ago. Zinc exports showed a decline of 3·6 per cent, while copper and nickel exports were up 4·8 per cent and 30·7 per cent, respectively. Gold shipments from Canadian mines recorded a gain of 11·2 per cent, while silver marketings were up 19 per cent. The output of coal was 12,487,794 tons in the first ten months, a gain of 1·8 per cent.

The increase in the index of manufacturing production over the first ten months of 1936 was 10 per cent. The output of newsprint at 3,042,970 tons showed a gain of 16·8 per cent. External demand for Canadian lumber showed expansion, the increase in the export of planks and boards having been 13·3 per cent.

Output of pig iron recorded a gain of 37·2 per cent, while the production of steel ingots was 30·7 per cent greater. The automobile industry participated fully in the recovery of the last three years, the increase over the first ten months of 1936 being 29·5 per cent. Production amounted to 169,774 cars and trucks compared with 131,099 in the same period of last year.

New business obtained by the construction industry showed a considerable percentage gain over the preceding year but the level remained low relative to that of the prosperous period culminating in 1929. The gain in contract awards to $198,577,000 compared with $142,629,000 amounted to 39·2 per cent, while building permits in 58 cities increased 34·9 per cent.

Production of electric power showed gains not only over last year but also over any other year in the history of the industry. Total output in the first ten months of 1937 was 22·7 billion kilowatt hours compared with 20·8 billion in the same period of last year. The gain of 9·1 per cent represents a considerable expansion due to greater industrial and domestic demand.

Carloadings in the first ten months of 1937 numbered 2,196,000 compared with 2,069,000 in the same period of 1936, the gain being 6·2 per cent. The gross operating revenue of the Canadian National Railways and the Canadian Pacific Railway recorded gains of 8·1 per cent and 5·0 per cent, respectively.

Imports showed a gain of 30·8 per cent over the first ten months of 1936, and exports were up 15·2 per cent.

The index of employment in manufacturing operations, being unaffected to any important extent by unemployment relief, is significant of the trend of business. The recall of employees by manufacturing concerns was continued from May 1933 to the first of October, last. The October level was higher than in any other month except May, 1929.

EMPLOYMENT AND UNEMPLOYMENT IN CANADA IN OCTOBER, 1937

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reported on November 1 was 10,463, the employees an their payrolls numbering 1,194,137 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for October was 1,897, having an aggregate membership of 214,858 persons, 8·9 per cent of whom were without employment on November 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from the 64 offices of the Employment Service of Canada showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

(1) The Employment Situation at the beginning of November, 1937, as reported by Employers

According to reports furnished to the Dominion Bureau of Statistics by leading industrial establishments throughout the Dominion, there was a slight slackening in employment at the beginning of November, but the loss was rather smaller than the average decline at November 1 in the experience of the years, 1921-1936. The 10,463 firms making returns reported pay-rolls aggregating 1,194,137, compared with 1,198,058 at October 1, 1937, while the index (1926=100) declined from 125·7 in the preceding month, to 125·2 at the first of November, as compared with 111·0 at November 1, 1936. Since this reduction was less than usual at the time of year, the seasonally-adjusted index showed a slight increase, rising from 119·8 at October 1, 1937, to 120·3 at the beginning of November, when it was higher than in any other month since September, 1929.

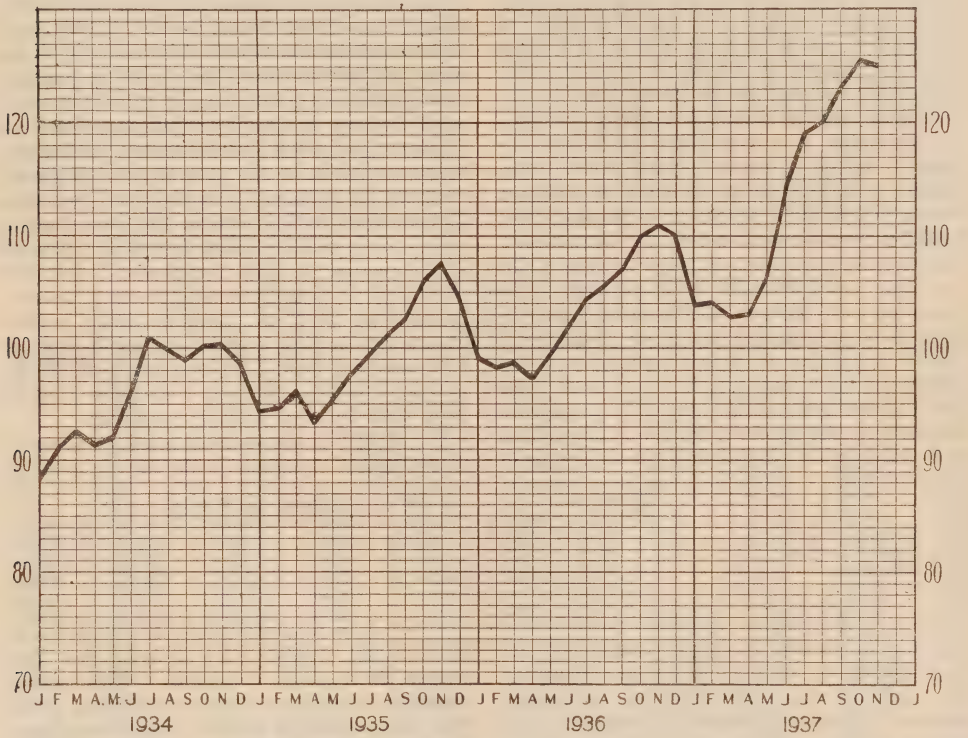
In the seventeen years of the record, the unadjusted indexes at November 1 have been as follows: 1937, 125·2; 1936, 111·0; 1935, 107·7; 1934, 100·2; 1933, 91·3; 1932, 84·7; 1931, 103·0; 1930, 112·9; 1929, 124·6; 1928, 118·9; 1927, 108·8; 1926, 104·0; 1925, 98·3; 1924, 94·1; 1923, 100·0; 1922, 97·0 and 1921, 91·3.

Particularly marked seasonal improvement was noted at the beginning of November in logging in which the number added to the pay-rolls was greater than in any other month for which data are available. There were also important increases in retail trade. On the other hand, mining, communications, transportation, services, construction and manufacturing showed declines that in most cases were of a seasonal character; the losses in construction and manufacturing were most extensive. Within the latter division, food, lumber and leather factories recorded the largest reductions in personnel, while automobile and some other iron and steel plants reported heightened activity.

For November 1 of last year, 10,054 employers had reported staffs aggregating 1,052,985, an increase of 8,600 persons as compared with their October 1, 1936, returns. The additions to the working forces were then most pronounced in logging, but highway construction, mining and trade had also shown improvement.

Employment by Economic Areas

The tendency was seasonally downward in the Maritime and Prairie Provinces and British Columbia; no general change occurred in Ontario, while heightened activity was indicated in Quebec. Employment in four of the five economic areas continued at an exceptionally high level as compared with the other autumns of the record; in the Prairie Provinces, however, the situation as reported by leading employers was not so favourable, the index being below the average for November 1 in the years since 1921.



Maritime Provinces.—There was a further decrease in industrial activity in the Maritime

Provinces, most of the reduction in personnel taking place in road construction; manufacturing, mining and transportation, however, also reported curtailment. Within the factory group, moderate additions to staffs were recorded in food and iron and steel plants, while rolls, or 5,473 fewer than at the beginning of October.

An increase had been indicated at November 1, 1936, by the 706 establishments whose statistics were then tabulated, and who had reported 86,051 persons in their employ, or 1,015

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

lumber mills were seasonally slacker. On the other hand, building and trade showed improvement, and there were large seasonal increases in logging camps. Returns were received from 721 employers in the Maritime Provinces with 91,900 workers on their pay-

more than at October 1, 1936. The index then, however, was nearly eight points lower than at the latest date.

The following shows indexes for each of the Maritimes in the last six months:—

Provinces	Relative Weight	Nov. 1, 1937	Index Numbers (1926=100) Oct. 1. 1937	Sept. 1, 1937	Aug. 1, 1937	July 1, 1937	June 1, 1937
Prince Edward Island ..	1.7	83.0	100.6	87.9	85.2	79.7	82.0
Nova Scotia..	52.2	124.9	132.7	133.5	131.5	138.3	124.3
New Brunswick	46.1	132.8	139.5	140.5	140.8	136.1	121.4
Maritimes.	100.0	127.3	134.9	135.4	134.3	135.8	122.0

Quebec.—Employment in Quebec showed another large advance, chiefly in logging, in which an exceptionally high level of activity was indicated. There were also gains in metallic ore mining, highway construction and trade. On the other hand, manufacturing, shipping, building and railway construction and services registered curtailment; within the

manufacturing group, the leather, lumber, vegetable food, pulp and paper, textile, iron and steel and other divisions showed contractions, in some cases of a seasonal character. The 2,507 co-operating employers enlarged their staffs by 8,876 persons, bringing them to 363,525 at November 1. Employment was decidedly brisker than at November 1, 1936, although a gain of 12,054 workers had then been reported by 2,372 establishments, whose pay-lists included 305,550 men and women.

Ontario.—The situation in Ontario showed little general change at the beginning of November, the 4,639 firms whose data were tabulated having a combined working force of 508,302 persons, or 80 fewer than in the preceding month. On the average, the change at November 1 in the years, 1921-1936, has been a falling-off, which though not large, exceeds that indicated at the latest date. There was a substantial advance in logging, and building construction and trade also showed considerable improvement from October 1. On the other hand, manufacturing, mining, transportation and highway and railway construction and maintenance reported curtailment. Within the group of factory employment, the tobacco and beverage and iron and steel divisions showed heightened activity, the gains in the latter being marked; leather, lumber, food and some other divisions, however, released employees. The losses, which were especially pronounced in canneries, were mainly seasonal in character. Although improvement on the whole had been noted at the beginning of November, 1936, the index was then 17·6 points lower than at the latest date, when it stood at 130·4. For November 1, 1936, statistics had been received from 4,462 employers having 437,780 workers.

Prairie Provinces.—There was a seasonal decrease in employment in the Prairie Provinces as at November 1, 1937. Returns were compiled from 1,492 firms having 135,559 employees, as against 137,391 at October 1. Logging, coal-mining, building, trade and manufacturing afforded more employment, but there were declines in services, transportation and highway and railway construction and maintenance. Most of the gain in manufacturing occurred in food and iron and steel factories. The general curtailment in the Prairies was on a much smaller scale than that recorded at November 1, 1936, when the index was practically the same, standing at 106·0, as compared with 106·2 at the date under review. Statements had been tabulated for November 1 of last year from 1,461 employers of 134,681 men and women; this was a decrease of 3,334 from their October 1, 1936, pay-rolls.

The following shows index numbers for each of the Prairie Provinces in the last six months:

	Relative Weight	Index Numbers (1926=100) Nov. 1,	Oct. 1,	Sept. 1,	Aug. 1,	July 1,	June 1,
Manitoba	44·9	99·3	99·2	100·2	99·0	100·3	97·4
Saskatchewan	22·6	115·9	120·4	128·3	118·8	110·2	103·9
Alberta	32·5	110·5	112·2	111·0	107·1	105·7	99·4
Prairies	100·0	106·2	107·6	109·4	105·6	104·0	99·3

British Columbia.—A further contraction in employment was recorded in British Columbia; the staffs of the 1,104 employers furnishing returns aggregated 94,851, compared with 100,263 in the preceding month. The reduction took place largely in manufacturing, there being important seasonal losses in food factories, together with declines in lumber mills and some other divisions; communications, services, transportation and construction also showed curtailment. On the other hand, retail trade was more active. Employment generally was brisker than at November 1 of last year, when 1,053 establishments had reported a total working force of 88,923 persons, compared with 91,250 in the preceding month; the index then stood at 105·4, as compared with 111·5 at November 1, 1937.

Table 1 gives index numbers by economic areas.

Employment by Cities

Additions to staffs were registered in Toronto, Hamilton, Windsor and Winnipeg, while in Montreal, Quebec City, Ottawa and Vancouver there were reductions. The general situation in each of these centres was better than that indicated by the firms reporting at the beginning of November of 1936, or of any of the last few years.

Montreal.—A reduction in employment occurred in Montreal at November 1, when 1,529 persons were released from the staffs of the 1,417 co-operating firms, who employed 159,897. Trade showed heightened activity, but there were losses in manufacturing, construction, transportation and services. Within the manufacturing group, there was curtailment in textile, iron and steel and leather factories, while electrical appliance and some other plants reported advances. A decrease had also been noted at the same date of last year, but the index was then nearly twelve points lower. Statements had been received for November 1, 1936, from 1,362 establishments providing work for 142,101 men and women.

Quebec City.—Employment showed a further falling-off in Quebec, according to 178 employers of 13,886 persons, compared with 14,334 at October 1. Manufacturing and services indicated most of the contraction, while trade recorded moderate improvement; within the manufacturing group, the largest decrease occurred in leather plants. Employment was brisker than at the beginning of November, 1936, when the 172 co-operating firms had employed 12,924 workers, or 128 fewer than at October 1, 1936.

Toronto.—There was a further small increase in the pay-rolls of 1,555 firms in Toronto, who had 140,300 persons in their employ, a number greater by 138 than in their last report. Most of the expansion took place in trade and construction, while iron and steel plants were also busier. On the other hand, employees were released from other branches of the manufacturing, notably leather, food and non-ferrous metals. A larger gain had been registered at the beginning of November of a year ago, but the index then was nearly seven points lower; the 1,501 employers making returns for November 1, 1936, had reported staffs aggregating 131,249, compared with 130,640 in the preceding month.

Ottawa.—In Ottawa, curtailment was shown in manufacturing, particularly in the lumber division; construction was also slacker, while trade was more active. The changes in the other groups were slight. The 204 establishments furnishing data employed 14,813 persons, as against 15,194 at October 1. Employment was in greater volume than at the same date in 1936, when the trend had also been downward, according to information from 199 firms with 14,336 workers.

Hamilton.—Employment in Hamilton increased substantially at November 1, when the 294 co-operating firms reported 38,512 employees, or 625 more than at the beginning of

Oct. 1	125·7	134·9	127·3	130·4	107·6	117·9
Nov. 1	125·2	127·3	130·5	103·4	106·2	111·5
Relative Weight of Employment by Economic Areas as at Nov. 1, 1937	100·0	7·7	30·4	42·6	11·4	7·9

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated area, to the total number of all employees reported in Canada by the firms making returns at the date under review.

October. Manufacturing was decidedly brisker, chiefly in the food group, and construction and trade also showed improvement. A greater gain had been made at the beginning of November of last year, but the index then was decidedly lower. The November 1, 1936, pay-lists of the 286 co-operating employers had included 32,303 men and women.

Windsor.—Activity in Windsor showed a further large advance; 179 establishments reported 21,019 persons on their staffs, compared with 19,944 at the beginning of October. The improvement took place mainly in the automobile and related industries, while food factories were seasonally slacker. A smaller increase had been indicated at the same date of a year ago, but employment was at a much lower level. Statistics for November 1, 1936, had been tabulated from 175 employers, whose pay-rolls totalled 17,194.

Winnipeg.—Employment slightly increased in Winnipeg, according to 488 firms employing 42,183 workers at the beginning of November, as compared with 42,028 in their last report. Manufacturing was rather brisker, the gains occurring chiefly in food factories; communications, building and trade also showed improvement, while transportation released help. Figues furnished by 482 employers at the first of November of last year showed that they had 40,713 men and women on their pay-lists or 161 fewer than at October 1, 1936; the employment index then stood at 94·9, compared with 98·0 at the date under review.

Vancouver.—The movement was again downward in Vancouver, where the 461 co-operating establishments had 37,215 persons on their staffs, or 988 fewer than in the preceding month. Manfacturing and transportation showed declines, those in the first named occurring largely in lumber and metal-using factories. On the other hand, retail trade afforded more employment. Industrial activity generally was at a higher level than at the beginning of Novem-

Relative Weight of Employment by Cities as at Nov. 1, 1937	13·4	1·2	11·7	1·2	3·2	1·8	3·5	2·1

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated city, to the total number of all employees reported in Canada by the firms making returns at the date under review.

ber of last year, when curtailment had also been reported by the 441 co-operating firms, whose employees had numbered 34,442, a decline of 671 from October 1, 1936.

Index numbers by cities are given in Table 2.

Employment by Industries

Manufacturing.—Employment in manufactures showed a contraction at November 1, following an almost unbroken succession of increases since the opening of the year. The 6,015 co-operating establishments reported 605,134 employees, or 13,336 fewer than at October 1, while the index declined from 121·7 in the preceding month to 119·0 at November 1. This reduction, which was of a seasonal character, involved a proportion of the aggregate pay-roll rather exceeding the average in the experience of the years since 1920. As a result, the seasonally-adjusted index declined, falling from 118·5 at the beginning of October to 117·8 at the date under review; the seasonally-corrected indexes in the last three months have been higher than in any other month for which data are available, with the exception of a few months in 1929.

There were large increases at November 1, 1937, in iron and steel plants, these being of more than ordinary interest in that they were contrary to the usual seasonal trend at the beginning of November in the last sixteen years. The rubber, beverage and electrical apparatus industries also afforded more employment than in the preceding month. On the other hand, animal and vegetable food, lumber, leather, pulp and paper, textile, clay, glass and stone, non-ferrous metal and non-metallic mineral factories released employees, the declines being in many cases of a seasonal nature.

The volume of employment reported in manufacturing at November 1, 1937, was

TABLE III.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES

(AVERAGE CALENDAR YEAR 1926=100)

—	All industries	Manufacturing	Logging	Mining	Communications	Transportation	Construction	Services	Trade

Relative Weight of Employment by Industries as at Nov. 1, 1937	100·0	50·7	7·4	6·2	2·0	8·8	13·1	2·4	9·4

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated industry, to the total number of all employees reported in Canada by the firms making returns at the date under review.

greater than at the same date of last year, or of any other year for which statistics are available, the index being, indeed, slightly higher than at November 1, 1929, the previous high level for the time of year; the reduction then indicated had been on a larger scale than at November 1, 1937. For November 1, 1936, 5,838 manufacturing establishments had reported 546,031 employees, compared with 552,112 in the preceding month.

The unadjusted indexes of factory employment (calculated on the 1926 average as 100), have been as follows at the beginning of November in the years since 1920: 1937, 119·0; 1936, 107·7; 1935, 103·5; 1934, 92·8; 1933, 86·5; 1932, 81·7; 1931, 88·8; 1930, 104·6; 1929, 117·2; 1928, 115·1; 1927, 104·9; 1926, 102·7; 1925, 96·5; 1924, 91·3; 1923, 98·7; 1922, 94·9 and 1921, 87·8.

Animal Products—Edible.—Meat-preserving plants reported greatly increased activity, but seasonal curtailment was indicated in dairies and fish-canneries. Statistics were received from 304 manufacturers, employing 26,738 persons, as compared with 27,820 in the preceding month. This decrease, which took place largely in British Columbia, compared unfavourably with the advance registered at the corresponding date last year, when employment was, however, at a generally lower level.

Leather and Products.—There was a decided loss in personnel in this group at November 1, mainly in boot and shoe factories in Quebec and Ontario. The 300 firms furnishing data reported 22,305 workers, as against 23,888 at October 1. The index was practically the same as at the same date in 1936, although a smaller decline had then been noted.

Lumber and Products.—Further seasonal contractions, involving many more employees than in the autumn of last year, were indicated in the lumber group, where employment was,

[1] The "Relative Weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by the firms making returns on the date under review.

however, more active than in November, 1936. The shrinkage at the date under review took place principally in rough and dressed lumber mills, while vehicle and some other wood-using works showed improvement. A combined working force of 47,744 persons was reported by the 893 co-operating manufacturers, as compared with 51,622 at the beginning of October. The most pronounced decreases were in Quebec and Ontario, but the tendency was generally downward.

Musical Instruments.—A small gain was indicated in musical instrument factories, 35 of which employed 1,621 workers, or 38 more than at October 1. Employment was slightly brisker than at the beginning of November, 1936, when little general change had been recorded.

Plant Products—Edible.—Fruit and vegetable canneries reported very marked seasonal reductions in their pay-rolls, while sugar and syrup, bakery and chocolate and confectionery plants showed small advances. The forces of the 498 co-operating firms aggregated 40,504 persons, or 6,780 fewer than in their last return. Employment declined in Quebec, Ontario and British Columbia, but improvement was noted in the Maritime and Prairie Provinces. The curtailment, on the whole, involved fewer workers than that registered at the corresponding date last year; the index number was then slightly lower than at the date under review.

Pulp and Paper Products.—The trend of employment in this group was downward, according to data from 613 establishments with 69,442 workers on their pay-rolls as compared with 70,276 at the beginning of October. Moderate improvement was recorded in printing and publishing houses, and in the manufacture of paper products, while pulp and paper mills showed a contraction. The largest losses were in Quebec. Additions to staffs had been indicated at the beginning of November a year ago, but the index was then over eight points lower.

Rubber Products.—Employment in rubber goods showed an increase at November 1; data were compiled from 55 firms with 14,670 employees, as against 14,519 in their last report. The level of activity was higher than at November 1, 1936, when a reduction had been noted.

Textile Products.—Cotton and some other textile factories reported moderately heightened employment, but the production of garments, headwear, woollen and silk goods showed a falling-off; 1,112 textile manufacturers reduced their pay-rolls from 112,214 at October 1 to 111,316 at the date under review. The decreases took place chiefly in Quebec. A smaller loss had been shown at the beginning of November last year, but the index was then some seven points lower.

Tobacco, Distilled and Malt Liquours.—A slight falling-off was recorded in tobacco works, while improvement was noted in beverage factories, according to the 187 establishments furnishing statistics in this group, which employed 17,091 persons, as compared with 16,987 at October 1. Most of the gain, on the whole, occurred in Ontario. A larger increase had been indicated at the correspondng date last year, when employment generally was not so brisk.

Chemicals and Allied Products.—In this group, statements were furnished by 205 plants employing 13,200 persons, or 26 more than in their last report. The situation was decidely better than in the autumn of 1936, when a larger gain had been recorded.

Clay, Glass and Stone Products.—Seasonal curtailment was noted in building material plants in most provinces; employment generally was at a higher level than at November 1, 1936, although smaller losses, on the whole, had then taken place. The forces of the 211 employers from whom information was received, had declined since October 1 by 606 person, to 10,472 at the beginning of November, 1937.

Electric Light and Power.—Employment in the production of electric current showed little general change, 16 workers being added to the forces of the 96 co-operating manufacturers, who employed 16,381 persons. A reduction had been indicated in this industry at November 1 of last year, when the index was lower.

Electrical Appliances.—Improvement was reported in electrical apparatus works, 125 of which had 21,803 employees, or 217 more than at October 1, 1937. No general change had been noted at the same date in 1936; employment was then in much smaller volume.

Iron and Steel Products.—Employment in automobile, agricultural implement and some other iron and steel works showed important increases, while the heating appliance and structural iron and steel divisions reported lowered activity. On the whole, the additions to staffs were rather smaller than those indicated at November 1, 1936, but employment continued at a high level as compared with the same date in the last few years. Statements were received from 878 manufacturers whose payrolls aggregated 142,481 persons, as compared with 139,457 at October 1, 1937. Most of the advance took place in Ontario.

Non-ferrous Metal Products.—Data tabulated from 177 firms in the non-ferrous metal group showed that they employed 25,496 workers, or 473 fewer than at October 1. The decrease occurred mainly in the manufacture of lead, tin, zinc and copper products. The situation was decidedly better than at the same date of 1936, when a smaller loss had been indicated.

Non-metallic Mineral Products.—There was a decline in employment in non-metallic mineral product factories, 144 of which released 412 persons, bringing their staffs to 15,045 at the beginning of November. The index was higher than at November 1 of last year, when a reduction had also been noted.

Logging

Statistics were tabulated from 361 firms employing 87,780 men, or 28,049 more than in the preceding month. This advance exceeded that reported at November 1 of any other year for which information is available, being, in fact, greater than in any other month on record, while the index, at 306·3, was also at its maximum for the last seventeen years. There were increases at the date under review in all provinces except British Columbia, where no general change was shown; the largest gains were in Quebec.

Mining

The mining of coal and other non-metallic minerals and of metallic ores afforded less employment, according to statements from 420 mine operators, with 74,427 employees, or 1,319 fewer than in their last report. Of the total employees recorded at the date under review, 25,221 belonged in the coal-mining, 39,135 in the metallic ore and 10,071 in the non-metallic mineral group. A considerable increase had been indicated at the same date in 1936, but the index then was below its level at the time of writing.

Communications

Telephones and telegraphs showed moderate seasonal contractions; the companies and branches making returns had 23,739 workers on their pay-rolls, a loss of 435 since October 1. The index of employment was higher than at November 1, 1936, when a similar falling-off had been noted.

Transportation

Street Railways and Cartage.—There was a reduction in activity in local transportation, according to 245 firms whose staffs aggregated 26,367 at the beginning of November, as compared with 27,260 in the preceding month. The decline occurred chiefly in Ontario and the Prairie Provinces. Employment was at a lower level than at the corresponding date in 1936; the loss then reported had been smaller.

Steam Railways.—Statistics were tabulated from 99 divisional superintendents and other employers in the railway operation group, whose payrolls were reduced by 1,058 persons, to 61,588 at November 1. The greatest contractions were in the Prairie Provinces. Employment was rather brisker than at the beginning of November, 1936, when a larger decline had been indicated.

Shipping and Stevedoring.—A decrease was noted in water transportation, 112 companies employing 16,909 workers, as compared with 18,814 in the preceding month. The curtailment, which was of a seasonal character, was most pronounced in Quebec. An advance had been shown at November 1 last year, when the index stood at 94·8, compared with 93·1 at the date under review.

Construction

Building.—There was a reduction in building, 435 persons being released from the forces of the 805 co-operating contractors, who had 34,972 employees, a number considerably greater than that reported by the firms making returns at the beginning of November, 1936; the trend had then also been unfavourable. There were advances at the date under review in Nova Scotia, Ontario, Manitoba and Alberta, while elsewhere curtailment was indicated.

Highway.—Work on highways and streets decreased in the Maritime Provinces, Ontario, Saskatchewan, Alberta and British Columbia, but there were important advances in Quebec and Manitoba. Statements were tabulated from 427 employers, whose staffs, standing at 95,288, were smaller by 11,188 persons than at October 1, 1937. The index, at 250·8 at the beginning of November, was much higher than at the same date in 1936, although improvement on the whole had then been noted.

Railway.—Seasonal curtailment of railway construction work was generally recorded, the most marked reductions occurring in Ontario and the Prairie Provinces. The forces of the 40 companies and divisional superintendents furnishing returns declined from 29,940 persons at October 1, to 26,479 at the beginning of November. This shrinkage was much less than that registered at the corresponding date in 1936, but the level of employment then was higher.

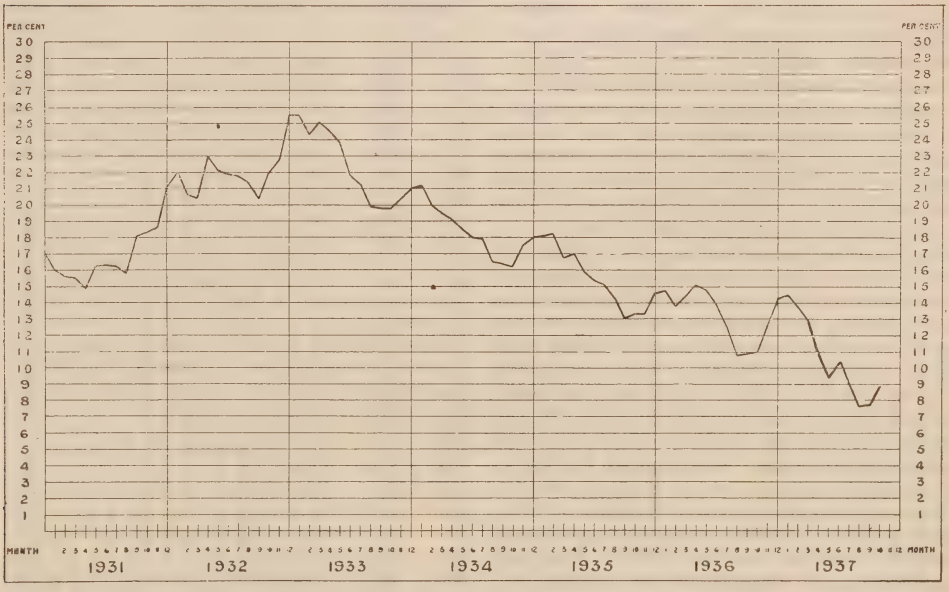
Services

Hotels and restaurants and laundries and dry-cleaning establishments were seasonally quiet, while the fluctuations in other branches of services were slight, according to 484 firms employing 28,807 persons, or 975 fewer than at the beginning of October. The index, at 131·0, was 6·1 points higher than that of November 1, 1936, when smaller declines, on the whole, had been indicated.

Trade

The trend of employment in trade was again seasonally upward, 3,035 workers being added to the forces of the 1,372 retail and wholesale houses furnishing returns, whose staffs aggregated 112,647. The increase took place mainly in the retail division, but wholesale trade also showed improvement. The index stood at 137·0, compared with 132·0 at November 1, 1936, when the reported gains had been on a smaller scale. The general advance this year was greater than the average indicated in the years since 1920, partly on account of the widespread revival in business which has been in evidence during most of 1937, and partly because the date of the enquiry fell at the week-end. Further pronounced expansion in employment may be expected during the next few weeks, in preparation for the Christmas and holiday trade.

TABLES



Index numbers of employment by economic areas, leading cities and industries are given in the accompanying tables. The columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns at the date under review.

(2) Unemployment in Trade Unions at the Close of October, 1937

The term unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are engaged at work other than their own trades or who are idle due to illness are not considered as unemployed. Unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

There was a slight falling off in the volume of work available to local trade union mem-

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

bers at the close of October from the preceding month, mainly seasonal in character, as evident from the reports furnished by 1,897 labour organizations with a total of 214,858 members. Of these, 19,213 or 8·9 per cent were without employment on the last day of the month as contrasted with a percentage of 7·7 in September. More favourable conditions, however, prevailed than in October of last year when 11·0 per cent of idleness was recorded. British Columbia unions reported a drop in activity from September of nearly 4 per cent, the coal mines, partly due to fire losses and consequent unemployment, and the manufacturing industries, affecting conditions in this province adversely. In Ontario and Manitoba employment declined by over 2 per cent, the recessions being rather generally distributed throughout the various trades and industries. The tendency in Quebec and Saskatchewan was also toward lessened activity though the changes were but nominal. In Alberta, however, the situation showed moderate improvement, particularly in the coal mines due to increased orders, and in Nova Scotia and New Brunswick slight gains in employment were noted. Quebec unions indicated a noteworthy rise in activity from October of last year, the building trades and transportation industries being largely contributing factors in this better movement, and in New Brunswick and Nova Scotia lesser gains occurred. Ontario and Saskatchewan members also were afforded a slightly better volume of work. From British Columbia, Alberta and Manitoba curtailment of employment on a small scale was registered.

A separate compilation is made each month of unemployment among local trade union members in the largest city in each province, with the exception of Prince Edward Island. The situation in Halifax, Toronto and Vancouver during October declined by over 2 per cent from September and minor contractions were evident among Saint John, Winnipeg and Regina unions. In Montreal and Edmonton, however, the employment trend was upward from the previous month though the changes were quite slight. When compared with the returns for October of last year, Saint John members were considerably better engaged during the month under survey, and noteworthy expansion was reflected by Montreal unions. In Toronto and Regina, also, the situation tended favourably. Edmonton members, however, showed moderate curtailment in work afforded, and in Halifax, Winnipeg and Vancouver, employment was slightly retarded.

Appearing with this article is a chart which illustrates the trend of unemployment by months from January, 1931, to date. The curve during October showed a slight upward projection from the previous month denoting a less favourable employment movement. Activity, as reflected by the curve, was, however, in somewhat better volume than in October of last year when the level attained was above that of the month reviewed.

Employment in the manufacturing industries during October subsided slightly from the previous month according to the reports received from 540 local unions involving 79,818 members. Of these, 8,161 or a percentage of

10·2 were without work on the last day of the month, as compared with 7·9 per cent in September. Heightened activity on a small scale was apparent from October last year when 11·6 per cent of unemployed members was reported. General labourers were decidedly busier during the month reviewed than in September, and among meat cutters and butchers, bakers and confectioners, metal polishers, cigar and tobacco and jewellery workers, employment advanced slightly. Increased slackness of substantial degree was noted by wood and fur workers. Among paper makers and leather workers also, noteworthy recessions occurred. Textile and carpet and glass workers recorded more moderate curtailment of activity, and the situation was slightly less favourable for iron and steel, brewery, garment, and hat, cap and glove workers, and printing tradesmen. Contrasted with the returns for October of last year much better conditions prevailed for general labourers, glass, hat, cap and glove, and brewery workers during the month reviewed, while lesser improvement was evident among garment, leather and jewellery workers. The tendency for printing tradesmen, iron and steel, textile and carpet, and cigar and tobacco workers was also toward increased employment. Meat cutters and butchers, paper makers, fur and wood workers, however, were much slacker than in October a year ago, and among bakers and confectioners there was but a nominal adverse trend.

The 55 unions of coal miners making returns at the close of October with an aggregate of 18,119 members, showed that 1,162, or 6·4 per cent were without work compared with an unemployment percentage of 7·1 in September and 4·6 in October last year. Alberta miners indicated a considerably better situation in October than in the preceding month which was largely counteracted by the recessions apparent in British Columbia where, owing to losses by fire, a number of members were thrown out of work. In Nova Scotia, however, employment was maintained in approximately the same volume as in September. British Columbia unions, as in the previous comparison, showed a pronounced falling off in avaliable work from October last year, and in Alberta curtailment of much lesser degree though noteworthy was apparent. A slightly higher level of employment, however, was reflected by Nova Scotia members.

The volume of inactivity in the building and construction trades during October exceeded slightly that reported in the preceding month, unemployment standing at 21·4 per cent compared with a percentage of 19·2 in September. The situation, however, showed marked improvement over October, 1936, when 32·6 per cent of the members reported were without employment. Bridge and structural iron workers, painters, decorators and paper hangers, and tile layers, lathers and roofers, showed pronounced increases in slackness from September, and among steam shovelmen, hod carriers and building labourers, a considerable falling off in employment was apparent. Carpenters and joiners reported more moderate recessions and the trend for plumbers and steamfitters was slightly less favourable. Conditions for granite and stone cutters, however, improved substantially from September, and noteworthy gains were recorded by bricklayers, masons and plasterers. Among electrical workers fractional increases in activity were reflected. With the exception of tile layers, lathers and roofers, all tradesmen were afforded a better volume of work during October than in the corresponding month of last year, bridge and structural iron workers, bricklayers, masons and plasterers, granite and stone cutters, and plumbers and steamfitters all showing a decidedly more favourable situation during the month reviewed, while important gains were noted by steam shovelmen, carpenters and joiners, electrical workers, and hod carriers and building labourers. Among painters, decorators and paper hangers the employment movement was upward though the variation from October last year was very slight. The contractions in activity evident among tile layers, lathers and roofers, however, were quite extensive.

The transportation industries at the close of October registered a nominal decline in work afforded when compared with the preceding month, as manifest by reports received from 835 labour organizations embracing a membership of 65,097 persons. Of these, 3,466 were idle at the end of the month, a percentage of 5·3 contrasted with 4·6 per cent of unemployment in September. The trend was, however, toward heightened activity when compared with October, 1936, reports the percentage of idleness for that month standing at 6·1.: Among steam railway employees, whose returns included over 77 per cent of the entire group membership reported, and among teamsters and chauffeurs there was a slight lowering in the volume of work available from September, while conditions for navigation workers and street and electric railway employees were but nominally improved. In contrast with the returns for October, 1936, steam and street and electric railway employees reflected a more favourable movement during the period under survey, while activity was somewhat retarded among navigation workers and teamsters and chauffeurs.

Retail shop clerks' locals reported all their members busy at the close of October as in the preceding month, while in October a year

ago 4·8 per cent of idleness was recorded. Reports were compiled from 2 associations of these workers involving a membership of 837 persons.

Civic employees showed but a fractional drop in activity during October from the previous month according to the 78 associations making returns with 9,808 members. Of these, 154 or 1·6 per cent were without work on the last day of the month contrasted with 0·9 per cent in September. The situation, however, remained unchanged from October of last year when 1·6 per cent of inactivity also was indicated.

Some employment advancement was evident in the miscellaneous group of trades during October from both the preceding month and October of last year, as manifest by reports forwarded by 143 local unions with a membership covering 9,622 persons. Of these, 531 were registered as idle at the end of the month, a percentage of 5·5 as compared with percentages of 7·3 in September and 9·8 in October, 1936. Unclassified workers were considerably better engaged than in September and increases in activity on a rather small scale were reflected by theatre and stage, and hotel and restaurant employees, and stationary engineers and firemen. Among barbers the trend was less favourable though the change from September was very small. Much better conditions prevailed for stationary engineers and firemen during October than in the corresponding month of last year, and improvement of moderate degree was evident among hotel and restaurant employees. Activity for unclassified workers, theatre and stage employees, and barbers, however, showed some slight curtailment.

Fishermen were slacker during October than in the previous month, the 3 unions reporting with an aggregate of 635 members showing an unemployment percentage of 23·6 compared with 16·2 per cent in September. The level of employment was slightly above that of October a year ago when 25·9 per cent of idleness was reported.

Returns were tabulated at the close of October from 2 unions of lumber workers and loggers with a combined membership of 780 persons, 2·4 per cent of whom were unemployed at the end of the month contrasted with percentages of 2·2 in September and 2·3 in October, 1936.

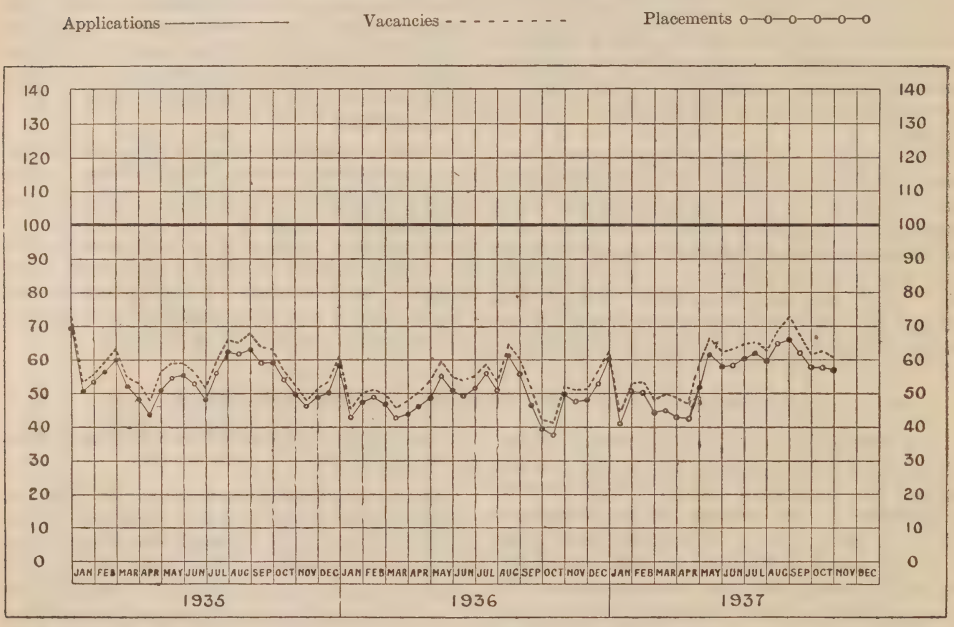
Table I shows by provinces the percentage of members who were on an average unemployed each year from 1919 to 1936 inclusive, and also the percentage of unemployment by provinces for October of each year from 1919 to 1934 inclusive, and for each month from October, 1935, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

(3) Employment Office Reports for October, 1937

The volume of business transacted by the Offices of the Employment Service of Canada during the month of October, 1937, showed a decrease in the average daily placements of 3 per cent when a comparison was made with the report of September, 1937, but an increase of over 21 per cent in comparison with that of October, 1936. Registration of applicants, however, was higher during October than in the previous month, but lower than during the corresponding month a year ago, while vacancies followed the same fluctuations as placements. In comparison with September, 1937, construction and maintenance showed a marked decline in employment, followed by losses of smaller amounts in manufacturing, trade and logging, with farming, services, transportation and mining showing advances, the greatest of which was in the first-named group. When a comparison was made with October, 1936, all groups, except farming and mining, reported increased placements, the most important gains being in logging, services, construction and maintenance and manufacturing. The loss recorded in farming was substantial, but that in mining very small.

The accompanying chart shows the trend of employment since January, 1935, as represented by the ratio of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, compilations being made semi-monthly. It will be noted from the graph that the curves of vacancies and placements in relation to applications showed little variation during the month of October, that of vacancies registering a slight rise during the first half of the month, while placements followed a slightly downward trend throughout the period. At the close of October, however, the levels shown were about 8 points higher than those recorded at the close of the corresponding month a year ago. The ratio of vacancies to each 100 applications was 62·6 during the first half and 60·6 during the second half of October, 1937, in comparison with the ratios of 41·2 and 52·4 during the corresponding periods of 1936. The ratios of placements to each 100 applications during the periods under review were 57·6 and 57·1

as compared with 37·6 and 49·6 during the corresponding month of 1936.



The average number of vacancies reported daily by the employers to the offices of the Service throughout Canada during October, 1937, was 1,614, as compared with 1,662 during the preceding month and with 1,332 in October a year ago.

The average number of applications for employment received daily by the offices during the month under review was 2,623 in comparison with 2,591 in September, 1937, and with 2,823 during October last year.

total of 40,347, while applications for work numbered 65,551, of which 49,093 were from men and 16,458 from women. Reports for September, 1937, showed 41,540 positions available, 64,763 applications made and 38,813 placements effected, while in October, 1936, there were recorded 34,615 vacancies, 73,390 applications for work and 32,266 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment Service of Canada, each year, from January, 1927, to date:

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

The average number of placements made daily by the offices of the Service during October, 1937, was 1,505, of which 1,067 were in regular employment and 438 in work of one week's duration or less, as compared with a total daily average of 1,553 during the preceding month. Placements in October a year ago averaged 1,241 daily, consisting of 904 in regular and 337 in casual employment.

During the month of October, 1937, the offices of the Service referred 39,082 persons to employment and effected a total of 37,605 placements. Of these, the placements in regular employment were 26,673, of which 21,289 were of men and 5,384 of women, while placements in casual work totalled 10,932. The number of vacancies reported by employers was 28,554 for men and 11,793 for women, a

Year	Placements		
	Regular	Casual	Totals
1927	302,723	112,046	414,769
1928	334,604	135,724	470,328
1929	260,747	157,620	398,367
1930	187,872	180,807	368,679
1931	175,632	295,876	471,508
1932	153,771	198,443	352,214
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937 (10 months)	228,837	92,481	321,318

NOVA SCOTIA

Opportunities for employment, as indicated by orders received at Employment Offices in Nova Scotia during October, were nearly 4 per cent less favourable than in the preceding

month, but over 31 per cent better than during the corresponding month of last year. There was a decrease in placements of nearly 2 per cent when compared with September, but an increase of over 32 per cent when compared with October, 1936. The increase in placements over October of last year was made up largely of gains in services, construction and maintenance and manufacturing, although all the groups, except fishing and finance, showed improvement. Industrial divisions in which most of the placements were effected during the month were:—manufacturing, 49; logging, 73; construction and maintenance, 552; and services, 511, of which 366 were of household workers. Regular placements numbered 585 of men and 132 of women.

NEW BRUNSWICK

There was a gain of over 9 per cent in the number of positions offered through Employment Offices in New Brunswick during October when compared with the preceding month, but a loss of nearly 3 per cent in comparison with the corresponding month of last year. Placements were nearly 8 per cent higher than in September, but nearly 3 per cent less than in October, 1936. The number of placements made in each industrial division varied very little when compared with October of last year. Small losses in construction and maintenance, logging and farming were partly offset by gains in trade and services. Placements by industrial divisions included:—manufacturing, 33; construction and maintenance, 57; trade, 33; and services, 716, of which 445 were of household workers. During the month 37 men and 96 women were placed in regular employment.

QUEBEC

Orders received at Employment Offices in the Province of Quebec during October called for over 4 per cent less workers than in the preceding month and over 8 per cent less than during the corresponding month of last year. There was a decrease also in placements of over 6 per cent when compared with September and of over 13 per cent in comparison with October, 1936. The reduction in placements from October of last year was due to a substantial decrease in the highway division of construction and maintenance, in which group large numbers of workers were placed in employment on relief projects during October, 1936. The decline in this group was largely offset by gains in logging, services and manufacturing. The changes in all other groups were small, although the majority showed improvement. Placements by industrial divisions included:—manufacturing, 208; logging, 1,835; farming, 79; construction and maintenance, 1,304; trade, 87 and services, 3,053, of which 2,755 were of household workers. Placements in regular employment numbered 3,560 of men and 1,924 of women.

ONTARIO

During October, positions offered through Employment Offices in Ontario were nearly 16 per cent less than in the preceding month, but over 37 per cent more than during the corresponding month of last year. There was a decrease of over 16 per cent in placements when compared with September, but an increase of nearly 34 per cent in comparison with October, 1936. Bush placements were considerably higher than during October of last year and there were also substantial gains in construction and maintenance, farming, services, manufacturing and transportation. A small increase was reported in trade and the changes in other groups were nominal only. Placements by industrial divisions included:—manufacturing, 881; logging, 3,201; farming, 1,750; transportation, 378; construction and maintenance, 3,764; trade, 352 and services 4,234, of which 2,769 were of household workers. There were 8,671 men and 1,517 women placed in regular employment during the month.

MANITOBA

There was a gain of over 27 per cent in the number of positions offered through Employment Offices in Manitoba during October when compared with the preceding month and of over 23 per cent when compared with the corresponding month of last year. There was an increase also in placements of over 34 per cent in comparison with September and of nearly 39 per cent when compared with October, 1936. A large increase in the highway division of construction and maintenance was mainly responsible for the gain in placements over October of last year for the province as a whole, although there was a considerable increase also in logging. These gains were partly offset by a fairly large decrease in farming and a minor loss in services. The changes in all other groups were nominal only. Industrial divisions in which most of the placements were effected during the month were:—logging, 688; farming, 637; construction and maintenance, 1,684 and services, 737, of which 588 were of household workers. During the month 2,984 men and 310 women were placed in regular employment.

SASKATCHEWAN

Orders received at Employment Offices in Saskatchewan during October called for over 72 per cent more workers than in the preceding month, but over 11 per cent less than during

the corresponding month of last year. There was an increase in placements of 61 per cent in comparison with September, but a decline of over 7 per cent in comparison with October, 1936. When comparing placements by industrial groups during month under review with the corresponding month of last year the only decline of importance was in farming and the most noteworthy increase in construction and maintenance. Of the changes in other groups, none of which was important, the largest were gains in services and manufacturing. Placements by industrial divisions included:—manufacturing, 50; farming, 2,174; construction and mainteniance, 731 and services, 993, of which 872 were of household workers. There were 2,813 men and 844 women placed in regular employment.

ALBERTA

Employment opportunities, as indicated by orders received at Employment Offices in Alberta during October, were over 4 per cent better than in the preceding month and over 20 per cent above the corresponding month of last year. There was an increase also in placements of over 4 per cent when compared with September and of nearly 17 per cent in comparison with October, 1936. Farming, construction and maintenance and logging showed the largest gains in placements over October of last year. These increases, however, were partly offset by declines in services, transportation and mining. In other industrial divisions placements were on about the same level as that of last year. Placements by industrial divisions included:—logging, 135; farming, 1,636; construction and maintenance, 360 and services, 517, of which 367 were of household workers. During the month 2,049 men and 265 women were placed in regular employment.

BRITISH COLUMBIA

Positions offered through Employment Offices in British Columbia during October were over 14 per cent less than in the preceding month, but nearly 52 per cent above the corresponding month of last year. There was a decrease of nearly 14 per cent in placements when compared with September, but an increase of over 52 per cent in comparison with October, 1936. The gain in placements over October of last year was mainly due to a substantial increase in the highway division of construction and maintenance. Of the changes in other groups, none of which were important, the largest were increases in services and manufacturing and declines in logging, trade and farming. Placements by industrial divisions included:—manufacturing, 77; farming, 145; construction and maintenance, 2,326, and services, 872, of which 569 were of household workers. Placements in regular employment numbered 590 of men and 296 of women.

Movement of Labour

During the month of October, 1937, the offices of the Employment Service of Canada made 26,673 placements in regular employment 15,947 of which were of persons for whom the employment located was outside the immediate district of the offices at which they were registered. Of the latter, 1,799 were granted the Employment Service reduced transportation rate, 1,331 going to centres within the same province as the despatching office and 468 to other provinces. The reduced transportation rate, which is 2·5 cents per mile with a minimum fare of $4.00, is granted by the Railway Companies to bona fide applicants at the offices of the Employment Service who may wish to travel to distant employment for which no workers are available locally.

Quebec transfers at the reduced rate during October were 93 in number, 48 provincial and 45 interprovincial. Provincially the Hull office assisted in the despatch of 34 bushmen, and the Montreal office of 14 highway construction labourers, to employment within their respective zones. The movement outside the province was from Hull and entirely of bushmen, 23 of whom were conveyed to Sudbury, 15 to Pembroke and 7 to Timmins. Offices in Ontario issued 1,209 certificates for reduced transportation during October, 1,199 of which were to provincial centres and 10 outside the province. The latter were granted at the Timmins office to railway construction labourers proceeding to Rouyn. Within the province the Port Arthur office transferred 514 bushmen, 28 highway construction workers, 8 building construction workers, and 3 carpenters to various sections of the Port Arthur zone, and one mine handy man to North Bay. From Fort William 178 bush workers and from Sudbury 114 bush workers and one steel sharpener journeyed to employment within their respective zones. The Ottawa office was responsible for the transfer of 38 bushmen to Sudbury, 34 bushmen to Sault Ste. Marie and 14 bushmen to Timmins. The Sault Ste. Marie zone also received 23 bushmen from North Bay, 13 bushmen from Kitchener and 3 bushmen from Niagara Falls. The North Bay zone was the destination of 19 bushmen travelling from Brantford and the Ottawa zone of 3 bushmen shipped from Belleville. From Toronto 51 carpenters were carried to Port Arthur, and from Windsor one mechanical draftsman to St. Catharines. The North Bay office issued certificates to 99 bushmen bound for Timmins and to 4 highway construction workers going to employment within its own zone. In addition during October there was a provincial movement of students under the Dominion-Provincial Youth Training Plan, reduced rate certificates being issued to 50 of these, the majority of whom

were bound for mining districts in Northern Ontario to take a course of training in this industry. In Manitoba 436 persons took advantage of the Employment Service reduced transportation rate during October, 24 of whom were destined to provincial situations and 412 to centres outside the province. All of these received their certificates for transportation at the Winnipeg office. The transfers within the province included 11 miners, 7 bushmen, 2 farm hands, 2 farm domestics, one fisherman and one hotel cook, going to employment in the Winnipeg zone. Of the persons travelling outside the province 410 were bound for the Port Arthur zone, among whom were 401 bushmen, 3 miners, 2 cooks, 2 farm hands, one first-aid man and one domestic, while two painters were transported to Timmins. Workers who availed themselves of reduced rate certificates in Saskatchewan during October numbered 13, all going to provincial centres. Of these, 11 were bushmen and one a cook who received their certificates at the Prince Albert office for transportation within the same zone. The one remaining transfer was to a mine carpenter proceeding from Regina also to employment in the Prince Albert zone. Business transacted by Alberta offices during October involved the issue of 37 reduced rate certificates, 36 of which were provincial. Of these, 35 were granted at the Edmonton office to one miner journeying to Drumheller and to 27 bushworkers, 2 oil refinery workers, one farm hand, one miner, one store clerk, one waitress and one cookee going to various points within the Edmonton zone. From Calgary one farm hand was sent to a point within the same zone. The one worker shipped outside the province was a farm hand conveyed from Edmonton to the Saskatoon zone. By offices in British Columbia 11 transfers at the reduced rate were effected during October, all provincial. The Nelson office despatched one farm hand to Penticton and one blacksmith within its own zone; the Victoria office one diesel engineer to Kamloops, and the Vancouver office one blacksmith to Prince George, 2 mine workers to Kamloops aud 5 miners to employment within the Vancouver zone.

Of the 1,799 persons who profited by the Employment Service reduced transportation rate during October, 625 were carried by the Canadian National Railways, 1,059 by the Canadian Pacific Railway, 110 by the Temiskaming and Northern Ontario Railway and 5 by the Pacific Great Eastern Railway.

(4) Building Permits Issued in Canada During October, 1937

The estimated value of the building authorized by 58 cities during October was $4,384,952; this was a seasonal decrease of $693,930 or 13·7 per cent, as compared with the September total of $5,078,882, but an increase of $122,345 or 2·9 per cent over October, 1936, when the aggregate value was $4,262,607.

The value of the building authorized in the first ten months of the present year was $47,135,318; this was higher than the aggregate of $34,946,019 reported in the period, January-October, 1936, and also exceeded that reported in the first ten months of any other year since 1931. However, the cumulative total in each of these six years has been very much lower than in preceding years for which data are available; while the wholesale prices of building materials have recently advanced, the index for the elapsed months of 1937 was below the average for the years since 1919.

Some 50 cities furnished detailed statistics, showing that they had issued more than 400 permits for dwellings estimated to cost approximately $1,360,000, and about 2,500 permits for other buildings valued at almost $2,828,000. During September, authority was granted for the erection of about 350 dwellings and 1,800 other buildings, the estimated cost being approximately $1,270,000 and $2,560,000, respectively.

Prince Edward Island, Manitoba and Alberta recorded increases in the value of authorized building as compared with September, 1937, the gain of $167,745 or 57·6 per cent in Manitoba being greatest. In the remaining provinces, the largest decreases were those of $333,654, or 28·1 per cent in Quebec, and $349,476 or 13·7 per cent in Ontario.

In comparison with October, 1936, there was improvement in Ontario, Manitoba and British Columbia, Manitoba reporting the most pronounced increases of $163,360 or 55·2 per cent. In this comparison, Quebec recorded the greatest reduction of $161,447 or 15·9 per cent.

Winnipeg showed an increase over the preceding month, and also as compared with the same month of last year. In Toronto, there was a slight improvement over September, 1937, and a similar decline as compared with October, 1936; in Vancouver, on the other hand, there was a decrease in the former, but an increase in the latter comparison, while the Montreal total for October was lower than in either the pre-

ceding month or the same month of last year.

Of the other centres, Quebec, Belleville, Chatham, Galt, London, Niagara Falls, Oshawa, Ottawa, Owen Sound, Peterborough, Stratford, St. Thomas, Sarnia, Sault Ste. Marie, Riverside, Woodstock, Regina, Edmonton, Kamloops and North Vancouver reported increases over September, 1937, and also as compared with October, 1936.

The following table gives the value of the building authorized by 58 cities during October, and in the first ten months of each year since 1920, as well as index numbers for the latter, based upon the total for 1926 as 100. The average index numbers of wholesale prices of building materials in the first ten months of the years since 1920 are also given (average, 1926—100.)

The aggregate for the first ten months was higher by 25·9 per cent than in 1936, and also exceeded that for the same period in each of the four years immediately preceding, but was substantially lower than the average of $102,-805,733 reported in the seventeen years, 1920-1936. The average index number of wholesale prices of building materials, though higher than in any of the years, 1930-1936, was lower than in other years since 1920.

Year	Value of permits issued in October	Value of permits issued in first ten months	Indexes of value of permits issued in first ten months (1926=100)	Average indexes of wholesale prices of building materials in first ten months, (Average 1926=100)

EMPLOYMENT CONDITIONS IN CANADA AT THE END OF NOVEMBER, 1937

Reports of Superintendents of the Employment Service

The employment situation at the end of November was reported by the Superintendents of the Employment Service to be as follows:—

Actual farming operations having been completed in the Maritime Provinces, farmers were engaged in doing odd repairs, cutting firewood, and generally preparing for the winter. Logging was confined to pulpwood chunking and piling, men being sent to camps in Lunenburg, Guysboro and Pictou counties. A few sawmills were still operating, but others had closed for the season. Fishing was only fair, as stormy weather had handicapped the industry in some localities; at Halifax, however, lobster, haddock, halibut and mackerel were plentiful. Coal mines in the New Glasgow area worked 5 and 6 days per week, while those in Cape Breton and vicinity operated from 3 to 6 days. Some idleness was reported in the iron and steel industry, but other manufacturing concerns were busy, those engaged in preparation of goods for the Christmas trade being particularly so. All building construction was progressing rapidly and considerable highway work was also under way. Transportation was brisk and trade good. There was the usual demand for domestics in the women's division.

Quietness prevailed in farming in the province of Quebec, while logging was very active, especially at Quebec, Matane, Hull and Rouyn. Few placements, however, were reported in mining. Manufacturing centres reported as follows: Montreal—all industries, except rubber and textiles, busy; Quebec—some slackness in the boot and shoe factories; Sherbrooke—production in silk and woollen factories exceeded that of last year, with activity normal in the metal industries; Matane—sawmills closed but planing mills fairly well employed; Chicoutimi—paper mills operating at full capacity, but those at Bagotville working only 5 days per week. Throughout the province building construction was progressing favourably; many men also found employment on current relief projects, as well as highway construction, street paving and repairs. Transportation by bus, rail and water was favourable and trade was good. The demand for women domestic workers was heavy and in some districts orders were more numerous than applicants.

The winter demand for farm hands in Ontario had fallen off considerably, thus little difficulty was encountered in obtaining suitable applicants to meet all requirements, where sufficient wages were offered. Toronto stated that a large number of inexperienced men had been placed, temporarily, harvesting Brussels sprouts. Nearly all logging camps were well filled and replacements constituted the chief movement of labour in that line. Timmins, however, reported a call for several hundred skilled men for pulpwood cutting, but this demand was being met by the co-operation of other Ontario and Quebec employment offices. Mining was slow. Industrial conditions were not quite so favourable in some lines, but this was largely accounted for by a reduction in staff for the winter basis of work. Steel, textiles, hosiery, underwear, tapestries, electrical appliances, rubber, furniture and implement plants recorded slackness, while other firms engaged in the preparation of goods for the Christmas trade were very busy. Building construction was not so active, many of the jobs being near completion or already finished, highway construction, also, in many localities had been reduced to the necessary seasonal work and this resulted in lay-offs. Trade showed increased sales. Although the demand for household workers was somewhat less than that recorded during previous weeks, still many calls were received for fully qualified domestics. In Toronto, 36 trainees in household science were making splendid progress at the Dominion-Provincial Youth Training Plan centre, where it was reported that nearly 100 requests from employers for graduates were already on file.

A heavy registration of rural workers to be sent out under the Farm Placement Plan was reported from the Prairie Provinces, nevertheless, placements, on the whole, were somewhat lower, although those made were nearly all under the above mentioned scheme. Many of the farm vacancies, however, which remained available were in outlying districts and thus difficult to fill. Logging was rather quiet, as the larger companies appeared to have their requirements satisfied. A fair demand existed for coal miners, particularly at Drumheller and Edmonton, although colder weather had been the cause of some slackness at Estevan and further increased production in the Turner Valley Oil Fields gave some encouragement for additional activity there. Manufacturing was unchanged. Building construction was quiet, but highway construction continued. A large number of applicants was registered under the Dominion-Provincial Youth Training Plan, and arrangements were practically completed for some

of the youths to start their courses in various trades and industries. Wholesale and retail trade was slightly better. There was a steady demand for female farm help, with many unfilled vacancies on hand. A number of women also found domestic employment in the city; others were placed as students under the Dominion-Provincial Youth Training Plan.

Farming in British Columbia was very quiet. Packing houses, also, were only carrying normal crews of employees, but there was a steady market for all grades and varieties of apples. A further contraction appeared in the movement of labour for the logging camps; some lumber mills were running full time, others, including shingle mills, had closed. The cutting and shipping of Christmas trees continued. Coal mining showed little change; gold mining was brisk, but base metal mines were slack. Building construction was active and in Victoria the best for a number of years; wet weather, however, at Vancouver, had proven detrimental to progress on jobs under way there. Work at the drydocks and shipping yards at Prince Rupert and Victoria was only fair, with shipping and longshore quiet at Prince Rupert and Vancouver, but plentiful at Victoria. Business was a little duller, due to the usual falling off between seasons and before the Christmas rush. More applicants were reported in the women's division than suitable jobs, so that a large number of women were looking for employment for whom little was available. Casual work in the larger cities also was slack.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

THE British *Ministry of Labour Gazette*, November, 1937, summarized the employment situation as follows:—

There was a decline in employment between September 13 and October 18, mainly due to seasonal influences. The industries chiefly affected were the distributive trades, the hotel, boarding house, shipping, road transport and railway services, building and public works contracting, the wool textile, linen, printing and bookbinding, and general engineering industries, and bread, biscuit, etc., manufacture. There was also a slight decline in agriculture, horticulture, etc. On the other hand employment improved in the cotton and tailoring industries, in coal mining, ship building and repairing, and dock and harbour service, and in the fishing industry.

It is estimated that at October 18, 1937, the number of insured persons, aged 16-64, in employment in Great Britain, exclusive of persons within the agricultural scheme, was approximately 11,659,000. This was 47,000 less than at September 13, 1937. On a comparable basis there was an increase of about 464,000 as compared with October 26, 1936.

Among insured workpeople, aged 16-64 (excluding those within the agricultural scheme), the percentage unemployed in Great Britain and Northern Ireland was 10·2 at October 18, 1937, as compared with 9·7 at September 13, 1937. On a comparable basis there was a decrease of 1·4 in the percentage as compared with October 26, 1936. In Great Britain the percentage at October 18, 1937, was 9·9, as compared with 9·5 at September 13, 1937. On a comparable basis there was a decrease of 1·5 as compared with October 26, 1936.

At October 18, 1937, the numbers of persons on the registers of Employment Exchanges in Great Britain were 1,159,613 wholly unemployed, 176,337 temporarily stopped, and 54,299 normally in casual employment, making a total of 1,390,249; this was 51,045 more than at September 13, 1937. On a comparable basis there was a decrease of about 166,420 as compared with October 26, 1936. The total for October 18, 1937, was made up of 1,074,482 men, 36,641 boys, 239,177 women and 39,949 girls.

The total of 1,390,249 persons on the registers at October 18, 1937, included 644,393 persons with claims admitted for insurance benefit (of whom 3,768 had applications authorized for payment of unemployment allowances in supplementation of benefit), 47,139 claimants whose position under the conditions relating to contributions paid and benefit received had not been determined, and 6,107 persons disqualified for short periods from receiving benefit (of whom 3,003 had applications authorized for payment of unemployment allowances). There were also 544,063 persons (not included in any of the foregoing classes) with applications authorized for unemployment allowances, 699 persons with applications for unemployment allowances under consideration, and 147,848 other persons, of whom 31,722 were juveniles under 16 years of age.

In Great Britain and Northern Ireland the total number of persons on the registers of Employment Exchanges at October 18, 1937, was 1,460,080, as compared with 1,403,506 at September 13, 1937. On a comparable basis there was a decrease at October 18, 1937, of 160,850 as compared with October 26, 1936.

United States

Employment in the combined manufacturing and non-manufacturing industries surveyed monthly by the Bureau of Labor Statistics decreased 80,000 in October as compared with September while aggregate weekly pay-rolls for the period covered increased $4,200,000, according to an announcement made by Miss Frances Perkins, Secretary of Labor.

A decline in employment of approximately 145,000 workers in the manufacturing industries of the country, was partially offset by substantial seasonal employment gains in anthracite and bituminous coal and in retail trade. Miss Perkins stated that the reports received by the Bureau of Labor Statistics relate to the period ending nearest October 15 and do not cover employment conditions for the latter part of the month. The official release by the Secretary of Labor continued in part as follows:

The aggregate weekly pay-roll increase was partially due to the fact that the September pay-roll totals were depressed by the observance of Labor Day and certain religious holidays which occurred during the September 15th pay period, Miss Perkins said. More than 40 per cent of the increase in the aggregate pay-roll over the month interval was in the anthracite and bituminous coal mining industries.

A comparison of employment in the combined industries surveyed in October, 1937 with October 1936 shows a gain of over 600,000 workers, and a similar comparison of aggregate weekly pay-rolls shows an increase of nearly $43,400,000 over the year interval.

In addition to the seasonal employment gains in the coal mining industries from September to October seasonal increases were also shown in retail and wholesale trade. Year-round hotels and electric light and power and manufactured gas companies also reported additional workers on their pay-rolls in October. The gains in these industries, however, were not of sufficient size to offset the decline in manufacturing industries and the losses that occurred in 10 non-manufacturing industries (metalliferous mining, quarrying, crude petroleum producing, telephone and telegraph, electric-railroad and motor-bus operation and maintenance, laundries, dyeing and cleaning, brokerage, insurance, and private building construction).

Gains in employment were shown in 31 of the 89 separate manufacturing industries surveyed. The decrease of 1·7 per cent in factory employment indicates a decline of approximately 145,000 workers over the month interval. Decreases in factory employment in October have been shown in 9 of the preceding 18 years. The current decline is attributable to recessions in such industries as blast furnaces, steel works, and rolling mills, foundries and machine shops, electrical machinery, cotton goods, women's clothing, and a number of additional industries in which contraseasonal declines occurred over the month interval. The October 1937 index of factory employment (100·4) fell below the levels shown in the preceding 7 months. It is at the level of November 1929. The October pay-roll index (100·2) is below the levels of the months March to August 1937, and is approximately the same as in December 1929.

The level of employment in the durable goods group of manufacturing industries remained unchanged over the month interval for the pay perioid covered. An increase of approximately 80,000 workers in the automobile industry in October reflected increased activity due to production of the new models, and served to offset the substantial declines shown in other major durable goods industries. Employment in the combined non-durable goods industries decreased 3·4 per cent. Among the non-durable goods industries in which sharp recessions in employment were shown were canning and preserving, beverages, ice cream, cotton goods, men's clothing, silk and rayon goods, and boots and shoes. The employment index for the durable goods group (97·3) is 9·1 per cent above the October, 1936, level (89·2), while the October, 1937, non-durable goods group employment index (103·7) is 1 per cent below the October, 1936, level (104·7). These indexes indicate that for every thousand workers employed in each of these groups in the index base period (1923-25 = 100), 973 workers were employed in October in the durable goods group and 1,037 were employed in the non-durable goods group.

Substantial gains in employment in department, variety, and general merchandizing stores and mail-order houses combined with seasonal expansion in apparel, furniture, wood, coal, and ice, and a number of other lines of retail trade resulted in an estimated increase of 59,000 retail trade workers over the month interval. This increase is somewhat less than the average increase in retail trade employment in October over the preceding 5-year period (76,000). Likewise, the increase in wholesale trade of approximately 16,000 workers and the gain of 4,000 workers in anthracite mining are below the average gains for October during the preceding 5 years, which were 18,600 and 7,100, respectively. The increase of 10,500 workers in bituminous coal mining in October, on the other hand, is well above the average October gain in the 5 preceding years (1,800). In year-round hotels the estimated increase of 3,200 in employment compares

favourably with the preceding 5-year averages. Employment in the electric light and power and manufactured gas industry increased only 1/10 of 1 per cent.

Non-Manufacturing Industries.—Among the non-manufacturing industries reporting declines, the more pronounced losses were in the private building construction and laundry industries. The decrease of 3·3 per cent in employment in the private building construction industry is contraseasonal, gains having been shown from September to October in each of the 5 preceding years for which data are available. Employment in laundries and dyeing and cleaning establishments normally recedes in October and quarrying and non-metallic mines also reduce operations. The loss of 1·4 per cent in metalliferous mines marks the first recession in this industry since November, 1936. Crude petroleum producing companies reported a decrease of 0·7 per cent following a series of gains which began in January of the current year. Telephone and telegraph companies reported 0·5 per cent fewer employees, this decrease also marking the first decline in ten months. Electric-railroad and motor-bus operation companies decreased their forces 0·4 per cent, and brokerage and insurance firms reported of 3·0 per cent and 0·1 per cent, respectively.

Private Building Construction.—Employment in the private building construction industry showed a further decline in October, reports received from 9,064 private building construction contractors employing 110,251 workers in October showing a decrease of 3·3 per cent over the month interval. Aggregate weekly pay-rolls in October, 1937, were 2·8 per cent less than in the preceding month. In four of the five preceding years for which data are available, gains in number of workers have been shown between September and October, the increases ranging from 0·5 per cent to 3·4 per cent. Weekly pay-rolls have also increased in October in 4 of the 5 preceding years, the advances ranging from 0·1 per cent to 5·9 per cent.

The level of employment in October, 1937, compared with October, 1936, shows a gain of 0·4 per cent over the year interval. Pay-rolls show a gain of 14·2 per cent. The reports received from co-operating firms cover only employees engaged in erecting, altering, and repairing private buildings and do not include projects financed by Public Works Administration or Reconstruction Finance Corporation funds or regular appropriations of the Federal, State and local governments.

Public Employment.— Employment on projects of The Works Program totalled 2,063,000 in October. This was an increase of 176,000 compared with September. Of the total 194,000 were working on Federal projects, 1,526,000 on projects operated by the Works Progress Administration, and 343,000 on National Youth Administration work projects and Student Aid. Payrolls for the month exceeded $96,043,000.

Approximately 149,000 workers were employed on P.W.A. construction projects, a decrease of more than 18,000 compared with the preceding month. Of this total 48,000 were working on projects financed by funds provided by the National Industrial Recovery Act and 101,000 on projects financed from funds provided by the Emergency Relief Appropriation Acts of 1935 and 1936. Payroll disbursements on all P.W.A. projects in October totalled $12,610,000 and material orders placed amounted to $22,340,000.

There were more than 361,000 workers in the Civilian Conservation Corps, an increase of 72,000 compared with September. An increase was registered in enrolled workers, while decreases occurred in the number of reserve officers, nurses, educational advisers, and supervisory and technical workers. Of the total number of workers in camps during October 312,000 were enrolled personnel, 6,000 reserve officers, 300 nurses, 2,000 educational advisers, and 41,000 supervisory and technical employees. Payroll disbursements during the month for all classes of workers totalled $15,609,000.

There were 216,000 employees working on construction projects financed by regular Federal appropriations. Compared with the preceding month, this was an increase of 10,000. Payroll disbursements totalling $20,811,000 were $857,000 less than in September. There was an increase in the number of workers on public road projects, but the employees on the payrolls worked a smaller number of hours. Material orders placed during October exceeded $23,035,000.

A total of 187,000 were employed on State road construction in October, 6,000 less than in the preceding month. The gain in the number of workers engaged in new construction was offset by a decrease in the number employed on maintenance. The number of workers on new construction and maintenance was 27,000 and 160,000, respectively. Payrolls for both types of work were approximately $12,135,000.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada and which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the LABOUR GAZETTE for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision is retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the Provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of Federal contracts. With respect to male and female workers under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages scales of the respective provinces.

As respects contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight Hour Day Act, 1930." This Act, however, has now in turn been superseded by The Fair Wages and Hours of Labour Act, 1935, which came into force on May 1, 1936. The clause relating to wages and hours in the last-named statute is in the terms following:—

"All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages;

"The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide, or except in case of emergency as may be approved by the Minister."

The new Act like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by federal grant in the form of contribution, subsidy, loan, advance or guarantee.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules known as fair wages schedules are thereupon included by the Department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment, the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted

in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed, claim therefor may be filed with the Minister of the Department with which the contract has been made and payments of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the Minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Orders in Council, it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts have recently been executed by the Government of Canada:

Department of Mines and Resources

Contract in Group "A" (Construction, Repair, Demolition, etc.)

Erection of fencing along southerly boundary of P.E.I. National Park (15 miles), extending from New London Bay to Tracadie Bay, P.E.I. Name of contractor, Mr. Henry J. Phillips, Charlottetown, P.E.I. Date of contract, October 22, 1937. Amount of contract, approximately $2,064.

The contract stipulated an 8 hour day and a 44 hour week and included the following fair wages schedule:

	Per hour
Axemen	$0 35
Blacksmith	0 50
Carpenters	0 50
Driver	0 30
Driver, horse and cart	0 45
Driver, team and wagon	0 55
Labourers	0 30
Motor truck driver	0 35
Motor truck driver and truck—	
1 and 2 tons	1 35
3 tons	1 85
Painters	0 50
Powdermen	0 40
Watchmen	0 25

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Where, by provincial legislation or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

Department of National Defence

Contracts in Group "A" (Construction, Remodelling, Repair and Demolition)

Contract for the construction of an Ordnance Clothing Store at Wolseley Barracks, London, Ontario. Name of contractors, McEachern Contracting Co., London, Ont. Date of contract, November 19, 1937. Amount of contract, $4,306.

The contract stipulated an 8 hour day and a 44 hour week and included the following fair wages schedule:

	Per hour
Brick and hollow tile layers	$0 90
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45
Carpenters	0 70
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 65
Gas or electric	0 50
Compressor operators—gas or electric	0 50

	Per hour
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Drivers	0 40
Electricians (inside wiremen)	0 80
Labourers	0 40
Motor truck drivers	0 45
Motor truck drivers and truck:	
1 to 2 tons	1 45
3 tons	1 95
4 tons	2 45
5 tons	2 95
Painters and glaziers	0 60
Roofers, felt and gravel	0 45
Rodmen, reinforced steel	0 50
Sheet metal workers	0 70
Watchman	0 35

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

Supply and erection of fencing along the new boundaries of the Royal Canadian Air Force Station, Jericho Beach, Vancouver, B.C. Name of contractors, Lundy Fence Co., Ltd., Toronto, Ont. Date of contract, November 19, 1937. Amount of contract, $4,600.

The contract stipulated an 8 hour day and a 44 hour week and included the following fair wages schedule:

	Per hour
Cement and concrete mixer operator:	
Steam	$0 90
Gasoline	0 60
Electric	0 60
Cement finishers	0 75
Carpenters	0 90
Labourers	0 45
Motor truck drivers	0 50
Motor truck driver and truck:	
1 to 2 tons	1 50
3 tons	2 00
Watchman	0 45

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work.

Construction of repairs and alterations to the Armouries at Indian Head, Sask. Name of contractor, Mr. A. O. Chielens, Indian Head, Sask. Date of contract, November 12, 1937. Amount of contract, $4,378.45.

The contract stipulated an 8 hour day and a 44 hour week and included the following fair wages schedule:

	Per hour
Brick and hollow tile layers	$0 90
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 42½
Carpenters	0 70
Cement finishers	0 55
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 45
Compressor operators (gas or electric)	0 45
Driver, horse and cart	0 50
Driver, team and wagon	0 65
Driver	0 35
Engineers, operating steam:	
Single or double drum	0 65
Three or more drums	0 75
Electricians (inside wiremen)	0 75
Labourers	0 35
Lathers, metal	0 70
Lathers, wood	0 65
Motor truck drivers	0 40
Motor truck driver and truck:	
1 to 2 tons	1 40
3 tons	1 90
4 tons	2 40
5 tons	2 90

The construction of roads, water supply pipe lines, etc., at Three Rivers Harbour, P.Q. Name of contractors, The Page Equipment and Construction Co., Ltd., Three Rivers, P.Q. Date of contract, November 22, 1937. Amount of contract, approximately $28,576.30.

The contract stipulated an 8 hour day and a 44 hour week and included the following fair wages schedule:

	Per hour
Asphalt rakers and finishers	$0 50
Blacksmiths	0 55
Blacksmiths' Helpers	0 40
Carpenters and Joiners	0 55
Cement Finishers	0 50
Cement and Concrete Mixer operators (gas or electric)	0 45
Cement and Concrete Mixer Operators (steam)	0 60
Compressor operators (gas or electric)	0 45
Crane operators (gas or electric)	0 50
Dragline operators (steam)	0 85
Dragline firemen	0 55
Dragline oilers	0 50

	Per hour
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Drill runners	0 45
Electricians (inside wiremen)	0 60
Engineers, operating, steam:	
Single or double drums	0 65
Three or more drums	0 75
Engineers, locomotive crane:	
Steam, gas, electric	0 70
Firemen, stationary	0 40
Hoist operators (gas or electric)	0 45
Labourers	0 35
Machinists	0 55
Millwrights	0 55
Motor truck drivers	0 40
Motor truck driver and truck:	
1 to 2 tons	1 40
3 tons	1 90
4 tons	2 40
5 tons	2 90
Painters and glaziers	0 50
Pipe fitters (surface) temporary work	0 50
Pipe layers, caulkers and solderers	0 45
Plumbers and steamfitters	0 60
Plumbers and steamfitters, helpers (all men assigned to help tradesmen)	0 40
Powdermen	0 45
Riggers, general	0 45
Road grader operators, horsedrawn	0 40
Road grader operators, including team	0 65
Road grader operators, gas	0 45
Rodmen—reinforced steel	0 45
Steam shovel engineers	0 35
Steam shovel cranemen	0 65
Steam shovel firemen	0 55
Shovel operators (gas)	0 85
Tractor operators	0 45
Welders and burners—acetylene or electric	0 55
Watchmen	0 30

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

N.B.—The wages rates specified above are *minimum* rates only and nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 hours per week, such lesser hours shall not be exceeded on this work.

Minimum Wage Scales for U.S. Seamen

The United States Maritime Commission, through its Chairman, Joseph P. Kennedy, announced to-day that it had fixed minimum-wage scales and had promulgated rules as to minimum-manning scales and reasonable working conditions for approximately 10,000 seamen serving as officers and crews of vessels receiving operating differential subsidies. This action was taken pursuant to the Merchant Marine Act, 1936, after the Commission had made an investigation of employment and wage conditions in ocean-going shipping and after holding extensive hearings during July and August in the principal maritime ports and in Washington.

Announcing the action of the Commission, Mr. Kennedy said in part:

"In establishing these minimum-wage scales, minimum-manning scales and reasonable working conditions the Commission disclaims any intention to affect the rights of any operator or its employees to set higher wages, increased manning scales or better working conditions by collective bargaining or otherwise. Spokesmen for the ship operators at the hearings in Washington definitely committed the employers to the position that the minimum standards would not be regarded by them as maximum standards and that the employees' right to bargain collectively for higher wages and better working conditions would not be impaired by the Commission's action."

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received in the department. Such agreements are summarized each month in the LABOUR GAZETTE. In the majority of cases the agreements are signed by both the employers and the employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In each agreement or schedule, the rates of wages for the principal classes of labour are given, with other information of general interest.

Construction: Buildings and Structures

OTTAWA, ONTARIO.—OTTAWA MASTER PLUMBERS ASSOCIATION AND THE UNITED ASSOCIATION OF PLUMBERS AND STEAMFITTERS, LOCAL NO. 71

Agreement to be in effect from September 1, 1937, to April 30, 1939, and thereafter from year to year, subject to notice.

Only union members to be employed, if available.

Hours: 8 per day, Monday to Friday, a 40 hour week, but if required for emergency work and the setting of sleeves and inserts Saturday morning, this may be done at straight time.

Overtime may only be worked with the sanction of the business agent and must be paid at time and one-half until midnight; after midnight and all work on Sundays and eight specified holidays, double time.

Minimum wage rates: from September 1, 1937, to December 31, 1937, 85 cents for journeymen (an increase of 2 cents per hour); from January 1, 1938, to April 30, 1938, 90 cents; from May 1, 1938, to the termination of the agreement, 95 cents. Improvers to be paid two-thirds of journeymen's rate.

Men working out of the city to have fare, board and travelling time paid.

Apprentices to be employed according to the Ontario Apprenticeship Act. One junior mechanic allowed on any job to each branch of the trade, but if more than five journeymen plumbers or five journeymen steamfitters employed, two junior mechanics allowed to six men, three to eleven and four to sixteen.

A joint conference board to be formed for the settlement of disputes. If they cannot settle a dispute, it will be referred to the international office of the union, and no strike or lockout to occur until they have rendered a decision.

TORONTO, ONTARIO.—TERRAZZO CONTRACTORS OF TORONTO AND THE INTERNATIONAL ASSOCIATION OF MARBLE, STONE AND SLATE POLISHERS, RUBBERS AND SAWYERS, TILE AND MARBLE SETTERS' HELPERS AND MARBLE, MOSAIC AND TERRAZZO WORKERS' HELPERS LOCAL NO. 56 (MARBLE AND TILE SETTERS' HELPERS)

Agreement to be in effect from November 8, 1937, to March 1, 1939, and thereafter from year to year, subject to notice.

Only union members or those willing to join the union to be employed.

Hours: 8 per day, five days per week, a 40 hour week. If required in connection with the pouring of concrete, work is permitted on Saturdays. On shift work, night shifts to be paid eight hours' pay for seven hours' work.

Overtime: time and one-half; work on Sundays and eight specified holidays, double time.

Hourly wage rates: from December 1, 1937, to February 28, 1938, men operating machines 57½ cents, labourers (while engaged on buildings) 52½ cents; from March 1, 1938, to March 1, 1939, men operating machines 60 cents, labourers 55 cents.

A joint arbitration committee to be formed for the settlement of disputes.

Workmen's Wages Act, Quebec

The following agreements and amendments to agreements have recently been made obligatory by Orders in Council and are noted in the next article:—

Iron Oxide Miners, Red Mill and district.
Bakers and Bread Distributors, Quebec City.
Shoe Factory Workers, Province of Quebec (Amendment).
Men's and Boys' Clothing Workers, Province of Quebec.
Furniture Workers, Province of Quebec.
Granite, Marble, Stone Cutting, Province of Quebec. (Amendment *re* Ornamental Iron and Bronze Workers, Montreal).
Building Trades, Quebec City (Amendment).
Building Trades, Joliette (Amendment).
Building Trades, Montreal (Amendment).
Clerks, Accountants, Stenographers, Jonquière.
Horseshoers and Wheelwrights, Victoriaville.

Industrial Standards Act of Ontario

The following schedules have recently been made binding by Orders in Council and are noted on page 1389 of this issue:—

Loggers, Massey Zone.
Loggers, Timmins Forestry Division.
Carpenters, Ottawa.
Carpenters, Timmins.
Barbers, Ottawa.
Barbers, Peterborough.
Barbers, Welland.
Barbers, Bracebridge, Gravenhurst and Huntsville.

Industrial Standards Act of Alberta

The following schedules have recently been made binding by Orders in Council and are noted on page 1391 of this issue:—

Bakers, Calgary.
Tile, Marble and Terrazzo Layers, Edmonton.

WORKMEN'S WAGES ACT, QUEBEC

Agreements Recently Made Obligatory and Other Proceedings

AN Act respecting Workmen's Wages which was summarized in the July issue of the LABOUR GAZETTE, page 745, replaces the Collective Labour Agreements Extension Act but stipulates that the agreements and regulations made under the former Act continue in effect for the period for which they were made. Under the Workmen's Wages Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant Governor in Council through the provincial Minister of Labour to have those terms of such agreement which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant Governor in Council may deem in conformity with the spirit of the Act, made obligatory on all employers and employees in the trade, industry, commerce or occupation within the district determined in the agreement. Notice of such application is published, and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable, with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date of publication of the Order in Council in the *Quebec Official Gazette*. The agreement may be amended through the same procedure. A joint committee must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and published in the *Quebec Official Gazette*, the committee is constituted a corporation. A joint committee may require certificates of competency from workers within the scope of the agreement in towns of 5,000 or more, and such by-law must be approved by Order in Council and published in the *Quebec Official Gazette*. Proceedings under the Collective Labour Agreements Extension Act were summarized in the LABOUR GAZETTE from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act are noted in the issues beginning July 1937.

Recent proceedings under this Act include the extension by Orders in Council of agreements affecting iron oxide miners at Red Mill and district, bakers and deliverymen at Quebec, men's and boys' clothing workers throughout the province, the furniture industry also throughout the province, horseshoers and wheelwrights at Victoriaville and district and clerks and accountants at Jonquière and neighbouring towns, all of which are summarized below. Amendments were made effective by Orders in Council to the agreements covering bread deliverymen at Quebec, shoe factory workers and granite, marble and stone quarrying and cutting and ornamental iron shop work throughout the province, building trades at Montreal, Joliette and Quebec. In addition, a correction was made to the Order in Council affecting barbers and hairdressers at Quebec. Requests for the extension of an agreement governing the manufacture of men's and boys' hats and caps throughout the Province and bakers and salesmen at Montreal were published in *The Quebec Official Gazette*, November 20. A request for the extension of an amendment to the agreement for bakers at Montreal was published in the issue of November 13, and to the agreement for granite cutters, etc., and ornamental iron workers in the issue of November 20. An Order in Council published in the issue of November 27 makes the competency card obligatory for barbers and hairdressers at Sherbrooke.

Mining: Non-Metallic Minerals

RED MILL, QUEBEC AND DISTRICT.—A CERTAIN PAINT MANUFACTURER AND LE SYNDICAT NATIONAL CATHOLIQUE DES EMPLOYÉS DES MINES DE RED MILL (THE NATIONAL CATHOLIC UNION OF MINE EMPLOYEES OF RED MILL).

This agreement made obligatory by Order in Council and published in the *Quebec Official Gazette*, November 6, is in effect from November 6, 1937, to November 5, 1938, and thereafter from year to year subject to notice.

The territorial jurisdiction includes Red Mill and the area within a radius of 50 miles of it, in which district are the towns of Pointe du Lac and Almaville and all the mines producing iron oxide (ochres) in the Province.

Hours: 48 per week.

Overtime and work required on Sundays and nine specified holidays, time and one half.

Minimum hourly wage rates: miller 42½ cents, foreman in mine 37½ cents, fireman and all those working inside the establishment 35 cents, employee working in the mine 32½ cents.

Seniority to be considered in making promotions.

Manufacturing: Vegetable Foods

BAKERS AND BREAD DISTRIBUTORS, QUEBEC CITY AND DISTRICT.

An Order in Council, approved October 29 and published in the *Quebec Official Gazette*, November 6, amends the previous Orders in Council governing bread distributors (LABOUR GAZETTE, July, 1935, page 629, February, 1936, page 199, April, page 371 and May, 1936, page 461) by providing that the agreement be enforced by the joint committee charged with the enforcement of the bakers agreement in the same district.

Another Order in Council, approved November 12 and published in the *Quebec Official Gazette*, November 20, makes obligatory the terms of a new agreement between certain bakery proprietors of Quebec, and neighbouring towns and l'Union Nationale Catholique No. 1 des Compagnons Boulangers et Livreurs de Pain, Inc. (The Catholic National Union of Journeymen Bakers and Bread Delivery Men) which cancels the previous agreements and is to be in effect from November 20, 1937, to November 1, 1938, and thereafter from year to year subject to notice. The agreement includes male workers only.

The territorial jurisdiction comprises the Quebec district, that is the city and county of Quebec, the city and county of Levis, the counties of Lotbinière, Dorchester, l'Islet, Beauce, Frontenac, Bellechasse, Montmagny, Kamouraska, Témiscouta, Rivière du Loup, Rimouski, Matane, Matapedia and Montmorency and bakeries outside this district who sell all or part of their production in the district.

Hours in the bakery: 65 per week in the cities of Quebec and Levis and within 15 miles of them, 72 hours in the rest of the district.

Overtime for bakery employees: time and one half. No work on ten holidays in the two cities or seven in the rest of the district, and no deduction from weekly minimum wage on account of such holidays.

Minimum weekly wage rates for bakeries of bread in Quebec City and Levis and within 15 miles of their limits: in bakeries, foremen $23, journeymen $20, when 30 bags of flour per man per week are baked; proportionate minimum wage rates are set for bakeries in which the number of bags of flour per man per week is greater or less than 30. (These minimum rates are $1 per week higher than in the previous agreement.) Temporary bakers, $3.75 per day. Minimum weekly wage rates for bakers of cakes and pastries: first man $21, second man $19, third man $16, fourth man $9. In the remainder of the district, that is outside the city of Quebec and Levis and within 15 miles of their limits, the minimum wage rates may be reduced by 15 per cent.

Apprentice bakers to be paid a minimum of $7 per week in the city of Quebec and Levis, and within 15 miles of their limits and 15 per cent less in the rest of the district unless the joint committee grant a permit to an apprentice to work for less.

Minimum weekly wages for salesmen and deliverymen: salesman $16 ($25 if he furnishes his vehicle); salesman-helper $7; delivery man $14 ($25 if he furnishes his vehicle).

A salesman, helper or deliveryman not to be responsible for credit allowed to his customers except if forbidden in writing by the employer.

Uniforms if required for salesmen to be supplied by the employer.

Employers boarding their employees may deduct $1 per week per room for lodging and 20 cents per meal. There is, however, no obligation for the employees to accept board or room from the employer.

The certificate of competency is required of all employees, to be secured either from the joint committee or the union.

Manufacturing: Boots and Shoes

SHOE FACTORY WORKERS, PROVINCE OF QUEBEC.—An Order in Council approved October 22, and published in *The Quebec Official Gazette*, November 6, provides that since a new agreement in the shoe manufacturing industry was made obligatory (LABOUR GAZETTE, October, page 1156), the previous Orders in Council in connection with the previous agreement and amendments to it are therefore cancelled.

Manufacturing: Textiles and Clothing

MEN'S AND BOYS' CLOTHING WORKERS, PROVINCE OF QUEBEC.—An Order in Council, approved November 12 and published in the *Quebec Official Gazette*, November 20, makes obligatory the terms of a new agreement between The Associated Clothing Manufacturers of the Province of Quebec, Inc., The Montreal Clothing Contractors Association, Inc., The Quebec Association of Garment Manufacturers, Inc. and certain other manufacturers, and the Amalgamated Clothing Workers of America, the Montreal Joint Board of the Amalgamated Clothing Workers of America and La Fédération Nationale du Vêtement, Inc. (The National Federation of Clothing Workers, Inc.).

The previous agreement is cancelled and the new agreement is to be in effect from November 20, 1937, to July 1, 1938, and thereafter from year to year, subject to one of the party giving four months' notice prior to July 1 of any year, to the other parties, to the Minister of Labour and the joint committee.

The industrial jurisdiction includes the manufacture (whether in factories or elsewhere) of all men's, boys', youths', juveniles' and infants' clothing and girls' clothing up to the age of 14 years, with the exception of shirts, overalls, baseball or other similar athletic uniforms, rubberized and leather goods, windbreakers, mackinaw coats, cotton uniforms (duck, drill, etc.), and other cotton garments, and with the additional exception of merchant tailors who do custom tailoring in which not more than five persons complete all operations on a garment.

The terms of this agreement are similar to the one previously in effect, with certain exceptions.

As in the previous agreement the province is divided into three zones: zone I, the Island of Montreal and within 10 miles of it; zone II, the territory within 75 miles of zone I; zone III, the entire province except zones I and II.

Hours: The regular weekly hours are unchanged at 44 in zone I and 48 hours in zones II and III.

Overtime also is unchanged, payment at the rate of time and one half being required in zone I and time and one quarter in zones II and III.

"No clothing, in whole or in part under this agreement shall be given to or taken out by any employee either directly or indirectly to be manufactured or worked upon anywhere outside of the premises of the employer."

Except for just cause, no employer to discharge or suspend a qualified worker or apprentice to replace him with a worker of lower standing.

It is forbidden any employer as a condition of employment or continuation of employment to sell an employee any interest in the employer's business.

The division of the industry into three parts, the coats, vests and pants section, the odd pants section and the infants and children's section and the definition of each of these sections together with the type of operations included in each class is practically the same as in the last amendment to the previous agreement as summarized in the LABOUR GAZETTE, January, 1937, pages 104 and 105.

Minimum wage rates are also practically the same as those in force from January 1, 1937, and noted in the same place with these exceptions: The minimum hourly wage rate for the lowest paid classes in the industry, that is of basting pullers in the coats, vests and pants departments and cleaners and button hole tackers in their first six months in the odd pants department, is increased from 12½ to 14 cents per hour in zone II and from 11½ to 13 cents per hour in zone III. The rate for fitter, underpresser, buttonhole maker, etc. in the odd pants department (the sixth of the seven classes of workers) is increased from 33 to 35 cents per hour in zone I.

Piece work rates may be fixed instead of hourly rates, provided that such rates do not yield less than the hourly rates established in this agreement. Employers paying higher rates may not reduce them. The joint committee may revise piece work rates whenever it deems they are not sufficient to yield the equivalent to the hourly rates.

The joint committee may set a special rate for an employee who produces less than the average skilled worker in his class.

Apprentices limited to 7½ per cent of total employees in a factory in zone I, 20 per cent in zone II and 25 per cent in zone III. (Basting pullers not included in these percentages). In zones II and III, if unable to secure qualified workers, the joint committee may grant a special permit for an additional 10 per cent of the employees being apprentices.

The joint committee as already existing to be continued under this new agreement. In this committee the number of members from zone I shall equal the number from zones II and III together. Two sub-committees may be established by the joint committee, one for zones I and II together and the second for zone III.

Any strike or lockout having for its object a change in conditions of the present decree is prohibited.

Manufacturing: Wood Products

FURNITURE WORKERS, PROVINCE OF QUEBEC —An Order in Council, approved November 26 and published in the *Quebec Official Gazette,* November 27, makes obligatory the terms of a new agreement in this industry, between the manufacturers of furniture of the Province of Quebec representing a number of firms and La Fédération Catholique Nationale du Meuble (The National Catholic Federation of Furniture Workers), L'Association des Ouvriers du Meuble de Beauharnois (The Furniture Workers' Association of Beauharnois).

The Order in Council is to be in effect from November 27, 1937, to August 31, 1938, and thereafter from year to year, subject to notice.

The industrial jurisdiction includes both male and female workers employed in the manufacture of: dining room furniture; bed room furniture; living room furniture; kitchen and breakfast room furniture; office furniture; school furniture; restaurant and bar tavern room furniture; lawn and porch chairs and tables of wood; coat trees, etc.

Hours: 55 per week except for shippers, maintenance and repair men.

Overtime: time and one-quarter except for shippers, maintenance and repair men.

The province is divided into four zones: zone I is the Island of Montreal and the area within 15 miles of its limits (until the end of 1937, Island of Montreal only); zone II, municipalities of a population of 3,000 or more in the rest of the province except in the county of Chicoutimi, and establishments with more than 50 workers in any part of the province outside of zone I; zone III is the rest of the province; zone IV covers the manufacture of summer furniture, made of wood assembled by nuts and bolts and also using textiles in its manufacture, in any part of the Province.

Minimum hourly wages for all classes including firemen, shippers and maintenance and repair men: a new wage scale was made effective from November 27 to December 31, 1937, which provides, as compared with the previous agreement, for lower minimum rates for 20 per cent of the employees and higher minimum rates for 80 per cent of the employees. From January 1, 1938, further increases in wages are to be made and from that date the following minimum wage scale will prevail.

ZONE I	Cents per hour
6 per cent of employees.. ..	18
7 per cent of employees.. ..	22
7 per cent of employees.. ..	28
60 per cent of employees.. ..	35
10 per cent of employees.. ..	40
10 per cent of employees.. ..	45

ZONE II	Cents per hour
6 per cent of employees.. ..	15
7 per cent of employees.. ..	20
7 per cent of employees.. ..	25
60 per cent of employees.. ..	30
10 per cent of employees.. ..	35
10 per cent of employees.. ..	40

ZONE III AND IV	Cents per hour
6 per cent of employees.. ..	12
7 per cent of employees.. ..	16
7 per cent of employees.. ..	20
60 per cent of employees.. ..	25
10 per cent of employees.. ..	30
10 per cent of employees.. ..	36

Female workers are included in the general schedule given above but until June 1, 1938, they are to be paid the following minimum rates: in the Island of Montreal and within 10 miles of it, 14½ cents per hour for beginners, 19 cents after one year's experience and 23 cents after two years' experience at the trade; in the rest of the Province, 2 cents per hour less. From June 1, 1938, wages for female workers to be the same as for male workers for the same work.

Piece rates to be sufficiently high to enable workers to secure the minimum rates.

The joint committee may establish lower minimum rates for handicapped employees, but the number of such employees may not exceed 5 per cent of the total number of employees in a plant.

Manufacturing: Metal Products

ORNAMENTAL IRON AND BRONZE SHOPMEN, QUEBEC CITY AND DISTRICT

These workers are now included in the agreement covering building trades in the Quebec district as noted below under "Construction: Buildings and Structures."

ORNAMENTAL IRON AND BRONZE SHOPMEN, MONTREAL (GRANITE, MARBLE, AND STONE CUTTING INDUSTRY, PROVINCE OF QUEBEC)

An Order in Council, approved November 12, and published in the *Quebec Official Gazette,* November 20, amended the agreement in the granite marble and stone industry throughout the Province (LABOUR GAZETTE, June, page 694 and September, page 1034) by adding a section governing the ornamental bronze and iron industry (shopmen) in the Island of Montreal, Ile Bizard and fifteen neighbouring counties. The ornamental bronze and iron industry in this district was formerly under a separate agreement (LABOUR GAZETTE, August, page 921) and no change was made in the conditions by this new Order in Council.

Manufacturing: Non-Metallic Minerals

GRANITE, MARBLE AND STONE INDUSTRY, PROVINCE OF QUEBEC

As noted above under "manufacturing: metal products," the ornamental bronze and iron shopmen in the Montreal district have now been incorporated into the granite, marble and stone industry agreement.

Construction: Buildings and Structures

BUILDING TRADES, QUEBEC CITY AND DISTRICT

An Order in Council, approved November 12 and published in the *Quebec Official Gazette,* November 20, amends the previous Order in Council for these trades (LABOUR GAZETTE, June, page 692).

The county of Rivière du Loup is added to the territorial jurisdiction.

Plumbers and steamfitters, electricians and tinsmith-roofers who are contractors must be paid a minimum of 70 cents per hour for their personal services.

One apprentice allowed for each five journeymen plumbers and steamfitters and each five journeymen electricians, but an employer is entitled to one apprentice in each shop and on each job even if less than five journeymen employed.

Additional parties to the agreement are certain proprietors of machine shops for ornamental iron and bronze work and Le Syndicat des Travailleurs dans l'industrie du Fer et du Bronze Ornemental de Québec (The union of Workers of the Ornamental Iron and Bronze Industry of Quebec.)

The industrial jurisdiction is extended to include all operations of the ornamental iron trade whether on the job or in a workshop. (This trade was formerly under a separate agreement which was summarized in the LABOUR GAZETTE, February, 1935, and January, 1936. No change in wage rates or hours is made by this amendment.)

Hours for ornamental iron and bronze workers are 9 per day, 5 on Saturdays, a 50-hour week.

Overtime for ornamental iron and bronze workers: time and one-half until midnight; thereafter and all work on legal holidays, double time.

Minimum hourly wage rates for ornamental iron and bronze workers: in zone I (City of Quebec and Lévis and within 10 miles of their limits) and zone II (Thetford Mines), mechanics 50 cents, adjusters 40 cents, helpers 30 cents; in zone III (the rest of the district) mechanics 42½ cents, adjusters 34 cents, helpers 25½ cents.

Minimum hourly wages for apprentice ornamental iron and bronze workers: first year 12 cents, second year 18 cents, third year 25 cents, fourth year 32 cents.

BUILDING TRADES, JOLIETTE.—An Order in Council, approved January 15 and published in the *Quebec Official Gazette,* November 6, amends the previous Order in Council for this industry (LABOUR GAZETTE, June, 1936, page 547) by extending the territorial jurisdiction to include the county of Berthier.

BUILDING TRADES, MONTREAL.—An Order in Council, approved November 12, and published in the *Quebec Official Gazette,* November 20, amends the previous Order in Council for this industry, (LABOUR GAZETTE, June, page 693, and September, page 1034) by adding the following workers with the minimum rates payable for all such work in zone I (Island of Montreal) and for work on building operations of a gross value of $20,000 or more in zone II (Ile Bizard, counties of Assomption, Terrebonne, Laval, Deux Montagnes, Argenteuil, Soulanges, Beauharnois, Châteauguay, Laprairie, Chambly, Verchères, Saint John and Iberville).

Minimum hourly wage rates: men working on machines for the polishing of terrazzo (dry) 55 cents; men working on machines for the polishing of terrazzo (wet) 50 cents. On all buliding operations of a gross value of less than $20,000 in zone II, 20 per cent below these minimum rates may be paid.

Trade

CLERKS, ACCOUNTANTS, STENOGRAPHERS, ETC. Jonquière, Kenogami, Arvida and St. Joseph d'Alma.—An Order in Council, approved November 12, and published in the *Quebec Official Gazette,* November 20, with correction in the issue of November 27, makes obligatory an agreement between certain retail stores, financial and industrial establishments, municipal and school corporations and Le Syndicat National Catholique des Commis et Comptables de Jonquières (The National Catholic Union of Clerks and Accountants of Jonquière) and Le Syndicat National Catholique des Commis et Comptables de Saint-Joseph d'Alma (The National Catholic Union of Clerks and Accountants of St. Joseph d'Alma).

The agreement to be in effect from the date of its approval by the Lieutenant Governor in Council (November 12, 1937).

The jurisdiction includes any person, association or financial corporation, industrial or commercial, or of any other kind, employing one or more employees of the classes mentioned in the wage scale, except banks and the aluminum industry. (Employees of the aluminum industry are covered by another agreement as summarized in the LABOUR GAZETTE, November, page 1272).

Hours: in financial and industrial establishments, 44 per week, without any daily limitation of hours; in commercial establishments (retail) 63 per week, without any daily limitation of hours, except that in Jonquière and Kenogami, closing hours to be at 6 p.m. from Monday to Friday inclusive and 10 p.m. on Saturdays and the eve of holidays; in commercial establishments other than retail, 44 hours per week; in restaurants hours to be those required by the business.

Overtime: time and one-quarter. No work on Sundays, religious or civil holidays. No work on legal and civic holidays for employees of financial or industrial establishments or commercial establishments other than retail. Work on Sundays in restaurants to be paid at regular rate.

Travelling and boarding expenses of employees required to work outside the locality where they live to be paid by the employer.

Minimum wages per week: In financial corporations or institutions, industrial societies or companies, municipal or school corporations: manager, chief accountant, treasurer, chief clerk $45, assistants to these $37.50; accountant, cashiers, $35, book-keepers, tax collectors, $30; secretary treasurer of rural municipality $20; clerks, stenographers, typists $10 during first year, $13 during second year, $18 third year, $22 fourth year, $25 after four years. In retail commercial establishments, manager $35; accountant, book-keepers, cashiers, receivers $25; retail clerks (male, over 16 years) $7 during first year, $10 second year, $15 third year, $18 fourth year, $20 fifth year, $22 sixth year, $30 after 10 years, extra workers 35 cents per hour; delivery clerk soliciting home orders $18 per week; deliverers $7 during first year, $10 second year, $15 third year, $18 fourth year; solicitors on a commission basis, $7 during first six months, $12 second six months, $15 second year, $20 after two years. In commercial establishments other than retail, managers, $45, assistant manager $37.50, accountant $35, assistant accountant and cashier $30; clerks, book-keepers, stenographers and typists, $7 first year, $10 second year, $15 third year, $18 fourth year, $22 after four years.

Finance

CLERKS, ACCOUNTANTS AND STENOGRAPHERS, JONQUIÈRE, KENOGAMI, ARVIDA AND ST. JOSEPH D'ALMA.—These workers employed in financial institutions are included in the agreement summarized above under "Trade."

Service: Public Administration

CLERKS, ACCOUNTANTS AND STENOGRAPHERS, JONQUIÈRE, KENOGAMI ARVIDA AND ST. JOSEPH D'ALMA.—These workers employed by municipal and school corporations are included in the agreement summarized above under "Trade."

Service: Custom and Repair

HORSESHOERS AND WHEELWRIGHTS, VICTORIAVILLE AND DISTRICT.—An Order in Council, approved November 18 and published in the *Quebec Official Gazette,* November 27, makes obligatory the terms of an agreement between Le Syndicat National des Maîtres Maréchaux-Ferrants de Charrons de Victoriaville (The National Union of Master Horseshoers and Wheelwrights of Victoriaville) and Le Syndicat National des Employés Maréchaux-Ferrants de Charrons de Victoriaville (The National Union of Employed Horseshoers and Wheelwrights of Victoriaville).

Agreement to be in effect from November 27, 1937, to November 26, 1938, and thereafter from year to year, subject to notice.

The territorial jurisdiction includes the counties of Arthabasca, Nicolet, Richmond, Megantic, Wolfe and Drummond.

Hours to be those fixed by municipal regulations.

Wages: qualified workman (one having at least three years apprenticeship) $12 per week, $2.25 per day.

Wages for apprentices: first year $6 per week, second year $9, third year $12.

A scale of prices is included in the agreement, and no blacksmith or wheelwright may charge less than these prices.

The joint committee may decide that a handicapped worker may be paid according to the rates of a lower class.

Service: Personal and Business

BARBERS AND HAIRDRESSERS, QUEBEC.—A correction to the Order in Council for these trades (LABOUR GAZETTE, October, page 1158) was published in the *Quebec Official Gazette,* November 13. Zone I includes the city of Quebec and six neighbouring municipalities. A municipal by-law has priority over this agreement only if such by-law provides for shorter working hours. In zone I, closing time on Saturday is 11 p.m The weekly half holiday is for a morning.

Competency Card

An Order in Council as noted in the *Quebec Official Gazette,* November 20, makes the competency card obligatory in the following trades:

Barbers and Hairdressers, Sherbrooke.

INDUSTRIAL STANDARDS ACT OF ONTARIO

Schedules of Wages and Hours Recently Approved by Orders in Council

THE Industrial Standards Act of Ontario, the text of which was printed in the LABOUR GAZETTE, June, 1935, page 534, with amendments in the issue of May, 1936, page 410, and May, 1937, page 505, provides that the Minister of Labour for Ontario may, upon petition of representatives of employees or employers in any industry, convene a conference or series of conferences of employees and employers in the industry, in any zone or zones to investigate the conditions of labour and practices in such industry and to negotiate standard rates of wages and hours of labour. The employees and employers in attendance may formulate and agree upon a schedule of wages and hours of labour for all or any class of employees in such industry or district. If, in the opinion of the Minister a schedule of wages and hours for any industry is agreed upon in writing by a proper and sufficient representation of employees and of employers, he may approve of it, and upon his recommendation, the Lieutenant-Governor in Council, may declare such schedule to be in force "during pleasure" or for a period not exceeding twelve months stipulated in the schedule and thereupon such schedule shall be binding upon every employee and employer in such industry in the whole or any part of the province designated by the Minister, such schedule not coming into effect until ten days after publication of the Order in Council in *The Ontario Gazette.* The Minimum Wage Board has authority to enforce the provisions of the Act and of the regulations and schedules. Beginning with the July, 1935, issue of the LABOUR GAZETTE, summaries are given in this article of the schedules which have thus been approved.

Logging

LOGGERS, MASSEY ZONE.—An Order in Council dated September 10 and published in *The Ontario Gazette,* September 11 makes binding the terms of a schedule of wages and hours in the logging industry in that part of the Sudbury Forest District called the Massey Zone, to be effective from September 11, 1937, during the pleasure of the Lieutenant-Governor in Council.

Wages: employees working by the month or the day are to receive in addition to their wages suitable board and lodging for every day, including Sundays and holidays; employees working on a piecework basis may be charged 75 cents per day for board and lodging.

Minimum monthly wage rates: cookees and kitchen staff $40 per month; general bushman $42.50 for a maximum of 26 days' work per month; loaders $45 for a maximum of 26 days' work per month; teamsters driving less than four horses $50 for a maximum of 26 days' work per month; teamsters driving four or more horses $55 for a maximum of 26 days' work per month (if a teamster supplies his own horses, additional compensation allowed). Minimum daily wage rates: river drivers $2.60; employees engaged in watering wood $2.60.

For pulpwood cutters employed on a piecework basis, a scale of piece rates is fixed, and it is provided that in poor or scattered timber, the employer will give special rate consideration to the pieceworker.

The board appointed under the Act may set a lower wage rate for handicapped workers.

LOGGERS, TIMMINS FORESTRY DIVISION.—An Order in Council, dated November 27 and published in *The Ontario Gazette,* December 4, makes binding the terms of a schedule governing the logging industry in the Timmins zone. (A previous Order in Council was published in the November 27 issue but is corrected by this one.)

The Order in Council is to be in effect from December 4, 1937, to April 15, 1938.

The terms of this schedule are the same as summarized above for the Massey zone with these exceptions:

No provision is made for extra pay for teamsters supplying their own horses.

There are certain differences in the piecework scale and 85 cents per day may be charged pieceworkers for their board and lodging.

Construction: Buildings and Structures

CARPENTERS, OTTAWA.—An Order in Council, dated November 23 and published in *The Ontario Gazette,* November 27, makes binding the terms of a schedule governing the carpentry industry in the city of Ottawa and adjacent suburban area.

The Order in Council is in effect from December 7, 1937, during the pleasure of the Lieutenant-Governor in Council.

Hours: 8 per day, 4 on Saturdays, a 44-hour week. In case of night shifts, eight hours' pay for seven hours' work.

Overtime: time and one-half for first four hours; thereafter double time. Work on Saturdays after noon required to permit the pouring of concrete may be done at straight time rates. No work on Sundays or five specified holidays except in cases of necessity and then only after obtaining a permit from the advisory committee. Such Sunday and holiday work must be paid at double time.

Minimum wages: 80 cents per hour until May 1, 1938, and 85 cents from May 1, 1938.

The Advisory Committee may fix a special minimum rate of wages for a handicapped worker.

The schedule does not include employees of manufacturing plants while engaged in manufacturing processes or employees of manufacturing plants or industrial establishments regularly engaged in repair, service and upkeep of plant, including new installations or alterations of a minor nature.

CARPENTERS, TIMMINS.—An Order in Council, dated November 23, and published in *The Ontario Gazette*, November 27, makes binding the terms of a schedule in the carpentry industry in the town of Timmins and adjacent townships.

The Order in Council is to be in effect from December 7, 1937, to May 1, 1938.

The terms of the schedule are similar to those summarized above for carpenters at Ottawa with these exceptions:

Hours: 10 per day, 5 on Saturdays, a 55 hour week.

Overtime: two hours overtime at the rate of time and one half; thereafter double time.

Minimum wage rate: 67 cents per hour.

Service: Personal and Business

BARBERS, OTTAWA.—An Order in Council, dated November 23 and published in *The Ontario Gazette*, November 27, makes binding the terms of a schedule governing the barbering industry in the city of Ottawa and surrounding suburban area.

The Order in Council is to be in effect from December 7, 1937, "during pleasure".

Hours are those during which barber shops are permitted to be open, by municipal by-law. No work on Wednesday afternoons, Sundays nor on seven specified holidays.

Minimum wages: those employed full time on a straight salary $25 per week; those employed full time on a percentage basis, $18 per week plus 60 per cent of proceeds over $28; those employed four hours or less from Mondays to Fridays inclusive and all day or less on Saturday, $10 per week plus 60 per cent of proceeds in excess of $15; those employed on Saturday or the day before a holiday and on the previous evening only $7.50 per week plus 60 per cent of the proceeds in excess of $10; persons employed for Saturday or the day before a holiday only, $5 per day or part thereof plus 60 per cent of the proceeds in excess of $7.50; persons working on days other than Saturday or the day before a holiday, $2.50 per day or part thereof plus 60 per cent of proceeds in excess of $4.

No deduction may be made from wages for materials supplied, laundry, etc.

A scale of minimum charges for each operation in the industry is fixed and no employer or employee may contract for or accept any lower prices.

BARBERS, PETERBOROUGH.—An Order in Council dated November 23 and published in *The Ontario Gazette*, November 27, makes binding the terms of a schedule governing the barbering industry in the city of Peterborough and within one mile of it.

The Order in Council to be in effect from December 7, 1937, "during pleasure".

Hours: from 8 a.m. to 7 p.m., on all days except Saturday or the day before a holiday, when hours will be from 8 a.m. to 10 p.m. No work on Wednesday afternoon, Sunday or on eight specified holidays.

Minimum wages: those employed full time on a straight salary basis, $25 per week; those employed full time on a percentage basis, $15 per week plus 50 per cent of proceeds in excess of $22, plus an additional 10 per cent of proceeds over $30; those employed four hours or less from Mondays to Fridays inclusive and all day or less on Saturday, $10 per week plus 50 per cent of proceeds in excess of $15; those employed on Saturdays or the day before a holiday and on the previous evening only, $7 per week plus 50 per cent of proceeds in excess of $10; those employed Saturday or the day before a holiday, $5 per day or part thereof, plus 50 per cent of the proceeds in excess of $7; those employed on days other than Saturdays or the day before a holiday, $2.50 per day or part thereof, plus 50 per cent of the proceeds over $4.

No deduction may be made from minimum wages for materials supplied, laundry service, etc.

A minimum scale of prices for each operation is fixed and no employer or employee may contract for or accept any lower prices.

BARBERS, WELLAND.—An Order in Council, dated November 27, and published in *The Ontario Gazette*, December 4, makes binding the terms of a schedule governing the barbering industry in the city of Welland and within two miles and one-half of its boundaries. (This schedule corrects and replaces the one published in the previous week in the issue of November 20.)

The schedule is to be in effect from December 14, 1937, "during pleasure".

This schedule is similar to the one summarized above for barbers at Ottawa, except for the wage scale:

Minimum wages: persons working full time on a straight salary basis, $25 per week; persons working full time on a commission basis, $15 per week plus 50 per cent of proceeds in excess of $22 plus an additional 10 per cent of proceeds over $30; persons working four hours or less from Monday to Friday inclusive and all day or less on Saturday, $7.50 per week, plus 60 per cent of proceeds over $12.50; persons working on Saturdays or the day before a holiday and on the previous evening only, $5 per week, plus 60 per cent of the proceeds in excess of $7.50; persons employed only for Saturday or the day before a holiday, $4 per day or part thereof, plus 60 per cent of the proceeds in excess of $5 from the work of the employee; persons working on days other than Saturday or the day before a holiday, $3 per day or part thereof, plus 60 per cent of the proceeds in excess of $5 from the work of the employee.

No deduction to be made from wages for materials supplied, laundry service, etc.

A minimum scale of prices for each operation is included in the schedule and no employer or employee may contract for or accept any lower prices.

BARBERS, BRACEBRIDGE, GRAVENHURST AND HUNTSVILLE.—An Order in Council, dated November 23 and published in *The Ontario Gazette*, November 27, makes binding the

terms of a schedule governing the barbering industry in the towns of Bracebridge, Gravenhurst and Huntsville.

The Order in Council is to be in effect from December 7, 1937, "during pleasure".

The terms of the schedule are similar to those summarized above for barbers at Ottawa, with the exception of the wage scale:

Minimum wage rates: persons employed full time on a straight salary basis, $18 per week; persons employed full time on a percentage basis, $15 per week plus 60 per cent of proceeds in excess of $22 from the work of the employee; persons employed four hours per day or less from Monday to Friday inclusive, and all day or less on Saturday, $7.50 per week, plus 60 per cent of proceeds over $12.50; persons employed on Saturday or the day before a holiday and on the previous evening only, $5 per week plus 60 per cent of proceeds in excess of $7.50; persons employed only for Saturday or the day before a holiday, $4 per day or part thereof plus 60 per cent of the proceeds over $6; persons working on days other than Saturdays or the day before a holiday, $2.50 per day or part thereof, plus 60 per cent of the proceeds in excess of $4.

INDUSTRIAL STANDARDS ACT OF ALBERTA

Schedule of Wages and Hours Recently Approved by Order in Council

THE Industrial Standards Act of Alberta, 1935, is similar to the Industrial Standards Act of Ontario, the text of which was printed in the LABOUR GAZETTE, June, 1935, page 534, with amendments in the issues of June, 1936, page 501 and June, 1937, page 640, where are also noted the minor differences between the Ontario and Alberta Acts. The Act provides that the Minister of Trade and Industry for Alberta may, upon petition of representatives of employees or employers in any industry, convene a conference or series of conferences of employees and employers in any industry in any zone or zones, to investigate the conditions of labour and practices in such industry and to negotiate standard rates of wages and hours of labour. The employees and employers in attendance may formulate and agree upon a schedule of wages and hours of labour for all or any class of employees in such industry and district. If, in the opinion of the Minister, a schedule of wages and hours for any industry is agreed upon in writing by a proper and sufficient representation of employees and of employers, he may approve of it, and upon his recommendation the Lieutenant Governor in Council may declare such schedule to be in force for a period not exceeding twelve months, and thereupon such schedule shall be binding upon every employee and employer in such industry in such zone or zones to which the schedule applies, the schedule not coming into effect until ten days after the publication of the Order in Council in *The Alberta Gazette*. The Minimum Wage Board has authority to enforce the provisions of the Act and of the regulations and schedules. Previous schedules under this Act have been summarized in the LABOUR GAZETTE, September, 1935, April, July, September, November, and December, 1936, May, June, July and August, 1937.

Manufacturing: Vegetable Foods

BAKERS, CALGARY AND DISTRICT.—An Order in Council dated November 22 and published in *The Alberta Gazette*, November 30, makes binding the terms of a schedule governing the baking industry in a zone which includes the city of Calgary and surrounding district.

The Order in Council to be in effect from December 10, 1937, to December 9, 1938.

The terms of the schedule are similar to the one previously in effect and summarized in the LABOUR GAZETTE, December, 1936, page 1184, with these exceptions:

Minimum wage rates for shippers, packers, wrappers, salesmen and deliverymen are omitted.

Small shops are defined as those in which three or less journeymen are employed.

Minimum wage rates for doughman, ovenman and bench hand are raised to $23 per week (an increase of $1.50 per week), for helpers to $17 (an increase of $2). Wage rates for apprentices are unchanged.

Construction: Buildings and Structures

TILE, MARBLE AND TERRAZZO LAYERS, EDMONTON.—An Order in Council dated October 18 and published in *The Alberta Gazette*, October 30, makes binding the terms of a schedule of wages and hours governing the tile, marble terrazzo and cold mastic construction industry in a zone which includes the city of Edmonton and the northern part of the Province of Alberta.

The Order in Council to be in effect from August 10, 1937, to July 31, 1938.

Except for the addition of the "cold mastic" industry and for the inclusion of cold mastic workers at a wage rate of $1 per hour, this schedule is the same as the one previously in effect and summarized in the LABOUR GAZETTE, September, 1936, page 840.

The regular hours are 44 per week. Wages are $1 per hour for marble masons, tile layers, terrazzo, mosaic workers and cold mastic workers; 60 cents for helpers and floor machine workers, 70 cents for wall machine workers and 50 cents for labourers.

PRICES, RETAIL AND WHOLESALE, IN CANADA, NOVEMBER, 1937

Cost of Living Prices of Staple Articles and Index Numbers

IN retail prices the cost per week of a family budget of staple foods, fuel and lighting and rent, was again slightly higher due mainly to the somewhat increased cost of foods while the Dominion Bureau of Statistics index number of wholesale prices continued the gradual decline due mainly to lower prices for non-ferrous metals, grains, livestock, hides and raw textiles.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of retail prices in sixty-nine cities was $8.79 at the beginning of November as compared with $8.75 for October; $8.32 for November, 1936; $6.67 for March, 1933 (the low point in recent years); and $11.75 for November, 1929. Changes during the month under review were slight except for a substantial seasonal advance in the price of eggs. Other changes were increases in the cost of milk, butter, bread, and tea and decreases in meats, rolled oats, beans and potatoes. Including the cost of fuel and rent with that of foods the total budget cost $17.58 at the beginning of November as compared with $17.51 for October. Fuel cost slightly more in November than in October due mainly to higher prices for coal in some cities. The cost of the budget for certain earlier dates was $16.96 for November, 1936; $16.54 for November, 1935; $15.41 for June, 1933 (the low point in recent years); $22.03 for November, 1929; $20.89 for November, 1922; $26.92 for July, 1920 (the post war peak); and $14.36 for November, 1914.

In wholesale prices the Dominion Bureau of Statistics weekly index number was 82·6 for the week ended November 26 as compared with 84·4 for that ended October 29 and 85·2 for the week ended October 1. On a monthly basis the latest figures available are for October when the index was 84·7 as compared with 77·2 for November, 1936; 72·7 for November, 1935; 63·5 for February, 1933 (the low point in recent years); 95·7 for November, 1929; 97·2 for November, 1922; 164·3 for May, 1920 (the post war peak); and 67·2 for November, 1914. During the month under review all of the eight main groups in the classification according to chief component materials were lower with the exception of non-metallic minerals group which was fractionally higher. Low prices for the year were reached by raw rubber, coffee, hides, raw cotton, raw silk, raw wool, copper, tin and vegetable oils. Wheat was about ten cents per bushel lower at the end of November than at the end of October. A factor affecting the price of raw cotton was the estimate of an unusually high yield in the Southern States. Non-ferrous metals generally were substantially lower in price during the month.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of November of seventy-two staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The price of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the LABOUR GAZETTE for February 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles com-

(Continued on page 1400)

COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL AND LIGHTING, AND RENT IN TERMS OF THE AVERAGE PRICES IN SIXTY-NINE CITIES IN CANADA.

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost or the quantities of different foods required for an average family

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended November 26, 1937, monthly figures not yet available.

*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

(Continued from page 1392)

paratively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities, required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the budget serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index

number of rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and cost of the various items from 1913 to 1926 weighted according to the importance of each item in workingmen's family expenditure and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

CHANGES IN THE COST OF LIVING IN CANADA FROM 1913 TO 1937*

* The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent 18¼%; Clothing, 18¼%; Sundries, 20%

Retail Prices

The downward movement in the prices of fresh meats continued in November. In beef sirloin steak averaged 25·7 cents per pound as compared with 26·7 cents in October, 29·3 cents in July, the high point for the year, and 22·7 cents in November, 1936. Rib roast was down in the average from 19·7 cents per pound in October to 19·1 cents in November. Fresh pork roast averaged 22·9 cents per pound in November, 24·4 cents in October, and 21·2 cents in November, 1936. The price of fresh eggs increased considerably during the month in all localities the Dominion average being up from 39·2 cents per dozen in October to 44 cents in November. Prices of this commodity were lower in Saskatchewan and Alberta than in other parts of the Dominion. Milk was fractionally higher at an average price of 11 cents per quart, increases being reported from several cities. Creamery butter was higher in most cities except those in British Columbia which changed little. The Dominion average price was up from 31·5 cents per pound to 32·5. Bread was fractionally higher at 7·3 cents per pound as compared with 6·5 cents in November, 1936. Beans declined in the average from 7 cents in October to 6·2 cents in November. The decline in the price of potatoes continued the Dominion average being 94 cents for ninety pounds in November as compared with $1.01 in October and $1.46 in November, 1936. Tea has advanced gradually in the average since February when it was 52 cents per pound to 58·9 cents in November. Higher prices for United States anthracite coal were reported from several cities and the Dominion average price rose from $14.21 per ton to $14.34.

Following are the prices reported for Welsh coal, "cobbles" and "French nut": Charlottetown $13.40; Moncton $16; Saint John $14; Quebec $13.50; Three Rivers $15 and $14; Sherbrooke $14.75; St. Hyacinthe $14.50; Montreal $14.25 to $14.75; Hull $15.75; Ottawa $15.75; Kingston $14.50; Belleville $15.50; Peterboro $16; Oshawa $14.75; Toronto $14 and $13.50; St. Catharines $15; Hamilton $14.50 and $14; Brantford $16.25; Galt $16; St. Thomas $16; Cobalt $18; Timmins $18.50; Port Arthur $17.25; Fort William $17.25; Winnipeg $20.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

The following notes afford information as to recent changes in prices in Great Britain and certain other countries. Tables giving official and certain other index numbers of cost of living, retail and wholesale prices in Great Britain and certain of the principal commercial and industrial countries appeared in the October issue of the LABOUR GAZETTE.

Great Britain

WHOLESALE PRICES.—The Board of Trade index number, on the base 1930=100, was 110·6 for October as compared with 111·2 for September, a decrease of 0·5 per cent for the month. There has been a slight decline in each month since July, but the aggregate decline during the three months was under one per cent. Compared with that for the same month last year, the October index showed an increase of 13·3 per cent. Food prices rose by 1·5 per cent in October, but prices of industrial materials and manufactures declined by 1·7 per cent. The non-ferrous metals group declined 10·6 per cent, wool 8·0 per cent and cotton 3·7 per cent.

The *Statist* index number, on the base 1867-1877 = 100, was 100·7 at the end of October, a decrease of 2·2 per cent for the month. The "all materials" group declined 3·6 per cent due to declines of 6·2 per cent and 4·2 per cent in "textiles" and "minerals" respectively. The "all foodstuffs" group declined 0·1 per cent, an increase of 2·0 per cent in the "vegetable food" group being offset by decrease in the "animal food" and "sugar, coffee and tea" groups.

COST OF LIVING.—The Ministry of Labour's index number on the base July, 1914=100, was 160 at the first of November as compared with 158 at the first of October. The index for the food group stood at 146 as compared with 143 the previous month, the increase being mainly due to increases in the prices of butter, eggs, milk, cheese and tea, partly offset, however, by decreases in the prices of potatoes and bacon.

France

WHOLESALE PRICES.—The general Statistical Office index number on the base 1914 = 100, was 611 for October as compared with 618 for September, a decrease of 1·1 per cent for the month. Food prices decreased 3·5 per cent while the prices of industrial materials increased 0·8 per cent. The index based on gold currency, 1914 = 100, was 63 for October as compared with 65 for September, a decline of 3·1 per cent for the month.

COST OF LIVING.—The official index number of the expenditure of a workingman's family of four persons at Paris on the base 1914 = 100, was 630 for the third quarter of 1937, an increase of 4·0 per cent over the figure for the previous quarter. The index of food prices rose from 629 to 649 or 3·2 per cent in the same quarter.

Germany

WHOLESALE PRICES.—The index number of the Federal Statistical Office on the base 1913 = 100, was 105·9 for October, a decrease of 0·3 per cent for the month. Non-ferrous metals decreased 11·1 per cent, rubber 4·6 per cent and textiles 3·2 per cent. All other changes were of a minor nature.

COST OF LIVING.—The official index number on the base 1913-1914 = 100, was 124·8 for October as compared with 125·1 for September, showing a decrease of 0·2 per cent. The heat and light group and the clothing group each increased 0·5 per cent, the sundries group increased 0·1 per cent. The food group decreased 0·6 per cent. Rent was unchanged.

Irish Free State

COST OF LIVING.—The cost of living index number published by the Department of Industry and Commerce, on the base July 1914 =100, was 170 at mid-August, 1937, as compared with 167 at mid-May, 1937, and 159 in mid-August of last year. The food group showed an increase of 1·8 per cent during the quarter.

United States

WHOLESALD PRICES.—The Bureau of Labour Statistics' index number on the base 1926= 100, was 87·4 for September, a decrease of 0·1 per cent from the August figure, but still showed an increase of 7·1 per cent above the figure for August, 1936. The textile group declined 2·3 per cent during September while chemicals and drugs declined 1·0 per cent. The index for the food group increased 1·5 per cent. All other changes were less than 1 per cent.

Dun and Bradstreets' index number (in continuation of Bradstreets' index number) which is based on the sum total of prices per pound of 96 articles of common use was $10·8483 at October 1, a decrease of 1 per cent for the month. The miscellaneous group declined 7·3 per cent, metals 5·2 per cent, textiles 4·0 per cent, naval stores 3·7 per cent, building materials 1·5 per cent, hides and leather 1·4 per

cent and fruits 1·0 per cent. Provisions increased 3·2 per cent, livestock 3·0 per cent, and oil 1·2 per cent. The remaining groups were practically unchanged.

Dun's index number, based on the cost per capita of a year's supply of commodities, was $193·674 at October 1, an increase of 0·4 per cent. The greatest change was in the meat group which increased 5·2 per cent, dairy and garden products increased 3·9 per cent. Clothing decreased 3·4 per cent and metals 1·1 per cent.

COST OF LIVING.—The index number of the Bureau of Labour Statistics, on the base 1913 =100 stood at 148·2 on September 15, 1937, as compared with 147·4 on June 15, 1937, and 143·6 on September 15, 1936. With the exception of food which showed a decrease of 0·6 per cent all the groups showed increases. Clothing increased 2·4 per cent, housefurnishings 1·9 per cent, fuel and lighting 1·3 per cent, housing 1·0 per cent and sundries 0·4 per cent.

The index number of the National Industrial Conference Board, on the base 1923= 100, was 89·5 for October, an increase of 0·1 per cent over the index for September which was 89·4. Food prices declined 1·0 per cent but the other groups showed increases as follows: sundries 0·8 per cent, housing 0·7 per cent, fuel and light 0·5 per cent, and clothing 0·3 per cent

RECENT LEGAL DECISIONS AFFECTING LABOUR

Appeal of Winnipeg Fur Workers Dismissed but Injunction Amended

IN The LABOUR GAZETTE, June, 1937, a summary was printed of a judgment of Mr. Justice Adamson of the Manitoba Court of King's Bench in an action brought against certain officers and members of the Winnipeg local of the International Fur Workers' Union. Judgment was given for damages and costs and a perpetual injunction was granted restraining the defendants from "watching and besetting" the premises of A. and M. Hurtig. Winnipeg.

This judgment was appealed and on November 8 the appeal was dismissed with costs by the Manitoba Court of Appeal, the defendants being given $75 to set off against the plaintiff's costs. The terms of the injunction were varied, however, by the Court of the Appeal since it was held that the order as granted by Mr. Justice Adamson restrained from legal acts as well as illegal. It was held, in Mr. Justice Trueman's words, that the evidence fully substantiated—

> the review made of it by Mr. Justice Adamson as well as his finding that the watching and besetting in question was a nuisance, consisting as it did of disorderly scenes, in which large numbers of persons took part, threats, and intimidation of employees, and interference with plaintiffs' business and customers. The fur workers of Winnipeg, who were instrumental in bringing to their aid the defendant Morris Reiss, of New York City, vice-president of the International Fur Workers Union, an affiliate of the American Federation of Labor, may have had legitimate grievances. One is the right of collective bargaining, which, it appears, was denied to them by the Furriers' Guild of Canada, Manitoba Division, of which the plaintiffs are members. See The Strikes and Lockouts Prevention Act, ch. 40 of the Acts of 1937, sec. 45, which recognizes a right which has obtained in Great Britain for many years. . . However it came about, the watching and besetting in the present case was allowed, whether deliberately or otherwise, to get wholly out of hand, with the result that the excesses complained of by the plaintiffs took place.

The injunction granted by Mr. Justice Adamson perpetually restrained the defendants from watching and besetting or causing or procuring to be watched and beset the premises occupied by the plaintiffs and from walking up and down, marching or parading in the vicinity of the building or causing or procuring others to walk up and down, march or parade in the vicinity and from carrying or exhibiting or causing or procuring to be carried or exhibited the signs referred to in the statement of claim.

It was held by the Court that—

> as an injunction in these terms assumes that there cannot be lawful picketing, the defendants at all times hereafter are prohibited from lawfully picketing the plaintiffs' premises in the event of the occasion arising for the lawful exercise of this right. . . an injunction adequate for the plaintiffs' protection from the acts complained of would restrain the defendants, their servants and agents, from intimidating, molesting, and interfering with the plaintiffs' employees and customers, from holding or conducting parades in front of or in the vicinity of the plaintiffs' store, from carrying or displaying placards or posters with intimidating or defamatory words thereon, and from carrying or displaying posters or placards the purpose of which is to injure the plaintiffs' business.

Chief Justice Prendergast and Mr. Justice Dennistoun agreed that the terms of the injunction should be modified. Mr. Justice Robson with whom Mr. Justice Richards concurred would have worded the injunction somewhat differently. The former stated—

> While it may be that in Manitoba combinations of labour for collective bargaining with employers are not unlawful, an employer's right to bargain with his employees as he

chooses, individually or collectively, has not been taken away: The Strikes and Lockouts Prevention Act, 1937, ch. 40, sec. 45. Therefore I think that it may be defamatory to say that an employer who exercises that right is in doing so unfair to his employees. In this case it is clear that defendants greatly exceeded their rights. I think the injunction should be as follows: That the defendants be restrained from publishing in any manner defamatory statements of or concerning the plaintiffs or their business or their employees; from causing a nuisance adjacent to plantiffs' premises, and, in particular, from conduct likely to attract groups of persons adjacent to plantiffs' premises or likely to deter any persons with peaceful objects from approaching, viewing or entering plaintiffs' premises; also from molesting, threatening or seeking to intimidate plaintiffs' employees or persons seeking, or who might be offered employment by the plaintiffs; from watching and besetting plaintiffs' premises with a view to compelling plaintiffs to do anything they are not compelled to do or to refrain from doing anything they are at liberty to do, but, subject to the foregoing, saving the right to attend in number reasonable for the purpose, to give or secure information.

Hurtig v. Reiss et al, (1937) 3 Western Weekly Reports 549.

Right of Employee to Payment of Minimum Wages Upheld in Manitoba

An information charging an employer in Winnipeg with failing to pay a male employee wages as required by the regulations under the Manitoba Minimum Wage Act was dismissed by the magistrate. The informant requested the magistrate to state the case for decision by a higher court.

On November 8, the Manitoba Court of Appeal directed that the case should be remitted to the magistrate and that an order should be made in favour of the informant for the balance due him in wages under the minimum wage regulations. The Minimum Wage Order requires that in such cases the minimum rate shall be $12 for a week of 48 hours or 25 cents an hour. At this scale the workman claimed $80.25 of which he was paid $14.50 and $18 on account. The magistrate was of the opinion that there was no evidence to show that the contract of hiring was for less than the minimum wage and that the "mere non-payment of the proper wage under the Act is not what the Act aims at remedying." He considered that the Act was not one for the recovery of wages, although recovering under the Act is incidental to a breach of the Act or regulations. He held that if the Order of the Board was to be interpreted as an Order for the payment of wages rather than an Order for prescribing a rate that the Order was *ultra vires* of the Board.

It was pointed out, however, by the Court of Appeal that section 14 of the Minimum Wage Act states expressly that if any employer pays an employee a wage less than the minimum wage and the former is found guilty of a violation of the Act or any regulation he shall be ordered by the magistrate to pay the full amount of the minimum wage less any amount actually paid by the employer and any agreement made by an employee to work for less is no defence under the Act. Moreover, the Act stipulates that in any prosecution the onus is on the accused to show that he has complied with the provisions of the Act and the regulations. The Court was therefore of the opinion that in the absence of such proof it must be accepted "that the payments made by the employer, and with which he stopped paying, were his idea of what was due."
